IIT President Rettaliata Announces Rev. Houck As Institute Chaplain

The appointment of the Rev. John R. Houck as university chaplain was announced Wednesday, October 30, by IIT President John T. Rettaliata.

Rev. Houck, an Episcopal priest, was called as campus minister by the Committee for the Joint Ministry, a group charged with developing a new ecumenical ministry at IIT. Chaplain Houck was then recommended to Dr. Rettaliata by this committee.

Investigation Committee Resolution Passed

In a general Faculty Senate meeting on October 31, a resolution was passed by a vote of 5-6 to form a committee to study the restrictions imposed upon SBS by the Dean of Students. The committee will be composed of six full-time faculty members, two chosen by SBS, and two by the Faculty Senate.

IC-ICC-UB Relationship

Chief topic of discussion at the International Club meeting of November 4 was the exact relationship which now exists between the I.C., the Inter-Cultural Center, and Union Board.

"First," announced President Mike Biskin, "I would like to clear up the common misunderstanding that the I.C. and the Inter-Cultural Center are one in the same. Actually, the International Club is an organization which owns no facilities. The Inter-Cultural Center is a union that runs the various clubs and organizations.

SDS, IIT Ind. Press Demand Support; ITSA Board Buckles

By J. B. Morris

Power, how much does the ITSA Board of Control actually possess? This was the actual question under discussion at the November 6 meeting of the ITSA after the appointments, denials, and general foot-dragging were eliminated.

Discussion was fostered by questions placed by SDS-IIT President Peter Pranz, and by IIT Independent Press Editor Charles Eells.

Investigation Committee demanded to know what the grounds were for the denial of Press recognition by the Dean of Students Office. Eells explained that he has been trying since last May to obtain recognition of the Concerned Students Coalition as a Press sponsor, and has had no success to date.

Assistant Dean of Students James Barrett countered that the CSC has been denied recognition because they have not satisfied the criteria that the administration has set forth. According to the letter intimated that the IIT campus was unsafe and furthermore that ITI was not fulfilling all stipulations to the surrounding community.

At this point Peter Pranz joined in the argument that he didn't think that the administration had the right to deny any printed material from campus distribution, whatever the reason.

At that point the debate was adjourned for the next meeting of the Faculty Senate. (Continued on page 9)

General Education Committee To Initiate Review of GEP

The General Education Committee has decided to initiate a review of the original General Education Program which has been approved by the Curriculum Committee last semester but which has not been brought forward for formal approval.

In their first formal meeting this semester, the Committee decided to set up discussions with students and faculty members to help with this review.

An additional mechanism has been set up for this report. The initiation of Departmental meetings to which Committee members may be invited to present particulars concerning the General Education Program.

In addition, there will be a symposium at the undergraduate education committee of the Faculty Senate, and a national meeting of the Curriculum Committee.

Engineering Students Need Reductions In Workloads

There are a substantial number of IIT students that presently find themselves involved in a very pressing problem; a problem that has existed at our school for quite a long time, and that needs an immediate solution.

The problem in question is the senselessly overloaded curriculum that all engineering students must conquer before graduation.

This curriculum is very demanding and requires four years of extremely intense work from each student, a requirement which can only be met according to the student's education and the student's personal life.

A requirement such as this should never be made of anyone, especially a student. The education of the student is at the point in his life when his pursuits of his non-academic life.

With the exception of the few that have it in themselves to mix with society, most students would not be able to handle the pressure.

Don't these students realize that there is another type of education to be gained from college, that the development of personal skills and character is one of the main reasons for attending college in the first place?

Can't they see that potential employers regard grades with the same, if not less, emphasis than they place on how well one has learned to get along with others, how well he has learned to get along with others, to develop his social skills? And the same holds true for society.

The General Education Program which is presently in the process of development is a big step in the direction of alleviating this problem. With its five-year engineering curriculum that will allow more time for humanities courses, the Program recognizes the problem and could indeed provide a logical solution.

The present engineering curriculum is outdated and does not satisfy the needs of today's students at all. Another program such as the GEP must be adopted.

IIT Independent Press Lacks Form of Constructive Criticism

Reality is as an individual perceives it. If the reality of IIT is as pessimistic and full of social evils as the Independent Press believes, then we, the members of the Technology News editorial board, have no right to criticize or object to these conclusions. We do, however, reserve the right to suggest improvements or to clarify misguided thought patterns, so as to obtain a concise, cogent, and valid means to an end.

