Parking Situation Unsafe; Long Range Plans Dictate Locked Lots to Go: Spaeth

The fences surrounding the private parking lots will remain as they are for the time being, according to Mr. Raymond Spaeth, Institute vice-president.

There are no immediate plans for tearing them down to expand the school parking lot. Spaeth said, however, that plans call for elimination of the fences.

Spaeth said that removal of the fences is desirable because they present an objectionable image to campus visitors and newcomers. A locked parking lot tends to accent the presence of neighborhood problems.

Eventually, open elimination of the fences, the two driveways next to the fire lane on Thirty-third street, which presently lead nowhere, will serve as the entrances to the parking lots and will be used for delays and services to the fraternities and dormitories.

Spaeth commented that night students have just as much right to the normal school parking lot as the full-time resident students.

Night students, he remarked, have a greater need to park their cars there, and the resident students should feel fortunate to be at a school which allows them to have cars on campus.

Spaeth also said that even though the lots are crowded, ITIS has more parking area, especially this conveniently located, than many other colleges.

Night students will soon, within a month or so, be able to park on the northeast lawn where the first-year gym is now located. This lot will be mainly for use by these students who will have classes in the new engineering building.

All the school lots will eventually have lighting similar to that of the east of State street between Thirtieth and Thirty-first streets. Several types of lights are presently being experimented with to determine which one will be most economical to install.

To insure an orderly parking lot with as little of a crowding problem as possible, students must respect the lot parking regulations.

Campus Police Chief James Clark explained the procedure for the issuing of tickets by the ITIS police.

He said that upon discovery of a violation, the officer first makes an attempt to locate the owner of the car. Unless the car bears a staff or a faculty sticker, the attempt proves very difficult. If the owner can't be found, the officer must fill out a private property complaint which authorizes the city police to write out tickets. A member of the city force is then called in and the ticket is issued.

A recent parking violation (Continued on page 11)

ITSA By-Law Revision Extends ACSA Powers

At the October 17 ITISA meeting, a bylaw change was passed permitting the restructuring of the Advisory Committee on Student Activities.

Under the old by-law, ACSA's role was simply that of advisor of the recognition procedure, but under the new by-law ACSA will be devoting more effort to the advising of student organizations.

One of the most important parts of the new by-law, according to Joe Herlehn who proposed the revision, is Section 5.01. It states:

"This committee shall at the request of an organization advise that organization in such areas as membership, public relations, or, in general with any problem the organization may encounter in the course of its activities."

It is hoped that this will provide greater unity between student organizations and the ITISA. Herlehn believes that this should be the main effort of the new committee.

In order to aid ACSA in its effort to advise student organizations, organizations when applying for recognition are asked to turn in a copy of the constitution of the organization and what are some of the things it plans to do during the fall semester. In the future, more time will be required to describe what the organization has been doing and what some of its plans are for the coming semester.

Such information will aid ACSA in advising organizations with their constitution and provide valuable information for future organizations.

In the past an organization has been required to have a representative present each semester. Under the new by-law revision, however, any organization receiving recognition will be required to provide a report at the beginning of the fall semester, outlining the organization's officers.

Because of the time change in the semester, this new procedure will not go into effect until next fall. Any new organizations will be contacted later this semester notifying them of the changes.

All existing and planned organizations having questions should ask any of the chairman of the committee, Joe Herlehn, at V1 2-8785.

Pres. Retallidata Reports Record Year for Tech

In his annual report to the board of trustees, President John T. Retallidata reported that record totals for assets, loan operations, and contributions were attained by ITIS during the past fiscal year.

Total assets of Illinois Institute of Technology and its research affiliates for the first time exceeded the hundred million dollar mark at the close of the institution's fiscal year. Assets total approximately $105,000,000, more than double their amount in 1965.

Dr. Retallidata also reported that loan operations for the year exceeded $49,500,000, an increase of almost $5,000,000 over the previous year.

This year's total included $15,650,000 for the university operations, $21,350,000 for those of the ITIS Research Institute, and $3,150,000 for programs of the Illinois Institute of Science Technologies.

Research income totaled in excess of $55,000,000, compared to $51,500,000 for the previous fiscal year. Research volumes at ITIS reached a new high of 25,333,000, the expanding research program at ITIS exceeded the $1 million mark at the close of the university's fiscal year. The university's personnel reached an all-time high of 6,343,000, and the institution's research expenditure exceeded $4,250,000. In June of 1967, the organization's assets had increased to $125,000,000. It is expected that these increases will result in additional contributions from private sources reaching an all-time high of $8,343,000, all of which will be used for educational purposes and for the purchase of equipment.

In June the university received the largest corporate gift to its endowment through the 1 million dollar gift to the ITIS Research Institute.

