ITSA By-Law Changes To Improve Committees

A series of by-law revisions proposed at Spring Conference were enacted upon at Wednesday's meeting of the ITSA, by the Board of Control.

The general purpose of the revisions is both a careful definition of the roles played by the various sub-committees of ITSA and a closer integration of the functions of the groups.

Coordination of responsibility for social functions was the primary area of concern. The ITSA Social Committee has been relocated to include social chairman of all classes. Union Board, IFC, IDC, and the commuter, as well as the ITSA social officers.

The ITSA Student Council will be responsible for social events which involve only ITSA students, such as Homecoming and I-Ball. Inter-class functions such as these until Spring Session will be the responsibility of the Union Board Social Area.

To further facilitate coordination, the ITSA Social Chairman has been made a permanent member of the Union Board Executive Council. The ITSA Board also moved to improve the functioning of its elected representatives. These representatives will now be required to meet with their constituent organizations and departments and report on their meetings regularly to the Board of Control.

Space for a limited number of girls will be made available in the Women's Dungeon, March 10, the evening of the Integral Ball. Those arrangements are made to facilitate housing for I-Ball dates coming out of Chicago Area.

For information on space, contact Jan Wesnus, ITWA President, Rose Kirkpatrick, ITSA Social Chairman, or Mrs. Atchison, Women's Resident Advisor.

Ramsey Lewis Trio To Perform At UB Concert Tomorrow Night

The Ramsey Lewis Trio, consisting of Ramsey Lewis on keyboards, Lou Donaldson on guitar, and Elgie 'Little Louie' Stone on drum Set, will perform tonight in the University Union at 8:30 p.m.

The trio is comprised of three of the leading jazz musicians in the country. Lewis is a protégé of Lionel Hampton and has been a member of Count Basie's band for many years. Donaldson is a veteran of the jazz scene and has worked with such greats as Duke Ellington and Count Basie. Stone is a seasoned drummer with a strong rhythmic feel.

The Ramsey Lewis Trio has appeared on several major television shows, including "The Tonight Show" and "The Merv Griffin Show," and has recorded for several major labels. The Trio is known for their smooth, melodic sound and their ability to blend different musical styles.

The concert is free and open to the public. Seating is limited, so it is recommended that attendees arrive early to secure a seat.
PUBLIC SERVANTS’ STRIKES SEEN
A DRASTIC SOLUTION TO PROBLEM

The moral considerations involved in the idea of strikes by "public service" elements of our society, is indeed serious and complicated issue.

Most recently, public servants, both national and local level have been going on strike to demand better treatment of teachers and nurses in the Chicago area. However, the realm of public servants, such as police officers, firefighters, public health workers, and professional men such as doctors, must be considered as well.

A mass strike for wage or salary increase by any of these groups would cause serious repercussions. We are certain that the constituents of these groups are very well aware of this outcome of a strike. Before striking, they would obviously consider both the loss of income and the probability of the loss of income, which would impose on the community they serve.

If all of these services groups were to strike, being fully aware of the possible repercussions, then we believe they would be deeply motivated.

However, considering the fact that by striking, service workers may endanger the general public, we cannot support the use of strikes or other pressure tactics, such as mass absenteeism, by public servants.

Great Robbery, Sign Pilfered

This week we would like to compliment the ingenuity of an unidentified member of the Techhawks, whose identities are anonymous to us. Instead of acting alone, the thief of the sign bearing the name of Technology News, formerly resting on the entrance to our offices, will in the future be in the annals of crime history.

The perpetrators of this dastardly crime, however, are due a good deal of credit. Although the members of the staff do not occupy the TN offices much, the theft of the sign bearing the name of Technology News, formerly resting on the entrance to our offices, will indeed have presented a problem to our invaders.

Certainly, too, the four massive wood signs holding the sign to the exposed wall must have made the task even more arduous. It is our guess, and one that is well-considered, that the typeface used on the sign was not made to the usual standards of the industry. However, if the student body might not have among its members any typesetters, the sign is not recovered, unfortunately.

