Homecoming '68 Schedule is Tentatively Established

Plans for IIT's 1968 Homecoming began this week with the first meetings of Homecoming sub-committees. The Committee, which consists of the IITSA President, the IITSA Social Chairman, Union Board Chairman, Pub Board Chairman and the individual Social Chairmen from each class met last Tuesday, October 1, and set up a tentative schedule of the weekend's activities.

The list of events which were decided upon runs as follows: On Friday, December 6, the terminating event of the decoration contest, which will again involve the decorating of dormitories and fraternity houses, will occur.

The judging of the displays will be by the Homecoming Queen candidates. Judging will take place on Friday night, December 6, so that the decorations be up for the entire weekend.

Friday night also will feature a basketball game preceded by a bonfire and a dance in the Hub Ballroom and Cafeteria. The dance calls for entertainment by two rock bands and a slow dance band.

Saturday's activities will include a water carnival, an afternoon basketball game and a concert which will be held in the evening.

Other suggestions not incorporated.

Rehabilitation Of Gangs Discussed

Edwin W. Backenstoss, chairman of the Chicago Police Gang Intelligence Division, appeared before the Newman Club in a meeting held Wednesday, October 2 in the Hub.

The topic of Mr. Backenstoss' speech was, "Rehabilitation of Black Gangs: A New Approach."

Mr. Backenstoss' speech was well received by the audience.

Mr. Backenstoss discussed the importance of rehabilitation of the gang members and the need for education of the children in the neighborhood. He emphasized the need for education of the children in the neighborhood.

"It is important for the children to understand the value of education," he said. "They must be taught that education is the key to success in life."

Mr. Backenstoss also discussed the importance of the parents in the rehabilitation of the children. He emphasized the need for parents to be involved in the education of their children.

Mr. Backenstoss concluded his speech by stressing the importance of unity among the people in the neighborhood. He emphasized the need for unity in order to make a positive change in the community.

"We must work together to make a positive change in the community," he said. "We must unite in order to make a difference."

Mr. Backenstoss' speech was well received by the audience. The people in the audience were impressed by his knowledge and his ability to convey his ideas effectively.

Mr. Backenstoss' speech was followed by a discussion among the audience. The people in the audience were able to ask questions and share their own ideas on the topic.

Mr. Backenstoss concluded his speech by thanking the audience for their attention and for their interest in the topic.

Mr. Backenstoss' speech was a success. The people in the audience were impressed by his knowledge and his ability to convey his ideas effectively. The people in the audience were able to ask questions and share their own ideas on the topic. The audience was grateful for Mr. Backenstoss' time and for his willingness to share his knowledge with them.

Peaceful Demonstrations Draw 10,000 Anti-Police Protestors

Over ten thousand people marched in a peaceful demonstration held in Chicago's downtown area on September 26. The marchers were headed for the White House and were chanting, "No war! No draft!"

The marchers were led by a band of drums and a group of skateboarders. They were joined by a group of bikers who were followed by a group of skateboarders.

The marchers were met by a group of police officers who were armed with batons and tear gas. The police officers attempted to disperse the crowd, but were met with resistance from the marchers.

The police officers then attempted to arrest some of the marchers, but were met with resistance from the crowd. The police officers were eventually forced to use tear gas to disperse the crowd.

The peaceful demonstration was a success. The marchers were able to express their views and their opposition to the war. The demonstration was a positive step towards peace and a positive step towards the end of the war.

"We must continue to march until the war ends," said one of the marchers. "We must continue to speak our minds until the war ends."

The peaceful demonstration was a success. The marchers were able to express their views and their opposition to the war. The demonstration was a positive step towards peace and a positive step towards the end of the war.

Dr. Primmack's column in the September 28 demonstration.

ITWA Holds First Ever: Co-eds

The Illinois Tech Women's Association held its first meeting of the semester on Thursday, September 26. The meeting was the second meeting of the association since its formation in the spring.

The association has been formed to provide a network of support for female students. The association has been formed to provide a network of support for female students. The association has been formed to provide a network of support for female students.

TN Cites Reasons For “No Political Stand” Decision

The criticism printed last week of the Editorial Board’s “No Political Stand” decision has a good deal of validity to it.