Essentially, the Independent Press is a self-perpetuating instrument of frustration which is destroying itself in the process of striking back at social inequities and injustices.

Masking the truth in condemning labels and deluding idioms is worse than deception, or not even seeking to delude. In essence, the Independent Press claims the distortion of "telling it like it is," and yet its writers borrow into their secure nests of platitudes and condemnations of social evils without presenting alternatives, or at least citing ramifications of these evil processes.

Immersed within this quagmire of stagnating processes, the "radicals" then have the audacity to claim that their perspective is unrepresentative. The intellectual blindness of the bourgeois hierarchy, the patronizing attitude, and an overreaction to established channels utilized successfully by modern developments are the facts.

Technology News as being an agency of the Institute. Admittedly, we are financed by Institute funds but this does not control the opinions of the editors, writers, and reporters. We appreciate the fact that we publish news as it is. If we err, we err because we want to make the necessary corrections in order to present the facts unbiased. Would the Independent Press do likewise?

In addition, we enjoyed the right to print both sides of an issue. The Forum is open to student opinion. Even this week's View From Here spoke in the defense of the Independent Press when attacked in previous editorials. Letters to the EIC are wholeheartedly accepted.

The Independent Press is "a nothingness" newspaper, then I wonder how far back our "rival" is. Can the Independent Press become an influential instrument in presenting and formulating student opinion? I think it can, if the editors are willing to present their opinions and arguments in a more dignified manner. But the question is, "Are they willing?" This is a question which the Independent Press must resolve.

I hope that the Independent Press will remain in existence, but I also hope that the EIC can see that their format must change if adequate support is to be obtained.
**NC's Fr. Lambert Discusses Blacks**

"Whatever Became of Integration?" was the subject of the lecture delivered to the Newman Club by the NC chaplain Father Lambert, at the meeting on Wednesday, November 6 in the HUB.

In the United States today the schools are just as segregated as they were in 1954; in Chicago alone 90% of the schools in black neighborhoods are 90% black—those in white neighborhoods are 90% white," said Father Lambert.

"Unemployment of black men in the United States is twice that of whites. Since 1950 the economic gap between the black and white man has increased rather than decreased; the difference in median incomes of blacks and whites has increased as well," continued Lambert.

The reason for the lack of success and interest in integration, stated Father Lambert, is that in white society today, only those blacks who try to be like middle class white people are given society approval. "The black man who attempts this imitation," stated Lambert, "finds himself in a position somewhere between the blacks and whites; he is no longer like the 'rest of the blacks,' and yet he is certainly not a white." As a result of these things, said Father Lambert, a general rejection of integration in the immediate goal of the black people at the moment.

"The black man's present feeling is summed up in today's popular slogan, 'Black Power,'" concluded Lambert.

**Queen Contest Heads Homecoming Festivities**

This year's Homecoming Queen will be chosen in an all-school election from candidates nominated by various campus organizations. Nominees are to be chosen from full-time IIT students and their names will be submitted to Lutzy Noyes at Delta Tau Delta, ext. 791, by Monday, December 2.

There will also be a Homecoming decoration contest. School organizations, social and honorary fraternities, sororities, and residence halls are urged to decorate the outsides of school buildings. The various organizations are requested to keep in mind the theme of the week end. Home Sweet Homecoming. A trophy will be awarded to the organization with the best decorated building.

All decorating must be done by 3 pm on Friday afternoon, December 6, when the judging will be done by the Queen candidates. In order to be eligible for the trophy, organizations must register for the contest by contacting Larry Delvecchio at Phi Kappa Sigma, ext. 520. Those organizations which do not have a building of their own may claim one of the school buildings to decorate. Those who register first have preference in their selection.

Homecoming '68 will officially begin at 6 pm Friday with the lighting of the bonfire. A basketball game at 6:30 will be highlighted by the crowning of the Queen during halftime Friday evening will end with a dance featuring the One-Eyed Jacks and the Strawberry Alarm Clock.

Saturday, December 7, will begin with a swim meet at 1 pm and a basketball game at 2 pm, both of which will be conducted in Arthur Keating Hall. At 4 pm until 8:30, a series of five movies will be shown in the HUB. Home Sweet Homecoming will terminate at a concert featuring Franky Valli and the Four Seasons at 8:30 pm.