Technology News may be forced to resort to drastic action and have a sign made. If not, we will all have to believe it or not, without markings above the entrance to our offices.

LETTER POLICY

Letters to the editor on articles previously appearing in TECHNOLOGY NEWS are welcomed. Such letters must be typed double spaced on one side of the page in good taste. Anonymous letters will not be printed, but the writer’s name will be withheld upon request.

Letters should be limited to 200 words. All letters will be printed, space permitting, but TECHNOLOGY NEWS reserves the right to edit any letter. All letters become the property of the newspaper and none will be returned.

TECHNOLOGY NEWS

Published every Friday during the school year by the students of Illinois Institute of Technology. 1900 South Federal St., Chicago, Illinois 60616. Second class mail authorization number 233, Illinois Institute of Technology, Chicago, Illinois 60616. Published on October 14, 1967. The $1.00 per year, in advance, to all the full-time students, faculty members, and staff members of the Institute. Letters to the editor should be submitted to the Managing Editor, TECHNOLOGY NEWS.

Page 2
**Deadline Set for Aid; Forms Available Now**

The dean of students office, on behalf of the JTC Committee on Scholarship Awards and Student Aid, has announced that the deadline for applications is May 1, 1967.

All applications for scholarships must be completed and turned into the dean of students office by that date. Students on National Defense Student Loans or on the College Work-Study Program should attempt to meet this deadline. Applications for these programs, however, will continue to be accepted after May 1.

Forms that must be filled out include the College Scholarship Service's Parents' Confidential Statement and the regular four page JTC application. These forms are presently available at the dean of students office.

Due to the length of processing time, all Parents' Confidential Statements should be filled out and sent to the College Scholarship Service before April 15, 1967.

Students who must meet this deadline are those who are on the following scholarships:

- ALC Foundation
- Alexander Memorial
- Anderson Scholarship
- Barber & Rogers Foundation
- Watson Memorial

**Mod-Dances, School Spirit Draw Comments**

Dear EIC:

As a graduate student in psychology I feel somewhat obligated to reply to Dr. Levine's statements about the twist quoted in the Feb. 14 issue of Technology News. Though he is a political scientist, Dr. Levine makes comments which are psychological or sociological in nature and which suggest in their unqualified seriousness that they are sophisticated psychological or sociological in information.

In this student's mind, comments such as Dr. Levine's are best offered only as personal, subjective opinion. Anyone at all sophisticated in the fields of psychology or sociology who made such comments would be careful at least to qualify them by indicating that they are only general speculation, or, technically, hypotheses or theory.

But one need not be trained in either psychology or sociology to sense the inappropriateness of some of Dr. Levine's comments. For example, he is quoted as saying that persons dancing the twist (or similar dances) are "an aggor- mation of human beings who have lost all relationship to each other." Only one exception to the rule would make his statement false. If one doesn't lose all relationship with the girls I twist with. In fact, opinions, I find it a very stimulating medium of communication (which is not entirely sexual, to Dr. Levine's certain dis- appointment).

In conclusion, I would like to suggest that one should refrain from using scholarly credentials in one field to dub people profession- ially in another. In my personal opinion, twisting can be fun and dancing it needn't make you "... a symptom of the social pathology. . . ."

Bill McConahay

As one of those who attended basketball games faithfully this past season, I can only commend the members of the team for representing Tech on the court. It seems that most Tech students don't take our teams seriously. The attendance at the home basketball games leaves much to be desired. I was surprised to see that the visiting fans often outnumbered the Tech students at our home games.

This certainly is no incentive to our team, which must play no matter how many fans show up. What right do the rest of us students have to expect the team to win when we don't support them?

But this season is over. Next season our team will be playing in the new gymnasium. Those students who have been complaining that they don't like to go to DeLaSalle will have no excuse for not coming to games. Let's see if we can't show our team a little more appreciation for their efforts.

