President’s Advisory Council Meets Today

The first meeting of the President’s Advisory Council has been scheduled for today at the office of Dr. John T. Retalliata, President of I.I.T. Much confusion has surrounded the PAC, when it was first proposed by the Faculty Senate last spring, there was no time for I.I.T. or anyone else to implement the plan. The possibility of students being selected on the PAC was first presented to the students at the I.I.T. meeting on October 16, 1970. Even though I.T.S. had difficulty filling its own vacant offices in those days, 18 students turned out to the I.T.S. meeting on October 26 to vote for the first non-anonymous PAC vacuum. The volume of candidates forced I.T.S. to postpone final PAC appointments until the November 2 meeting.

All this time, acting I.T.S. boards—Tom Ziemke and Harry Hofman stated that the PAC proposals, as corrupted by the Faculty Senate, provided for meetings with President Retalliaata at least monthly. This was assumed true by the students running for the PAC—because proceedings of the I.T.S. members was reported promptly in I.T.S., and no corrections were made until after the committee was formed.

The final appointments were made at the Nov. 4 I.T.S. meeting, it was generally assumed that the minutes of I.T.S. would be sufficient for validation for the appointments. But the rest of the full term passed without any word of a PAC meeting, monthly or otherwise.

Sunday night of 9, WIRT presents a Forum on the first meeting of the President’s Advisory Council; several members will be available to answer questions on the air, at 520 or 529.

Three, in the January 29 issue of TN, an editorial appeared—asking what had happened to the PAC. In the accompanying monthly and very promptly the validity of I.T.S.’s appointments were reviewed in a fashion, based on I.T.S.’s handling of the matter. But the walls were knocked down, that some I.T.S. appeared, President Retalliaata’s secretary called TN, asking where it had received its versions of the PAC proposals, as had the President and the Board of Directors—there was no such at-least-monthly presentation.

It turned out that I.T.S. had never received anything from Dr. Torida’s office about the PAC—but went ahead with the proposal as Dr. Torida’s advice. Robert R. Bowness, Dean of Students, looked into the confusion and reported that the administration knew nothing of I.T.S.’s actions of the day. Since then, the I.T.S. appointments have been brought to the administration’s attention—and, consequently, the first meeting has been set up. The Council includes nine students, eight faculty members, and eight administrators besides President Retalliaata.

Five of the nine students are the ones elected last fall by I.T.S.: Mike Andrews, Anthony Smeltz, Richard Blake, Bob Kondor, and Mike Tompkins. Bob Weinberg, Professor of the Champaign University Student Association, and Philip Vavda, President of the Champaign University Student Association, have since been asked to speak for their opinions of the I.T.S. student body, of which I.T.S. is a part of. Indeed, at the current meeting, there has also been named to the Council through an I.T.S. decision that the current I.T.S. or AT.S. President Officers be included in the Council for the entire 1970-71 academic year.

In the final meeting and the next Nov. 4 meeting, three students—Deborah Davies (B.A., Economics, Women’s Residence Hall) and Diane Denby, both sophomores in Women’s Residence Hall, were ended out of the top five because they split between the two choices. I.T.S. student representative on the Council.

To announce to the two Ada Bowness, created a sixth place in the student section, and has added Brenda Barnet, a fifth-year Architect and Assistant Resident Advisor in the Women’s Residence Hall, to serve on it. When reach for comment, Mike Barnet said that’s the sure the PAC will be a part of the student’s decision. Full particulars on all student members are listed elsewhere on this page.

Representing the faculty will be Dr. Thomas M. Colby, Associate Professor of Business and Economics; Dr. Lawrence J. Davis, Assistant Professor of Business and Economics; Mr. O. Ogden Herndon, Associate Professor of Architecture; Dr. Mark V. Magoon, Professor of Mechanical/Aerospace Engineering.

Greg Kooner drives in as Hawks down Champaign State, 106-74, for their 13th straight win. Story on page 6.

Dorm Room and Board Fees Hiked up to $1,100

Rates and board rates for I.T.S. 1971 fall semester will increase to more sharply rising costs.

Although comparisons are frequently missing because of varying factors, I.T.S.’ basic rate will remain lower than that of other private universities in the Chicago area next year. The rates will be the same or lower than those of all major technological universities as reported. Moreover, rates have been reviewed. Announcement of the rates was made yesterday.

The rate for a double room with two meals a day will be $1,100 compared with the previous rate of $795.

Other rates are as follows (all rates are for I.T.S. students):

Double room — $795

Single room — $665

Board, 7 days, 2 meals/week $75

Board, 5 days, 1 meal/week $55

Room and board rates will be increased from $205 to $223 for a double room with five-day meals.

Elect ATS VP and Secretary Next Week

Elections, financial committee will select procedures for the primary process were the primary procedures of any other of the Association of Tech Students.

The open ATS Executive Council Elections Committee should have been filled by all students this Tuesday and Wednesday. Petitions for these offices are still available at the Dean of Students office and are due before 5 p.m. tomorrow, March 1. As of now, Paul Reynolds, John W. Schmitt, and George Postick, and Mark Zeihakke are running for Vice-President; Jean Konetzni is the favorite candidate for Secretary.