---

**Dr. Young Discusses Dem. Convention**

There are many reasons for Richard Nixon's victory in last Tuesday's election, but the major one, is the "outrage inspired on the minds of the American people because of the Democratic National Convention," according to Dr. Quentin Young, former president of the National Medical Committee for Human Rights and speaker at the Black Students Organization meeting of November 6.

Dr. Young, who helped administer medical aid to demonstrators at the convention, told the group that "history will record three things about the 1968 Democratic Convention. It was responsible for the defeat of Hubert Humphrey, because of Mayor Daley's incredible baton attack. It also showed the deep, ugly look of fascism in the United States, and the problems of untrained police control."

The National Medical Committee for Human Rights was formed at the height of the civil rights movement in 1964 to provide medical assistance to the protesters. It was felt that the hospitals would have to deal with any injuries sustained during the demonstrations.

The mayor's report on the Convention asserted that the presence of doctors was an indication of the yippies' attempt to "pamper" violence, but Dr. Young said that this was far from the truth. With the height of civic cynicism, Daley and Chicago officials denied the demonstrators their "legally obligated services," and the protectors had to be ready for anything.

Although it was originally planned that any necessary medical care could be done in nearby hospitals, the number of injuries necessitated immediate attention. Over 1,000 people were treated during the week by over 1,000 volunteers.

After the convention disorders, Dr. Young was asked to appear before the House on Un-American Activities investigation into the rioting. He went for two reasons: "to tell the country exactly what went on during the convention and to denounce HUAC." He told the IIT group of the "thirty years of failure of HUAC, and what it turned many people's lives into, an ideal of 'gumshoe privileges.'"

Although he entered with an apprehension that the Committee would "not only condemn but also try to punish," he said that he felt satisfied with his testimony before HUAC.
Mr. Galvin:

"Group think" is typical of business conformity.

In the course of the Dialogue Program, Arnold Shelby, a Latin American Studies major at Tulane, also will explore views with Mr. Galvin as will David M. Brown of Chemical Engineering, Michigan State, and Stan Chess, Journalism, Cornell, with Mr. Doan; similarly, Mark Bookman, Pre-Med, Ohio State, and David G. Clark, Political Science, MA candidate at Simmons will also talk with Mr. DeYoung. These Dialogues will appear in this publication, and other campus newspapers across the country, throughout this academic year. Campus comments are invited, and should be forwarded to Mr. DeYoung, Goodyear, Akron, Ohio; Mr. Doan, Dow Chemical, Midland, Michigan, or Mr. Galvin, Motorola, Franklin Park, Illinois, as appropriate.

IS ANYBODY LISTENING TO CAMPUS VIEWS?

BUSINESSMEN ARE.

Three chief executive officers - The Goodyear Tire & Rubber Company's Chairman, Russell DeYoung, The Dow Chemical Company's President, H. O. Doan, and Motorola's Chairman, Robert W. Galvin—are responding to serious questions and viewpoints posed by inviting student spokesmen about business and its role in our changing society through matters of a campus/corporate Dialogue Program.

Here, Arthur M. Klebanoff, a senior at Yale, who is completing graduate studies and a career in government, is exchanging views with Mr. Galvin.

Dear Mr. Galvin:

The trend on the nation's campuses is toward greater freedom - and responsibility - for the individual student. Whether the action is extension of waiting hours for women or relaxation of course requirements, the result is the same: a placing of greater trust in the individual, and a growing array of flexible alternatives for that individual.

Yet when he looks at business, and particularly at big business, a student sees an organization oriented to the group rather than the individual, and to that group's security rather than the individual's challenge. That "group" is any collection of administrative peers and immediate supervisors which meets frequently at all levels of the bureaucracy.

What began as an attempt to imitate the highly successful "team" of technologists has become a plodding group of administrative bureaucrats. And whereas the team produced, the group pondered.

But "group think" is a strange brand of thought indeed. Group-think places a premium on conformity rather than creativity, and waste rather than efficiency. Somehow, group-think demands little or no substantive thinking on the part of the individual.

Lately, group think has become synonymous with business administration. Some consulting firms exist merely to sensitize the individual to the group. Yet administration has always been that aspect of business meant to appeal most to a socially conscious college generation. Is there any wonder then that the trend toward individual freedom and responsibility coincides with a growing alienation between business as a career?

My question for Mr. Galvin is what will business do to provide the individual with the opportunity and incentive to perform, as an individual, the kinds of tasks he is both prepared and interested in performing?