Ken Bouchard
Fraternities Start to Get Social Calendars Rolling in Full Swing

by Glenn Davison

With the fourth week of classes now ended, the activities are increasing on the quad. Most of the fraternities are making plans for the IFC Pageant scheduled for April 8. Basketball action was postponed because of repair to the court in De LaSalle High School.

Tao Epsilon Pi had a dance a week ago last Saturday night in the room with Dean Holmes as host. A party is scheduled for March 18, and work is underway to plan a car rally and a spring picnic.

Five new initiates were added to the roster of Theta Xi. The banquet was held at the Sahara Room with Dean Holmes as host. A house party is scheduled for March 18, and work is underway to plan a car rally and a spring picnic.

A basketball game between the alumni and actives of Alpha Epsilon Pi on March 17, is the big event on their calendar. Eight pledges were initiated a week ago last Sunday with the banquet at the Cosmo Inn.

Triang is having a house party tonight and will participate in the tri-house party March 17. Six new members were initiated.

Next weekend, Alpha Sigma Phi will participate in basketball action at the University of Illinois. Nine pledges were initiated and Ron Bakstlar advocated North Madison.

Looking for dragons?

IBM’s dragons are the challenges confronting modern technology. You know them by name: population explosion, space, education, hunger, disease—list is endless.

Interested? Then whatever your area of study or previous commitments after graduation, talk to IBM. We need men and women who want to make the most of their imagination and problem-solving skills. Who want to learn and grow in today’s fastest-growing industry: information handling and control.

Doesn’t it make sense that you could fight the most challenging dragons at IBM?

Careers at IBM are in six major areas: Programming, Finance and Administration, Research and Development, Manufacturing, Computer Applications and Marketing.

Whatever your immediate commitments, whatever your area of study, sign up now for an on-campus interview with IBM, March 15.

If for some reason you can’t be there, drop us a line. Write to: Manager of College Recruiting, IBM Corporation, 1144 Wilshire Boulevard, Los Angeles, California. IBM is an Equal Opportunity Employer.

Pat Nevin is the president of Delta Tau Delta as of February 1, with Stan Matherwa assuming as vice-president. Bob Bailey is treasurer, Lee Carney is correspondent, and Ed Cook is recording secretary. A candlelight dinner is planned before the Ramsey Lewis Trio Concert and house gathering will be in the house afterward.

House elections were held at Sigma Phi Epsilon and Dick Peyton was elected president, Bob Bailey is vice-president, John Ziegler is controller, Stan Gorrski is secretary, and Bob Conway is recorder.

Pi Kappa Phi will initiate ten pledges Sunday and hold a party afterward. Two new pledges were received—Chris Polk and Joe Haas. An off-campus party at a brother’s house will be held this weekend.

Phi Kappa Sigma will initiate nine pledges Friday night with a banquet following at the Wagon Restaurant. Bob Cermele was elected Corresponding Secretary and Mike Belville was elected Social Chairman. A good number of the brothers will be attending the Intergal Ball, March 10.

Kappa Phi Delta announces five new initiates: Mary Bader, Shirley Finley, Julie Miller, Laura Mielke, and Beth Siegel. Jan Wessel was elected president and Connie Brock to first vice-president. Lynn Watson is second vice-president, Renee Teda is secretary, and Janet Waddell treasurer. Planned is the Tov Harvest Dance on April 14.

Short course in lifelong economics for college seniors!

Group Flight Announced

A special "group flight to Europe" is being planned by the department of architecture. A minimum of 25 people are required to make the flight possible. No maximum limit has yet been set, therefore accommodations can be made for those desiring to participate.

This special flight is a group flight and does not consist of any tours. The sole purpose is to reduce transportation costs. For further information for this special flight, a savings of one-third is possible. The reduced fare is $410.

Crime Control Using Technology Symposium Topic

A three-day professional forum, the first National Symposium on Law Enforcement Science and Technology, will be conducted on campus March 7-9. The event is co-sponsored by the ITT Research Institute and the Justice Department.