Miss Weaver’s first point—that the Editorial Board did not give an explanation for their decision—is well taken, and we apologize for the error.

The Editorial Board of Technology News decided that it will not back a particular presidential candidate for the following reasons:

Technology News is present at the ONC weekly campus publication which presents information for student education. Moreover, Technology News should not be guilty of excluding national events from its pages.

But where does a school newspaper, the ONLY school newspaper, draw the line?

Technology News bows to the superiority of the local city newspapers in their ability to cover national events adequately. Quite obviously, it is impossible for a school newspaper to maintain correspondents in Washington, D.C., New York, or Los Angeles—if we print material concerning people in these areas, we must accept the information second hand from a city-wide newspaper.

Technology News does not claim, nor will it ever use second hand information for editorial material. Our staff is here in Chicago, and the information we gather and report will be first-hand, not some accumulation of opinions gathered by reading editorials in other newspapers.

Finally, being the only campus publication, we feel that it would be unfair to our editorial pages to “cherry pick” a single person from now to November. Admittedly, it would be very convenient for us to pull for a particular candidate, but there exists at present no other campus news publication that could counter our opinions and student representation would become rather tepid.

It is for the above reasons that the Editorial Board has opened a forum for students interested in publishing their personal views of candidates.

We’re willing to give students the space they need. It is up to the students to respond. Technology News doesn’t belong to the Editorial Board; it is and always will be the property of IF students.

Announcements

ITWA Meeting

The Illinois Tech Women’s Association will meet Wednesday, October 10th at 7:00 pm in the basement lounge of the Woman’s Residence Hall. All members are invited to attend.

SDS Films

Friday, October 4, the Students for Democratic Society will present two films from Viet Nam at 8 pm in the Hall Ballroom. “The Caged Gulag” and “Liberation of Hanoi,” will be shown.

AIAA

The IF student chapter of the American Institute of Aeronautics and Astronautics will hold its first meeting of this year on Thursday, October 10th at 7:30 pm in room 14. All interested students are invited to attend.

HONOR "F"

There will be a meeting of Honor "F" on Wednesday, October 10th at 8 pm in the gymnasium seventh floor. All active members are invited to attend.

Vice-president Answers Editorials

This reply is to prove that the administration does read Technology News, and also to respond to the question, “Why doesn’t the administration do something about the parking lots?”

As pointed out in the Technology News article, the lots can be put in good condition only by hard-surfacing and proper lighting. Plans and specifications for this project are complete. To condition the parking areas on campus, however, will cost a minimum of $50,000 for grading, draining, and black-topping, and another $150,000 for lighting. This totals $200,000. The fact that this is not being done is simply because the Institute does not have money to spend on light fixtures. R. J. Speeth

Dear E.I.C.,

The administration will like to respond to the article in last week’s Technology News regarding the problem of lighting the fraternity quadrangle.

The Institute has formal agreements with each fraternity, and with the fraternity as a group, under which responsibility for the physical upkeep and maintenance of each house and the fraternity area is primarily that of the fraternities. We have discussed with the Alumni Interfraternity Council the need and possibilities of lighting and fraternity quadrangle area. The Institute has plans and is ready to proceed immediately with such lighting installations.

The fraternities, however, have not responded other than to say this matter is the problem of the Institute. Under the existing agreements, physical improvements and changes to the housing in the fraternity area can be undertaken only after approval of the individual fraternity.

If the fraternities wish to modify the existing agreements and desire the Institute to take over responsibility for the physical upkeep and maintenance of the fraternity houses and quadrangle, the Institute is ready to do so. It should be pointed out, however, that this will make the fraternity houses another part of the dormitory system, and this philosophy has not been a part of our tradition of an independent fraternity system.

R. J. Speeth

Parking Situation Demands Comprehensive Reports

Last week in Technology News, the Editorial Board addressed the important issues concerning IF students and faculty.

Resolving the issues is the responsibility of key personnel in the administration. Student sentiment and desires are only effective in reminding the administration that such problems exist and that an answer is requested.

It was to my amazement earlier this week that Technology News received two letters from the Office of the Vice-President and President, informing the editors of the concerns brought to the Management Board on September 27.

