Homecoming Begins Tonight

Basketball, Dancing Tonight

Homecoming activities will be in full swing tonight when the torch is put in the mammoth pile of wood, branches, and one pong pong table in the field east of Arthur Keating Hall.

This bonfire, constructed by the freshman class, will be lighted at 6 p.m., commencing what proves to be an event-filled evening.

Daytime events leading up to the bonfire include the judging of the many decoration displays on campus and the final voting for the Homecoming Queen.

All nine Queen candidates will tour the campus to observe the decorations and ultimately choose the one worthy of first place. Judging will begin at 3 p.m. with the trophy being awarded the winner during halftime of tonight's basketball game.

Voting for our Queen will continue at the election poll in the HUB until 8 p.m. tonight. The Queen will then be announced and crowned during halftime of the basketball game.

The basketball game, which will follow the bonfire and resulting pep rally, should start around 7 p.m. The opponent will be Rockford College and the contest will be our first home game of the season.

One unique aspect of the game will be the debut of IIT's cheerleading squad. Composed of eight coeds, the squad has been practicing since the past few weeks in anticipation of the season and will be a welcome sight on the basketball court.

Immediately following the basketball victory, attention will shift to the HUB where the evening dance will be held, starting around 8:30 p.m.

The featured band is the Steppin' Stones, a local band which has been heard on the radio frequently over the past few years.

The term of drumming and coordinated light effects will provide a contrast with that of the other featured band. The Fuzzy Jacks.

Classified by many as a real band, the Fuzzy Jacks have won big crowds from Champagne where they are students at the University of Illinois.

These two bands will be performing in the HUB cafeteria while the IIT Dance Band will be providing a more subdued and romantic mood in the Ballroom.

Tickets for the dance can be purchased for $2 at the HUB newsstand and from fraternity and dormitory salarieds.

Elmwood Pool will be the scene of Saturday's action at 1 p.m. which will begin the second day of Homecoming 68. The tenkam of IIT will compete against the swimming team of Milwaukee Institute of Technology.

Following the swimming event will be the second basketball game in as many days in Arthur Keating Hall. The Techawks are hoping to make a weekend sweep by defeating Rockford tonight and Griffith at 3 p.m. tomorrow afternoon.

The action will transfer to the HUB at 7 p.m. where a series of Flash Gordon films will entertain the audience until 9 p.m. The films are being sponsored by the Committee on Union Board Films.

Highlighting the evening are the Four Seasons in Arthur Keating Hall at 9:30 p.m.

The seating has been divided into three sections and students will be seated according to proof of ticket.

The Four Seasons and the Four Seasons have enjoyed the distinction of selling more records than any other group now recording in the United States. Their first hit, "Sherry," presented them with their first gold record, representing a million sales or more. Since then they have added other golden records to their collection.

Guest appearances on the Ed Sullivan Show, the Steve Allen Show, and the Dick Clark Show helped to boost their popularity. Recently the Four Seasons have been preparing night club showings across the country, attracting millions of listeners in seven years performing.

The soothing sounds of Frank Valli, first tenor; Bob Gaudio, second; and Tommy DeVito, bass, should cap the weekend with a memorable experience.

Tickets are still available. Combined tickets for the weekend can be purchased for $2.40 at the HUB newsstand or from the dormitory house. Concert tickets are only $1.50 and $2.40 while dance tickets are only $2.
Technology News Supports CRC Concert Resolution

It is doubtful that anyone would disagree with the fact that a state of tension exists between IIT and the community. There is much that surrounds this conflict.

Only the most apathetic would allow such tension to continue indefinitely. Only a fool would wish to increase the temperature even more.

The ITSA Community Relations Committee, working jointly with members of the Black Student Organization, has come up with an idea which I hope will ease the tension, as well as help wipe out the state of ignorance which exists between "our worlds" and the community. The ignorance which caused the tension in the first place.

A musical group of the community, "The Pharaohs," has agreed to coordinate a concert which would present a selection of classical and popular music of the Afro-American Culture to students of IIT. Cost to IIT: $2,000. Condition: That members of the surrounding community be admitted to the concert at no charge.

As Tim Holly, CRC member said, "The money is more than IIT wants to have the concert, they will come up with it."