Hosting the conference will be ITT's newly formed Law Enforcement Science and Technology Center, directed by S. A. Yefsky, an ITT research scientist and a member of the Chicago Crime Commission.

Attending the meetings will be experts from federal, state, and municipal agencies, academic institutions, and research laboratories throughout the nation.

Material presented will include new and improved means of crime control and criminal justice administration, using such advanced technology as computer programming, radar, and new electronic sensors.

Scheduled for the opening session is a report by the President's Commission on Law Enforcement and Administration of Criminal Justice (National Crime Commission), just completed by the Institute for Defense Analysis. Yefsky said the report contains the broadest assessment to date of potential applications of modern technology to criminal justice.

In stressing the need for such a symposium, Yefsky said: "Law enforcement can be considered a multi-billion dollar service industry which has not fully benefited from our expanding technology, created in large part by military and space programs. This symposium will provide impetus for the scientific and engineering communities to direct their attention toward the many technical problems of law enforcement."

Funds for the symposium were granted by the Office of Law Enforcement Assistance of the Department of Justice under the Law Enforcement Assistance Act of 1965, established to provide federal assistance for improving state and local law enforcement capabilities and techniques.

Yefsky also adds "This meeting will be the first professional level scientific symposium on criminal justice and will be held on an annual basis. Research can and must expand by orders of magnitude in criminal justice if we are to assist in containing and reducing crime."

CAREER NEWS FROM HUGHES
Aerospace Divisions in Southern California

NEW AND CONTINUING PROGRAMS AND PROJECTS

PHOENIX Missile & Fire Control System
SURVEYOR Lunar Landing Spacecraft
Synchronous Communications Satellites
TOW Anti-Tank Missile System
ATS (Applications Technology Satellites)
AIM-4F/AIM-4E Missiles
VATE, Automatic Checkout Equipment
CORDS

These examples of Hughes Aerospace activities are representative of more than 230 major product and service capabilities ranging from aerospace vehicles to ASW systems. Diversification such as this promises long-range stability both for the company and its employees.

NEW MISSILE SYSTEMS DIVISION

More than 1,600 engineers, scientists, and technicians are now at work on expanding R&D programs at Hughes new 82-acre Canoga Park complex in the San Fernando Valley. Unsolved facilities and the professional atmosphere at Hughes engender creativity and achievement.

HIRES OF ENGINEERING GRADUATES

Of the over 12,000 employees of the Aerospace Divisions, over 5,000 are Members of the Technical Staff. Average experience is 11.7 years. Average age is 31.9 years.

HUGHES-CULVER CITY/CANOGA PARK

Hughes Aerospace Divisions at Culver City, and Canoga Park offer Engineers and Scientists a unique combination of urban and suburban advantages. Located adjacent to major freeways, Los Angeles Civic Center is about a half-hour distance—beaches, and a short drive. Attractive residential neighborhoods are nearby UCLA, USC, and Cal Tech offer outstanding educational facilities.

IMPORTANT OPPORTUNITIES, steady growth, diversification, long-range stability, professional atmosphere, advanced facilities, fine living conditions—these are the advantages which Hughes Aerospace Divisions can offer you at Culver City and Canoga Park.

For additional information and to arrange an appointment with our Technical Staff Representatives, please contact your College Placement Office or write: Mr. Robert A. Martin, Head of Employment, 11940 W. Jefferson Blvd., Culver City, California 90230.

CAMPUS INTERVIEWS

HUGHES AEROSPACE DIVISIONS

An equal opportunity employer / U.S. citizenship required.
Annual Dining-In Held by NROTC, Guest Speaker Admiral Burrows

On Saturday, Feb. 18, the NROTC unit held its first annual Dining-In at the Fifth Army Headquarters Officers’ Club. Guests for the evening were Rear Admiral A. C. Burrows USN (retired); Lieutenant Colonel Leonard Stone, Professor of Air Science and Commanding Officer of the APOTC unit at IIT; Dr. Phil Shurrage, chairman of the department of psychology and education; Reverend C. J. Christen of the Lutheran Student Foundation; and Second Lieutenant Donald Emond, U.S. M.C., a June, 1966 graduate from Illinois Tech.

