**Rettalata Reports Annual Budget Of $52.6 Million**

Record totals for assets and fiscal operations were attained by IIT during the 1969-1970 academic year, according to Dr. John T. Rettalata, IIT's annual presidential report to the IIT Board of Trustees.

The President's report states that the combined annual budget of IIT and its affiliates has reached the total of $52,000,000. This represents an increase of $1.1 million over last year's record high of $51,000,000. The combined fiscal operations included: income and endowment funds of $12,000,000, and $31,000,000 of student aid and research grants.

President Rettalata also reported that the total enrollment in the university's day and evening divisions exceeded 7,300 students, a slight decrease from last year's total of 8,400. There was a gain in the full-time day student enrollment, and the part-time evening enrollment showed a loss. Dr. Rettalata attributed the increased enrollment to the availability of more classes and programs.

President John T. Rettalata added, "Thousands of people benefited from special programs held on campus, including institutes, short courses, seminars, professional meetings, recreational neighborhood activities, and courses provided by the VPA and the School of Engineering and Technology.

**ITRI Initiates Research Project To Study Artificial Heart Devices**

One of the largest projects to operate under the facilities of ITRI is now in its preliminary stages. Under the sponsorship of the National Institute of Health and the Department of Health, Education, and Welfare, the project will evaluate artificial heart prostheses for patients by decreasing the normal work load on the heart.

The project will encompass all of the ITRI Research and Measurement Building and will eventually form a staff of over 50 members. The clinical staff includes Dr. C. F. Kottke, chief surgeon of the University of Chicago and the noted heart surgeon who performed one of the first heart transplants in Chicago. Also included in the clinical staff from Children's Memorial Hospital is Dr. Milton Paul, a well-known specialist in cardiology.

The stated purpose of the project is to objectively test and evaluate the devices from an engineering, biological and clinical standpoint. The Artificial Heart Program office believes that "it is imperative that the devices or components satisfy rigid biological and engineering criteria before they can be considered for clinical trials."

**Moratorium Scheduled for Nov. 14-15; Activities Include Teach-In, Picketing**

by Diane Cleary

The IIT Moratorium Committe has a tentative schedule of activities to be held on campus during the November National Moratorium. In general, the schedule will include the following, although it is subject to change:

- November 12
  - 8 pm - Teach-In
- November 13
  - 12 pm - Teach-In
  - 4 pm - Picket ITRI
- November 14
  - 8 pm - Teach-In
  - 9 pm - Moratorium
  - Small discussion groups
  - 11 pm - Teach-In
  - 4 pm - Picket ITRI
- November 15
  - Evening - Movie and/or speakers
  - Saturday, November 16
    - CAMPUS WIDE TEACH-IN

The Teach-In will be primarily for students and faculty, although anyone desiring to support the movement may attend. In the community, and in Chicago during the Moratorium before the Moratorium. The Teach-In is intended especially for those who are not aware of the issues.

Because of the biological and chemical warfare research being conducted by the IIT Research Institute, the building will be picketed throughout the Moratorium.

**J. R. Morrin, EIC Resigns; Kass Assumes Position Starting November 1st**

Last Wednesday, October 29, J. R. Morrin, EIC in Charge of IIT's Technology News, announced that he would be submitting his resignation on November 1st to President Bob Holt, the resignation would become effective November 1, 1969.

Morrin stated the reason for his resignation as "grade problems." It is in order to produce a good news- letter, an editor must put in 30 hours a week," commented Morrin. "In spite of the recent reorganization, I would like to continue to function as EIC without further sacrificing my studies."

Tacking over the duties of EIC until the Publication Appointments Board can determine for an official

**Correction**

**Wage settlement data printed in the strike follow-up story of last week's Technology News was incorrect**

In a press release, the IIT Union said that the strike would consist of three wage increases: 11.5% immediately, 11.5% in January, and 11.5% in October, 1970, for a total increase of 35%.

The data was incorrect. The correct figures are as follows:

- Effective October 1, 1969, a new wage scale was established.
- Total dollar increases of 11.5% over the previous scale.
- The IIT Union acknowledged the error and promised to update the information under the provisions of the new contract. In October of 1969, employees will be given an across-the-board increase of 7.5% (with a minimum raise of 1.5% per hour). Total labor will be set for wage increases, is estimated at 30%.