In June the university received the largest corporate gift to its endowment through the $1,000,000 gift to the ITIS Research Institute.

In June the university received the largest corporate gift to its endowment through the $1,000,000 gift to the ITIS Research Institute.

In June the university received the largest corporate gift to its endowment through the $1,000,000 gift to the ITIS Research Institute.

In June the university received the largest corporate gift to its endowment through the $1,000,000 gift to the ITIS Research Institute.

Institute's Solution to Parking Problems Slighty Day Students

"Short term plans," "long term plans" are the evasive expressions one hears when discussing the dormitory and fraternity locked-parking lots.

The students are told that these lots are not needed. However, the theft of a car from the well guarded and "lighted" parking lots, as well as a smashed windshield of a car in the locked lot, are indicative of the need for the locked lots. In fact, such events show an increased need for secure parking locations, and are not indicative of removal of said facilities.

Commuter parking, especially night school parking, needs to be expanded so that we are told. We are also told to be privileged to have parking for resident students. (But is this $800 per semester minority so small as to be neglected for the $100-$200 night school student?)

Technology News Credo

To inform and report for the members of the IIT community.

To work for the betterment of the institution of which we are a part.

To foster greater harmony and understanding between all factions of Technology Center.

To voice student opinion and to support and check the student government.

In order to best achieve and promote these ideals, this newspaper commits its support to:

1. Creating a nearby, off-campus eating and drinking establishment.
2. Increasing the percentage of resident students at IIT.
3. Maintaining the present fraternity and dormitory parking lots.
4. Improving the Common Core Curriculum through better faculty, faculty, and student communication.
5. Maintaining an effective tutoring program for students in the near-by schools.

Success of "HC-67" Depends On Tech Students' Participation

For the first time since 1963, IIT is planning to have a homecoming. A lot of planning and work has already been done to assure that "HC-67" will be a weekend to remember for all Tech students.

The ITEA social chairman, the ITEA president, Union Board, the homecoming committee, and the Board of Control members have exhausted innumerable hours, and have spent a sizable portion of the ITEA budget for "HC-67." The entertainment is going to be first rate, with two basketball games, a dance, a parade and a concert on the tap for the weekend.

Everyone now seems optimistic over the completion of the gym before December 1, and the alumni will have a second use of the gym and the Schonmberger Dinner to look forward to, as well as the other events. All in all, everyone looks great.

Announcements

Freshman Happening

The Freshman Board is sponsoring a happening tomorrow night in the Bog, from 9 to 11:30 p.m. The happening, called "Fresh Power," will be a free public lecture on Tuesday, at 7 p.m., in the Student Union. The event is free to all students, and all are encouraged to attend.

The happening will consist of local talent in a program of rock and roll music and poetry readings.

PS Lecture

Dr. Abraham A. Avdat, the Consul General of Israel, will give a free public lecture on Tuesday, at 7 p.m., in the Student Union. The event is free to all students, and all are encouraged to attend.

The happening will consist of local talent in a program of rock and roll music and poetry readings.

FORTRAN Course

The Freshman Board is sponsoring an evening course in FORTRAN IV. The course will be held on Thursday evenings from 6 to 9 p.m., in the months of November and December. Textbooks and computer time are included in the fee of $100 per person. To register, contact the Freshman Board office at (312) 408-2540.

Louie Theater

"Our Man" is now being presented at the Louie Theater, 1641 E. 35th Street. Tickets for Wednesday and Saturday performances are available at the box office for $10.00 per person. The show is being presented by the IIT Drama Society.
Letters to the Editor

'Veit' Survey Draws Reader Comment; IDC Speaks on Parking Lot Problem

(The following letter from the IDC was not addressed to Raymond J. Speer, HIT vice president, and is reprinted here so all students may see the position of the IDC.)

Dear Sir,

We of the Inter-Dormitory Council are often required to make our position concerning the locked parking lots completely clear. These lots constitute the only reserved and "safe" parking areas available to all students. You have been presented facts and figures concerning the incidents of car theft and damage on our "safe" campus, so that it should be abundantly clear that this standpoint of safety is area area necessary.

We are also very much alive to the fact that insurance companies require that a car be parked in a locked parking lot before theft coverage will be written. That the dorms area is a substitute. This is but one more reason that the lots must be left.

As you are aware, the access road and fire lane which would follow the destruction of these facilities would eliminate a large number of parking spaces on a campus that is, in spite of recent improvements, is still a parking lot.

As far as the student's concern, the attempt to remove these lots, was the underhanded and accretive method that was used. It seems that a deliberate attempt was made to present the students with a "fait accompli" when they returned in the fall.

