IIT Professors Are Recognized For Individual Achievements

By Dr. Henry Knepler

Dr. Henry Knepler, Professor and Chairman of IIT’s Language Literature and Philosophy department, has straddled the worlds of The Theatre and History and written The Gilded Stage, "The Years of the Great International Actors."

The Gilded Stage, published by Wm. Morrow & Company and giving on sale September 26, deals with the lives of the four great international actors of the 19th century—Rafael Felix, Guita de Rassor, Sarah Bernhardt, and Eleonora Duse.

In an interview with Technology News, Dr. Knepler told why he selected such topics.

“...There are a number of reasons,” Knepler states, “First of all, I consider the theatre my field. Secondly, 19th century theatre has always been most interesting to me. Finally, I feel that these four actors present us with a good picture. This was the period which existed in the 19th century. This was the period of the champions—the Rockefellers, the Carnegie, the Vanderbilts, the time when competition was at its bleakest between men. Likewise, the four scenes in my book—but perhaps the last of the great competitors in the international theater."

Research for the book was done over a period of many years by the libraries of Chicago, New York, IIT, the University of Chicago, Harvard College, and the British Museum. Dr. Knepler admitted that he did not initially set out to write The Gilded Stage, but rather decided to write it after he had already accumulated material on the subject for other reasons.

Dr. Knepler received his Bachelor’s and Master’s Degree in English from Queens College, University of Canada, and obtained his PhD from the University of Chicago. In the next few weeks he will be appearing on various radio and television patterns discussing shows to introduce The Gilded Stage to the public.

Mbatu Heads New African Studies Course

by Dori Hayashi

Unless directly confronted with the undifferentiated truth, many people remain unaware of the situation as it presently exists in South Africa. Much more honestly reported information must be made available and for this reason the Political Science department has instituted a course in its curriculum. The Politics of Race Relations.

Working within the structural framework of the development of a racist thought in South Africa, Professor Jeremiah Mbatu, presently teaching the course, hopes to draw parallels and form comparisons with the hope of analyzing this trend in social, philosophical, and psychological phenomena.

Deported from his home in Johannesburg, South Africa, Mr. Mbatu arrived in the United States in 1967 and became a coordinator in the Program of African Studies at Northwestern University. Mr. Mbatu openly stated his opposition to the system of apartheid prevail in South Africa and from this reason the Political Science department has instigated a course in its curriculum. The Politics of Race Relations.

New Programs Discussed At ITSA Meeting

The Illinois Techn Student Association Board of Control will meet formally for the first time on the semester on Wednesday, September 25 in the ILU at 7 p.m.

The Board of Control already met informally on Saturday, September 7, at the 50th on the Lake Restaurant to discuss the present semester’s programs and policies.

The important topics of the meeting concerned student government changes and Homecoming plans for the year. At present the Board is planning to form three policy committees, monitoring academic, non-academic, and volunteer affairs. John Harte, ITSA President, states that there remained much work to do on the committees before they could be considered. Homecoming plans are, according to President Harte, "a lot of work." Although the Homecoming Committee has planned a well coordinated program for the December 4 and 5 affair, they have been having a great deal of difficulty in lining up entertainment. and time is running short.

In closing, Harte had a two-fold message for IIT students: "The students must remember that the ITSA is not part of the government, and the Board of Control representatives must not forget that it is their responsibility to represent their constituents."

Durenholzer Given Annual ASME Award

The George Westinghouse Gold Medal for distinguished service in the field of mechanical engineering was presented to Dr. Ronald A. Bedenholzer, whose mechanical engineering at IIT on Tuesday, September 17.

The award was presented in San Francisco at a luncheon of the Joint Power Generation Conference cosponsored by the American Society of Mechanical Engineers and the Institute of Electrical and Electronic Engineers.

Professor Bedenholzer has been associated with IIT since 1952. He has specialized in the fields of thermodynamics and heat power engineering. In 1952, he was instrumental in organizing the American Power Conference and has served as its director ever since that time. Previously, he had been director of the Midwest Power Conference.

The American Power Conference is the largest independent electrical power forum in the nation and is held annually in Chicago. It devotes itself to the generation, transmission, distribution, and utilization of electric power. Professor Bedenholzer recently returned from the Soviet Union, where he represented the American Power Conference at the World Power Conference.