Jerrilyn Appelton will be the new Assistant Editor. Bob Unger, a member of the IIT union for three years, has served in the Past as an occasional writer. Assistant Editor Unger, impressed with the job, decided to accept the position. He was on the Editorial Board for two years.

President John T. Rettalata
Applaud Engineers' Unflinching Loyalty

Traditionally, the EC's last editorial is dedicated to thanking their loyal staff for their help over the semester. However, since I am already breaking tradition by resigning mid-semester, I will also break tradition by abbreviating my thanks.

A sincere thanks to those who worked with me, and especially to those who went without sleep so many times to help put out a decent newspaper. And the best of luck to Mike Kass in his new role.

Now, on to the more important: the upcoming Viet Nam Moratorium. Some of you who participated in the last one are aware that there were also many students who ignored the day and went to classes as usual.

I often wonder how many students at IIT, in particular engineering students, are opposed to the Viet situation and yet never even think of joining with other students to demonstrate their opposition. Or how many research engineers (and not just those at IITRI) are opposed to the nature of the research that they are performing.

Why is it that the scientists, engineers, and other researchers are not at the head of the Viet Moratorium? Are they sissies? Would most researchers rather work on a better method of killing than one which would save lives?

Neither of the above. The fact is, the scientist and engineer are among those most easily "bought off." When confronted with a problem, be it how to pack more punch into an ICBM or the creation of a completely mechanical heart, the engineer resigns himself to the solution of that problem and apparently is not interested in the morality of the result. A true engineer will solve any problem, so long as you give him a lab. It's not unlike giving a pet a cut of your yarn.

It is often said that an engineer makes a very good salary. Well, everything's relative, but let's assume that he does make good money. Why? Because engineers are convinced that they can justify demand high pay. Did they at some time threaten to strike for better wages? Hardly. Were it not for their being in great demand, engineers might well be among the lowest paid college graduates.

If engineers ever closed their books long enough to even form a union or found time enough to demand a solution to any problem, industry could probably pacify them by passing out free computer time or slide-rule tie tacks.

IT is swamped with these potential "noble men of science." And the engineering syndrome is already beginning to flower; note the abundance of patents. In summing up, I would like to be able to point the finger of blame at the engineer for his seeming inability to comprehend anything but a mathematical equation. But one cannot blame the man of science for his attitude, any more than he can blame the passerby for his fascination with a ball of yarn. Can one?

Rho Epsilon

There will be a meeting of the Rho Epsilon Amateur Radio Association at 1 pm on Tuesday, November 4, in the HUB. All interested radio amateurs are invited to attend.

AIAA

The American Institute of Aeronautics and Astronautics will present Mr. Allen Freeland at a luncheon speaker at their meeting on Tuesday, November 4. The topic of his talk will be "A Grand Tour Mission to the Outer Planets." It will be held at 1 pm in the E 1 auditorium, and is open to the public.

ONI

The Organization of New Intellectuals is a group which meets to discuss Objectivism and its related topics. The meetings are normally unpublicized, but they are held regularly on Mondays at 8 pm in the HUB mezzanine. Anyone interested is invited to attend.

Society of Physics Students

The IIT Chapter of the Society of Physics Students will host a panel discussion on "The Requirements and Opportunities of Graduate Study in Physics and Allied Fields" on November 4, from 1 pm to 2 pm in room 304 of the HUB. The panel members will be Dr. Burnstein (High Energy Physics), Dr. Ernst (General Relativity), Dr. Gross (Biophysics), and Dr. Weinstein (Solid State Physics). The panel will discuss questions about graduate studies in a given field. Anyone, especially seniors, interested in graduate studies in physics is invited to attend.

WHIT Sunday Showcase

This Sunday, from 9 pm until midnight, WHIT brings you the second Come- dy Showcase, hosted by Steve Belling and featuring Bill Cosby, Flip Wilson, and many others for three hours of hilarious fun.

IEEE

The Institute of Electrical and Electronic Engineers will hold an informative meeting on Tuesday, November 4. Dr. Whithalhead, currently a member of the Board of Directors of the Engineers Council for Professional Development, will speak on the Engineering In Training Exam.

Taffy Apple Sale

Arady Air Society will sponsor a taffy apple sale, October 31, in the HUB. The sale will be held all day today and tomorrow.