However, some questions arise from the replies themselves. The parking lot issue is not a recent one, so why has the financial aspect been such a problem? Surely if the master plan called for hard-surfacing of the parking lots, small amounts of money could have been set aside even prior to the completion of definite plans and specifications. This method is used for building projects so why wasn’t it done for the parking lots?

It was pointed out that IF probably has more parking area per student and staff member than any metropolitan college or university in the country. This leads me to believe that more attention should have been directed at this problem long ago. Just because this privilege is ours, it doesn’t necessarily follow that we should be content with inferior parking lot conditions.

Many points that I would like to raise are omitted due to lack of space but I recognize a basic necessity. The letters to the editor need to be expounded upon to provide an in-depth approach to the problems.

I should like to see administrative officials, faculty members, students, and other interested persons to discuss their viewpoints in writing and invite them to submit their statements to Technology News for printing in the Forum.

B.E. Chairman Dr. Davis Strives for Perfection

by Doris Hayashi

My impression of this year's class was through an interview with a member of the faculty or administration, who was completely unaccustomed to the idea of being interviewed. The impression was one of surprise that an IIT student could be so at home in the world of the business and economic departments, and that he had time to devote to his studies.

Dr. Davis is an interesting person who seems to have an answer for everything. He is very much a planner, and he has a way of thinking that is both analytical and creative.

Independence, the student is no exception, is not taken for granted at IIT. Although the 'technical tradition' is an important part of the student's education, the student is encouraged to develop his own ideas and to be independent in his work.

The setting is one of understated elegance, which lends itself to the student's familiarity with an individual in the most academic manner.

D.H.

The setting is one of understated elegance, which lends itself to the student's familiarity with an individual in the most academic manner.

D.H.

Forty-two new faculty appointments at IIT have been announced by Dr. James J. Brey, academic vice-president. These new appointments bring the total number of faculty members over 300.

Heading the appointments are two full professors, Dr. Nathan Goldman, professor of sociology and chairman of the department, and the new president of the Illinois Institute of Technology.

The other full professor is Dr. Leon Bierman, in the department of mathematics.

Previously, he had been professor of mathematics at the University of Chicago and Northern Illinois University.

The new president has degrees from the University of Chicago and the University of Illinois, and he was formerly a member of the National Academy of Sciences.

Young Republicans Organize; Plan Fund Raising Projects

by Skip Grimshaw

Turnout was low at the first meeting of the IIT YR (Young Republicans), held in the Midwest Club on February 11. The organization was formed by students who wanted to organize a group that would discuss current political issues and to promote a more positive image of IIT on campus.

The group is planning to hold a series of meetings to discuss political issues and to discuss the need for more involvement in campus politics.

The group is also planning to hold a series of meetings to discuss political issues and to discuss the need for more involvement in campus politics.

COLUMBIA GAS

Energy Engineering has opportunities for you in

- Research Studies
- Consulting and Industrial Processes
- Designs and Materials
- Heavy Equipment
- Engine and Economic Analyses

There’s excitement waiting for you in energy engineering, on a range of projects where you can make history. For example, you may be involved in the design of a new power plant, or in the development of a new type of energy storage system. You may also be working on the development of new materials for use in energy efficient buildings.

Columbia Gas is an equal opportunity employer and we encourage all qualified candidates to apply.

American Political System Incapable Of Processing Minority's Problems

by Mike Bellion

For those of you who read my article last week concerning the lack of sophistication among "outsiders" and law enforcement officials in America, and believe that I'm some sort of punk who-desires or encourages violence, I have a disappointing statement to make — I neither condone nor advocate violence.

With that in mind, I'm going to offer a little personal testimony: which I wish that worldly philosopher Eric Hoffer and the other beached whales on President Johnson's silly little committee on violence in America would include in their records.

Those who cry for "justice only with law and order," are in effect saying, "do it within the system, use the legitimate channels." I'm afraid what these people fail to see is that in many cases people have tried the legitimate channels, and the system has been prepared to deal with them.

Our American political system is unique, and until recently has been one of the most efficient systems in existence. The basis of the system are the inputs and outputs — plugged into, and emanating from, that multi-perplexing hierarchy known as government.

The inputs are the demands of the people and the demands of nations, and the outputs are the laws, the techniques of administering laws, and most importantly, the pacification of those whose demands are met.

The failure of our system today lies with this pacification output, especially with respect to black Americans and people opposed to the war in Vietnam.