We were appalled to discover that an action which would adversely affect such a large number of residents was not only undertaken without consulting them, but at such a time and in such a manner that the action would take place at all, that the students would be unaware of what was happening, that they could not do anything about it.

We are aware that your office has stated that the lots will be left "for the time being." We are not satisfied with this. We will be satisfied with nothing less than an assurance from your office that these facilities will be available to the residents as long as they are needed.

Based on past experience and future considerations, we do not see this need diminishing for years to come.

Respectfully,

Diane Bower
President, IDC

Dear Sir,

Your Vietnam questionnaire leaves out one important position. The most community choice available on the questionnaire is "military victory and seeking negotiations." This would merely lead Vietnam, you say.

You have left out victory Mr. Belliere! Actually, the important questions regarding Vietnam can be summed up as follows:

1. The position of the Communist Party and the left-wing groups. Withdraw immediately, even if this means the Communists will come closer to their goal of total world domination.

2. The position of President Johnson: Contain the war as is, even if it goes on for many more years, with maximum loss of human life.

3. The position of the John Birch Society and other right-wing groups. Rapid military victory, and NO negotiations with the Communists.

Mr. Belliere, if the most conservative position available were merely to contain North Viet-

nam, they would have nothing to lose by starting a war, any time they want. (They would lose some lives, but they don't care.) The terms "victory" and "negotiation" are totally incom-

parable.

Sincerely,

John Joseph Hoero
EE, 9th semester

(Mr. Hoero, the survey was intended to include all rational solutions to the Vietnam situation, not all reactionary solutions. If you will extend the fourth proposal, you will notice that its point is to insure military victory.)

HC-67 Tickets, Queen Petitions To Be Available on Wednesday

Nomination forms for Homecoming Queen will be available starting next Wednesday, November 1, in the Dean of Students office. To be nominated, a candidate must be a full-time student at HIT, and will be sponsored by one of the ITSA recognized organizations. The necessary information for the nomination form will include the name of the candidate, her organization sponsor, a short history of her community, and a black and white photograph, with a negative if possible. Petitions will be due back in the dean of students office by 5 pm on November 17.

Because Technology News will not be published on November 24, any candidate wishing her picture to appear in the paper will have to have it submitted by November 14.

The election of the queen will take place at an all-school election to be held on November 29 and 30. The winner will then be crowned at halftime of Friday night's basketball game with Roosevelt College.

Gene Bader, ITSA and HC-67 Chairman, commented that he was happy with the plans and progress being made. He also expressed optimism for the completion of the gym.

Commenting, he said, "Accord-
ing to reports, the construction is right on schedule. I don't believe there will be any postponements or alterations of our plans. What we need now is for the students to also believe in the completion and to back us up and the event to purchase tickets."

IF Ball To Be At M & M Club On November 4

This year's Interfraternity Ball will be held on Saturday, November 4 at 8:30 pm in the Merchants' and Manufacturers' Club at the Merchandise Mart. Entertainmen is the semi-formal affair will feature Jim Bremner Patient, and his orchestra. Brem-

ner has played at many high school proms and dinner dances all over Chicago.

Paul Lessen, a comedian, will also entertain. Lessen has appeared on the Ed Sullivan Show and has been a protege of Danny Thomas.

The highlight of the evening will be the Queen contest which this year is to be improved over previous years. Judges for the contest will be from Kay Vogel and Patricia Monroe, Merged Southeastern Women's Association.

The contest will be distributed at this event.

Get Eaton's Cordisable Bond Typewriter Paper.

Mistakes don't show. A mis-key completely disappears from the special surface. An ordinary pencil eraser lets you erase without a trace. So why use ordinary paper? Eaton's Cordisable is available in light, medium, heavy weights. Write for free samples. In 1000-sheet packets and 500-sheet ream boxes. At Stationary Departments.

if you're a wave-mover, a boat-rocker or a mold-breaker, we just might have something in common. our engineers have broken a few molds in the past and they'll break a lot more in the future.

Check us out when our representative visits your campus.
272 Respond to TN Questionnaire: 64% Back War, Escalation