Protection Systems Van

On Monday, November 3, 1969, four IIT's Protection Systems Van will be on campus. The van will be on 32nd St., between State and Dearborn Streets between the hours of 3 and 5 pm. All students are invited.

In a recent letter to IIT'S Secretary Gary Garns (cc: Technology News), Dean of Students Robert Borthron stated that the purpose of the disciplinary procedures. Our goal is to develop an equitable and workable judicial program for review by students, faculty, and administration.

For one, it seems that the administration has placed itself on the line by promising to develop an equitable disciplinary procedure.

At present the disciplinary procedure at IIT involves three levels. The Dean of Students Office is responsible for deciding whether or not a disciplinary question brought to its attention warrants being turned over to the Institute Disciplinary Committee, presently composed of four faculty members and three permanent members. If the matter is referred to the committee, it then makes a decision on the case and prescribes the punishment. The student involved may then appeal the decision to the President.

At its Spring Conference last semester, the IIT'S Board of Control drafted a preliminary proposal for the IT'S Disciplinary Committee, including student participation in all phases of opinion. This proposal for restructuring the judicial system was presented to Dean Borthron.

It is certainly not too radical an idea to expect that a student should have some voice in an area as vital as student discipline. It makes little sense to assume that a student is incapable of formulating a valid opinion regarding punitive action, taken against another student. Our trial by jury is based on the concept of trial by peers. Why not apply this to IT'S?

In his letter, Dean Borthron said, "I have received this document (the petition) and shall treat it as representative of the consensus of the board. The thoughts and opinions of the student body and the rational behind them will be helpful to a review and reconsideration of our disciplinary procedures. The general tone of the letter seems to indicate that the administration also realizes that there is work to be done before we have an equitable and workable judicial program."

Having recognized that there is a need for reconsideration of disciplinary proceedings, and that student opinions should play a role in establishing this structure, Dean Borthron has placed the administration on the spot. They cannot say "We never said anything like that." Likewise, they have placed themselves in a position where they would have to consult with the student body before they can proceed with drawing up a new structure. Being so committed, the administration is not able to restructure the judicial process without, in effect, "backing down" on Dean Borthron's statement.

Considering Dean Borthron's letter as a statement of administration opinion, the possibility of having student representation on the disciplinary proceedings is indeed bright.
Josh White, Jr. Concert Enthralls Enthusiastic But Small Audience

“Spirits of ’69” Theme of H.C.; Two Concerts, All Night Party Featured

Homecoming is alive and well at H.T. After a series of meetings, the Homecoming Committee has set up the list of scheduled events for December 11, 12, and 13. The theme for this year will be “Spirits of ’69.”

The events will open Thursday, December 11 with the tentatively scheduled Freshman Bonfire at 7, followed by the Tech hoopers vs. Northeastern Illinois State at 8. Friday, December 12 will see the judging of the decorations by the Queen candidates at 5, and at 7:30 and 10 the Homecoming concert, to be held this year in the HUB auditorium. Each year’s performers will be Buff Rose, Smith, and Food. Various contests to be announced at a later date will be held on Saturday, December 13 from 1 to 4 in the afternoon. Saturday evening the HUB basketball team will play against St. Francis at 7. The Homecoming Queen will be crowned at the halftime of this game.

A new twist will be added to the activities with the holding of an all night sports party, following the basketball game at 9.

The YOUNG THEOCRISTS of Amer. invite you to a one-week-end educational discussion, at the YMCA Camp Pacer, Nov. 28-30, food and lodging for only $5. Call James or Eta Tutuc 842-4312, after 5 pm.

Announce NATO, SEATO Fellowships

NATO Fellowship

NATO is offering a $460 per month research fellowship in the field of humanities and social sciences. The fellowship includes air travel costs for any approved research, usually lasting from 2 to 4 months. Candidates are selected on the basis of their experience and must be from a member country. Work must be directly related to the NATO nation. For an application, write to the Committee on International Exchange Of Persons, 201 Constitution Avenue, Washington, D.C., 20418. The deadline for submitting applications is February 1, 1970.

SEATO Fellowship

Fellowships for research on the problems of Southeast Asia or the Southeast Pacific area will be offered by the Southeast Asia Treaty Organization to nationals of member countries. Applications are available from the Committee on International Exchange Of Persons, 201 Constitution Avenue, Washington, D.C., 20418. The deadline for applying is February 1, 1970.

