President Retaliatai's Leadership Role of IIT in Community

When Armour Institute of Technology and Lewis Institute merged in 1940 to form IIT, the university grew significantly with the opening of new facilities and the expansion of existing ones. The growth was not only in terms of physical space but also in the academic programs offered. IIT student enrollment increased, and the institution added new departments, including Mechanical, Electrical, Chemical, Aeronautical, and Electronic Engineering.

President Retaliatai made the fundamental decision to stay in the inner city and do its part to control the problems of blight and decay which threatened the very survival of the metropolis. The area surrounding the campus, which had been one of the most fashionable neighborhoods in Chicago when Armour Institute was founded, had deteriorated seriously. In projecting its own plans for development, IIT had to assume leadership in helping to transform the community around it. IIT, therefore, became engaged in urban renewal activities before government programs existed in this field. Since World War II, the university, in cooperation with other institutions, private industry, and with governmental agencies, has participated in Chicago's first extensive urban renewal program, which has completely changed the face of the Central South Side community.

Here among the modern buildings on our campus, it is sometimes difficult to realize that Illinois Institute of Technology has just completed its 75th Anniversary Year. It is worth bearing in mind that out of the harshest roots of our institutions for three-quarters of a century, and beyond that period has flowered, and will continue to grow, on the bases of the technological age, which is making old notions of changing our lives at a rate that is almost beyond comprehension, opening opportunities for human advancement which could scarcely have been envisioned a few decades ago. What seems to society that technology is called upon to solve are almost insurmountable.

I know that you are aware of the magnitude of the demands which will be made upon your generation, and that, as students, you have come to IIT with the firm intention of preparing yourselves to meet these demands. Again, be hearty welcome, and our best wishes for your success.

Campus Improvements Involve Removal of Historic Buildings

Within the last year, IIT's campus has experienced a substantial improvement in appearance and face a major transformation of new buildings and the destruction of antiquated ones.

Since last fall we have witnessed the completion of Arthur Keating Hall and the Engineering I Building. We have also seen that old landmark Chapin Hall reduced to a green lawn, and now, after returning to school, we see that the building houses our temporary gym is gone.

With the opening of the swimming pool, Arthur Keating Hall, the school gymnasium, will provide the full use of all its facilities for the first time this semester. The building was designed in various stages of completion throughout all of last year.

The Engineering I building was completed in time for spring semester classes last year. It houses the Mechanical-Aerospace Engineering, Industrial Engineering, and Math departments and is the temporary home for the Fire Protection Engineering and Civil Engineering departments.

Chapin Hall was torn down last spring and along with it went a part of IIT's history.

A structure was originally built on the grounds of the Armour Institute of Technology by the Armour family as an apartment house. It was known as Armour Flats and rental income was important in the institution.

As the structure grew old it was decided to remodel it and convert the rooms into a classroom. The work was done in the late 1930's and remained until its demolition.

The other historic building which has suddenly disappeared is the old State Street building which had come to be known as our permanent temporary gymnasium. Erected in the 1880's, the building was the birthplace of the Institute of Gas Technology, and, since the relocation of IGT, has been used primarily for maintenance shops.

Future plans for campus construction call for an Engineering II building to be located immediately west of Engineering I and a Physics-Chemistry building to be situated on the site of the old temporary gym.

Engineering II will cover about 60,000 square feet and will cost approximately $2 million. The Physics-Chemistry building will cover about 35,000 square feet. Both buildings are still in the planning stages with the architectural designs still unfinished.

As soon as these buildings are completed, plans call for the demolition of the Economics-Mathematics, and Civil Engineering buildings west of the HUB.

The Waugh building will eventually be torn down to provide room for additional fraternity houses or dormitories.

Bonthorn Assumes New Post

Dr. Robert J. Bonthorn has been appointed Dean of Students at IIT beginning September 1.