The results of the Technology News Vietnam Questionnaire which ran in the October 29 issue have been tabulated. The questionnaire consisted of five probable solutions to the present situation existing in Vietnam. Voters were asked to identify themselves only as students, staff, or faculty. The first possible suggested solution stated: "The U.S. should terminate the war by withdrawing its military forces from South Vietnam as quickly as technologically possible." This solution drew 10.1% of the votes — 6.8% students, 2.9% faculty, and 4% staff. The second possible solution stated: "The U.S. should agree as a step toward inducing North Vietnam to negotiate — to a permanent and unconditional termination of our bombing of that country." This suggestion drew the lowest, only 3.5% of the votes — 4.6% students, and 1.1% faculty. The third solution stated: "The U.S. should continue the war at its present level but without further escalation. Meanwhile, the U.S. should insist on negotiations with North Vietnam for a satisfactory settlement of the war; 'satisfactory settlement' meaning enforceable arrangements containing North Vietnam from aggression against South Vietnam. 6.3% of the voters chose this solution, all 6.3% being students. The fourth suggested solution stated: "The U.S. should continue the war at its present level, but at any level deemed necessary by the President — after consultation with the Congress and Chief of Staff — to ensure military victory. Meanwhile, the U.S. should firmly seek negotiations with North Vietnam for a satisfactory settlement of the war; 'satisfactory settlement' meaning enforceable arrangements containing North Vietnam from aggression against South Vietnam. Dissolution of the U.S. congress run 44.8% students, 13.2% faculty and 5.8% staff — a total of 63.8%.
The fifth choice on the questionnaire was allotted for those whose position was not expressed by any of the other statements. 14.3% of those who voted chose to check this statement, all of them being students.

The solutions, in order of popularity, are No. 4 (continue war at any level deemed necessary by the administration), No. 5 (no solution expressed in questionnaire), No. 1 (terminate the war as quickly as possible), No. 3 (continue war without escalation — negotiate a non-aggression pact between North and South Vietnam), and No. 2 (U.S. should stop bombing Vietnam to induce negotiation between North and South Vietnam).

Since there were only 272 votes, it is obvious that this is not an accurate suffrage of the entire student body, faculty, and staff of IIT. This poll does show, however, that the overwhelming majority of those who voted were in favor of allowing the war to continue in any way the Administration thinks best.

"What would it take to get you interested in Lear Siegler?"

(Would aerospace challenge, professional recognition and a midwest location do for starters?)

We're big enough to have been active in every major aerospace project. Small enough to want to see you get all the professional recognition you can achieve, all the responsibility you can handle — with appropriate advancement. The other side of that coin, naturally, is that there are simply no mas ters to get lost in at LS1.

What's more, LS1's recently-expanded facilities are based in Grand Rapids, Michigan — not some far-off, crowded coast or sprawling southwest. (We like Grand Rapids because among other things it's friendly, cultural activities thrive and real estate is about as sane as anywhere in the country.)

We're a critical defense industry deeply involved in design, development and manufacturing. Our challenges include advanced flight reference, navigation, communication and display systems for aircraft, missiles and spacecraft. In this respect we're currently engaged in some of the most exciting research and development programs you'll find in any company, large or small. And we're versatile enough to sustain this air of excitement and dynamic growth within an overall framework of stability.

Our Supervisor of University Relations will be on your campus soon. If engineering or science is your field and we've given you good reason to be interested in Lear Siegler, be sure and see him. He's interested in B.S., M.S. and Ph.D. candidates who are interested in what LS1 has to offer. (If you can't make it, write as soon as possible.)

"Art Protest" Ends With UICC Show

Although the war in Viet Nam has been in progress for several years, there has been increasing criticism over its value and methods. The fact that most of the protests and demonstrations are widely pub lished probably aids the cause of these discontents.

However, organization of these groups has played prominent roles in stalling these protests to voice their opinions. One such group has been active in the Chicago area calling themselves "Festival of the Midwest," they are currently engaged in a "Festival of Protest." The group consists of actors, musicians, dancers, poets, painters, and film makers who present their personal statements through their own art forms.

The center of the festival was held at Mandel Hall at the University of Chicago last October 21 and 22. A previous meeting was held October 7 at the Lutheran Church in Chicago. The finale of the festival was held last Wednesday at Illinois Hall at the University of Illinois Circle Campus.

In addition, art shows were held in conjunction with these meetings at the Meadows Club on South Ellis and at the South Side Community Art Center on South Michigan.
I sang my harp on the sun's deck
Here at the water in the cool unbloomed year.
And the light notes clung at my hair roots
Like bird cries gathering.

All the day's time leaned
Into lengthening shadows
And moments clung like fresh leaves
On water.

Wind crossed the pond
Leaving stripes and cresses
As though it rolled and cast down,
Cast down into shape for vision.

Wisteria hung for lavender
In a blossom of perfume,
And on the stone a toad
Settled in sunlight.

Is this saturation of senses enough?
Living together between a time frame,
We creature and non-creature
And I among them.

Susan McCord, October 1967
New Actors’ Program at Jane Addams Center

by Doris Hayashi

The “games students play” are often intriguing and quite complex. We go to great pains to keep our students active, but we never seem to get their full attention. This is the case with the students at Jane Addams Center, a place where they are encouraged to explore their interests and develop their skills.

