Black Students, Concerned Whites, and Administrative Committee Begin Discussions of List of Grievances

Discussions between an administrative committee appointed by President Retallick and an alliance of black students and concerned whites began on Wednesday of this week. The substance of these discussions is the list of demands presented by the alliance last week.

Members of the alliance participating in the talks include Nater Sheen, Minolta Rucker, Harry Thomas Jr., Robert Koch, Eugene Sutton, Douglas Davidson.

At the outset of the talks members of the alliance asked the administration for a statement responding to the demands in an attempt to form a framework for discussion. Dr. Brophy replied that "HIT is not a racist institution," stating that the student's insistence has never been unanswered in admissions, housing, or employment.

Alliance members countered by citing numerous instances of racist practices which have gone unchallenged by the university administration. The alliance urged the administration to institute policies in both the campus and the community at large, and expressed the need to support the policies with strict enforcement. Dr. Brophy promised the alliance that such a statement will be made and that all racist incidents reported by the students will be investigated.

The vice president of the universityajo promised that all grievances of the campus and the nation will be made explicit and will be made public. The administration promised to cooperate with racist activities on campus and urged the parties involved to act in such a manner that they may be followed up with action against the police or other law enforcement agencies.

The alliance also asked that discipline hearings be open, that transcripts be made verifiable, and that students be excluded as members of the Board. Dr. Brophy stated that the Board will comply with A.A.U.P. guidelines which will make transcripts and student participation public. However, the alliance refused to agree to allow all students who participated in the controversy to vote.

When discussion of the demands that tennis courts which bar HIT students from practicing was brought up, the comments made by student and administration attitudes concerning participation of the university community at large was made. The Davis administration refuse to "taker the risk of" making the tennis courts, pointing out students, pointed out students along Michigan Avenue, and the banning of a white supervisor in the dormitory cafeteria rather than provision of a qualified black employee with comparable pay.

Members of the administrative contingent responded to these initiatives with surprise and alarm. Administration statements that such practices are absolutely not in line with the administrative policy.

The alliance pointed out that the tennis courts are a symbolic indication of community residence that this is not an issue for HIT. They noted that removal of the tennis courts was a significant victory for the students.

IT!, Nationwide Results Of Choice 68 Similar

Results of the April 24 Choice 68, the first nationwide primary ever held in the United States, show Senator Eugene McCarthy decisively exceeding a large field of announced and unannounced candidates.

Of the 1,072,830 votes cast by students at 130 universities across the United States, McCarthy was the first choice of 381,933, followed by Robert Kennedy with 233,832 votes and Richard Nixon with 197,767 votes. Over 60% of the students who voted were eligible to vote in this November's election.

Students also indicated in the poll that they were undecided or considering other candidates. 20% of the students voted for McCarthy, 11% for Kennedy, 9% for Nixon, 6% for Goldwater, and 3% for other candidates. 23% of the students stated they were undecided or considering other candidates.

Some 11,000 foreign students who also voted in the election, registered 50% of the votes for McCarthy. The results are significant, as the election was held in a world where McCarthy's popularity has been growing rapidly.

The results are significant for the urban crisis. About 42% of the students voted for McCarthy, and 25% of the students voted for Kennedy. The results indicate that the students are demanding change, and that change must come from the top of the administration.

Dean Hogan: A Loss To IIT Students

When I was asked to make some expression of my feelings about Dean Hogan and his passing, I was glad that I would have the opportunity to express my love and respect for the man. When I actually sat down and tried to put these feelings into words, however, all the words seemed somehow lacking.

What words does one use, after all, to express the fact that before most of us could even walk, IIT was Dean Hogan’s whole life? How does one find adequate words to describe Dean Hogan’s sense of dedication to IIT’s students?

I rather doubt that there is an answer to these questions.

Just suffice it to say that at Dean Hogan’s passing, something very valuable and irretrievable was taken from IIT.

John Hoff
ITSA President

It has been my pleasure to know and work with Dean Hogan during the past four years. I regard his recent death as a great personal loss and even a greater loss to the Institute and its students.

Perhaps, the thing which impressed me most about Dean Hogan was his sincere honesty. If he agreed with you on a matter he would tell you so and then pursue some course of action with you. If he did not agree he would issue his disagreement methodically in between discreet puffs on his continuous cigar.

Dean Hogan was a man who cared very dearly for this Institute, its students, and the relationships and conflicts which resulted from this association. He was a man really concerned about this campus and therefore a loss which will not be easily compensated.

