ENTIRE DEVELOPMENT PLAN, AS IT NOW STANDS, GIVEN IN FALL

The following question on the Development Plan and its Promotional Program have evolved from discussions among students and alumni. They are answered here by the Development Committee.

A. General characteristics.

1. What is the Development Plan?
   The Development Plan is the course of action which has been evolved from an exhaustive study of engineering education and the needs of industrial Chicago, and which has been developed by a joint committee of the educational leaders as to how Armour Institute of Technology can continue to conform to present educational standards and establish a new educational role in the world of today.

2. What problem has this Plan been designed to solve?
   It is designed to solve the problem of the educational needs of the world today and its present-day roles in the education of engineers and industrialists. It is designed to bring about a new educational role in the world of today.

B. Sources of the Development Plan.

1. What will be done to the campus?
   The specific plan will be made by the Administration of the Institute and will be carried out by the Board of Trustees.

2. What will be the result of this Plan?
   The result will be a new educational role for the Institute, and a new educational program for the students.

3. What is the importance of this Plan?
   The importance of this Plan is that it will bring about a new educational role for the Institute, and a new educational program for the students.

4. What is the cost of this Plan?
   The cost of this Plan is for the purpose of the Administration and the students.

5. What is the result of this Plan?
   The result of this Plan is that the Institute will take on a new educational role, and the students will take on a new educational program.

6. What is the importance of this Plan?
   The importance of this Plan is that it will bring about a new educational role for the Institute, and a new educational program for the students.

7. What is the cost of this Plan?
   The cost of this Plan is for the purpose of the Administration and the students.

8. What is the result of this Plan?
   The result of this Plan is that the Institute will take on a new educational role, and the students will take on a new educational program.

9. What is the importance of this Plan?
   The importance of this Plan is that it will bring about a new educational role for the Institute, and a new educational program for the students.

10. What is the cost of this Plan?
    The cost of this Plan is for the purpose of the Administration and the students.

11. What is the result of this Plan?
    The result of this Plan is that the Institute will take on a new educational role, and the students will take on a new educational program.

12. What is the importance of this Plan?
    The importance of this Plan is that it will bring about a new educational role for the Institute, and a new educational program for the students.

13. What is the cost of this Plan?
    The cost of this Plan is for the purpose of the Administration and the students.

14. What is the result of this Plan?
    The result of this Plan is that the Institute will take on a new educational role, and the students will take on a new educational program.

15. What is the importance of this Plan?
    The importance of this Plan is that it will bring about a new educational role for the Institute, and a new educational program for the students.

16. What is the cost of this Plan?
    The cost of this Plan is for the purpose of the Administration and the students.

17. What is the result of this Plan?
    The result of this Plan is that the Institute will take on a new educational role, and the students will take on a new educational program.

18. What is the importance of this Plan?
    The importance of this Plan is that it will bring about a new educational role for the Institute, and a new educational program for the students.

19. What is the cost of this Plan?
    The cost of this Plan is for the purpose of the Administration and the students.

20. What is the result of this Plan?
    The result of this Plan is that the Institute will take on a new educational role, and the students will take on a new educational program.
REAL NEED EXISTS FOR INTERMEDIATE TECHNICAL SCHOOL

Between the secondary schools and the universities there is a gap which has always existed. There is no intermediate institution of engineering education in America today. This gap has existed for some time, and in recent years the demand for intermediate engineering training has become more evident. Many technical schools have been established to fill this gap, but there is still a need for an institution that offers a more extensive and specialized engineering education.

The need for such an institution is not confined to America. In many countries, especially in Europe, the demand for intermediate engineering education is increasing. The lack of such institutions is causing a shortage of qualified engineers, which in turn is affecting the economic development of these countries.

The establishment of an intermediate technical school would not only meet the current demand for engineering education, but it would also help to meet the future demand as technology continues to advance. This school would provide a bridge between the secondary schools and the universities, preparing students for both immediate entry into the workforce and further education at the university level.

Thus, there is a real need for an intermediate technical school, and the establishment of such an institution would have significant benefits for both students and society as a whole.

ARMOUR RELAYS SCHEDULED FOR SATURDAY, APR. 2

(Continued from page 1)

in the Chicago area, and also
in the area, where
the school is located. The meet
will be held on the north side of
the campus, on the track and
field.

In the past, the University of
Chicago has been known for its
track and field program. The
school has produced many
notable track and field
athletes, including Olympic
medalists.

The meet will feature
competitions in track and
field events, including
long-distance running,
short-distance running,
and jumps.

The meet will be open
to the public, and
admission will be free.