After dinner Admiral Burrows, the guest speaker for the evening, told the gathering of some of his experiences in the Navy, humorously recounting his ambitions to go into lighter-than-air craft, eventually spending an enjoyable and worthwhile career in heavier-than-water craft (submarines). He distinguished speaker ended his after dinner talk with a discussion of the United States’ commitment in Vietnam.

To end the evening, some of the junior midshipmen staged a series of skits centering the life of a “Middle at Tech.”

Chicago Happenings
Many Cultural Presentations Available in Chicago Area

The Hull House “Underground Theater,” located in the basement of a high-rise building in the Harold Lloyd Homes, 220 South State street, will open its 1967 season on Friday evening, March 10, with a triple bill of one-act plays written and directed by Gerald Wallace. The plays, “Kiss of the Rose,” “Libertville,” and “New Numbnut” will run for five weekends, Friday through Sunday evenings. Curtain is at 8:30 pm.

Renaissance II will provide the dramatic action for the ten weekend run. Friday through Sunday evening until May 14, 1967.

A twin bill of one-act plays, “Adulthood” and “The Life of a Skinflint,” will be presented at the Theater on the Square, 1125 West Roosevelt Road, on Friday evenings beginning March 3. The productions are part of a series of one-act plays written by members of the University of Illinois Drama Department for the purpose of introducing new writers to the public. The series is sponsored by the University of Illinois Drama Department and the Illinois Arts Council.

When Rainbows Exist

The production of “Much Ado About Nothing,” starring Carrie Nye and James Ray with Vincent Park, is now entering the second week of its three-week run and a half-week engagement.

An exhibit of seventy-five prints and drawings by James E. Arnold and twenty-seven prints by Edward Munch is being shown in the Department of Prints and Drawings, in the Art Institute of Chicago from February 19 through May 14, 1967.

A twin bill of one-act plays will be presented at the Hull House Theater in the Community House, 500 East 57th Street, on Friday evenings beginning March 3. William Hackett’s “Requiem for Brother XII” and Norman Mark’s “The Integrators” will provide the dramatic action for a ten-weekend run. Friday through Sunday evening until May 14, 1967.

Some young engineers will go through almost anything for a future with “P.S.E.&G.”

Whether you’re a swashbuckler or not, our personalized training program offers you the opportunity to contribute to tomorrow’s challenging world. Find out if you can qualify for a stimulating and rewarding career with Public Service. See our representative when he visits your campus.

Whittemore and Lowe Performance Example of "Outstanding Virtuosity"

by Bill Partridge

Last Saturday night the students of HUB almost filled half of the music hall to listen to the piano duo of Whittemore and Lowe. This mere lack of attendance was enough to merit a loud outcry from some sources, especially this one.

The concert was an outstanding example of the virtuosity of the duo, with musical compositions going from the deep and pensive "Variations on a Theme of J. S. Bach, Op. 81" by Max Reger, to the light and entertaining "Mother Goose Suite" by Maurice Ravel.

Mr. Whittemore's running monologue more than compensated for any lack of formal attire and seemed to keep the program running quite smoothly.

Many of the works which the duo performed are seldom heard in concert. Perhaps this is one of the things which added so much to the performance; it didn't consist of the usual overplayed and overperformed standards. The duo proved how much experience means in such technically difficult works as Reger's "Variations."

I felt, however, that there was a small disappointment in their program. Directly after the intermission, the duo performed a work by Francis Poulenc. I felt that they should have included in their "Music of Today" category, a work by one of their more "fit-out" contemporaries. Thus, I feel, would have been better than sticking to purely neo-classical works.

The duo ended the evening with works of Bach, Kreisler, and Ravel. Ravel's "Bolero," which ended the entertainment, seemed to completely captivate the audience. The "Bolero" was familiar to everyone attending the concert, and the duo's excellent interpretation seemed to add to the mystical, rhytmic quality of the work.