Al Ver
Past ITSA President

Dr. Thomas E Hogan
Dean of Students

Friend

He is dead and gone May he rest in peace
Amen

He has left us and we shall miss him
For what he was and what he did
He was a kind man and extended himself to others
And it was a pleasure to know his humor

To give a helping hand and offer advice
Were memorable traits and they touched many
Consideration formed the thread uniting actions
Presented honestly offered with sincerity
Firm with desire intent with Friendship

There were those who knew the title
But never what it meant
There were those who knew the office
But never met the man
Still others did not realize the task

His was a burden to which he was devoted
And toward its resolution he was resolved
And in his contribution he was part of IIT
And I have seen this and I have known him
And in his absence I feel only grief

Jay John Fox
Editor Emeritus

(The Resolution was passed at a meeting of the Faculty Senate on May 14, 1968.)

The members of the Faculty Senate of Illinois Institute of Technology, on behalf of the entire IIT Faculty, wish to acknowledge the many educational contributions Dr. Thomas E. Hogan made during a long tenure of service, both as a teacher and as an administrator. Dr. Hogan joined the Faculty in 1946 as a professor in the Department of Business and Economics and served the University in a number of capacities. In 1961, he became Dean of Students. In this position Dr. Hogan’s contributions reached a pinnacle. He demonstrated unusual skill, patience, integrity, and sensitivity in handling and increasingly difficult job on a modern university campus. His own special brand of humor and humanity were utilized effectively to ease many tense and trying situations.

The Senate is conscious of a great sense of loss. Dean Hogan will be sorely missed. In this hour of sorrow, the Senate extends its deepest sympathy to Dr. Hogan’s wife, Mrs. Virginia Hogan, and to his family.
**Potential Outcome Of Extreme Student Expression Lies Hidden**

Students on campuses across the nation have displayed, in recent months, intensified expressions of their beliefs. This trend exists, basically because of the breed of today's student: an individual acutely cognizant of his environment—socio-economically, politically.

College students with founded beliefs, as opposed to passers, tend to have legitimate grievances. However, the demands made, which will hopefully eliminate, in the eyes of students, the grievance source, are very often unrealistic. Further, the means by which the students attempt to win their demands are becoming even more extreme.

Jim Wilderadl for the late-hour symphony and excellent photo work (especially on campus security), cartoonist Al Taylor and Art Editor, Paul Miklos, my gratitude for filling-up the rest of the article in the paper with humor.

Thanks also to all the other members of the staff who provided copy, read copy and assisted all the staff.

Last and farthest, since I am now a member of their select group, thanks to Weite, Rubes, Nisbet and Associates for a job well done on the business end of the paper.

**“THE END”**

In recent years, the America public has begun to appreciate and respect personal expression by the student. However, the meaningless and unnecessary choice of expression, resulting in violence because of the lack of moral and security, has considerably reduced the reputable position of student belief.

Some people will disagree, and state that they start at 5:00 all the time, because they are not fully aware of the magnitude.

These echoes of result have been heard on many campuses where students have controled their violent tendencies. Their efforts were geared into action via traditional and newly innovated channels.

Students challenging the IIT policies should reexamine their position. By re-evaluating their demands, perhaps hastily prepared, and viewing the total potential outcome, and not just the immediate satisfaction of demands, a change in attitude may be noticed.

Any attempt to effect a radical change without a gradual transition, and thus what many students fail to realize, is no immediate satisfaction, but in the long run, an inescapable situation greater than the one remedied will prevail.

**Announcements**

**APO Book Exchange**

In order that students do not have to carry home books which they plan to read, yet at the fall, the APO book exchange will be open Wednesday and Saturday of finals week from 11 am to 2 pm. APO is located in room 131 of the HUB basement.

**AIP**

The American Institute of Physics will hold its final meeting this semester on May 21, at 1 pm in room 219 of Sugel Hall. All members are required to attend and renew their subscription to Physics Today. New members will be accepted from all undergraduate levels and next year’s office will be elected. In addition, a color movie entitled “analysis of Nucleon-Nucleon Scattering” will be shown. The public is invited to attend.

**Ecumenical Sunday**

This Sunday, the campus religious organizations will sponsor an Ecumenical Service at Trinity Episcopal Church at 26th and Michigan. The service will start at 4 pm and will be followed by a buffet style supper afterwards. All the students and faculty of AIP are invited to attend. For reservations call Stan Olszewski at 842-9474.