New IIT Group Formed

Will your biases be stolen this year? The Committee Against Student Terrorism predicts that campus violence will rob the nation’s students of classroom and instruction and of dollars.

"Even greater loss for the individual will be the erosion of his right to live in a society which has the institutions of physical force," says David Connolly. "CAS director." Student practice has been transformed to intellectually oppose the Nazi-like storm trooper tactics of various student groups which seek political goals by means of force."

CAS is not connected with IIT in any way, although a student director of CAS will soon be officially recognized. Last spring, members of CAS distributed 1,000 copies of Robert E. Howard’s famous article "Campus or Battle Ground?" to campuses in the Chicago area, including 900 copies here at IIT.

First appearing in Barron’s National Business and Financial Weekly, Howard’s article shocked the causes and uses of the SDS attack at Columbia University. During the Democratic National Convention, CAS distributed to the delegates 8,500 copies of another Barron’s article "Ballots or Bullets?" written by Walter White, Jeffery St. John, plus 8,500 copies of Howard’s article "Ballots or Bullets?"

CAS is not connected with IIT in any way, although a student director of CAS will soon be officially recognized. Last spring, members of CAS distributed 1,000 copies of Robert E. Howard’s famous article "Campus or Battle Ground?" to campuses in the Chicago area, including 900 copies here at IIT.

The group at IIT received permission from Howard to call itself CAS as long as it upheld the principles of the original group. Articles about the newly formed group were published in the Chicago Sun-Times and in the Tower Tribune.

J union Board will be holding a meeting Tuesday, September 24 at 10 p.m. in the ILU for all those interested in working on the Board.

All those interested in working for Integral '69 should attend the meeting in the ILU on Tuesday, September 24 at 10 p.m. Coffee and donuts will be served.

The name of the organization was a creation of Mr. Bucher at Brook College. Another closely related group was the Committee in Defense of Property Rights at Columbia University, which played a role in the Columbia crisis.

Editor Praises Administration For Improving Racial Policies

The responsibilities for the EIC of any student newspaper are more than what merely meets the eye. For instance, besides being the chief organizer of the production, he must keep his ears tuned to student sentiment on campus whether he agrees with the majority or not. Student expression lacks unity on this campus. Therefore, most movements become a lost cause at the outset.

However, even though individual participation seems to be a rare characteristic of the average Techowan, a movement initiated by the Black Students Organization last spring did achieve significant recognition. Although it is difficult to judge the effect of the movement on the administration, certain trends indicate that the pleas of the Black Students Organization did not fall on deaf ears.

It is quite evident that the enrollment of black students has increased markedly over the previous years. Included in this number are several college transfers from schools of majority-black enrollment.

Several summer programs are offered by H1T to aid deprived students and prospective applicants in their endeavors for a college education. Substantial grants from the government are available for students from lower-income families who possess a desire to attend a college or university.

In addition to the extra training programs provided by H1T, a group of students from Dunbar High School were given special assistance in English under the tutelage of an H1T English professor. Similar tutorial programs have originated from H1T students themselves and an effort is now underway to unite these separate, experimental programs under a single leadership.

Additional funds are being sought from the government to increase and improve upon the programs now begun. It must be noted that work in this field has only begun and that it is still susceptible to alterations and experimentation; however, a good foundation has been laid upon which further improvements can be made.

The gym was open this summer to 200 community teams as part of the Mayor's Commission on Youth Welfare. The gym's use during the school year will be reserved for the students and faculty of H1T but discussion is currently underway concerning open hours.

Finally, a part-time professor from Johannesburg will present a course in the politics of race relations in South Africa. Eventually, more courses of this nature will be added to the H1T curriculum.

All of these events only represent a beginning — a new effort to overcome the barriers that separate the races, a new effort to promote a healthy relationship between H1T and the surrounding community.

A long road lies ahead but I think that the administration should be praised for the effort displayed thus far. By all means, the work must continue. I urge that the administration take full advantage of the opportunity they have to develop a sound relationship between H1T and its neighbors.

LETTER POLICY

Letters to the editor on articles previously appearing in TECHNOLOGY NEWS are welcomed. Such letters must be typed (double spaced), signed, and written in good taste. Anonymous letters will not be printed, but the writer's name will be withheld upon request.