"World Without Sun," by Jacques-Yves Cousteau

The world beneath the sea and the seven oceans who lived and worked there for a month have been recorded in an Academy Award-winning documentary which is also thrilling entertainment. Photographed in color, the film's underwater scenes are breathtakingly beautiful, capturing a world of vibrant life and shadows, full of color, excitement, and drama.

Added Feature—Pink Flute Cartoon

Sunday, March 5, 8 pm

"Making On The Bounty," starring Martin Brando, Trevor Howard, Richard Harris

The stirring tale of the sea is magnificent, capturing the excitement and beauty of ships at sea. Captain Bligh, commanding the HMS Bounty, leaves England commissioned to bring breadfruit plants from Tahiti to the West Indies. Nootious for his inhuman treatment of his crew, the captain instills fear and hatred aboard his ship. His cruel and brutal command takes charge away from him. The island's lush tranquility and the power of the sea with its tremendous storms are breathtaking to behold. The music reflects both the violence of men and the gentle beauty of Tahitian life. A written classic becomes a film classic.

Cultural Club Presents
Annual Festival Mar. 11

A program of entertainment representing various cultures will be presented by the International Club of IIT as part of its third annual International Festival. The festival will be held on Saturday, March 11, in the HUB auditorium. The program consists of music and dances from India, Nigeria, Japa, Poland, Philippines, Mexico, Indonesia, and the United States. The entertainers, both professional and semi-professional, will utilize traditional costumes and instruments in some of the numbers presented.

Arts and crafts from the different countries will be on display during the intermission, and refreshments will be available in the HUB lounge.

The International Club consists of interested foreign and American students attending IIT. The purpose of the club is to expose others to their own culture and point out the highlights of it. The festival is open to the public, and admission is $1.00.

CCC will be sponsoring a seminar and dinner on Thursday, March 16. Korean night will be held on Friday, March 17.

Dr. Eyring Will Lecture at IIT

Recipient of the 1966 National Science Medal, Dr. Henry Eyring, will deliver the third annual series of Kilpatrick Lectures on chemistry here at IIT beginning March 13.

Dr. Eyring, known for his development of absolute rate theory, is retiring president and chairman of the board of directors of the American Association for the Advancement of Science. He is a former president of the chemistry department of Princeton University, a professor of chemistry, and has recently retired as dean of the graduate school at the University of Utah.

Eyring received the National Science Medal, our government's highest award to men of science. Last year, "for contributions to our understanding of the structure and properties of matter, especially for the creation of absolute rate theory, one of the sharpest tools in the study of chemical reactions."

The Kilpatrick Lectures, to which the public is invited, will be presented in the auditorium of the Swan Memorial Hall. The schedule is as follows:

Mon., March 13, 8 p.m.—Modern Developments in Rate Theory, 1 p.m.—Sincinip of Theory of Liquids

Fri., March 17, 1 p.m.—Properties of Solids and Liquids

INSURANCE
AUTO & LIFE INSURANCE
at special rates for college students and faculty.

Humble Oil & Refining Company—Provides more petroleum energy than any other domestic company—History No. 1-America's Leading Energy Company

Enjay Chemical Company—one of the ten largest chemical companies in the United States. As part of an industry marked by rapid growth, Enjay enjoys unusually strong advancement opportunities.

Esso Production Research Company—Provides advanced research and design work for new processes and production of oil and gas. A leading research laboratory.

Esso Research and Engineering Company—Provides postgraduate research and development of processes and products, engineering research and process development, mathematical research.

Let us tell you about the specific opportunities we have for you. The No. 1 family of companies offers a variety of rewarding careers to scientists and engineers in chemical engineering, petroleum, electrical and civil engineering at all degree levels. Our activities include oil and gas exploration, and production, and manufacturing, transportation, and marketing, including synthetic rubber and petrochemical products—as well as the management of all these.