Faculty Senate, ITSA Hold Fall Conference on Nov. 8

The ITSA Faculty Senate and ITSA sponsor a Fall Conference for the encouragement of campus communication and to provide an input for campus committees. The conference will be held Saturday, November 8, in the HUB. All students, faculty, and academic administrators are urged to participate. Following an initial group meeting, the participants will break up and discuss specific academic issues. Spokesmen for each group will return after lunch in order to prepare a summary to be distributed to all participants, the chairman of all campus committees, and others in policy making positions. Please return the registration form below if you plan to attend and indicate the topics in which you are most interested. If you have more than one choice, use 1 for your first choice; 2 for second, etc. Registrations received before 5 P.M. Thursday, November 6, will receive preferential consideration.

(campus address)

I plan to attend the November 8 Conference:

Pass-Fail Grading Systems
Library Hours and Facilities
Core Curriculum (EAP's)
Honors Program
Course and Faculty Evaluation System
Faculty-Student Contacts
Nurkic of Core
Other Specific

ATTENTION: STUDENTS
Will do your typing - research papers, theses, etc.
24 Hour Service

REDAK SECRETARIAL
1941 S. Ridgeland, Berwyn, Ill. 60402

SOPHOMORE THRU GRADUATE STUDENTS
Part-time positions available as a manager in research data processing and marketing. Positions will provide a steady income a year.

NROTC Kidnapped
by Peter T. H. Smith

Last Saturday,概面 heads of the NROTC, and despite the efforts of the American University and the University of Illinois, the NROTC had a successful fund-raising event. The event was a benefit for the University of Illinois ROTC, and a possible 1500 people attended. In the ROTC headquarters, the facility was completely occupied by the police force. The event was held in the ROTC headquarters, and a possible 1500 people attended. In the ROTC headquarters, the facility was completely occupied by the police force. The event was held in the ROTC headquarters. The event was held in the ROTC headquarters.

Maybe our name gives you the wrong impression.

You might think that if you come to work for us, we'll stick you behind a desk making phones for the rest of your life.

Don't be misled by the word Telephone in our title. Actually, we're a group of over 60 companies and more than 50 of these happen to be in the telephone business. That's in the General Telephone group and we're involved in developing the telephone business, so our customers can work for another of our companies, like Sylvania.

Sylvania manufactures over 10,000 products alone. Knocking out everything from Micro-Electronic, Semi-Conductor Devices to Educational Communications Systems.

The communications field is one of the fastest-growing industries around. The more it grows, the more we grow and the more customers we have to serve.

In the communications field, we're looking for Scientists and Engineers with ambition and ideas. Together we can discover new worlds. Or make an old one easier to live in.

General Telephone & Electronics

NROTC Rifle Team Wins Match; Kidnapping of Shooter Hurt Score

by Paul Reynolds

Last Saturday one of IIT’s least-known teams had its season opener, and despite the loss of a top team member, was successful. The Navy ROTC Rifle Team beat a strong Army ROTC team from Univ. of Ill. — Chicago Circle with a 1097 to 1090 final touch of a possible 1500 points. With this first win the NROTC team has already equaled last year’s win record. In the 1968-69 season IIT NROTC had a 1 and 9 record, finishing in last place in the Chicagoland ROTC Rifle League (CRL), made up of teams from IIT, UIC, Westmont College, DePaul, Loyola, and Northwestern.

That poor record was the result of insufficient practice by many team members, according to First Sergeant R.A. Adams, the team coach. He feels this year will be different because of the enthusiasm and spirit shown by the team so far, including the winning of this first match. If he is correct, the NROTC can look forward to several successful seasons due to a large number of freshmen and sophomores on the team. Of the 13 members, 3 are freshmen, 7 are sophomores, 1 is a junior, and 2 are seniors. A bizarre incident contributed to the close finish of Saturday’s match. One of the NROTC’s top shots, Sullivan Augustine, pledge from Sigma Phi Epsilon was kidnapped by his pledge the night before the UIUC match. He was still missing by starting time Saturday morning, and Navy was forced to shoot without him.