The surrounding community will not be satisfied with empty promises made by delegations composed mostly of hot air. No other community would be, either.

The Community Relations Committee is asking for the support of everyone: students, faculty, administration, and alumni. The purpose of every- one at IIT that will demonstrate our willingness to accept and try to understand the people who live around us.

There are those who will say that the community should have put the concert on for free. This, however, would eliminate any "real" gesture on the part of IIT. Money talks.

The Editorial Board of Technology News supports the idea of holding a concert open to members of the surrounding area. This means that we are willing to contribute money as well as publicity. Five dollars is a small price to pay for the opportunity of furthering one's understanding. The money contributed will help IIT take the first step towards discovering who lives on the other side of the fence.

Next Friday, December 13 will mark the last issue of this semester's TECHNOLOGY NEWS. The date of the first issue of next semester is February 4, 1969. Anyone interested in submitting copy for printing this semester should turn their material in by Tuesday, December 10, 1968.

Pilsner ITT

"Compulsory" Attendance Needed for Homecoming

Trying to make Homecoming '68 a success has not been easy. Prospects for a grand time on the level of last year's event was very discouraging in September and October. Contracts for the two-day event had not been signed and the Homecoming Committee was still trying to come up with a feature attraction.

But definite commitments in November gave promise that Techawks should not count December 6 and 7 as "normal" routine days. A large amount of time and effort from many individuals has gone into this event in order for it to be a memorable occasion in everyone's mind.

The weekend is finally here. Fraternity house and campus buildings have been decorated to promote the theme of Homecoming. The basketball and swimming teams have practiced hard to insure victories during the two days. New ideas were initiated in order to stimulate interest.

A good representation of organizations nominated IIT cooks for Homecoming queen, in fact, more than last year. Now it is our turn. We as individuals and students must participate in the activities if we want more Homecomings in the future.

All-school parties at Saber's Bratwurst house and campus buildings have been decorated to promote the theme of Homecoming. The basketball and swimming teams have practiced hard to insure victories during the two days. New ideas were initiated in order to stimulate interest.

Local "compulsory" attendance policies in schools is the only way to have a great Homecoming. So forget about school work. Go to the games. Go to parties. Go out and have a great time.

Davidson

Views on SDS, Independent Press

Dear EIC,

To argue with criticisms leveled by SDS and BSO against IIT and the U.S. society is like arguing about motherhood. To argue for solving the problems of IIT and its society is quite different. The "new left" groups such as SDS call for still more regression to socialism to solve our ills. It is because our citizenry left the progressive action under our constitutional Republic, that most of the ill of our society exist.

It is for us to turn from the regressive feminism of socialism and turn towards the masculinity demanded by our constitutional Republic. Masculinity in nations and men is demonstrated by law, discipline, justice, pride, the heroic, and virile; femininity by materialism, dependency on others, gross emotionalism, absence of genius, greed, lust for power, and enviousness. A masculine nation seeks what is right and has vision; a feminine nation seeks what is immediately satisfying and rich. Richness is the cause of disintegration. An American nation is a group of individuals; a feminine nation has an intense desire to control and dominate.

The ends justify the means; the answer of the "new left" will turn academic freedom into making freedom producer of society. Freedom of speech will be rekindled in the community. They, of course, will not relinquish their education and student government under the guise of academic freedom.

Is it the responsibility of each student to know whom he elects to lead? It is the responsibility of the administration to assure quality education to produce quality citizens. Our universities must not become centers for revolution as Berkeley has become. Students, our choice is the soft slavery of socialism or the hard freedom of a Republic with individual responsibility.

Leroy Vandergrift

BSo Presented

Dear EIC,

In response to the courageous student who spoke up for the opinions of the silent majority on campus, I too would like to voice our objections to the meager activities of the various bubble-rous ing organizations at IIT.

We also object strongly to the present situation, where the effects of hard-working IIT students are overshadowed by the feeble attempts of Black Students Organization, Students for a Democratic Society, and the Independent Press, to create havoc on campus.