In announcing the appointment Dr. James J. Morrin, Associate Vice-President, said, "I am confident that Dr. Bonthorn's empathy for students and experience in campus activities will make him most effective in discharging these new responsibilities."

The new dean succeeds the late Dr. Thomas E. Hogan who had been Dean of Students since 1941.

Dr. Bonthorn has been a member of the engineering department faculty since 1947 and was named assistant professor in 1951. He has served as a member of the Faculty Council and the Discipline Committee and as an assistant to the Dean of Engineering.

He received a B.S. degree in mechanical engineering from IIT in 1944, an M.S. in mechanics in 1952, and a Ph.D. in mechanics in 1962.

He is a member of the American Society of Engineering Education and a member of Sigma XI, National honorary research society.
TN Work Offers Variety; Staff Positions Available
by Glenn Davison

It seemed only a short time ago that finals had ended and summer vacation promised to bring a welcome relief from the burdens of homework and tests. Somehow those twelve or thirteen weeks didn't seem as long as twelve weeks during a semester.

Anyhow it is that time of year again when strong vows are made to improve that 2.00 GPA and to spend less money on "nonessential" activities. Yes, it all begins again—except for the freshman.

It doesn't just begin for the freshman but it represents a new beginning. A rather large and necessary task of adaptation stares him in the face as he sets foot on this campus. He will learn a lot in the next few months about scholarship, leadership, and organization.

Mississipi Valley Times Chief of Staff, The Times, and Assistant Editor of Technology News are usually voiced in his first issue and he, being no exception, would like to make a few points.

First, I would like to encourage all freshmen to pursue extracurricular activities. If you ask any upperclassman, he will tell you that it is well worth your while to actively participate in some organization or activity.

We are fortunate at JIT to have a large number of activities for a rather small student body. Thus chances are increased for assuming a prominent position in ITSA, Union Board, Technology News, or other organizations.

Parking Concession In Resident Lots Demands Solution

With the advent of a new school year already in progress, it appears evident that the perennial parking lot problem is getting worse rather than better, especially adjacent to the fraternity quadrangle areas.

In the middle of last week, even before the arrival of the majority of students to the parking lots, there were apparently a number of student car owners has increased sharply over the past year.

A new situation arises in the wake of this old problem. If it is true that overcrowding in the lots exists, especially if a larger fresher class is anticipated, have any studies been made by the administration to solve the dilemma?

The issue of congestion is only one problem that besets the parking lots; the issue of the deteriorating physical condition of the lots is an even more obvious and immediate one.

The occasional grading and minor repairs cannot possibly quell the overwhelming clouds of clouds of dust that arise in dry weather or the vast expanses of standing water and chasm-like pits that result from the rains.

Can the situation be handled by the administration to prevent further embarrassment or will the problem fall into the category of administration's red tape and provoke an answer only as "in the near future."

The industrial board hopes that the administration has enough foresight to recognize the need for improved parking lot conditions and will finally act to improve them.

Advice To Freshmen Includes Cultivation of Special Interests
by Mike Beletris

Technology News would like to offer some words of advice to the incoming freshman class in order to better prepare them for their academic careers. We believe that a good start would come from a student who has shown leadership in campus affairs. Michael Beletris is such a leader. He is a past EIC of Technology News, past Junior Class President, and a member of ITSAs Board of Control. He holds the general respect of the entire student body and school administration. — Ed.

Those of you who are entering JIT as freshmen are beginning what could be the most important years of your life. You are beginning your college education.

LETTER POLICY

Letters to the editor on articles previously appearing in TECHNOLOGY NEWS are welcomed. Such letters must appear typed, double spaced, signed, and written on good paper. All anonymous letters will not be printed, but the writer's name will be withheld upon request.

Letters should be limited to two hundred words. All letters will be printed, space permitting, but TECHNOLOGY NEWS reserves the right to edit any letter. All letters become the property of the newspaper and none will be returned.