Shakespeare once said that the world is a stage upon which all people are acting out life. A theater was never spoken for the case of the student. But now is your chance to improve your acting ability. Learn how to stage convincingly through your character’s brush with the audience. A teen volunteer must be involved in the planning stages of the program. Basic acting classes for teens and adults are offered on Monday evenings from 7-10 p.m. What happens when the actors in a play find out that the best part of a play can be the only one? According to Ayn Rand, Atlas will shrug and say “who cares.” Ayn Rand’s influential novel, “Atlas Shrugged,” will be the focus of the play on October 27 at 7:30 p.m. Ayn Rand has forged an intellectual revolution which challenges the most fundamental beliefs of today’s culture. Objectivism holds that individual happiness is a goal of the realization that reality exists as an absolute.

The spotlight will be focused on the stage of life at the Conrad Hilton Hotel, 722 S. Michigan.

The admission into this worthwhile experience of stimulating learning is $5 for students.

Take a break from the hustle and bustle of the city by grabbing a seat in the theater and watch the play, “Atlas Shrugged.”

As long as you’re looking into career opportunities, see what they’re like with Standard Oil Company (New Jersey) and its 300 worldwide affiliates in the oil, chemicals, plastics, and fertilizers.

You can start in just about anything you want — research, engineering, manufacturing, marketing, management — and how these fields offer you advancement. Within the field, you can choose to work in one field to another. Intercompany and intracompany, your job is to build world class companies and at one step, our unique decentralization will help you become known on an individual basis.

We’ll give you individual challenges, individual recognition, and help you grow. Because we’re talking more money on your success than almost any other company in the world!

Make an appointment with your college placement officer now to see the U.S. oil and gas industry.

Would you like to be with No. 1? Humble Oil & Refining Company supplies more petroleum energy than any other U.S. oil company. We’re literally No. 1. — America’s Leading Energy Company. — With the world’s largest Arabian oil fields and the world’s largest reserve of oil and gas.

The Humble Oil & Refining Company

Would you like to be with one of the leading chemical companies in the U.S.? In Esso Chemical Company, our decentralized manufacturing, marketing, and business operations give you the ability to get the best, to be at the leading edge of every discipline.

Would you like to be with one of the world’s largest research companies? Esso Research and Engineering develops worldwide problems for all affiliates of Standard Oil Company (New Jersey). With opportunities for basic and exploratory research, and development of products and processes, you get the ability to get the best.

Esso Research and Engineering Company

Would you like to be with the world’s largest research production organization? Esso Production Research Company does analysis and design for the worldwide drilling and production activities of Standard Oil Company (New Jersey) affiliates. Here, too, you get the best.

Esso Production Research Company

Equal Opportunity Employers
India Association To Present
Diwali Week, Beginning Sat.

The India Association of IIT has announced the calendar of events for Diwali Week, the India Week, 1967. The annual celebration will begin October 28 and continue through November 3.

Beginning the week's festivities will be an Indian film in English entitled "The Guide". The film stars Dev Anand and Waheeda Rehman. It will be shown in the HUB at 7:30 pm with admission being $1.25.

An Exhibition of Indian Arts and Crafts will appear October 31 to November 3. The free exhibit will be open from 9 am to 7 pm at the IC Center.

On October 30, a lecture will be given by Swami Bhashyamandam on the "Spiritual Relationship Between America and India." The free event will be held at the HUB at 4 pm.

The main event of the week is Celebrity Night. Featured will be Devi Uma Sharma, the Kathak dancer who incorporates religious concepts into her dancing. She will be accompanied by Ustad Rehmat Ali Khan on the sarod and Shri Ramchandra on the tabla. The dance will be staged in the HUB at 9 pm on October 30. The admission charge is $2.50.

The HUB will be the scene of several films on India on October 1. There will be no admission charge for the showings which begin at 8:30 pm.

A debate will be held on November 1 in HUB rooms 305 and 306. The topic for discussion concerns "Public Sector is More Productive than Private Sector to the Economic Growth of Developing Nations." The time is 8:30 pm. There is no admission fee.

Information regarding India Week or any of the events may be obtained from IIT at 222-9600 or Ext. 4612.

ITSA

(Continued from page 1)

A breach of contract suit. The air conditioning was repaired the very next day.

John Huff made a statement which summarized the Board's point of view. "It seems that Mr. Spaeth, Mr. Byrnes and Mr. Par- dush don't realize that their decisions have often affected students adversely. They just don't take the students' views into account."

Dan Benz, ITSA treasurer, pointed to another gripe which affects large numbers of students. He explained that there are many courses in the ITA catalog which are not offered, have never been offered, and are not going to be offered in the future.

Several members of the Board were able to support this statement from personal experience. At the IRTA banquet, IRTA president explained that the catalog is produced by ITA Public Relations and indicated that pressure from the students and the academic departments would be needed to correct the problem.