Letters should be limited to two hundred words. All letters will be printed, space permitting, but TECHNOLOGY NEWS reserves the right to edit any letter. All letters become the property of the newspaper and none will be returned.

to get back overdue books from the students. Besides levying fines, the library issues three warnings to the student. If the book is still not returned, the Dean of Students' office can act by withholding grades.

However, the problem of books being kept past the due date by faculty members cannot be so easily solved. Faculty members are given a special library privilege in that they do not have to pay fines. This gives occasion for the greater degree of trust the library has for the faculty over the students.

As a greater trust in the faculty is seemingly well-founded, but there is evidence that a few faculty members have had a substantial number of library books in their possession for quite a long time, this trust should seem to fail.

When books are selfishly kept by anyone, many others who would like to use them are cheated. A public library cannot function properly in this way. The usual courtesy by all library users, including faculty members, is urged.

Announcements

Placements

Placement orientation will be held Octo-
ber 1, 1968, 12 noon, in the Smith Auditorium. Perkins Hall. Infor-
mation pertaining to the PE exam is scheduled also.

Scholarships

Applications for all Fullbright Scholar-
ships must be turned in to the Dean of Students' office by October 1, 1968.

Junior Class Officers

There will be a meeting of all the Jun-
ior Class officers in the Delta Tau Delta library at 1 p.m. Tuesday, Sep-
tember 24.

IEEE

The Institute of Electrical and Elec-
trical Engineers will hold a general meeting Tuesday, Septem-
ber 24, from 1 to 2 p.m. in room 301 of the HUB. The IEEE student
members will speak on summer job opportu-
nities in industry.

TN Set Policies Toward Upcoming November Election

In a meeting of the Editorial Board of Technology News, it was decided that no board member would write editorials until after an advisory survey of the presidential candidate of the upcoming election.

The Technology News is, however, a student newspaper and therefore obligated to voice the opinion of the student body, whatever that may be. The Board of Technology News has decided to allow an open forum for directed student opinion on candidates of the presidential race. No student will be allowed to have space in any student of H1T who wishes to express his or her political views on a particular candidate.

Students interested are hereby contacted by any member of the Editorial Board. All editors will be printed, space permitting, but TECHNOLOGY NEWS reserves the right to edit any letter. All letters become the property of the newspaper and none will be returned.

Dates for Rosh Hashana are the evenings of September 22, 23, and 24 and Yom Kippur, the evenings of October 1 and 2.

Junior Class Officers

There will be a meeting of all the Jun-
ior Class officers in the Delta Tau Delta library at 1 p.m. Tuesday, Sep-
tember 24.

IEEE

The Institute of Electrical and Elec-
trical Engineers will hold a general meeting Tuesday, Septem-
ber 24, from 1 to 2 p.m. in room 301 of the HUB. The IEEE student
members will speak on summer job opportu-
nities in industry.

ships must be turned in to the Dean of Students' office by October 1, 1968.

Student and Faculty Abuse Of Library Is Intolerable

The true center of knowledge on any college campus is undoubtedly the school library. The library is the one place where all students, regardless of their specific areas of education, can come in quest of answers concerned with every aspect of society, social as well as academic. The individual academic buildings on campus represent education which is selective in specific areas. The student can only absorb that knowledge which is presented to him by others. It is, in a way, a restrictive sort of educational process, because the student has little to say about what will be taught to him.

The library exists for the purpose of self-education. Here students can expand their learning to any level they desire. They can delve into new fields of interest selected solely at individual discretion.

It is for this reason that the library does play so important a part in a student's education, and because of this role, it is unfortunate when the library is misused or taken advantage of. H1T's Crear and Kemper libraries collectively contain one of the finest selections of books in the country. We students are extremely fortunate to have such an educational opportunity available to us.

And yet, some students and faculty members do not abide by the library regulations, and take advantage of the library's generosity to return overdue books.

The library can and does take action
Abuse erable can act by withholding the publication of books being kept by faculty members by a request for an annual report with a list of books the library has for the students in the faculty is small but when there is evidence of suspected members have library books for quite a long time, open forum for discussion, and steadily kept by any who would like to use. A public library cannot be used in this way. The efforts by all library faculty members, is

UB To Sponsor Six Concerts; 5th Dimension Highlights Series

The following is the first in a series of short biographical sketches of the professor of business administration, who has been shown great interest in students. — Ed. University of Technology News

The soft-spoken Mr. Wayne Bernett, Assistant Professor of Business Administration, has been in the Department of Business Administration in 1968. Mr. Bernett has been with the University since 1964 when he earned his Bachelor's and Master's Degrees in Business Administration from the University. His instruction in these fields for several years.