The most important thing about college education is keeping in mind the concept of education. Universities are not in existence as institutions of vocational training. You are not at JIT to develop one particular physical or mental skill which will apply to some future job. If you are, stop before you pay your first $900 installment, and make your way to a vocational school and become a technician.

The process of higher education is a process of learning; learning how to think and how to relate. The process is certainly aided by textbooks, but you don't have to go to college to read or understand a book. So, there is more to this process, and more is involved extending yourself beyond textbooks and the classroom.

Each of you have special interests and talents, ranging from the novice academic to the strictly social side. And each of you will find that JItH has a full range of student activities to which you may contribute, and from which you may benefit.

Participation in extracurricular activities is, in itself, a central part of the educational process.

Viewing specific activities at JIT, you will undoubtedly become familiar with the initials ITSA, the Illinois Tech Student Association. ITSA is the student government, and you may become an integral part of this body through participation in one of the association's many committees, boards or commissions.

If you are interested in writing or journalism, Technology News has a number of staff openings in the areas of reporting, copy reading, layout, photography and cartooning. The yearbook, Integral, 1969, has similar openings. The student radio station WITI is in need of new broadcasters, engineers, and announcers.

Union Board, the programming arm of ITSA, posts a full range of social activities for students, and UB members are out to recruit students interested in helping to fill the committees of their education, films, recreation, concerts and social areas.

On the special interest side there are a number of organizations such as the Roman Catholic Newman Club, the Inter-Cultural Center, and the Afro-American students organization.

How do you get into one of these organizations? How can you help yourself and your fellow students? Well, as Bill Cosby might say, "Reach out." Begin by attending the Activities Fair tomorrow at 9 am in the Union. There you can talk with members on most any campus organization.

If you're interested in joining some organization later in the year, but don't know where to turn, read Technology News, and make some inquiries of your own, and someone will be available to answer your questions.
September 6, 1968

International Film Competition
Won By Two IIT Students

Two Institute of design students from IIT have won the first place award in an international film-making competition sponsored by the United Nations and the International Council of Graphic Design Associations (ICOGRAFA). The students, John Bieser and Stan Lepore, collaborated in making the film as their senior thesis project.

The award was presented on their behalf, Saturday, August 24 at the ICOGRAFA 1968 Congress Third General Assembly and International Congress in Eindhoven, the Netherlands.

The 16mm color sound film is based on the theme of the "Equality of Man" as set forth in the United Nations Charter on Human Rights. Filming was done in and around Chicago.

The film represents the story of a group of young persons working towards the realization of a large, impersonal, technological society," Bieser said.

Included in the film are scenes of people working at an El platform, children playing hockey, a Negro and a white youngster fighting a kite, and the computation center at IIT Research Institute.

Chemistry Dept. Names
Dr. Filler as Chairman

Professor Robert Filler has been appointed chairman of the department of chemistry, under the direction of Dr. Ralph G. Owens, Dean of the College of Engineering and Physical Sciences.

Professor Filler, who has been serving as chairman of the chemistry department since 1966, joined the IIT faculty as an assistant professor in 1951.

During the 1963-64 academic year he was a National Institutes of Health special postdoctoral fellow at Cambridge University in England. He has also been a research chemist for the U.S. Air Force Wright Aeronautical Research Center in Dayton, Ohio, a postdoctoral research fellow at Purdue University, and a chemist at Columbia University where he worked in an antimalarial program for the Oriental Institute of Research and Development.

Dr. Filler is the author of a number of books in the field of organic chemistry. He is a member in the area of fluorine chemistry, and he has presented a number of papers on this subject at international meetings both in the United States and Europe. His recent research in organic fluorine chemistry includes studies in the synthesis of unsaturated- present drugs. A program being sponsored by the National Institute of Health. Professor Filler received a B.S. in Chemistry from the City College of New York in 1943. He was awarded an M.S. in 1947 and a Ph.D. in 1949, both in chemistry, by the State University of Iowa.