They won't tell you about all the job opportunities we have for college graduates - engineers, scientists, business and liberal arts majors. Not that they wouldn't like to. It's just that there are too many jobs and too little time. In a half hour interview our man would barely have time to outline the scope and diversity of the opportunities we offer. That's why we published a brochure called "Starting Points at General Electric." In plain language it will tell you exactly how and where a person with your qualifications can start a career with General Electric. Pick up a copy at your Placement Office. Then arrange for a productive session with our interviewer. He'll be on your campus soon.
Do you think a bright young engineer should spend his most imaginative years on the same assignment?

Neither do we.

That's why we have a two-year Rotation Program for graduating engineers who would prefer to explore several technical areas. And that's why many of our areas are organized by function—rather than by project.

At Hughes, you might work on spacecraft, communication satellites and/or tactical missiles during your first two years.

All you need is an EE, ME or Physics degree and talent.

Some of the current openings at Hughes:

- Electro-Optical Engineers
- Microwave Engineers
- Space Systems Engineers
- Missile Systems Engineers
- Guidance & Control Engineers
- Spacecraft Design Engineers
- Weapon Systems Engineers
- Components & Materials Engineers
- Circuit Design Engineers
- Product Design Engineers

For additional information, please contact your Placement Director or write:

THE EMPIRE BUILDERS

are not exactly what we need.

City builders are all we're looking for at the moment. City builders, in our language, are engineers. And a growing city like Milwaukee needs plenty of those. If you're one, we need you to design streets, sewers, water systems and structures, to supervise construction, to try your hand at any job that fits you. To shake around a while at the many departments of local government concerned with building a great city.

THE "MEANING OF THE 20TH CENTURY" IS THEME OF TECH ALUMNI LUNCHEON-LECTURE SERIES

A series of four Illinois Institute of Technology Alumni luncheons, dedicated to "The Meaning of the 20th Century," has been announced by Robert E. Kohnen, an IIT alumnus and program chairman for the series.

Mr. Kohnen, who is vice president of Growth Industries in Chicago, has been closely associated with the scientific and technological developments which typify the twentieth century. In commemoration of the 10th anniversary year, the IIT Alumni Association will present a panel of prominent alumni at each luncheon to discuss an aspect of the modern technological revolution. One of IIT's proponents, institutions, the Institute of Technology, was founded in 1892, and, the other, Lewis Institute, was founded in 1896.

The first panel, on October 19, is scheduled to meet at 11 a.m. at the IIT campus in 3241 South Federal Street, Chicago. The luncheon will begin promptly at noon and will be held in Grover M. Hermann Hall on the campus.

The luncheon panel will discuss the meaning of the twenty-first century in terms of innovative educational programs in industrial technology and modern communications. The luncheon panel will consist of Dr. Ronald L. S. Steckelmacher, a vice president of the Illinois Institute of Technology, and a speaker to be announced.

The second luncheon, on November 2, is scheduled to meet at 11 a.m. at the IIT campus in 3241 South Federal Street, Chicago. The luncheon will begin promptly at noon and will be held in Grover M. Hermann Hall on the campus.

The luncheon panel will discuss the meaning of the twenty-first century in terms of innovative educational programs in industrial technology and modern communications. The luncheon panel will consist of Dr. Ronald L. S. Steckelmacher, a vice president of the Illinois Institute of Technology, and a speaker to be announced.

The third luncheon, on November 19, is scheduled to meet at 11 a.m. at the IIT campus in 3241 South Federal Street, Chicago. The luncheon will begin promptly at noon and will be held in Grover M. Hermann Hall on the campus.

The luncheon panel will discuss the meaning of the twenty-first century in terms of innovative educational programs in industrial technology and modern communications. The luncheon panel will consist of Dr. Ronald L. S. Steckelmacher, a vice president of the Illinois Institute of Technology, and a speaker to be announced.

The fourth luncheon, on December 12, is scheduled to meet at 11 a.m. at the IIT campus in 3241 South Federal Street, Chicago. The luncheon will begin promptly at noon and will be held in Grover M. Hermann Hall on the campus.