When asked as to what extent he would act as an advisor to the students, Mr. Bernett replied that he thought that it was primarily the editor-in-chief's responsibility, including the running of the newspaper, and that, as always he would give the Editor-in-chief plenty of advice. "I would prefer not to see any material that is about to be printed in Technology News, but in my position I do not feel that the editors that issue already was printed." Mr. Bernett is quite proud of his own department of Business Administration. "The B&E department has grown a great deal in the last few years, and is actually doing quite well considering the funds allotted. The B&E department is one of the few departments that has a budget allocated specifically for educational purposes." Mr. Bernett also mentions that the department has never had to look for outside funding. Because of B&E's stricter entrance requirement, the students in the department are not as many trouble involved in increasing requirements for the B&E students who are already majoring in the increased load."

Mr. Bernett was born and raised in Chicago where he attended Lindhegh High School. At present he is considering taking a leave of absence from IIT to study for his PhD.

The Fifth Dimension in Concert

On October 29, 20th, the University of Technology News will present the Fifth Dimension in Concert.

The Fifth Dimension in Concert

On the concert scene in Chicago, pre-season concerts will feature German composers. Schoenberg's Kolmogorovian Suite No. 5 and music of Mozart, Mahler and Bruckner are scheduled for this weekend. Friday, September 25, 8:15 p.m. and 8,00 p.m., respectively on the Orchestra Hall.

For a dinner show combination, Mister Keets of the London House is the thing. Both feature the hit musical "Jacques Brel is Alive and Well and Living in Paris." Shows are Monday, Wednesday, and Thursday at 8, 8:30, and 9:30 p.m.

Mister Breskin is definitely the Billy Joel type and is, in fact, also a pianist in addition to being a masterful leader. Mr. Breskin will be featuring Ives, Beethoven, and other classical works, all performed at a high level of technical excellence.

The Works of Mozart, Beethoven, and Wagner will be presented in the Chicago Symphony Orchestra's 7th Season. The concerts are scheduled for Chicago Symphony Opens Sept. 26.

HUB Roof Being Fixed

The noise you undoubtedly heard this past week was the beginning of the work to fix the Hub. The work is scheduled to continue through the Hub registration period in the HUB was to be used by students and faculty in the building.

There have been leakage problems with the roof ever since it was finished, probably because of its unique design. All parts of the roof have been modified to prevent the precipitation of water, which causes damage. The problems have been attacked by systematically removing the roof, cleaning it, and replacing the roof.

A concrete pour is being made of the roof so that it will be watertight under normal weather conditions. Gutter work is also involved and will be completed by the time the Hub is opened to students.

The repair job is being done to prevent water damage to the building. The HUB is unusable until the repairs are completed.

The noise was not expected to continue for more than a day. Students and faculty are expected to return to classes as scheduled.

A contractor is presently working on a new type of sealant which is expected to withstand the elements. Work was started last spring, but because the sealant must be applied under ideal weather conditions, the delays were met with some difficulty.

Students who find the opportunity to use the library will discover that a few changes have been made with regards to the check-out system.

The old check-out system in which students presented their library card to the librarian before being able to check out books is obsolete. To check a book out now, one must present his school identification card, which can be obtained at the desk. Instead of the previous two-week check-out period, a student must now keep the books for three weeks. To renew it he must bring it back to the library and fill out another card before the books can be renewed for another two-week period. The books may be renewed multiple times as necessitated by the length of renewal.

Academic Vice-President R. M. Fernald, in announcing the changes, said, "All of the new procedures are designed to make the library a more efficient service to the students. The changes were made to meet the changing needs of the students and the library."

The Hub House Theater has announced a schedule of films for the weekend. Monday, October 2nd, at 8:00 p.m. will be a bill of two outdoor films by H. B. Whitney. Tuesday, October 3rd, at 8:00 p.m. will be "The Day the World Ended." The film will be presented in the Jane Adams Auditorium. For reservations, call 344-5682.

The Hub House Playwrights Center is presenting the premiere of a new play by William Fetter, entitled "The Fall of the Line." For reservations, call 444-8976.