**Ascension Thursday Mass**

Thursday, May 23, Mass will be celebrated on campus for the benefit of those who wish to worship together on this Holy Day. The Mass will be held in the HUB balcony at 12 noon.

**ITSA Chairmanships**

Chairmen are needed for the ITSA Elections and Rules Committee. Interested students should submit applications by the next ITSA meeting on May 23 at 8 pm in the HUB.
Letters to the Editor-in-Chief

Dear EIC:

The society of Black Knight is proud to announce the graduation of the following members: Tim Alkire, Mike Belmore, Mal Cohen, Dennis Delhanty, Stan Danskar, Jay Fox, Allan Gaskinch, Tim Kinkaid, Steve Lipson, Dennis Milliron, Paul Morrell, John Nowoski, Fred Pashier, John Tylke, and Al Ver.

RESOLUTION

Many campuses across the nation are experiencing various repercussions of the social tensions which agitate our time. EIT is no exception to this. As members of the EIT Faculty Senate, believe that we need to shape our position on these issues.

1. We believe that continued restrained and sympathetic contacts between administration, faculty, and students are essential to the continuing process of proposals or grievances. We are determined to arrive at solutions.

Dear EIC:

In the May 10 issue of Technology News, the headline read "Black Student Group Expresses Grievances to EIT Administration." On the cover of the May 18 issue, Technology News described part of the meeting as discussion "regarding the list of demands submitted to the Administration by the campus Black Power organization." The ITSA President's statement was "concerning the demands of the EIT Black Student Group." Even the editor of the official press released by the ITSA administration called the resolution a "petition relating to the demands of Black students." To keep the record straight, I wish to point out that nowhere in the resolution did the signers identify themselves as a Black Student or Black Power organization. It is most interesting also to find that the signers, as well as the delegation which presented the resolution to Dr. Brophy, were composed of black and non-black students.

David Lai

Dear EIC:

I wish to clarify a few points regarding an interview of myself and several other students in the Chicago Sunday American of May 12, 1968. First of all the answers to the questions in the interview were taken out of the context of a three hour discussion, and as presented did not in some cases validly represent the opinions of the students being interviewed.

Secondly I want to explain one of these points, in hopes of protecting the many friendships which I have among EIT's 450 fraternity brothers. When asked whether the student demonstrators on most campuses represent (Continued on page 6)

Benefit Concert To Be Held in HUB

The IIT campus has been selected as host to the Jarmon Composers' Concert, which will present a benefit concert in the HUB. The concert will be sponsored Saturday, May 25 at 8 p.m. and the money raised will provide funds for a summer program of the Sullivan House. The Benefit House, located at 4575 S. Lake Park Avenue, offers a creative alternative to the local camps. The summer program will allow the boys to go to Sullivan House and have an opportunity to construct a camp in Michigan with their own hands.

The house was designed by Louis Sullivan in 1930 and was designated as an architectural landmark in 1990 by Mayor Daley. In 1964, the building was donated by the owner with the understanding that it was to be used to provide constructive recreation for the neighborhood children.

At present, there are 123 boys, ages 5 to 16, who receive ADC welfare. The contemporary music of Jarmon and his quartet of instrumentalists have received numerous reviews praising their exciting performance. Admission to the concert is $2.50 per student. Student tickets are available for $1.25.

Greeks Stage Final Parties As Semester Draws to End

Amid the sounds of paint and eggs splashing on house walls and loud music emanating from the second-floor five men, the Greeks are gradually becoming aware of the dreaded approach of finals week. Many houses are ending their social calendars with a senior farewell. Alpha Sigma Phi held their last Friday at Glenn Eagles Country Club. Alpha Sig Gene Polisky announces his pinning to Jone McCollough.

This Saturday, May 15, is planning a beer picnic tomorrow and will hold their senior farewell May 25 at Illinois State Beach. Three pinnings have taken place. Tom Korzenicki to Jessica Klein, Ken Keal to Carol Frenkel, and Frank DeSerio to Ruth Heiser.

Senior farewell at Phi Kappa Sigma will take place tomorrow night at the Burlington Resort.

Admission Policies Discussed (Continued from page 1) to the faculty for approval.

Dean Holmes reported that the endorsement of the Illinois Grants Program, additional funds, customarily going to upperclassmen, was expected to be made available to the entering freshmen.

Two issues, not on the agenda of the meeting were brought up by ITSA Liberal Arts Representative, administration committee member Mike Belzfreid. Belzfreid briefly explained that he was working with administration director David Dudley in attempting to utilize students, beginning in the fall, to help with the direct recruitment of new students.