Middies Lead by One; 4-0 Lead by Farr Hall

by Barry Spencer

As the 1st mutchball tournament moves into the final weeks of league competition, the Farr Hall team remains as the only undefeated team in the tournament. Navy ROTC defeated the Illini Tuesday to knock them from the ranks of the undefeated.

Farr Hall has played every team in the Thursday league, and has yet to suffer a setback. Their record was challenged last week by the Zoa, who lost their first game, but only for the second time. The Zoa was unable to beat Farr Hall last week and looks like Farr Hall will remain on top in the Thursday league.

In the Thursday league, three teams share the lead; NROT, Illini, and Versus. Versus defeated AICE Tuesday by a score of 24-0. Versus depends heavily on the running and passing of quarterback Norman Wagoner. Navy and the Illini also played Tuesday with the middies winning 14-6.

All of NROT's points were scored by Glenn Davis on passes from quarterback Les Solomon. The Navy touchdowns were set up by a 30 yard pass from Solomon to center John Commers in the first half. A tough defense and a good punt return in the second half gave Navy good field position and set up Versus' second touchdown.

An Illini drive late in the final half was spearheaded with runs by quarterback Bruce Leonard and halfback John Sorvillo. Larry Kirby ended the drive by taking a ten yard pass for the touchdown. Navy maintained control for the rest of the game and forged ahead to break the three way tie for first place.

With half of the season already over, it looks as if Farr Hall is the team to beat in the Thursday League. In the Tuesday League, however, things are still much up in the air as the fairly even strength of all five teams.

Record Attendance at Last CC Meet

by Bob Johnson

Last Tuesday was the finale to the 1969 Cross Country season. The conditions for the meet were anything but ideal with the temperature in the low 40's and a slight wind blowing. The schools competing were III, Chicago State, Rockford College, and Northern Illinois. Tech finished third out of the four schools despite a second and a third place by Bob Burson and Jerry Wilks and a fine effort by all the Tech Harriers, Greg Padgett, Chuck King, Al Stueben and Mike Barnett finished 15, 16, 19 and 24 respectively.

The winning time was 21:55 by Lynch of Chicago State to set a new course record. Burson was 31 seconds behind with 22:06 and Wilks with 22:15, both breaking the existing record of 22:50 by over half a minute.

Commenting on the season Coach Madrav stated: "We had a very successful season considering the small size of the team, and I want to commend all the team members for their fine effort. Attendance at the meet was approximately 50,000 people, due to the passing spectators as they drove by in their cars on Outer Drive.

The tennis team will have their first scheduled practice in the gym from 9 to 12 on Wednesday morning on Saturday, November 1. Everyone is invited to attend.

Engineering: Would you rather start your career in management and practice management instead of starting in engineering and working up to management?

Charnin Paper

A SUBSIDIARY OF THE PROCTOR & GAMBLE CO.

Manager, Product Development, Charnin Paper

Experience in papermaking is not necessary; we'll train you. Within 6 months after you join us, you will be given full charge of an engineering section or direct responsibility for a production unit or department.

We will interview at the Student Placement Office Wednesday, November 5

BS and MS degrees in Chem, CE, EE, ME, Pulp and Paper Technology, and MBA's with BS in any technical discipline. We have opportunities in:

- Manufacturing Plant Management
- Plant Maintenance Management
- Product Engineering
- Plant Industrial Engineering
- Plant Chemical Engineering

Already 10th largest industry in the U.S., papermaking is exploding with new growth. And Charnin, as a producer of personal paper products only, is a pacesetter in the segment that is growing 3 times faster than the total industry!

Charnin's entire operations are alive with new methods, new ideas, new processes, new products...and Charnin engineers are in the forefront of these developments. As we expand our marketing area expands beyond 45% of the U.S. population, we need more engineers capable of bold new thinking.

Our rapid growth combined with a practice of promotion from within, provides outstanding advancement opportunities. We must significantly increase our management organization in the next few years, providing opportunities at all levels in the organization. Your progress will be closely followed, since our technically trained management group is comparatively small.

Choice of locations: Green Bay, Wisconsin; Cheboygan, Michigan; Mahopac, Pennsylvania; and (new) Cape Girardeau, Missouri; plant that has just gone into production. If hunting, fishing, or sking are hobbies, your choice of locations can put you into an area rich in resources for your favorite sport.