Sincerely yours,

Arthur Klebanoff
Governor, Yale

Dear Mr. Klebanoff:

The desire of young people for greater individual freedom and responsibility is not confined to the campus, but is a characteristic of the maturing process. It is not a phenomenon of this generation. And it is a good thing when expressed constructively.

As a college student and member of several important campus committees, you must be aware of the importance of individuals pooling ideas and efforts. University-sponsored research programs incorporating needed social reforms, and working out pilot projects as prototype solutions - methods to overcome widespread illiteracy in the ghettos, to encourage self-respect through self-help, for example - reflect team efforts. Even actions undertaken by the dissenters and protesters on campus result from "committee action" and not the blanishments of one individual.

The concept of granting more and more freedom to act responsibly, with authority, is not alien to business. It is fundamental. Individuals demonstrate talents. Those talents need each other for the attainment of corporate results. In the pooling there is no loss of individuality or freedom.

Business is, and must be, strongly concerned with the individual, but since running a business is a team effort, there has to be group orientation, too.

In business, as in other fields, many decisions and actions result from "group-think" meetings, which do indeed demand substantive thinking from the individual. It is my opinion that more creative ideas come from a number of people "thinking" together than separately. One person's idea sparks the thoughts of others. Some people are naturally better at conceiving the germ of an idea than at refining it to a practical degree, and in group-think I think one draws upon a multiplicity of talents and viewpoints.

I have attended many group-thinks but seldom take time approaching your description. Certainly some were unproductive, but usually because of negligence in disciplining the group to adhere to the subject. Carefully disciplined, non-nonsense creative sessions often produce table-bangings and heated exchanges rather than affinity, and out of them may come solutions to complex problems and decisions involving millions of dollars and affecting thousands of employees and the public. An inefficient or conformist think group would waste talents, manhours, and money.

Business is to blame for the fact that today's college students must make a critical choice between business, or other careers without sufficient knowledge on which to base such a decision. Students daily exposed to the campus are well-equipped with knowledge about teaching, an abundance of facts on medicine, government service, and many other fields has long been available. But business has neglected to communicate adequately by way of personal experience, the really significant facts about the realities of business to the very people it is trying to attract.

Its enormous accomplishments that have produced the highest standards of living in the world - its massive research and development programs that are probing into outer space and underusses, which will profoundly affect virtually the face of man's life... its increasing direct involvement in the social problems of today, and the efforts to devise practicable means of dealing with root causes, not merely surface symptoms, which are all part of the daily operations of business.

The solutions being achieved result from "group-think" efforts within a corporation, or between a number of businesses, as in the result of a cooperative effort between business and government. No one individual possesses all the sufficient facts or knowledge to direct all growth phases of a major enterprise. No one sector of the economy has the technical know-how or resources to carry the load for the forward progress of our national program.

Within this framework there are "individual" selective tasks and goals requiring "individual" responses. It is through the intermingling of individual talents that viable solutions to the complex problems of today, and the challenges of tomorrow will be found.

Sincerely yours,

Robert W. Galvin
Chairman, Motorola Inc.
UB to Present Charlie Byrd, Top Jass Guitarist, In Concert

by Doris Hayashi

“Charlie Byrd is that rarity, a musician so versatile that he qualifies as one of the world’s top classical and jazz guitarists,” claimed Time Magazine. Tomorrow evening, HIT students will be given the opportunity to witness this musical marvel. Union Board presents Charlie Byrd on stage at 8:30 p.m.

Byrd has appeared on many major television shows including those of Johnny Carson, Jerry Bingham, and Steve Allen. He has been the subject of two television productions devoted to his unique contribution to American music.

Performing at numerous college concerts and nightclub appearances every year throughout the country, Byrd still prefers to spend much of the year in the Washington area. He is basically a family man and dislikes spending much time away from his wife and two children. A perfectionist, Byrd practices at least three hours a day, and still maintains his schedule allows for it. He is a competitive experiment...er and in recent years has been studying the work of Ravi Shankar.

Charlie Byrd can be seen in concert tomorrow night.

Esquire Theatre: The Lion In Winter

Peter O'Toole carries his role of Henry II in "Becket" to old age in "The Lion in Winter." This movie, currently playing at the Esquire Theatre, is the story of Henry's unwise appointment to the successor of the English Crown.