You can always take a smaller job. But only now, at the start of your work in industry, are there as many opportunities for a lifetime career with No. 1. Why not try us on for size—make a date now with your personnel office for an interview.

PLANS FOR PROGRESS COMPANIES EQUAL OPPORTUNITY EMPLOYERS.
Basketball Season Ends, Tech Loses Final Two

by Jerry Jacobson

IIT's basketball team finished up the 1966-67 season with two losses to a pair of very strong teams. St. Louis and Connecticut.

On Wednesday, February 22, the Techhawks faced St. Procopious. The Eagles proved to be too aggressive in the last game of their season, overpowering the Techhawks 106-93. The Techhawks played even harder with the Eagles, but just couldn't make up the 8 point deficit. Bill Geist in his last game of his career got 38 points for the Eagles, but his performance was nearly matched by Jerry Arnold who tallied 29 for the Techhawks and rebounded outstanding.

There will be a meeting for anyone interested in Tennis or Golf. The meeting will be held in the temporary athletic offices at 12:15 on Thursday, March 7.

On Monday, February 27 the Techhawks lost the final game of their season to a powerful Lewis College, 90-74. The Techhawks started strong, holding the high scoring Flyers to only ten points in the first quarter. Then the Flyers' star forward, Jay Wood, scored 23 points. The Flyers came back strong in the opening minutes of the second half, but again Williams led his team to a comfortable lead which they held for the rest of the game.

- Sidelines

(Continued from page 10)

basketball in his third year at Lewis. I really wonder whether or not he deserves his rating. Unfortunately he displayed his talents as a halfback and two years ago he was injured. But back he comes and does a splendid job at center.

In conclusion I'd like to salute the Lewis varsity athletes who last week completed their college careers. Steve Keller has been on the varsity swimming team for four years. The past two years Keller has captained the team, and along with Coach Erickson, is responsible for the team's marked improvement and success. As a third-year returner he has broken the school record with the medley relay team and challenged several others individually.

Three basketball players, Ed Skalka, Jerry Arnold, and Jay Kurtzman, also competed for the last time. Kurtzman, like Keller, has captained the team for two years. Popularity nicknamed "the chub." Kurtzman has been the field general for the forwards. He is respected by his teammates and is noted for his consistent hard work and determination in both games and practice.

Tech Swimmers Receive Awards; Take Second in Triangular Meet

The Tech swimmers finished their regular season last Saturday with a triangular meet against Illinois Circle Campus and Illinois College at Circle Civic Center. A very strong Circle team dominate the meet taking nearly all first and second place wins with 12 points. The battle for the runner-up position was much closer, with Tech just touching out IC 33-32. The final record of 5 wins and 7 losses represents the best season the swimmers have had in several years. Of the 23 people who expressed an interest, only eight remained to complete the season.

Of these eight, Schonderwoord, Mikkis, Keller, Green, and Suson will receive major awards. Buechel, Kiley, and Fevansk, the manager, will receive minor awards. Bill Hesford will receive a minor award for his excellent performances last season.

Tech's four top swimmers, Schonderwoord, Keller, Green, and Mikkis will comprise Tech's relay team in tomorrow's Chicago Invitational Swim Meet at the Circle Civic Center. In a meet after the UICC meet, the team elected Paul Mikkis, who holds records in the 500 yard and 1000 yard freestyle, to be their captain for the 67-68 season. He replaces Steve Keller who is graduating.

Why become an engineer at Garrett-AiResearch? You'll have to work harder and use more of your knowledge than engineers at most other companies.

If you're our kind of engineer, you have some very definite ideas about your career.

For example:

You've worked hard to get a good education. Now you want to put it to work in the best way possible.

You will never be satisfied with run-of-the-mill assignments. You demand exciting, challenging projects.

You don't want individual responsibility - you insist upon it.

Does that sound like you? Then AiResearch is your cup of tea.

Our business is mainly in sophisticated aerospace systems and subsystems.

Here, research, design, and development lead to production of actual hardware. That means you have the opportunity to start with a customer's problem and see it through to a system that will get the job done.