Chairman Brolly then spoke on the second issue raised by Belzfreid, that of the admissions policy of the Institute regarding black students in the neighborhood surrounding IITA. Brolly indicated that he was aware that such policies may sometimes under question but felt that the scope of the problem made it distinctly an administration problem, out of the hands of the admissions office or the committee.

Exam Pill. And before long you're feeling more alert and with it again.

Sure you've used Nodas to help you stay awake the right side of the exam...

But have you ever thought of taking Nodas to make yourself a little sharper during the exam itself?

Well, maybe you should. Let's say you're one of those guys who doesn't have to cram like mad the night before. (Even so, you're probably not getting your usual amount of sleep.) And let's say the morning of the big exam you have that drowsy, head-hanging feeling for class, kind of droopy and unwound and wondrous if The Great Brain has decided to have a nap.

What do you do? Panama, that's what you do.

If you happened to read this ad, you walk coolly over to the water cooler and wash down a couple of Nodas, theExam Pill. And before long you're feeling more alert and with it again.

You see, Nodas helps bring you up to your usual level of alertness, so you don't just sit there as a fog; it gives you the extra processing power you need to keep that exam in line. In fact, Nodas contains the strongest stimulant for your mind that you can take without a prescription. Yet it's not habit-forming. Okay, but what about the guy who goes off all time, and has to jam everything in the night before? Are we saying Nodas will keep him from flunking out?

Nope. We're just saying he'll be alert and awake. As his faculties...
Skulls and Sigs-Teams to Beat

On Wednesday, May 8, IF Softball continued their two games scheduled. In the first game, Alpha Sigma Phi lost 15-4 to Sigma Phi Epsilon. In the second game, Sigma Phi Epsilon defeated Alpha Sigma Phi 19-2.

The second game saw the Sig Eps defeat the Phis Kapps 11-8. For the Sig Eps, Brian Eulber got 4 hits and Mark Richman hit a homer. Paul Rudnick turned in a fine offensive and defensive performance.

The next week on Monday, two more games continued the action. In the first game, Sigma Phi Epsilon crushed Sigma Phi Kappa 15-4. Bert Abrams pitched a fine game and Harold Degan played a fine defensive game. Dennis Stein got the key hit for the TEPs. Dick Petzelt got three hits for the losers.

In the second game, Alpha Sigma Phi played a fine game and lost 5-4. Frank Inverse of Delta Tau Delta hit 19-3 and brought the broad jump event in.

Tech Sets Mark At 7-5

HIT's Baseball team lost to Concordia last Saturday, 7-5. The game was an exciting one, with both teams putting up a good fight. The final score was 7-5 in favor of Concordia.

In the first game, Tech scored first and then went on to win the game. Tech's pitcher, who was in fine form, kept the opposing team's bats quiet throughout the game. The score was 7-5 in favor of Tech, who played an excellent game. The game was attended by a large crowd, who enjoyed the exciting play of both teams.

The second game saw the Tech team losing to Concordia, who won the game with a score of 7-5. The game was played with great enthusiasm, and both teams put up a good fight. The final score was 7-5 in favor of Concordia.

Tech came back in the second game, but were unable to overcome the lead, which Concordia managed to maintain throughout the game.

Tech's pitcher, who was in fine form throughout the game, kept the opposing team's bats quiet. The score was 7-5 in favor of Tech, who played an excellent game. The game was attended by a large crowd, who enjoyed the exciting play of both teams.

More Letters to the Editor

(Continued from page 6)

Dear EIC,

I read the recent issue of Technology News and was quite interested in the article about the new technology being developed at Tech. I was particularly intrigued by the description of the new computer system that was developed by the engineers at Tech.

It seems that this new technology is capable of performing a wide range of tasks, from data analysis to complex simulations. I believe that this type of technology could be very useful in a variety of fields, including medicine and engineering.

I was also interested in the article about the new satellite system that was launched by Tech. I think that this technology could be very useful in monitoring the Earth's climate and providing early warning of potential natural disasters.

I look forward to reading more about the latest developments in technology and I hope that Technology News will continue to provide valuable information about this rapidly evolving field.

Sincerely,

[Signature]

Charles M. Graham

Dear EIC,

I would like to commend the editors of Technology News for their excellent coverage of the recent developments in technology. The articles were well-written and informative, and I enjoyed reading them.