Sign up at the Placement Office now, and find out more about a future with us. Bring in the gym from 9 to 12 on Wednesday, November 5, 1969 at 115 N. Wabash at Washington, ENGLEWOOD EVELYN GREEN PLAZA.

Equal Opportunity Employer AA EEO
Faculty Petition Creates Controversy; Claim Faculty Constitution Violated

Considerable controversy has developed over the calling of a Faculty Senate meeting now scheduled for Monday, November 10, to discuss a student petition now circulated by the IIT/SA Moratorium Committee.

The petition states that "it should be left up to each student's discretion whether to attend classes." On the Moratorium days of November 14 and 15. It further requests that "no tests or quizzes should be given on those days so that participating students "will not feel forced to attend classes.

Certain members of the faculty plan to propose a resolution in support of the student petition.

Events leading up to the calling of the meeting, beginning over two weeks ago, have created heated controversy and claims that the Faculty Constitution has been violated.

On October 26, three of the four members of the Faculty Senate Committee, headed by Senate President Lennart Persson, along with four Senate committee chairmen, decided unanimously not to call a special Senate meeting to discuss the Moratorium. A meeting had been held in October prior to the first Moratorium for the purpose of Moratorium discussion.

Two subsequent requests by faculty members for a special Senate meeting to discuss the student petition were denied by Dr. Pearson on the basis of the Coordinating Committee policy.

A further faculty request for a special Senate meeting to discuss the student petition was also rejected by the Coordinating Committee. Dr. F. Pearson, the committee's secretary, suggested that the petition was directed to the faculty as a whole and that the faculty members should petition for a faculty meeting to discuss the subject.

The faculty Senate comprises only tenured faculty members.

As of Thursday morning, the faculty meeting had not yet been announced by Dr. Retallack, according to the committee. The request by the student body to call another faculty meeting to discuss the subject was rejected and the notice for the meeting was postponed.

The original dates proposed were November 7, 10, or 12.

Moratorium Committee Revises Schedule; Asks Response to Pres. Nixon

Last Tuesday's meeting of the IIT/SA Moratorium Committee to plan an extended schedule of Moratorium events for the campus and discussion of President Nixon's November 3rd speech about Vietnam.

The committee chairman, Dr. F. Pearson, reported that "the President's speech seemed directed more at soothing public opinion than at the crucial issues of withdrawal and peace." The speech did not make any move to end involvement in Vietnam or to clear a clear direction to end the war. The committee had considered before sending the petition to those who demanded a real disengagement from Vietnam.

Members of the committee expressed greater determination in their organization. "We do not claim that, with the time necessary to organize a faculty meeting, it could not now be held before the Moratorium deadline." Members of the committee proposed new dates for the meetings, including November 7, 10, or 12.

Tech Campus Exhibits Sculptures by Jacquet

by Tom Heller

You wash up for your eight o'clock class, and wearily trudge the path you have long walked. Suddenly you are confronted by geometrical shapes. You attempt to focus your bleary eyes. What is it? a alien life form, a computer plot, the new campus police car, or is it the new computer parking lot? No Technical error. Those bloodshot eyes, it's none of the above.

It is the present the site of a unique exhibit of large outdoor sculptures. Early this week the works of art, sculptured by Jerald Jacquet, were placed on a black field shown for exhibition and placed in various spots on campus.

The exhibit, lasting from November 1 through April 30, features nine abstract pieces up to eight feet in height and weighing up to one ton each. The exhibit was sponsored by IIT/SA Union Board, entering into new fields in an effort to expand campus life.

Eight of the nine sculptures are constructed of Cor-Ten steel, a material that resists weather, creating a rich brown patina. The other sculpture is painted steel.

This exhibition project is aimed at protecting and healing the sculpture, since no protective coating is applied to the finished piece. The steel sculpture takes up to seven years to weather properly, according to the sculptor. Jacquet feels that his sculptures are a reaction to our modern environment. They reproduce, in effect, the environment for the viewer, or as he would rather have it, the participant, of his works.

The organic properties of the steel and the sculptures' various forms are a product of Jacquet's style of sculpture which he believes to have certain terms of organic geometry. He believes this term connotes an aspect expanding geometric forms.

Jacquet, who is also a sculpture instructor at IIT's V. C. U. Circle Campus, has exhibited in several Midwest winter shows and one of his works, fourteen feet tall, stands on O'Neil's stage at Illinois Avenue.