We would like to think that, no matter how strong, narrow-minded, and (a) pathetic the majority of IIT students are, that they, in the long run, will prove to be the true servants of society. We appreciate their sense of indignation, but thought that any ingrates would demand a change in the so-called "oppressive"

Robert J. Nisbett

**Dennis Plouff Appointed Spring TN Editor-in-Chief**

In a special appointments meeting of Publications Board held on Tuesday, November 26, Dennis Plouff was named as the new Editor-in-Chief of TECHNOLOGY NEWS for the next spring semester.

Plouff, a fifth semester civil engineering student, has served on the Technology News staff for all five semesters in the capacities of reporter, special correspondent, layout editor, features editor, and presently as managing editor. In respect to next year's paper, he mentioned, "The spring semester will be spanning a larger than this semester. I'd especially like to see a large increase in the number of writers in order to ease the burden on the two editors who did a lot more work this semester than should have been required of them."

"Our main problems will involve recruiting new personnel and organizing them into an efficiently working staff."

**CRC Seeks Support For Concert**

Raising the $20,000 necessary to present the planned community concert to IIT students and the surrounding community was the chief topic of discussion at the December meeting of the ITSA Community Relations Committee.

In an effort to garner the support of the entire body that is IIT, the CRC is sending the following letter to student organization leaders, faculty members, and department heads, as well as alumni:

"The ITSA Community Relations Committee would like to fulfill all our students and alumni's requests..."..."You are invited..."..."IIT Student and Alumni Relations Committee..."..."We wish to help promote understanding and foster educational and cultural stimulation in the best interests of improving the existing relations with the community. The students and faculty do not understand the very little about the people of the neighborhood and their culture. Conversely, the neighborhood residents do not understand that they benefit either directly or indirectly from the work we have to do."

"In order to promote understanding and open lines of communication between the students and the neighborhood, the Committee on IIT and the community, the Committee is organizing and supporting a free concert for all students and neighborhood residents. The concert will be held here and IIT and will feature popular neighborhood musical and cultural groups who will introduce us to Afro-American culture. There will be no admission charge, but the committee is responsible for all funds raised. The concert cannot be scheduled until we have sufficient funds to cover costs. To do this and to show that we are a force to be reckoned with, we are asking the students, faculty members, and alumni to back our effort. We are asking the students, faculty members, and alumni to back our effort. We are asking them to subscribe to the concert by purchasing a patron certificate for the sum of five dollars, or to suggest other means of raising funds. This subscription enables them to be listed as a patron sponsor of the concert and to be listed on the program as such."

President Retaldrad, in his opinion regarding the situation, said that he hadn't heard of the plan. Of the interview with President Retaldrad, Wu said, "The meeting was generally unproductive. Many of the basic rooms which could have been of use were being resubscribed. However, I suppose that the meeting was a starting point."

President Wu has recently informed Technology News that he will be running a Board of Freshman office, already forming the Board of Freshman Class. Also no petitions have been turned in for Freshman Class Secretary.

**Christmas Tree Decoring Party**

On December 11, the International Club will be holding a Christmas Tree decorating party in the southern part of the Hub. Anyone who is interested in helping to decorate is invited to come. The theme is International Christmas. There will be a tree for each continent. Bring home for decorations and cookies and a voice for singing.

**SING OUT**

On December 17 the International Club will be sponsoring a community concert in the Hub. It will start at 9 pm and will last until people get tired of singing. Admission is free so bring a friend.

Distinguished British Actor To Star In Original Production of 'By George'

By Delia Hayashi

George Bernard Shaw for many years dominated the theatrical world. His influence as a playwright is perhaps even greater than his popularity. Although somewhere in the world one of Shaw's plays is always being performed for entertainment, he saw that the play should also be as dedicated to the life and welfare of the nation as a church.

The original production of the London-Broadway stage comedy hit "By George" was based on Shaw's life and will be presented on Monday, December 9, at Grover Hermann Hall.

The presentation is being sponsored by TRW Inc. and stars the distinguished British actor Max Adrian as George B. Shaw.

TRW's vice chairman, Dr. Simon Ramo has explained that the company has always been interested in innovative ways of communicating with campus communities. As part of a new experiment in business-education relations, the production is appearing at 40 of the nation's leading colleges on a no-charge basis.

It is the primary purpose of the tour to extend TRW's dialogue with the nation's college campuses. A second objective is to help broaden student appreciation of the arts.