The product lines at AiResearch, Los Angeles Division, are environmental systems, flight information and control systems, heat transfer systems, secondary power generator systems for missiles and space, electronic and specialized industrial systems.

In each category AiResearch employs three kinds of engineers. Preliminary design engineers do the analytical and theoretical work. Then write proposals. Developmental engineers are responsible for making hardware out of concepts. Whichever field fits you best, you can be sure you are working with a man who wants to make a mark on the field. And he's working with you. And learning from you. And the real pro's in the field. And you're helping his company.

Our engineering staff is smaller than comparable companies. This spells opportunity. It gives a man who wants to make a mark plenty of elbow room to expand. And that's what he's doing. And he's doing it with you. And learning from you. And the real pro's in the field.

If the AiResearch story sounds like opportunity speaking to you... don't wait to contact AiResearch, Los Angeles, or see our representa- tive when he comes to your campus.

We'll be happy to talk to you... about you and your future.

And put this in the back of your mind:

In a field where meeting challenges pays off in rewards...

AiResearch is challenge

An equal opportunity employer

Sign up now in the Placement Office for interviews. An AiResearch representative will be interviewing on campus Monday, March 13.
Wrestlers Out-Grapple Notre Dame to Win

by Gene Bader

The Illinois Tech wrestling team put together a tremendous team effort and knocked off the Irish of Notre Dame by a score of 26-19. Individual winners for Tech were John Leong, Doug Stuart, Kurt Kincade, and George Derby.

Leong put in his best effort of the year. Wrestling a full weight class above his normal class, he captured victory by pinning his opponent. Stuart and Kincade both took victories by means of default. Stuart won when his man couldn’t continue after sustaining an eye injury. Kincade was awarded the victory when his opponent injured him with an illegal hold. The injury was to his knee; the early diagnoses were said to be either torn or strained ligaments. Kincade, however, hoped to compete in last Wednesday’s match. Derby, team captain, told the victory by pinning his man. The victory was the start of a new streak. His old victory string of 14 was broken in last week’s match with the University of Chicago.

Both Coach Tony Barba and his team were in high spirits over the victory. Derby commented on the victory: “We beat ‘em, I really didn’t expect to do it. We knew that our only chance for victory was with a team effort, like the Knox win. We did it, and I couldn’t be any happier.”

“Both Coach Tony Barba and his team were in high spirits over the victory. Derby commented on the victory: “We beat ‘em, I really didn’t expect to do it. We knew that our only chance for victory was with a team effort, like the Knox win. We did it, and I couldn’t be any happier.”

Loyola and St. Joe Set Keglers

The past two weeks have seen the Tech Keglers come out on the short end of matches. On Sunday, February 19, in a match against Loyola, the bowlers dropped a majority of games, but accumulated enough pins to take the point for total pinfall. Last Sunday the team lost three out of five games, and came out on the short end of total pinfall also. The match was against Saint Joseph’s of Rensselaer, Indiana.

In the Loyola match, Jim Karlin, Elliot Silver, and Hank DeGraff were the top three scorers. Their respective scores were 942, 947, and 935 respectively.

St. Joe took high honors in the other match, as Tom Salarek was leading scorer for Tech with 949. St. Joe’s first game total was 1002 pins, an average of over 200 a man.

On the season, Tech is averaging 877 pins per game or approximately 174 per man.

FROM THE SIDELINES

Last Monday, the Tech Roundballers finished out their season against the Lewis College Flyers. Although the team lost several incidents occurred which I feel are worth noting.

When I first entered the gym I was exhilarated to see the small band of Tech roosters. The group was made up of dormitory residents primarily representing the North Dorm and Fowler Hall. This group of students has attended almost every home game and a few away, too. All of their equipment—drum, horn, and horn—were purchased through donations by the men themselves. Thanks fellows! I only wish more students could have found the time and energy to show the spirit of these few.

The so-called star for Lewis is Ferry Williams, a stand-out in prep (Continued on page 9)