"The Lion in Winter" doesn't offer a fantasy-like glimpse into the world of the scene but presents the story in a most realistic manner; the slapstick, the castle and the mead, the dirt floors are covered with straw and dung, and the royalty babbles about its estates. Peter O'Toole's superbly written script, and photographic splendor in rhythm with the rhythm of the story, will definitely be awarded numerous awards.

**The Parables of Peanuts**

by Robert L. Short

Charlie Brown, Snoopy, Lucy, Linus, and Schroeder date back to 1950, when Charles M. Schulz created the comic strip "Peanuts." Since then, "Peanuts" has become a worldwide phenomenon, inspiring a range of products and merchandise.

The Parables of Peanuts is a collection of five parables, each focusing on a different theme. The parables are illustrated with the familiar characters from the "Peanuts" strip, making this a unique and entertaining way to explore the parables of the Bible.

The parables in the book are:

1. The Lost Sheep
2. The Good Samaritan
3. The Prodigal Son
4. The Talents
5. The wise and foolish virgins

The parables are told in a way that is easy to understand, making this book a great resource for both children and adults.

The 5 billion dollar corporation you probably never heard of.

Funny how big you can get and still remain virtually anonymous.

Somehow we've managed to do it.
We're a group of over 60 companies, making everything from microwave integrated circuits to color television. And we rank number 5 in the top 500 corporations in the nation.

Pretty hot stuff for a nobody. But though you may not recognize our name, maybe the name Sylvania rings a bell.

It's one of our companies.

You may even live in one of our telephone company areas. We operate in 23 states.

So here we are, 5 billion dollars strong, growing all over the place, and looking for engineers and scientists to grow with us.

Why don't you think us over with your Placement Director.

Incidentally, we're known in the communications field as General Telephone & Electronics. Pest. Pass it on.
I Read Tech News

The View From Here

by Bob Roeh

I have watched with a combination of emotions and some amazement as the rift between the editorial board of this newspaper and the publishers of the Independent Press has grown wider. But this week the conflict is no longer humorous. It is instead downright pathetic.

Let me attempt to trace the history of this conflict to illustrate my point. Last spring the idea for an independent newspaper came out of the group of concerned students who supported the Black Students Organization's demands to the Administration.

There was concern among this group that the effort would fail, since the Independent Press was to be published without official administrative action. The group went ahead with the paper, though, and it was distributed widely on campus during the week before finals.

At this time Technology News had ceased publication for the semester, so was unable to offer an alternative.

During the summer, the Independent Press became a continuing reality. The present staff of the Press was formed and plans were made for fall issues.

The first of these fall issues appeared on September 27. Very few of these issues have reached students' hands. Instead copies were confiscated; allegedly, according to D. N. Smith, Robert Roehn, because the publication had not been registered in his office beforehand.

Many '68 Integrals Left

 integrals '68 has been on sale in the HUB for two weeks. However, many persons have not picked up their copies, nor have they made arrangements for getting their yearbooks.

The following is a partial list of those persons who are entitled to a copy of the 1968 Integral:

- Brown, Mark
- Brons, Thomas
- Brown, Joanne
- Cole, Ronald
- Case, Margaret
- Iannone, Robert

Letters to ETC

BSO Denounces Past TN Article, Slanted Interpretation Is Claimed

In the November 1 issue of Technology News there appeared an article, concerning Mr. Sessy Weisman, which made reference to certain community oriented programs and the Black Student Organization. Several statements which were made in the article need to be clarified. They were based on a distorted interpretation of events and not on facts.

The facts are that:

1) Mr. Weisman has made no contact with the officers of the BSO concerning any programs at the gym.
2) When the officers of the BSO went to the office of Mr. Ed Glancy, they were asked to be clarifying because they were based on a distorted interpretation of events and not on facts.

Obviously some of these have left campus, it would be appreciated if someone who knows the new address of one of these persons can contact either Stephen Savage or Dennis Floutt at Ext 527.

Persons who have paid the 1968 Integral may pick up a copy at the Phi Kappa Sigma Fraternity on Mondays, Wednesdays, and Thursdays, or the book may be obtained at the integral office in the student organization's offices in the HUB basement, or at the Technology News office on Wednesdays between 5:30 and 7:00.

For other arrangements call Stephen Savage or Dennis Floutt at Ext 527.

The yearbook will not be delivered on Campus until Christmas vacation. All unreadable or unclaimed books that are left at that time will be sold without re-fund.