Professor Filler is a member of the American Chemical Society, the Chemical Society of London, the American Association for the Advancement of Science, Sigma Xi, the honorary chemistry society Phi Lambda Upsilon, and the American Association of University Professors.

His civic activities include membership on the School's Committee of the South Shore Commission, a commissioned officer of the local citizens, and on the Board of the O'Keefe grammar school PTA.

Five Lewis Literary Winners
Are Named From Competition

Five Illinois Institute of Technology graduates and undergraduates have been named literary winners in the 1968 Edwin H. Lewis literary competition.

The Lewis winners are: Elizabeth Koulina, Macke Blanton, Ronald Taylor, Michael Belletine, and Roger Jackson.

A student, Michael Magee, received a special award of the Language, Literature and Philosophy department.

The Lewis prize awards were established through a grant to the IIT department of Language, Literature and Philosophy by Edwin G. Nourse, a 1940 graduate of Lewis Institute.

The purpose of the competition is to encourage all students who might be interested in literary talent at IIT.

Mr. Nourse set up the endowment for the prizes in 1966, and the first prizes were awarded last year. Under the terms of the Nourse grant, a committee of professors from the IIT departments determines the award winners.

An economist and editor, Mr. Nourse is the President of the Council's Financial Advisors (Planters Bank).

In fact you may be amazed to see that you aren't even recognized as "Intrigual," a yearbook, as a publication that conveys the feelings and essentially, the heartbeat of the school.

The quality of our books has been demonstrated by the 1966, 1966, edited by Steve Keller, which was selected by the Society of Typography Arts to be exhibited at the society's annual graphic arts show the following year.

"Intrigual '66 was the third yearbook to be included in the annual show. The two books prior to Keller's book, to be exhibited were Intrigual '65, edited by Mike Sheyansky, and Intrigual '63, edited by Larry Bacon.

Getting back to this year's book, the staff of the 1969 Intrigual is headed-up by Bill Partridge as Editor-in-Chief and Jim Wildenrat as Art and Associate Editor.

As you might imagine, work already has been done on this year's book. In fact photos are already being taken. However, no information is possible until now is time to get started in one of those months, whether it be working on layout, artwork, copy or photography.

A Note On Intrigual '68

As told in the previous issue of Technology News, you may remember, a number of problems with the quality of the 1969 Intrigual were encountered. Due to these problems, the yearbook was rejected and arrangements were made for the reprinting of the book.

Unfortunately, as of this date, the correction of the problems is not fully complete. However, the book will be printed as soon as possible by the end of September, 1969.

Fraternity Rush

Many freshmen entering IIT this semester will be somewhat puzzled as to exactly what is happening during Orientation Week, which is also known as Rush Week.

This year the frazzlers will be looking for prospective members who will be in accordance with the rush regulations. It is during these days that fraternity rush is held.

At night many frazzlers will hold parties in an attempt to attract more members to their house. It is during these days that rush regulations are enforced by the Rush Committee. The first few days of the week are the busiest, and it is during this time that prospective members are most likely to be approached.

Wednesday night of Rush Week is known as "Rush Night," since this is the night that frazzlers can best attract a freshman, asking him to join. But the frazzlers are not the only ones who can determine the outcome of Rush Week.

According to the Rush Week regulations, each house will be open to any one who wishes to come in and look around the house and visit with the brothers. Each house serves meals which are available to everyone.

Fraternities at this time are not allowed to have parties, and any party that is sponsored by a fraternity is forbidden.

If an attempt is made to answer these questions, a look at the rules for fraternities rushing established by the Fraternity-Fraternity Council will be of some help.

But first an explanation of a fraternity's rush week strategies is necessary.

In addition to all the activities that everyone will be involved in during this Orientation Week, all students will find it necessary to register for 12-week classes.

The registration booklets for day and evening classes can be obtained at the registrar's office on the first floor of Main Building. These booklets answer all questions concerning registration schedules and also list all classes available for the semester.

These booklets are available for pre-registration only, after the date of registration. These booklets are available for pre-registration only, after the date of registration.