The luncheon panel will discuss the meaning of the twenty-first century in terms of innovative educational programs in industrial technology and modern communications. The luncheon panel will consist of Dr. Ronald L. S. Steckelmacher, a vice president of the Illinois Institute of Technology, and a speaker to be announced.
Board of Governors May Repeal Lynd Decision

Lynd drops his legal action against the Board.
Lynd was appointed in the fall of 1964 to his position at Yale for a five-year term. Noted for speaking out on American problems, Lynd made an unexpected trip to North Vietnam and China without the consent of the State Department in 1966. This controversial action prompted Yale to dismiss him from the faculty.
Lynd expressed his desire for academic employment in the Chicago area late in 1966. Both Northern Illinois University and University of Illinois-Chicago Circle offered him positions, but both administrations failed to make final approval.
In spring, 1967, Lynd was notified by Chicago State College (formerly Illinois Teachers College-Chicago South) that he was offered a position there as associate professor. Assuming this to be final, Lynd made the necessary preparations to teach for the fall term of 1967.
On July 17, 1967, the Board rejected the recommendation to appoint Lynd to Chicago State College. The Board’s decision centered around Lynd’s trip to North Vietnam and his discussion of American policies in general, stating that he engaged in and supported unlawful activity.
Several protests have been filed against the Board’s action. In addition, two cases have been filed by Lynd and the Cook County Teachers Union against the Board, both for appeal of the Board’s decision.

Placement

Monday, November 6
1. E. S. Du Pont de Nemours & Co.
East Chicago, Indiana
2. General Foods Corporation
White Plains, New York
3. Courting Glass Works
Courting, New York
4. Power Magazine
Staten Island, New York

White Oak, Silver Springs, Maryland

...they’re right.
And wrong.

It might be said, instead, that we specialize in people for we believe that people are a most important reason for our company’s success. We act on that belief.
We select our engineers and scientists carefully. Motivate them well. Give them the equipment and facilities only a leader can provide. Offer them company-paid graduate education opportunities. Encourage them to push into fields that have not been explored before. Keep them reaching for a little bit more responsibility than they can manage. Reward them well when they do manage it.

You could be one of the reasons for Pratt & Whitney Aircraft’s success... if you have a B.S., M.S., or Ph.D. in:
- Mechanical • Aeronautical • Electrical • Chemical • Civil • Marine • Industrial Engineering • Physics • Chemistry • Metallurgy • Ceramics • Mathematics • Statistics • Computer Science • Engineering Science • Engineering Mechanics.

And we could be the big reason for your success. Consult your college placement officer—or write Mr. William L. Stoner, Engineering Department, Pratt & Whitney Aircraft, East Hartford, Connecticut 06108.
Evening Program Begun At IIT's Crystal Lake Extension

IIT’s new extension campus at Crystal Lake, Illinois, has initiated an evening class and research program.

Classes in several engineering disciplines and chemistry are now being offered at the new campus. EIT president Dr. John T. Retzlaff discussed the importance of the new campus: "The acquisition of the extensive Crystal Lake property represents an opportunity to undertake special research and educational functions requiring large general facilities."

At present there is a demand for the expansion of IIT’s evening division and its special education program through establishment of extension facilities serving suburban areas.

The evening division has the largest evening enrollment of any engineering institution in the country, and IIT is the only educational institution in the Chicago area offering evening degree programs in engineering.

The new campus is ideally situated to serve the needs of people in the increasingly industrialized Northwest suburbs.

To meet the needs of these people, Crystal Lake campus will offer both continuing education and distance courses for undergraduate and graduate degrees.

The location is also well suited for offering one- and two-week summer courses in new trends in engineering, science, and research for engineers and executives from all parts of the country.

The main administrative building located on the newly acquired Crystal Lake facilities in Crystal Lake, Illinois, northwest of Chicago.
Conditions at McCormick Place Fire Told by Jensen at SFPE Meeting

IT Professor Kjelle Jensen, chairman of the Mayor's Committee to Investigate McCormick Place Fire, spoke at the last meeting of the Society for Fire Protection Engineers. Jensen's talk was on the hazardous conditions which led to the fire of January 16, 1967.

At the time of the fire the National Homewares Manufacturers Association was holding their semi-annual show. There were approximately 1280 exhibits on both levels. All the exhibits contained a wide variety of combustible materials.

Although the exact cause of the fire has not been positively determined, the possibility of an electric cause is strong. It is known that aluminum partitions melted and flowed through the expansion joints in the second floor ceiling. Tests have proven that molten aluminum ignites such materials as were in the booths.

There was a total absence of fire protective items such as sprinklers and fire walls. At the time of the fire five of the seven available water hydrants were shot off.

Besides insufficient fire protection, the confused and haphazard firefighting efforts of the McCormick Place personnel had a significant effect on the extent of the loss. A total of six minutes elapsed from the discovery of the fire to alarm transmission.

In a test under conditions similar to those at McCormick

...
FORUM

The dorms have discovered paintbrushes. Beauty—beauty of a sort—competitive beauty; something nonexistent in a successful form previously at I.T. A female who realizes physically that it is not enough to be only female here in order to be popular with the men. There are dozens of girls attending this institution who have the physical attributes common to "Miss Student Body". But physical qualities are not stressed here; mental qualities are.