Ghetto Blacks on Chicago's south side have elected and re-elected Congressman Dawson and Mayor Daley because "they never did them wrong." But, more importantly, they never did them right, and the black people in Chicago and cities across the nation are finally becoming aware of this.

In the presidential primaries, the relevant people in the country, Senator McCarthy and the late Senator Kennedy drew the overwhelming support of the democratic voters. However, the system failed to protect their legitimate redress, and 50,000 gathered in Chicago to protest pacification as I have used the (Continued on page 7)

The View From

by Bob Koch

Last week this paper reported that the alliance of the Black Students Organization and concerned whites plan to revise and expand the collective bargaining agreements which demand the Administration's support this continuing effort to encourage the Chicago III Administration to become relevant to the needs of some those with which it must interact.

I have a couple of stories of my own about demands which I would like to see added to the original list. The rest of these is the establishment of an Office of Community Relations.

The head of this Office would take the responsibility of analyzing and supervising the programs designed to involve III in a meaningful way with the black communities and neighboring communities. He would be directly responsible to the President.

Among the duties of the Office of Community Relations would be the management of a training and educational program, expanded beyond the twelve students now pursuing assignments of translation and educational facilities to entrenched communities, such as special training of black high school students and other programs of the future.

But the new Office would have to go beyond coordination and expansion of programs which are aimed at a limited base. The Office of Community Relations must be responsible for guiding the development of new programs in order to close the widening gap between white and black communities.

He must be responsible to the needs of the community and able to push the right white community leaders. Only with such ability will the Office be able to work with those leaders to find solutions to mutual problems, and unless these programs are worked out with communists, participation that can never have more than a modicum of success.

It is rather disheartening that an Office of Community Relations does not have enough staff to do the job. The present administrative officials are so busy that they are not able to attend to the needs of the community. The new Office of Community Relations, if properly staffed, would be able to push the right white community leaders. Only with such ability will the Office be able to work with those leaders to find solutions to mutual problems, and unless these programs are worked out with communists, participation that can never have more than a modicum of success.

American Political System Incapable Of Processing Minority’s Problems

by Mike Bellmore

The View From Here

by Bob Koch

It was last week that the administration of President Johnson and the leadership of the Black Student Organization and concerned whites plan to revise and expand the hitherto ineffective policies of the Administration.

As one of the signers of the original agreement, I am prompted to support the continuation of the policy of non-violence in the area of educational and community relations. The administration has made efforts to this end, but the system remains united in its resistance to the demands presented to the Administration.

The purpose of this article should be obvious. It would be a worthwhile attempt to involve the campus community in a more meaningful way in the shaping of its future. The real test is to establish a system of checks and balances on the administration, not out of fear, but because we are citizens of this college.

We are bound in politics and government by the Community Relations Act of 1969. We are bound in politics and government by the Community Relations Act of 1969. As we continue to talk about our concerns and our responsibilities to the campus, we should be aware that it continues to turn out these people who are not adequately educated, nor do we have any clear understanding.

Dear President, do we have more to say than "Our community is not a free one and we must move on?"

The only effort at responsible participation from our students of the day has been the Inter-Cultural Center, which offers a site for discussion of the draft and the campus. The students in the Inter-Cultural Center may not like the proposal, but they are working on a more systematic program that will pull together the student body rather than separate it into small groups.

Alan Liebowitz, former director of ICC, has left ICC’s campus for a position on the staff of the Inter-Cultural Center. The office of the Inter-Cultural Center will be able to provide a better service to students, but the campus is not a free one and we must move on.

Psych 10 Program Aids Students On Probation

by Darl Haymond

Psych 10 is the name assigned to a program which has existed for the past four years. Unique to this campus, Psych 10 was funded by the Esso Educational Foundation for two years. The program is a form of psychological treatment specifically dealing with academic underachievement. Under the supervision of Robert Roth and Harris Berenbaum, the approach is derived in its simplistic form.

The Academic Standing Committee selects students who would otherwise be dropped for deficiencies and gives them the alternative solution—Psych 10.

If a student chooses "group ITWA (Continued from page 1) mobility as well as improving hearing and surveillance.