For those who are perfectionists and who would rather not see something done at all than buy something done at all than thing badly, there is a choice for you to go on making a perfect performance. Hall House Theater is inviting people of all ages and levels of acting ability to visit and enter expert instruction at 7:00 House Theater.

Changes At Library Include Improved Check-Out System
Overseas Studies Financed By State Department Grants

The period of application for State Department grants, graduate study and research, or study and training in the creative and performing arts abroad in 1969-70 is nearing its close. Application forms and information may be obtained from the campus Fulbright Program Advisor. The deadline for applications is October 1.

Competition for the grants will be keen, due to the Congressional fund-cutting, and the government's oath on overseas travel. The number of grants may therefore be reduced as much as two-thirds from the preceding year.

Because of this increased competition, only those candidates who fully meet the requirements will be considered. Applicants must be U.S. citizens, proficient in the language of the host country, and, except for the cases below, must have a bachelor's degree or its equivalent.

Creative and performing artists who wish to study abroad are not required to have a degree, but they must have four years of professional study or experience. Social workers must have at least two years of professional experience after the Master of Social Work degree. Applicants in the field of medicine must have an M.D.

Selections will be made on the basis of academic and professional record, and on the feasibility of the applicant's proposed study plan, personal qualifications, and evidence that his selection for a grant would help to advance the aims of the program.

Preference will be given to those who have not had previous study or residence abroad.

Two types of grants are available for this cultural exchange program: U.S. Government Fulbright Grants, and U.S. Government Travel Grants. A full award will provide a grantee with tuition, maintenance for one academic year in one country, roundtrip transportation, health and accident insurance, and an incidental allowance. An allowance for dependents is also provided for grantees in several countries.

A limited number of travel grants are available to supplement maintenance, and tuition scholarships granted to American students by universities, private donors, and foreign governments.

ATTENTION: STUDENTS
Will you consider joining the Fulbright Program? A Fulbright scholarship is a难得 opportunity for international education and cultural exchange. Please visit the Fulbright Program website for more information and application details.

Why would Bic torment this dazzling beauty?

Why?

To introduce the most elegant pen on campus.

Expensive new Bic® "Ball Pen" for big spenders

Only Bic would dare to torment a beauty like this. Not the girl... the pen she's holding. It's the only beauty the Bic® "Ball Pen" shines. Bic is the only pen to turn color. And the 24-carat gold pen nib! The finer touch since Bic® "Ball Pen" was introduced. You can have this luxury pen for as little as 49 cents. Only Bic® "Ball Pen" has a handle that is just right for you. Distinctive Bic® "Ball Pen" is designed for the discriminating pen owner. A writing instrument with as much character and panache as the real thing. Bic® "Ball Pen" is designed for the discriminating pen owner.

Cover for Bic®" Ball Pen" makes a fine addition to your Bic® "Ball Pen" collection. Order your Bic® "Ball Pen" covers today.

Rush & Romance Spark The Quad

by Dori Hoyashi

Being a member of the female species I have taken peeks at the Greeks. The past week, the quad came alive with colored lights, balloons, bands, and millions of people, and a pervasive feeling of intra-fraternity spirit and unity. During the semester, the fraternity men were busy executing their own personal techniques of rushing. In Pi Kappa Phi, the following guys are minus one fraternity pin: Don Grimwood, Hal Throemer, Chris Piekarski, and Wally Mastrostipito. Mark Conley has given away his javelin. Al Janosz is engaged, and the following guys have taken the final plunge: Grant Remerska, Bob Proctor, Rick Buell, and Ken Kinney. Sigma Phi Epsilon is having a busy week with an Alumni Active Open (Saturday) at Silverwood Forest Preserve on September 28th. The Sig Eps had a huge rush, and 16 freshmen have pledged the fraternity. Eight marriages took place. Mike Gaffney is pinned, and Jim Henne and Clyde Knapp gave their ladies away. Delta Tau Delta has a 1968 pledge class of 24, and their pledge ceremony was on Wednesday, September 30. Bob Knight is engaged to Suzi, and Nick Koloski is married.

Located on the middle of the Quad, the Phi Kapps have had a choice rush this semester. Good luck to the 16 new pledges of the Class of '72. The active have also been active this semester. Paul DeValvoir is now a member of the Big Ten. Bill Wells is engaged to Linda Wexler, and David Takefman is engaged to Sandy Peters. University of Wisconsin. If you have any information on the newest pledges, please fill us in. If you have any information on the newest pledges, please fill us in. If you have any information on the newest pledges, please fill us in.