IIT Sends 22 To ACU Workshop Discussions

22 Representatives from IIT are attending the regional conference of the Association of College Unions-International being held this week end at Wisconsin State University-Eau Claire. They will attend workshops to discuss the cultural, social, recreational and educational programs provided by college unions.

Colleges and universities from Wisconsin, Illinois, Michigan, and a portion of Canada north of Wisconsin will be represented. The theme of this year's conference is "Involvement 68," wherein delegates will meet in groups to handle simulated projects as developed from the actual circumstances on various campuses. The featured speakers for the week end will include Dr. John Grier of the University of Minnesota and Mr. C. Shaw Smith of Davidson College, Davidson, North Carolina.

Evening entertainment for the representatives will feature Josh White, Jr., in full concert; other entertainment will include Shipley and Brewer in a coffeehouse program, and an APO sponsored "A Night at Campus."

The Association of College Unions, founded in 1914, is officially represented on over 650 campuses throughout the world. The purpose of the Association is to provide an opportunity for unions to join in studying and improving their services, and to assist in the development of new college unions.

William Dunbar, director of the HUB and member of the steering committee of the ACU, and Richard Unger, assistant HUB director, are also attending the conference.

Perspective

Dr. Knepler, Chairman of LLP Dept., Projects Pride With Mystical Element

by Doré Hayashi

What is the mystical element which binds individuals together, making them surpass the boundaries of feeling effectively neutral towards one another? Surprisingly enough, it may be a strictly internal stimulus which creates the before-mentioned response. Pride in oneself may be the determining factor, ranking mankind in a universal hierarchy. The degree to which a person sees himself as being ultimately important within a finite framework correlates with the level on which he exists, and affects his lifestyle thereafter.

Dr. Henry Knepler, chairman of the Language, Literature and Philosophy Department projects a feeling of inner tranquility through his gently assertive, outward manner. A feeling of overwhelming admiration is generated within his listeners due to the above mentioned "mystical element."

One is amused while speaking to this scholar. Dr. Knepler has obtained a disciplined and controlled awareness of his total environment. He is able to alleviate existing conditions which may be considered less than perfect and is therefore quite receptive and responsive to new ideas.

His aesthetic is pure, detached from possible consequences or ramifications. This is an abstraction which may seem absurd, yet it is a fundamental principle in human understanding. Ideas are exchanged perfectly, and only then are they placed into the total scheme of things.

Since 1961, when Dr. Knepler was appointed chairman, LL&P has evolved into a department which purports combined a number of disciplines. A major increase has occurred in the number of faculty members teaching foreign languages, linguistics, and philosophy.

Unfortunately, the department has not reached its greatest potential due to the lack of interested students, but this is a primary complaint of all the liberal arts departments. The faculty is large and diversified but the number of students it confines is limited.

Dr. Knepler, aside from his numerous intellectual pursuits, is a staunch advocate of increased communication among all facets of the IIT population. As he said, "The groups must work together; communication will then occur quite naturally. Like any other human contact, faculty-student communication has to have a reason, but the faculty is willing if students are."

"Faculty members are much more accessible than students believe. Historically, the faculty has been making decisions without thinking of interacting with students, but eventually and inevitably, there will be more of this communication. The faculty may not have previously sought increased communication, but it certainly has not avoided it," he said.

Dr. Knepler is a beautiful man. There are no words to express the magnitude of admiration which is generated from within me. He is a gentle gentleman who evokes immediate trust and respect.

Don't Get Pigeonholed. "I was determined not to take a job where I'd be stuck at the same desk for the rest of my life. I knew that experience on the job was the best teacher. What I didn't know was precisely what kind of a job I wanted to do. Teletype, being the kind of company it is, gives the graduate engineer the chance to move around; to try his hand at various assignments with the company. Both the individual and the company benefit from this type of arrangement.

"My present assignment involves planning new parts for production (from drawings received from our associates in the research and development area), specifying necessary tooling, and solving all manufacturing difficulties once the parts are in production. Handling important projects like these from start to finish, with every necessary facility you need at your fingertips, adds up to a real opportunity for a young graduate like me.

"Freedom to find your own way... that's why Teletype is my kind of company."

Entire Quad Reserves Weekends for Play: Plans Varied Activities

by Doril Hayashi

Studying for midterms is promptly forgotten during the weekend regales. There is a time for work, but more importantly, a time for play.

"Back to nature" must be the theme for the Alpha Sigma Phi Pledge Party which is being held at Gray's Lake tomorrow. A hayride and bonfire will initiate the afternoon activities. Next weekend, the Mother's Club fall card party will be held at the house.