The meeting ended with a pizza from Beth Siegel for IT women to be less apathetic toward ITWA, and to bring complaints and ideas to meetings. Women having opinions on any issues, or who have complaints, should attend the next board meeting. The date of this meeting will be announced in Technology News.

"Gork complain that ITWA never does anything. If they will come to meetings, support their representatives, and take an interest in women's affairs, the ITWA voice in ITS will accomplish something."

**UNIVERSITY PARKING LOT**

**FULL**

**Solution:**

**New Honda.**

This lean, lithe Honda 125 Super Sport can be the answer to a lot of problems besides parking.

Consider price. You can buy this beauty at an impressively low initial price; fuel it for a fraction of what you'd spend on a four wheel gas guzzler. And, of course, there are the pleasantly paintless costs of maintaining and insuring a Honda.

The 125 Super Sport couples lightweight economy with red hot performance features. Its dependable four-stroke twin engine produces a dazzling 13 bhp; acceleration that matches the best of them.

And styling. The 125 Super Sport is nothing but class from its streamlined pipes to its sculptured tank to its rugged telescopic front forks. The sleek and sassy 125 Super Sport. Is there a better way to solve your problems?

---

**SDS Wants "Bill of Rights"**

One of the most emphasized points of discussion at the September 30 meeting of the IIT chapter of the Students for a Democratic Society was the need for a Student Bill of Rights.

Leaders of the SDS said that much racial, social, and political discrimination exists in the determination of which students are allowed to use the facilities of the IIT campus. This lack of justice and other facilities in the actions of the administration call for the establishment of a Student Bill of Rights.

Other topics discussed at the Monday meeting were racial discrimination on campus, projects of national interest to conscientious SDS members everywhere (such as the government subsidized biological and chemical warfare research going on at the IIT Research Institute), and the universalization of the United States Armed Forces.

The IIT chapter of the SDS, headed by Peter Pran, is part of the largest radical organization in the United States. In the past the IIT SDS has, in conjunction with other chapters, organized powerful demonstrations for various causes throughout the city of Chicago.

Events sponsored by SDS include assisting in the change of foreign, domestic and school policy, the possible attendance of Mark Rudd, SDS leader at Columbia University at one of their future meetings, and the showing of two Vietnam films tonight at 8 pm in the Hub Ballroom.

---

**FORUM**

October 4, 1968

There has been recent talk on campus concerning the role of the student in administrative affairs. These discussions are usually aimed at what the concerned students call the apathetic Teach-In.

At a recent meeting the concerned students are the only voice on campus representing the student in administrative affairs. He speaks out about the faults of the Institution and the conservative ways of the administrative workings, which the claims are suppressing his actions derived from his liberal views. He dramatizes his views by holding small rallies and calling himself a member of the minority. However, by placing himself in a minority, he limits himself to that clique, where he feels he and his colleagues are the only ones who can understand the liberal views he holds. Thus, he has become isolated as the apathetic Teach-In in the aspect of communicating with other students.

This is not to say that the concerned students are the only people who are ignoring the majority. The Teach-In also has his choice in which all attention is aimed at individuals and pinpoints. I cannot complain with a student who studies, as this is of course the prime function of the student. However, I can speak against the student who has no regard for the problems surrounding him. It is ironic that where some of the country's most intelligent people go to school, with the attitude that someday the country will be in their hands, they cannot see the problems in a twenty-seven square mile area.

Time and time again, a sentence results in a Technology News article. "Why can't something be done about it?" Well, something can be done about the problems we have, but it is going to take something more than a few students complaining to each other and occasionally to the administration. Obviously, the administration will have to change its policies and spend money on the assumption that everyone wants something done because a few people take a step forward with a suggestion.

However, if the administration is confronted with a demand that the majority of students support, they are going to be more apt to listen and provide the change.

I propose a "Yes or No" opinion poll on the campus. If the suggestions the concerned students have brought forth, the opinion poll would be made in which the more student body could participate. Such questions on the poll should include the passing of the parking lot, more lights on campus, better police protection, and other grievances which have so far been held by the minority groups. The results of this poll, if supported, can then be put before the administration as being a major concern and no excuse could be given for not having the support of the minority student body.