"By George" is believed to be the first time a business firm has sponsored a professional Broadway play on campuses. Offered to selected colleges, TRW's cross-country tour of this one-character comedy began October 28 at Massachusetts Institute of Technology and ends January 25 at Seattle University in the University of Washington.

Produced in association with the New York City-based theatrical producing firm of Arthur Cantor and Nicholas Varoff, "By George" stars Max Adrian in the multi-act, acclaimed role he created in 1956 at the Edinburgh Festival and later performed in London and Broadway stages.

Adrian has an uncanny resemblance to George Bernard Shaw. The words were given to Adrian: he took them and became Shaw. The three-act play depicts Shaw's developmental stages in his adult life.

Hypnotist Entrescees Student Volunteers At Newman Meeting

"Hypnotism" was the drawing card of the Wednesday, December 4 meeting of the Newman Club. In a talk given by James C. Erdman, an instructor at the Hypnosis Institute of Chicago, a brief definition of hypnosis was given. Many of the fallacies of hypnosis were cleared up, and an actual demonstration of hypnosis was given.

"Hypnosis is a state of mind induced by suggestion," said Mr. Erdman. "It is that and nothing more. But by its very simplicity, hypnosis is actually quite complex, and of course, can be dangerous if employed improperly."

To clear up much of the existing horror on hypnosis, Erdman told the group that it is totally impossible for a person to be hypnotized against his or her will. He mentioned, in fact, that sometimes people cannot be hypnotized even when they desire too, because they are "too willing."

The school of that he represents, Erdman told the group that they accept all applicants, including college-aged students. The school offers instruction on group hypnosis, self-hypnosis, and therapy. Mr. Erdman closed the meeting with an actual demonstration.

Working with a group of ten volunteers, Erdman succeeded in putting over head in a light trance. After putting the volunteers in a light hypnotic state, Erdman told the group that they were going on a picnic. By simple suggestions, the hypnotist moved the group to a spot where they were extrememly hot, cold, etc.

Erdman convinced one young lady that she could not feel her hand in one of her hands, he passed a lighted cigarette lighter several times under her hand, and the girl never flinched.

Piraikon Theater To Present Play On December 15

The Inter-Cultural Center is presenting for group bookings at a reduced rate for the December 15 performance of the Greek drama "Philoctetes" by Sophocles. The play will be performed by one of Greece's top theatrical companies specializing in classical drama, The Piraikon Theater.

The December 15 play is part of a series of dramas being presented by The Piraikon Theater at Chicago's Auditorium Theater. The company will perform two other Greek tragedies on December 10 and 12 as well.

All IIT students are invited to attend the December 15 performance. Those who would like to serve a ticket should call or drop by the office of the Inter-Cultural Center, E.M. Building, etc. and get involved in the challenge of Israel.

GET INVOLVED IN THE CHALLENGE OF ISRAEL

SHERUT LA'AM (SERVICE CORPS FOR ISRAEL)

If you are between 18 and 30 you can consider a number of opportunities available to serve in Israel and form yourself:

1. PROFESSIONAL & SEMI-PROFESSIONAL
   A) Service as a teacher, group worker, engineer, etc.
   B) Continue your service for a second year, or
   C) Register for a second year at an Institute of Higher Learning in Israel if you are a college graduate or undergraduate entering your third year of studies.

   Departure: July 1969
   Cost: $570 round-trip airfare and orientation costs
   Limited number of partial loans available for professionals only.

2. KIBBUTZ PARTICIPATION — ONE YEAR
   Unpaid experience in communal living
   Departure: September 1969
   Cost: $470 round-trip airfare and orientation costs

3. SIX-MONTH KIBBUTZ PARTICIPATION:
   Departure: January 1969 and approximately every 4 months thereafter.
   Cost: $570 round-trip airfare and orientation costs

Play Makes Debut at Hull House

by Terry Putula

The Roanoke Register and Times-News, which was attending the University of California at Berkeley, said its Midwest debut at the Hull House Theater on Friday, December 13.

Alpha Sigs Win IF Sing

by Ben Furino

Saturday, November 23, the Interfraternity Council presented IF Sing which proved to be an extremely close contest.

