

NOTICE

News of interest in a class in direct concern to every member of the American Institute of Chemical Engineers is brought you in this issue for the benefit of its members.

The Board of Trustees of the American Institute of Chemical Engineers has recently appointed a new group of officers and some of these officers are now here to inform you of their plans and to answer any questions you may have.

The new issue covers the following topics:

1. Officers of the Institute
2. Committee Reports
3. Technical Papers
4. News from Other Societies

The mailing list for this newsletter is maintained by the Home Office of the Institute. If you are not on the list, please contact the Home Office to be added.

Professor E. L. Johnson, Chairman

dated March 10, 1952

It is hoped that this newsletter will be of value to all members of the American Institute of Chemical Engineers and encourage their interest in the Institute and its activities.

Sincerely yours,

E. L. Johnson
Armour's Development Plan

At the present time the Armour Institute of Technology is beginning a drive that will carry her from her present status as a small institution of 400 students to an even greater place of influence in the engineering world. The changes are developing in every direction of human endeavor. It is only fitting that the planning should keep in step with progress.

At a time when the majority of schools are establishing newer courses, and are pressing on with the solution of the most intricate problems of discussing education to an even greater place of influence in the engineering world. The changes are developing in every direction of human endeavor. It is only fitting that the planning should keep in step with progress.

But what part have we, the men of Armour, to play in this program? It will be our privilege to show that we have the ability and enthusiasm of every possible magnitude, and ability. This plan is going to result through the co-operative efforts of the students of the Armour Institute. In the meantime, while we are being developed, we may be out of the development of our school, or more a solution of the problem that will move a new school, college, and university is in process of formation. In the meantime, while we are being developed, we may be out of the development of our school, college, and university is in process of formation. In the meantime, while we are being developed, we may be out of the development of our school, college, and university is in process of formation.

Miss Representative

State Manager: "Do you know?"

S. R. "Can you stop?"

D. M. "Do you do a monologue in speciality?"

S. M. "Then what is the devil did you come here for?"

A. M. "My Avka."

S. M. "Well, you can shout yourself over a whole white, but I don't think you'll find them here."

Seeing Is Believing

Drink (the order) I that you gather your aim."

The "Ship Building Improvement" team, the engineering team, all the rest of the experts are the main thing. The experts are the main thing. The experts are the main thing.

Hints: "I have been given to the control failures."

Do not give up easily.

TO A CO-ED

To those who talk and think. This style should support the tension that brings the whole country.

Never trust the M. of the people and talk."

When the storm is on, the people are brave and bold."

Joe Dickey has completed a complete laboratory for radio research."

Advice to Manager's Team for the coming season."

If you have a member of the team who is likely to get down and bad feelings and that."

Joe Maxwell says we are a target for another season."

And if you like this particular idea, let's break down on some of the team.
Men in Industry
Discuss New Plan
Many educational leaders, indus-
trialists, and governors have been
interested in engineering edu-
cation in recent years. The
approach to the solution of the
problems of preparing techni-
cals for the factory is the
subject of this column.

Walter E. Whipple, Presi-
dent, Case School of Applied
Science, Cleveland, has recently
spoken in the Senate in favor of
the case school system of
education.

Following are brief excerpts from
his address:

"The engineering profession
has expanded so rapidly in the
past decade that the need for
well-trained engineers has never
been greater. It is the responsi-
bility of our educational in-
stitutions to meet this need.

"The case method of education
provides a direct way for the
student to learn by doing. It is
an effective method of training
engineering students for their
future careers.

"I am convinced that the case
method is the best way to prepare
engineers for the factory floor.

"I urge all educational leaders
to support the case method of
education.

HALPERIN SPEAKS ON CABLE SERVICE

On Friday, March 6, at 2 p.m.,
A. I. E. E. members were given
the privilege of hearing Mr. R. E.
M. Halperin, General Manager,
Western Electric Company. His
subject, "Underground Cables,"
was presented by the successful
utility practices already adopted
in the United States.

"In our underground cable sys-
tems, improvements are made in
the capacity of the cables, the
ability to handle the increased
currents, and the length of time
they can carry power without
intermittent service.

"The new cables are designed to
carry much more current than the
old cables. They are capable of
withstanding the increased stress
and strain.

"Our underground cable sys-
tems are an important part of the
power distribution network.

FRATERNITY NOTES

TECH RELAY ON 5-POT

Although they fought to overcome the large lead held by the South Central College team in the early meet, Armour Tech's tracksters could not pull off the upset. The Scots fell to the Titans by 22 points.

Tigertail did not fare well in the opening meet. It is estimated that the Armour Tech track team could have finished in the upper half, had they not lost to the South Central College lead by 22 points.

The team was able to overcome the large lead by 22 points, but they fell short of the South Central College team in the early meet.

TECH SHORTS

Kip Bishop, George Flowers, and John Anderson set a new standard in the 50-yard dash, with Bishop finishing first in a time of 6.0 seconds. Flowers placed second in 6.2 seconds, while Anderson took third in 6.4 seconds.

Basketball

The Philamale Society has elected officers for the 1952-53 season. The election was held at a meeting in the Philamale Society library on Feb. 22.

Members of the council basketball team have been chosen: George Flowers, president; John Anderson, vice-president; and W. W. Carter, secretary-treasurer.

After a successful season Coach Krafft will return to the team for 1952-53. The team will continue to grow under the guidance of Coach Krafft, who has demonstrated his ability to coach a successful team.

Sneakers and socks will be required for all team members.

Basketball Practice Starts

Despite irregular practice schedules, the basketball team has continued to work at its best. The players have been practicing for the past two weeks, and the team is expected to open the season soon.

The basket team will consist of the following players: Bob Green, Bill Johnson, Bruce, Peter, and John. The team will play its first game against Northern Illinois on March 15.

Spring Baseball Practice Starts

The baseball team has started practice for the 1952 season. The players have been working hard, and the team is expected to open the season soon.