McQueen Boosts Virile Image
In ‘The Thomas Crown Affair’

by Terry Pohalski

Steve McQueen has done the next to impossible. He has strengthened his already indomitable virile image. In “The Thomas Crown Affair” (now showing at the Woods Theater) he’s a slick millionare who, with sageness, acumen and precise organization, steals two million dollars from a downtown Boston bank, just for kicks.

- Belle Tire
  (Continued from page 4)

This term here does not refer to the making of step-gap laws or housing so as the white’s in a minority. Instead it means compromise and “leaving the door open.” It may mean things like replacing Lewis Hershey, or keeping Mayor Daley from exhibiting the qualities of the dying American art of husson. This is pacification.

Unfortunately, failure to pacify has in many cases hardened both the rebels and the civilians makers into uncompromising positions. However, this does not mean that pacification has no pase. There are umal numbers of civilians who are still trying the system, waiting for their demands to be met, or in need of pacification to see that they can continue within the system.

Faye Dunaway, the cool, calm, and collected insurance investigator who tries to connect Thomas Crown (McQueen) with the robbery, melts eventually in the presence of Crown’s cool. (Chalk up a few points for McQueen.) Fighting to catch Crown, she succeeds in setting a trap.

Dunaway’s doomsday device is spring and Sir Thomas Crown, with the polish and finesse of Houdini, escapes in a dazzling flash of glory leaving Dunaway holding the bag and her Rolls. (Score 20, need more be said?)

While on the subject of master organization, finance, and expertise, Hans Schmidt-Isenscheidt, making his fourth appearance at the Chicago Symphony Orchestra’s subscription concerts, will continue a two-week guest conductor engagement on October 17 and 18 at 8:35 p.m. and 2 p.m. respectively in Orchestra Hall.

Suite No. 2 from the ballet “Undine” by Hans Werner Henze will receive its first hearing at these concerts. A joint show concerning the convention week disorders is planned to open at the Rosen Gallery for student artists on Saturday, November 2. The exhibition is part of an organized effort by various gallery owners in Chicago to give artists an outlet for their interest in current events in our city. The exhibit will include paintings, drawings, prints, and photographs.
Newman Club, Farr Outs Victorious
In First Round 1M Football Games

Victories in this week’s first round of the intramural football tournament were the Newman Club and the Farr Outs.

On Tuesday afternoon the Newman Club squeaked by the Delta Phi team by a score of 6-8. Most of the game was played between the 20 yard lines. The Delta Phi squad found it impossible to muster an attack against the more experienced Newman Clubbers. But the Delta defense held off the Newman attack, coming up with some great plays in the process.

The Newman Club pushed across the only score of the game midway in the second half. The tally came on a pass from quarterback Ray Burnside to freshman receiver Valquette.

Tuesday’s second game was also a shutout. The Farr Outs were out on the long end of a 13-0 count against the East Wing Association.

Seahorse George Eastman was the big man for Farr Outs. Besides playing some great defense, Eastman threw for one touchdown and an extra point, and ran the other TD over by himself.

The first score came in the opening period. Eastman found end Walt Petee behind the defenders and drilled a strike to him for the first six points. Keith Engle, sophomore, more back, flared out and took an Eastman aerial for the extra point.

Early in the second half Eastman ended the scoring with a dash around end, escaped two would-be tacklers, and scrambled to pay dirt.

The two winning clubs, Newman Club and the Farr Outs, will meet in the second round on Tuesday, October 15. Next week’s first round games will be played.

Harriers To Run

This Saturday the IE cross country teams journey to Rockford for a meet against Rockford College, Lake Forest, Chicago South, and Northeastern Illinois.

Prospects for the harriers’ success have to be rated as anything but rosy. Several members of the squad have decided to hang up their running shoes already.

Individually, Dick Oldani figures to be in the race from start to finish, and Kenny Mizer should be right up there too.

SENSITIVITY + GOSPEL

You are invited to participate in a Christian Friendship Weekend on October 11-13 at the Ursuline Center, 1300 S. Wabash Avenue. The purpose of the weekend is to explore your problems, see how the gospel relates to them, and together form a Christian community. Registration for the weekend can only be made through Father Robert B. Papp, O.P.

1909 S. Ashland Avenue
Chicago, Illinois 60608
Phone: MO 6-4500 or CA 6-0074

BOBBY’S TASTY LANE

(THANKS TO THE SHOPPERS GATHERING AT)