Winners Announced For Frosh Board

A familiar attitude, aapathy, appears to have accompanied IIT students back to campus this fall. One of an entering class of 1,500, a class of 850 freshmen voted in the IITSA Freshman Representative Election held Tuesday and Wednesday in the Hub. The figure represents a mere 14.3% of the class of 1972. Freshman women turned out in larger numbers, however, with 21% of them at the polls. Only 14.3% of the freshmen men voted.

Election was similarly lacking at Tuesday noon's meeting of the class of 1972. Only 80 freshmen were present to bear speeches by candidates for the freshman and IITSA Freshman Representative election. IITSA Election Commission Chairman Gary W. Wartman termed this week's activities an unprecedented display of voter apathy at IIT. It is disheartening to all those participating in activities at Illinois Tech to see such a shift in enthusiasm and pride. Freshman Representative was elected by the freshman class. Arlene Adams ran unopposed for the IITSA Freshman Representative. Five Frosh Board Members were elected by the freshmen. The results are as follows: Michael Martens, Richard Alderson, Thomas Zemek, Rearad Voss, and Michael Kimble.
The View From Here

The Editorial Board of Technology News, in a statement on page two of this week's issue, announced an intention of taking no political stance as a member of the editorial board, it goes on to be heard or acted upon. They are in no way responsible for the views expressed in this publication.

On the last day of the Democratic convention in New York City, the board members gathered in the office of the publisher to discuss the issues of the day.

The young, the middle-aged, and the old are not aware of these issues. They are a minority with no power to change the world.

A significant percentage of the young people, and virtually all black and poverty-stricken Americans feel the danger ahead. In the directions taken by our present political leadership, we find ourselves in a corner from which there are few escape routes. But we have a right to know what the future holds for us.

Many of the supporters of Senator McCarthy, Kennedy, and McGovern have dedicated themselves to working for peace candidates in the Senate and House elections. These commitments are important and necessary in order to provide an outlet for much of the energy built up during the race.

But it is sad to note that many of the people who supported, worked for, and attended Senator McCarthy's rallies are not in a position to understand why young, black, and poor people refuse to vote for one of the three American candidates.

Hubert Humphrey may have some recent questions. But he has no need of his own political party. The party has forced him to run on the ticket without the support of his own party. He is now in a position to understand why young, black, and poor people refuse to vote for one of the three American candidates.

However, refusing to vote for a presidential candidate is not an effective way of expressing disapproval. It is easily interpreted as a lack of patriotism or apathy. In order to express dissatisfaction some positive action is vital to provide evidence at the next election.

There are many possible means of direct action ranging from demonstrations at rallies and speeches through the collection of petitions or the publication of police records on Election Day. Some of the least meaningful action might be some question of ignorance or surprise. It is of the ballot box.

There is one man who can white, black, poor, and all who are less present for the present, say the politicians. That man is Dick Gregory.

Gregory, unlike most politicians, is honest, straightforward and disarming. He is a black, and stands in contrast to the politicians who have been driven out of the field of politics by the demands of youth. Gregory has the potential to be the spokesman and leader of a new America, a new America that could be built on mystical symbols which mean nothing.

And Dick Gregory's appeal is not limited to civil rights issues. He speaks to us all, and we must think and act in a way that is consistent with the contributions we are making to the future.

Quad Football Forecast Picks
Phi Kaps As Early Favorites

Now that Rush Week is over, football on the Quad becomes serious business instead of just a way to keep freshmen around.

Last year’s champions, the Delta, have been hit by graduation, losing backs George Derby and Tom Kend- cals as well as quarterback Tom Mattesower. Their chances for a repeat performance hinge on how well their new quarterback can stand up to the pressure of IF play. On paper the Phi Kaps appear to be strong contenders to take over the crown. Their entire offense, including star running back Kenney Hruske, will return. Defensively, the Skulls will be at least as formidable as their predecessors can fill the backfield left vacant by the graduation of George Braun.

The Skulls are strong not only in starters, but have amazing depth as well. A strong pledge class gives them two deep hand depth at every position.

No one is about to count the Alpha Sig out of the race, either. Their speed is the key, and their team spirit is just as important.