Registration materials will then be distributed.

Graduate and undergraduate students must register September 9. Only those who are previously registered may change their classes. Graduates may register Tuesday, September 10, through Thursday, September 12. Graduates may register Tuesday, September 10, through Thursday, September 12.

Open registration for undergraduate students will be held September 13.

Late registrations and program changes will be taken care of through September 17. Students registered in the fall term may register through September 17. Undergraduate students may register through September 18.

Registration materials will then be distributed.

Graduate and undergraduate students must register September 9. Only those who are previously registered may change their classes. Graduates may register Tuesday, September 10, through Thursday, September 12. Graduates may register Tuesday, September 10, through Thursday, September 12.

Open registration for undergraduate students will be held September 13.

Activities

Union Board Initiates Plans for Frosh

by Charles Grisham
Union Board President

Because it is one of the major organizations on campus, Union Board is able to offer the students a wide variety of activities and interests which are so vital in rounding out an individual's social aspect of his college education.

The Union Board of IIT is the ITSA Structure Satisfies Varied Student Interests

The Illinois Tech Student Association, ITSA, is the student government at IIT. ITSA's functions fall into three main categories. The Board of Control is the administrator of the Association. The Board exercises some control of the other areas of ITSA through the approval of appointments and budgets. The Board consists of 18 members, elected by school and resident status, who along with ITSA's committees represent the student body in dealings with the administration and faculty.

The Union Board is technically a standing committee of ITSA as an organization under the aegis of ITSA's administration. The Board is a student government, and members of the Board are chosen by the student body in elections every year.

The money to support these activities is furnished through the Board of Control and is allocated approximately $50,000 every year. This money comes from the tuition and so each of you has a vested interest in ITSA's operations. It's more than just a monetary interest, however, since ITSA can be a great working model of the society which you will be entering after you leave IIT. ITSA offers experience in everything from politics to the effective use of advertising in influencing society.

This has been a brief statement of what ITSA has to offer you as a student at IIT. As part of Orientation Week activities, ITSA sponsors the Activities Fair this year. It is on Monday afternoon. We urge you to take full advantage of this opportunity.

Activities board of ITSA, and it is subdivided into four general areas of activity: Concerts, Movies, Education, Recreation, and Social. Each area is under the direction of a student Area Director who is responsible to the President.

The supervising body of Union Board is the Executive Committee which consists of the Area Directors, student officers, representatives of student government, and members of the Board of Control and the administration.

This year the Union Board has made plans to give freshmen an opportunity to see all phases of its operations. New members will be split into several small groups and rotate among the various areas. At the end of one semester a person will choose the area which he is most interested in. It is hoped that this approach will give the members the maximum satisfaction and enjoyment from his activity.

The Social Area, headed by Tom Kurce, is one of the major areas of recreational activities at IIT. The group has plans for six events this semester with the first being a mixer during the first weeks of school.

At Frosh Council is the director of the Recreation Area which is responsible for card parties, bowling, chess and other socials. They are plans for a Road Rally and Women's Lunchtime program to be made for this fall.

Education Area Director Joe McNally is in charge of sponsoring the celebrity lecture series which features talks from various authors held on weekday afternoons.

Films Area Director Jim Sals is responsible for the Friday and Sunday feature movies as well as the Wednesday art films series.

The Concerts Area is under the direction of Paul Czyczakowski who works to present the annual Union Board Concert Series. This year's concerts will include Charles Byrd, P.D.Q. Bach, and the Fifth Dimension.

Pub Bd. Serves Judiciously

by Jay Fox
past Pub Board Chairman

Publications Board, a standing committee of the Illinois Tech Student Association, serves as a judicial board over IIT student publications. At present these publications are Technology News, the student newspaper; Integral, the yearbook; and radio station WITI.

The board at present consists of eight members; five elected members, the President and Treasurer of ITSA, and a representative from the Daily Student's Board. The main function of the board is to review each publication's operation during the semester. Reports are received from the editors and business managers of each publication at each Pub Board meeting.