Delta Tau Delta has challenged Triangle to a game of football. The prize which each house will be vying for is two kegs of beer. The date hasn't been set, but the day has been set for the Pledge Formal (tomorrow night). Next weekend there is a pajama party (??) in the house and finally, I was requested to print the following: "Larry Stagner did not go to Karen Wierums and says he would not even consider it." It was a recreation of something that was printed in Technology News two weeks ago.

Triangle will be visiting its chapter at the University of Wisconsin (Madison) for the week and before they go, an alumni beer blast is scheduled for tonight. The following have lost their letters: Tom Zuzan, John Morel and Bob Hoel.

The Sig Eps are planning an off-campus party co-sponsored by the Pi Kappa this evening. Next weekend an Active Alumni Beer Blast is scheduled.

Tau Epsilon Phi is co-sponsoring a mixer on the near north side with the Alpha Lambda Delta security weekend. Next Saturday, the members are having their Active Play Party.

Alpha Epsilon Pi is in its midterm social slump with not much happening as a group for the next few weeks. Of course individually Chris Wernstrom is nominated for the IF Ball Queen. She was escorted by Guy Allard, her promate, from the Pi Kappa Phi house. On the 15th a party will be held at Mike Konell's apartment and the following evening, the Pledge Class Dance will be held.

College is a waste of time...
IBM invites you to join an infant industry.

Big as it is, the information processing industry is just beginning to grow.

Recently, Fortune estimated that the value of general purpose computers installed in this country will more than double by 1972. Other publications have other predictions, and probably no source is totally precise. But most agree that information processing is one of America's fastest growing major industries.

Every day, it seems, computers go to work in a new field or new application. IBM computer are working in such diverse fields as business, law, medicine, oceanography, traffic control, air pollution. Just about anywhere you can name.

To somebody just starting out, this growth means exceptionally good chances for advancement. Last year, for example, we appointed over 4,000 managers—on performance, not seniority. Here are four ways you could grow with IBM:

Engineering and Science
"The interdisciplinary environment keeps you technologically hot."

"Working in data processing today pretty much means you work in a broad spectrum of technologies," says Nick Donofrio.

An Associate Engineer at IBM, Nick is a 1967 graduate in Electrical Engineering. He's using his technical background to design circuits for computer memory systems.

Nick says, "Your specialty at IBM can take you into the front yard of half a dozen different fields. In my job, for example, I worked with systems design engineers, chemists, physicists, metalurgists, and programmers. The diversity helps me keep up to date on the latest technologies."

Career areas in engineering and science at IBM include: Research, Design & Development, Manufacturing, Product Test, Space and Defense Projects, and Field Engineering. You'll need at least a B.S. in any technical field.

Marketing
"Working with company presidents is part of the job."

"I'm pretty much the IBM Corporation in the eyes of my customers," says Andy Moran. "I consider that fairly good for an engineer who graduated only two years ago."

Andy earned his B.S.E.E. in 1966. Today, he's a Marketing Representative with IBM, involved in the planning, selling and installation of data processing systems.

Andy's customers include companies with annual sales ranging from 20 million to 120 million dollars. He often works with executive vice-presidents and presidents. Andy says, "At first I was a little nervous about the idea of advising executives at that level. But by the time I finished training, I knew I was equipped to do the job."

Career areas in marketing at IBM include: Data Processing Marketing and Systems Engineering, Office Products Sales, and Information Records Sales. Degree requirement: B.S. or B.A. in any field.

Finance
"You're in an ideal spot to move ahead fast."

"I've always figured my chances for advancement would be better in a growth industry. That's why I picked IBM," says Joe Takacs.

Joe's been working in general accounting since he got his B.B.A. in June, 1968. Growth wasn't the only reason he chose IBM. He says, "I learned that it's general practice at IBM to promote from within and to promote on merit alone. I like that."

"Another growth factor is the job itself," Joe says. "During my first few years, I've got experience with every type of accounting—Income & Expense, Balance Sheet, and so on. I've been learning how the company is structured and how it operates on a broad scale. That's exactly the kind of knowledge I'll need to help me qualify for a manager's job."

Career areas in finance at IBM include: Financial Planning and Control, Financial Analysis, Accounting, Information Systems, and Internal Auditing. You'll need at least a Bachelor's degree.

Programming
"It's a mixture of science and art."