In first place was Alpha Sigma Phi, under the direction of John Baiza. Right behind them was Phi Kappa Sigma. The Skulls, under the supervision of Tom Escott scored a mere six points less than the leaders.

Triangle, last year's winner, would have taken first if it had not been for the loss of a point. As it was, they placed third.

The judges for this year's sing were Maestro Silvio Iovane, Mr. Robert McCoy, and Mrs. Marguerite Radatz. They are all qualified musicians, some of whom help Interfraternity Sing could not have been the success it was.

The standby bag and how to get out of it.

Here's the scene. You want to go somewhere. You want to fly. So you make it to the airport and try to get on a plane. Maybe you do, maybe you don't. Get out of the bag. Allegheny gives you advance reservations to get you where you're going, when you want to go. All this at up to one-third off the ticket price when you purchase our Young Adult Card. You can't get away when you want to. Even holidays. Who wants to wait?

Going somewhere soon? If you're under 22, stop by any Allegheny ticket counter, purchase your Young Adult Card and save up to 33 1/3%. From there, the sky is yours.

Young adults in a hurry fly Allegheny.

Scene from Hull House production of "Johnny No Trump."
BUSINESS MYTHS VS. REALITIES

Dear Mr. Bookspan:

Unquestionably our central cities are faced with the explosive pressures of the industrializing world and the resulting strife of slum housing, relative poverty, hard-core unemployment, traffic congestion, air and water pollution. This is not a new problem, but the urgent demand for solution is underscored by the many episodes of freely-triggered violence which scar our cities today.

Yet paradoxically, as these crises worsened, our overall economy has witnessed unparalleled productivity, higher employment, and living standards for the large majority of our population than ever in history.

In this, this has precipitated a trek to suberbia of such proportion that many downtown residential areas have been virtually abandoned to a highly explosive, usually non-white, residual population.

There are no pat solutions to these problems. Consider for a moment the magnitude of the efforts during the past thirty years relative to urban renewal, public housing, and the war on poverty. The results have fallen far short of the expectations voiced by those who advocated massive public spending and the multiplication of all additional governmental-agency programming. In this context, I think it is not an exaggeration to say that the defining of goals for the community, and the determination of the means for their achievement, was regarded strictly as governmental prerogative and strictly outside of business' purview.

Yet in this there is now an increasingly vocal groundswell which private industry should understand the need to solve the more pressing urban problems - if only its attention can be diverted from its 'blind pursuit of good works' and its social conscience awakened.

As Kenneth Clark, the well-known Negro psychologist, has said: "Business and industry are our last hopes because they are the most realistic elements of our society."

To assess the collective activities of business throughout the nation, in developing and implementing practicable solutions for varying aspects of local problems, is manifestly impossible. But let me mention a number of typical examples in the field of air and water pollution.

The auto, steel, oil, rubber, lumber, paper, and chemical industries, to name a few, have expended literally billions of dollars in applied research and in the installation of mechanical apparatus for the appreciable reduction of smog, noxious fumes, dust, silt, and other air and water pollutants. Examples: the steel industry in the Chicago area has eliminated 27,000 tons of the 98,000 tons of particulate matter that accumulated annually to aggravate the city's air problem... Chrysler, Ford and General Motors have programs ranging from the control of fumes given off in paint to auto bodies, and water pollutants from chromating processes... to dust collectors at foundries... to intense research for economically practical automatic exhaust controls... Crown Zellerbach has developed means to eliminate 15% of the solids and 95% of the hydrogen sulfide from gases leaving its kraft mills... Dow Chemical has instituted various successful methods to reduce water pollution from industrial plants, and to reclaim certain types of plants... natural streams... In Goodyear, installation of a $750,000 waste water treatment system at our facilities in Gadsden, Alabama, assures purification of millions of gallons daily before return to the Coosa River. Moreover, air and water pollution control equipment is being installed in some eighty other plants, while all new facilities under construction, or those recently built, have such controls in their specifications. All of this has been done voluntarily. Does this action bespeak of "Profits Now," as you suggest?

But industry isn't the only source of air and water pollution, much needs to be done in the areas of public and private housing, sewage control, and garbage disposal... just to name a few.