Publications Board is a review board in nature. It cannot act on any forthcoming issue of a campus publication. However, it can establish precedent where cases may develop which are similar in nature. The Board is empowered by the ITSA Constitution to take the necessary steps to correct an action which it feels has placed the institution in jeopardy. In such cases, a careful review is conducted by the Board, and an attempt is made to reach a workable solution with the publication's management. If this is not satisfactory, the Board may take further steps against the publication.

Publications Board appoints the editor and business manager to each publication. This is done after a review of each candidate's qualifications, and a personal interview is conducted. All business managers are appointed for one year's term. The editor of Integral and the station manager of WITI are also appointed for one year's term.

The editor-in-chief of Technology News holds the position one semester.

All appropriations to publications must pass through the Board. The publication's present financial standing is reviewed and the allocation is then examined. By handling these matters at the Board level, a composite view of the campus publications is maintained and each publication operates without the interference of the Board's activities.

ITSA President Welcomes Freshmen To IIT Campus

It is my task as president of the student body here at IIT to welcome you freshmen and transfer students to the campus. I say it because it is very difficult to just use the word welcome in greeting a newcomer to IIT.

Speaking to people who have been at Tech for any length of time, you will find nearly every possible emotion displayed—from the pouring of great quantities of information into you, to you which are often almost unbelievable.

The opportunities of our association in the university life that are available to the student who is actively seeking them out and developing them to their fullest, are almost limitless.

Perhaps the most important thing that IIT, or for that matter any university, can offer you is the chance to find your own identity. This might not mean too much to you right now, but in a year or two I hope that you will be able to see just how exciting it is to be able to say, "I am me." I am no one else. I am not my parent's kid anymore, but I am me. As I said, probably just looks like a double, talk right now, but try and keep it in mind and later on, perhaps when you're chairman of an ITSA committee, or on the Board of Control, or president of one of the many student organizations, or have achieved some particular goal you have been pursuing, or else, and ask yourself how much you have been pursuing, or else. I'm asking you to ask yourself how much you have been pursuing, or else.

I am not saying that you should pursue nothing, else. I am not saying that you should pursue nothing, else. I am not saying that you should pursue nothing, else. I am not saying that you should pursue nothing, else. I am not saying that you should pursue nothing, else. I am not saying that you should pursue nothing, else. I am not saying that you should pursue nothing, else.

So with that... Welcome to IIT John P. Huff, President, ITSA.

Campus Radio Station Broadcasts Continuously

WITT, 640 kHz, exclusively serves IIT with the modern sound in radio. The broadcasting studios are located in rooms 132 and 134 on the lower level of the HUR and the transmitter is located in the east wing dormitories.

The station operates on a carrier current system of transmission to serve the dormitories, fraternity, and dormitory areas of IIT. Because of this peculiarity of mode of transmission, WITT is best re-ceived by radios placed near or connected to the electrical wiring of the residential buildings.

WITT presents live programming from 1 pm until midnight daily except Saturday. When not live, WITT rebroadcasts WSDM-FM, thereby providing a continuous 24-hour day, 7 days a week.

Each day, WITT provides a diversified program of music including the latest pop, the best in jazz, folk, classical and easy listening music. Additionally, WITT features Six-Four Surveys keeps track of the top 40 on campus, including a special survey show from 5 to 6 pm.

The station is always open during broadcasting hours to all students. There are openings on the staff to all departments for students who wish to undertake anestation position.

Due to yearbook budget reductions the 1966 integral will be a limited edition. You may reserve a copy of the 1966 integral for the full price of $5.00 or with a partial payment of $2.00. They will be on sale during Orientation week giving you a chance to meet George Savage or Dennis Poult at Phi Kappa Sigma fraternity, extension 230.
Freshmen Elections Will Be Sept. 17, 18

Any freshman interested in running for the position of Freshman Board Representative may pick up a petition in the office of the Dean of Students beginning Tuesday at 9 am. Completed petitions must be turned in to that office by 5 pm, Friday, September 13.