Attractive clothes, makeup, and exercise are accessible for every girl. Grooming aids, sharp clothes, and exercise are available to every man. But previously there was no need for any of these things at our "university". The guys had no one to impress. The girls, finding the fellows in this state, saw little reason for attracting attention. In either direction, there was no competition for the attention of the opposite sex.

The stimulation came from the outside. The guys saw HER. The weight room became crowded, intramural football had its greatest turnout in the dorms, and cafeteria dress became a little more interesting, because SHE might be there.

Our freshmen girls must be patient and realize that the tradition of a "men's technical school" is difficult to break. That is why, by definition, Tech girls are ugly. This blind proverb must be exposed for what it is—a stupid understatement. So girls, hang on and try to look sexy. Our boys need to have their eyes opened. Let's hope that soon "Miss Student Body" will be one of many good-looking women on campus.

Paul Kuehl

Plan All-School Referendum Vote For Nov. 15-16

The seating of the president of the Inter-Dorm Council on the ITSA Board of Control will be the subject of an all-school referendum to be held November 15 and 16.

Under the proposal, introduced by junior class president John Hoff, the IDC president would take over the independent dorm representatives seat, and the position of independent dorm rep would be abolished.

The present independent dorm representative is Tim Alkire. If the referendum approves the proposal, Alkire will serve out his term of office, at which time he will yield his seat to IDC President Duane Bower.

ITSA President Al Ver has announced the names of the six Board members who have been appointed to faculty standing committees.

Al Guerting and Denny Muchkin will serve on the committee on registration. The calendar committee will have Bob Nowak and John Hoff. Dennis Miller and Joe Herlein will serve on the admissions committee.

November 16, 1967 — "A New Horn Of Plenty". Bountiful industry has replaced the bountiful soil as the symbol of abundance in this technological age. The meaning of the 20th century in terms of radically altered industrial techniques and productivity will be examined by:

Mr. Robert A. Prechter, President, Marmon Group, Inc.

Mr. Walter E. Schirmer, President, Clark Equipment Company

Dr. Stanley M. Black — Moderator — Chairman, IIT Dept of Industrial Engineering

Chemists - B.S., M.S. & Ph.D.

Career opportunities for basic and applied chemical research and development in diversified fields.

Organic - Structure, synthesis, derivatives; basic and applied research.

Physical - Polymer structure; solution and solid state properties.

Biochemistry - Proteins, enzymes, natural products; isolation, structure, and properties.

Federal Aid Helps in Building Of Higher Education Facilities

More than 800 colleges and universities in the United States received Federal aid to build or remodel classrooms, laboratories, and libraries during the first fiscal year according to Wilbur J. Cohen, Under Secretary of Health, Education and Welfare. Grants in excess of $710,000,000 were made to 877 institutions of higher education under the Higher Education Facilities Act of 1963.

This Federal aid helped to generate nearly $2,000,000,000 in college construction needed to meet the increasing student enrollments.

The breakdown in the report reveals:
(a) Grants of $450,760,000 went to 819 undergraduate institutions for construction work.
(b) Grants of $60,000,000 went to 67 universities to establish or improve graduate schools and centers.
(c) Loans of $300,000,000 to 183 institutions for general use.

Some institutions received grants for both undergraduate and graduate construction and, in some cases, loans as well. Total Federal contributions in grants and loans can't exceed 75 percent of total construction costs.

New York, California, Pennsylvania, Ohio, Texas, Illinois, Wisconsin, and Michigan all received grants in excess of $25,000,000 each.
Frat Playoffs Begin Soon; Skulls Play Sigs Sunday

by Tim Sellor

League play is already finished for the football play-offs will be underway next week. The Phi Kapps meet the Sigs Sunday to play their season's last game, before the standings are finalized for next year's league action.

When the league standings are final, Delta Tau Delta will be the champion of the three teams that will play the second place team from each league, the Phi Kappas, and the Sigs. The Sigs ended their season in a borderline tie, with the Phi Kappas claiming first place.

The game against the Sigs will feature a number of the league's top players, including the Phi Kappas' Dave Walker, who scored two touchdowns, and the Sigs' Steve Johnson, who scored three.

Triangle Pledges In Finals of IF Football Turnover

A pledge IF football tournament has been arranged this year, and the top teams will be decided in the upcoming games.

Last Sunday Triangle defeated Delta Tau Delta, 10-7, to move on to the finals. The Sigs will play the Delta Tau Delta in the final game.

Move up to MONZA

Whatever kind you smoke, you owe it to yourself to try MONZA Pipe Tobacco. Your favorite pipe will give you more pleasure when you choose this imported blend of the world's finest tobaccos.