"A computer is practically useless until somebody writes a program for it," says Earl Wilson.

Earl got a B.A. in Modern Languages in June, 1967. He's now an IBM programmer working on a teleprocessing system that will link the computerized management information systems of several IBM divisions.

Earl defines a "program" as a set of instructions that enables a computer to do a specific job. "Programming involves science," says Earl. "because you have to analyze problems logically and objectively. But once you've made your analysis, you have an infinite variety of ways to use a computer's basic abilities. There's all the room in the world for individual expression."

Career areas in programming at IBM include: Systems Programming, Application Programming, Programming Research, and Internal Programming for IBM's own use. You'll need at least a B.S. or B.A.

You can get the other part straight from the source. Talk to our representative and ask him about XEROX's remarkable major advances in education. In areas like color imaging and 3-D imaging, about refinements in combined copiers and copier systems to process and graphically reproduce color theory in exact colors, any distance... Ask anything imagineable and you'll discover XEROX is not just a company that's invested with every phase of the information and education explosion. We place great emphasis on individual innovation. Additional schooling aimed at advanced degree. Brainstorming a variety of short-term project groups. Any benefits in shortening your career, not simply a job for you to fill So while you're looking over your career opportunities, we'll be looking over for career potential. Fair chance. Why not make an appointment with your Placement Director? A half-hour of your time could be the start of a great future in fundamental and applied research, development and manufacturing engineering, or programming.
This year's intramural football championship will pit the Big Red of Alpha Sigma Phi against the Skulls of Phi Kappa Sigma. The Sigs powered their way into the final game with a 20-0 victory over Triangle. The Sigs unveiled a new flanker offense in this game, an offense which the Phi Kaps also use.

In the first half neither team was able to get on the scoreboard. The Sigs had some trouble adjusting to their new offense, but the Sig defense held Triangle at bay.

back Al Teach. Teach took the short pass and ran to pay dirt. End John Nelson took a Sollymoss pass for the extra point.

The Sigs kicked off and the ball was returned to their 15 yard line. The Sigs took the second half kickoff and marched up the field with Sollymoss running end sweeps for good yardage. The first score of the game came from the Triangle 20 yard line. Sollymoss faked another end sweep, then stopped and pitched the ball to blocking back Al Teach. Teach took the short pass and ran to pay dirt. End John Nelson took a Sollymoss pass for the extra point.

The Sig kickoff was a good one, and Triangle was buried at their own 15 yard line. On the first play, Sigs corerback Charles DuPont picked off a Triangle pass and took it in for the second Sig score. Sollymoss brought the offense in and threw to center Ron Bakalar for the extra point to make it 14-0.

After the kickoff Triangle came up with its best scoring opportunity of the half. The big play was a long bomb to end Gene Hector. Once again penalties thwarted Triangle's scoring drive.

The Sigs took over and brought the ball back down the field. Sollymoss took it in for the final score on a 2 yard run.

The Phi Kaps had a rougher time getting to the finals. In the semi the Skulls ran up against Phi Kappa Phi, the undefeated champions of League 1.

At the end of the game the Phi Kaps were no longer undefeated. They succumbed to the Skulls by a 13-7 count.

Illini Capture Intramural Title, Squeak Past Dorm Animals

The Illini captured this year's intramural football championship. In the championship game the Illini met the Dorm Animals.

The teams played to a hard fought 6-6 tie. The Illini were declared winners and champions by virtue of an edge in first downs.

In the first half the Illini squad dominated the play. They received the opening kickoff and immediately began a 60 yard drive. The drive was kept moving by a 25 yard pass from quarterback Dan Podraza to halfback Reinhardt Taylor.

The Illini culminated their march from the Animals' 20 yard line. Podraza dropped back, eluded the Animals' rush, and flipped a touchdown strike to big end Jon Alsatys. The Animals rose up with a fine inside rush to stop the extra point try.

The rest of the half was scoreless as the defense took over. The Illini defense was particularly tough, holding the Animals' attack to one first down.

In the second half the Animal defense stiffened and forced the Illini to punt at the end of the first set of downs.

The punt was no bargain and gave the Animals excellent field position at their own 45 yard line.

On second down Animal quarterback Scott "Sly" Jost rolled out and threw a 40 yard bomb to end Wayne Sanders. This play shocked the Illini defense, and seconds later Jost (Continued on page 13)

Oh, oh. Bet my date is the one with "personality."