Freshman Board Representatives, who are to be selected in an election scheduled for Tuesday and Wednesday, September 17 and 18, Polls will be located in the HUB and will be open from 1 pm to 5 pm on Tuesday and 11 am to 2 pm on Wednesday.

For the first three months of the semester the class of 1972 will be represented by five persons, Freshman Board Representatives, who are to be selected in an election scheduled for Tuesday and Wednesday, September 17 and 18. Polls will be located in the HUB and will be open from 1 pm to 5 pm on Tuesday and 11 am to 2 pm on Wednesday.

Freshman Board Representatives are not entitled to vote on matters before the IIT Executive Board, but are permitted to bring up for discussion any matter pertaining to the class of 1972. In early December the freshman class will elect a slate of regular officers who will be responsible for organizing and running all class activities.

A Freshman Board Campaign Forum will be held during the activities period on Tuesday, September 17. The meeting will be held in the HUB Auditorium beginning at 12:30 pm. All interested persons are invited. The purpose of this Forum will be to enable voters to hear speeches given by candidates running for office. Immediately following the meeting freshman may cast their ballots at polls located in the rear of the Auditorium.

All elections at IIT are conducted with the preferential voting system, a system that insures that the candidates elected are truly the ones the voters prefer. In the preferential system the voter selects not only the first choice candidate but numerically denotes his preference for each and every candidate. In a closely contested election, the voters second choice and even his third choice are as important as his first. In a recent election three candidates were tied in the number of votes received. After considering second choice votes, the election board opened and one candidate collected enough votes to be declared the winner.

Any one desiring further information concerning the upcoming Freshman Board Election should contact Elections Commission Chairman Gary Arts at 325-9301 or campus extension 520.

Welcome Back Ready To Start The Year?

The Commons
Soul Band Featured at Fri. “Street Dance”

On Friday, September 13, the final day of Orientation Week, the Senior Class is sponsoring ITT’s first mixer of the year. Entitled “The End of the Beginning,” the dance is staged to introduce incoming students to campus life. This year’s event takes on a new twist. It is being planned as a street dance to be held on the lawn between the HUB and Pernstein Hall. In the event of rain, the HUB Ballroom has been reserved for the evening. Entertainment will be provided by the “Things to Come” with Pierre. The group is a ten piece “soul band” and does their arrangements of the popular Temptations, Four Tops, James Brown, and Supremes songs. There is a possibility that another band or other entertainment will be added before Friday night.

Free tickets have been distributed to all students throughout the Chicago area, and a large turnout is expected.

In addition to the entertainment, ITC has agreed to hold its annual barbecue in conjunction with the event and will provide free hamburgers and drinks to all those attending.

Gene Bauer, President of the Class of 59 and dance chairman, commented: “The other class officers and myself have attempted to stage something which would be unique at Tech. I’m very happy that the fraternities have agreed to add their support. This should add to the success of the dance.”

John Huff, president of ITSA, stated that he hoped all the freshmen would participate and kick off what could be ITT’s best year.

The dance will take place from 8 to 12 pm and those who wish to come will certainly be invited to join in the fun.

Friday Housing Payment Due Soon at Cashier’s

All returning students and entering freshmen who will be residing in the dormitories or living in a fraternity house are to make their initial room and board payments at the Cashier’s office in the Commons building at 3200 S. Wabash Ave.

The Concert Series ticket books will be on sale for $14, $15, and $18 during Orientation Week. The “1969 graduation” will perform May 5, 1969 instead of the Sergio Mendes concert due to construction difficulties.

These payments must be made upon checking in at the Cashier’s Office. They may be made in full or, if a payment plan is selected, the installment payable at check in may be submitted.

Upon initial payment toward the semester’s residence hall contract, the housing office will send a notification of the course work the student will be required to complete.