Slum housing, hard-core unemployment, education, and traffic congestion also are the focus of direct business involvement. In short, business is responding to the challenge of the times by channeling some of its capabilities directly to the requirements for the solution of some of the vital problems set before us. Westinghouse, alone, is spending millions of dollars to alleviate the area and the lives of others is considerable. Business' success in such programs results solely from capabilities which have been perfected through the discipline of our free enterprise system. Business' real forte lies in its effective meeting of customer needs and demands by the translation of creative research production, and resources through the mastery of skills under the incentive of profit-making. The profits generated as a result of this process provide the underpinnings of our entire economy.

In other words, business is in business to make a profit. It is only through the accrual of profits that funds are available for all social improvement programs, whether originated by the public sector or at the instance of business' own initiative, or jointly with government.

A thorough appraisal of the record, therefore, will reveal that the nation's business community - both on its own and in concert with government - is developing, implementing, and expediting efforts to solve the problems which you so rightly say demand attention. In terms of responsiveness to these needs and increasingly effective solutions, I think a noteworthy record is in the making, with expenditures ranging in the billions.

Without profits, this money would not be available for these programs, which offer no monetary return to industry whatsoever. Sincerely,

Russel DeYoung, Chairman
The Goodyear Tire & Rubber Company

BUSINESSMEN ARE.

Three chief executive officers - The Goodyear Tire & Rubber Company's President M. D. Dean; and Chairman, Russell DeYoung; The Dow Chemical Company's President W. D. DeGarmo; and Chairman, Robert W. Galvin - are responding to severe questions and viewpoints posed by students and others in their changing society... and from their perspective as heads of major corporations are exchanging views through means of a campus/corporate dialogue program on specific issues raised by leading student spokesmen.

Here, Mark Bookspan, an Ohio State Chemists major, who plans a medical career, is exploring issues with Mr. DeYoung:

In the course of the full dialogue program David G. Clark, a Master of Arts candidate at Stanford University, also will explore issues with Mr. DeYoung, as will David M. Galvin, Electrical Engineering, Michigan State, and Stan Chex, Journalism, Cornell, with Mr. Dean.

These dialogues will appear in the publication "Forums and Chambers" a campus newspaper sponsored by the National Rural American Studies Fellowship, and in the "Ohio, Mr. Dean, Dow Chemical Midland Michigan, or Mr. Galvin, Michigan State, Park Illinois, as appropriate.

You'll see them in the campus papers... the campus community has been very receptive to them. You'll find them valuable as a model of the kind of campus dialogue that could be held in any college or university, throughout the country, particularly this academic year. Campus comments are invited and should be directed to Mr. DeYoung, or to Mr. Galvin.

Sincerely,

Arthur M. Kiebpa
Chairman
Government, Yale and Arnold Shley, Latin American Studies, Tulane, with Mr. Galvin.

Doan.

These dialogues will appear in the student publication "Forums and Chambers", a campus newspaper sponsored by the National Rural American Studies Fellowship, throughout the year. Campus comments are invited and should be directed to Mr. DeYoung, or to Mr. Galvin.
When you start knocking on doors try ours first.

You'll find the type of company and job you've been preparing for. A company in the forefront of advancing technology...with diversified capabilities...and a healthy mix of government and government branches.

You'll be able to choose a creative career in fields such as underwater acoustics; radar; communications; space systems or computer technology.

Cagers in Back-to-Back Contests This Weekend

The Tecahawks are particularly anxious to prove themselves before the home fans after their season opener last Saturday at the University of Dubuque.

The Dubuque squad took the opener from the leas Teahawks by a score of 85-70. Most of the difference was due to the fact that the Hawks had spent most of the preceding afternoon in a long training camp ride out to the towns campus.

The factor of fatigue proved decisive in the last four minutes of the contest. At that time the Teahawks were playing Dubuque to a standoff. However, the long day began to take its toll, and our guys couldn't go longer after rebounding with the aggressiveness needed.

Rick Klaus of IIT led all scorers with 24 points. Teammate Ken Wayne chipped in with 19. The rest of the squad failed to carry its weight, however, in no one the managed more than six points.

Dubuque had five men in double digits in the scoring column.

Kritz and Brunette alternated on the forward spots and produced 22 and 14 points respectively to pace the attack.