The HUB polling place will be open from 9 a.m. to 5 p.m. from Monday, March 1, and from 11:30 a.m. to 10 p.m. on Tuesday, and from 9 a.m. to 7 p.m. on Wednesday and Thursday, and from 9 a.m. to 5 p.m. on Friday, and from 11 a.m. to 7 p.m. on Saturday. All members will be eligible to vote until 5 p.m. on Thursday, and from 9 a.m. to 5 p.m. on Friday, and from 11 a.m. to 7 p.m. on Saturday. All members will be eligible to vote until 5 p.m. on Thursday, and from 9 a.m. to 5 p.m. on Friday, and from 11 a.m. to 7 p.m. on Saturday.

Two more students are needed to serve with John Pisinger, James Nolan, and Tom Zeihakke on this committee.

ATS Executive Council, along with several interested Assembly members, will meet with the Faculty Committee to consider the next meeting. It has been decided to meet with students at the electoral college to see what positions students should take in the I.T.S. affairs at the I.T.S. meeting at 9 p.m. on Monday night.

APD announced another student director distribution day this Wednesday at 3 p.m. at the Northwest corner of the HUB. After the meeting two new assembly members were introduced: Pradip Naik and David Trudl. Committee members say their ITT life is now being formed; anyone interested in being chairman or serving on any of these committees should fill out a committee application form available at the Dean of Student’s office or call Hofert, at ext. 1242 or 410 by 8 p.m. Monday night.

Lastly, ATS has also been chosen to the administration’s proposal for an “overall University discipline system.” This plan is found on page 2 of this issue of Technology News. The assembly has been re-established by the appropriate committee to evaluate the proposal.

EDITORIALS

IIT and Diminishing Returns

The financial problems here are evident enough as a starting point. One item, "Increased State Aid to IIT," January 22, wherein IIT may take on overhead students and staff. In any case, this divested institute remains unable to operate in the black. How, then, does IIT operate at all? By borrowing against future expectations. The most recent and self-defeating example of this is the recent hike in residence rates.

The increase was based on the assumption — very possibly a fallacious one — that the number of dormitory residents was going up. Obviously if you demand more from everyone who uses a facility, you will pull in more money — and that is a point of view (for others to start living off campus).

LETTERS

(The following is a Disciplinary System report from ATS this week by Robert J. Southeast, Dean of Students.)

For some time the Dean of Students' Office and various student groups have utilized similar disciplinary structures appropriate to our University. This presentation attempts to meet the same plans and suggestions into a disciplinary system which fulfills the needs of students, faculty, and administration. The system provides for responsibility participation by all groups, drawn on their abilities where they can most effectively serve.

It seems appropriate to first articulate some broad plans and goals of the disciplinary system. While all members of the university are concerned with student discipline, it is the administrative branch that is charged with the responsibility for administering an effective disciplinary system and it is the administrative function which has the authority to enforce the sanctions imposed by a disciplinary body.

Student discipline is a part of the educational process, essential to the educational process. It is considered part of the aims and goals of the university. Discipline within administered by an individual or a committee is a form of education and ultimately at the heart of the educational process. This form of teaching is quite obvious, is only needed by a very small number of our students, but it is a point of maturity and motivation which enables them to learn through the normal methods.

Each member of the university, whether engaged in teaching, studying, or administrative work, has a shared responsibility for the proper conduct of both faculty and students. This responsibility is exercised within the limits of the University Discipline Code. The University Discipline Code is intended to provide a proper balance between the needs of the student and the needs of the university.

The purpose of student discipline and the primary aim of those administering discipline is to provide a proper balance between the needs of the student and the needs of the university. The discipline is the development of the person and the welfare of his colleagues.

The policies used in disciplinary procedures must be chosen to best achieve the proper balance. The disciplinary administrator must recognize that breadth of discipline, if serious enough, may be substantial deviation from the student's discipline objectives. The policies should be reviewed for fairness, to be a standard to which students and faculty would agree. The policies are to be reviewed on an ongoing basis, and the effectiveness of the policies are to be evaluated on an ongoing basis.

A few observations pertinent specifically to IIT may be of interest to students.

1. A student должна be prepared to handle the investigation of an incident and the determination thereof.
2. A student should be prepared to handle the investigation of an incident and the determination thereof.
3. The judicial function should be performed in a manner that is fair and impartial, but based on the evidence presented.
4. The previous disciplinary record has a significant impact on the determination of the sanctions imposed by the first disciplinary body.
5. The proposed disciplinary system is outlined in the enclosed chart. Under such a system, complaints could be brought to the Dean of Students and the Disciplinary Board, which would consist of the Dean of Students, the Chairman of the Academic Council, and the Directors of the Academic Council, who would serve as ex-officio members. The Board would review the complaint, and if the complaint is deemed appropriate, it would be referred to the Disciplinary Board for a hearing.

Psych Services — A Professional Counseling Center

by Paul Reynolds

At the end of World War II, many returning veterans decided to continue their education under the provisions of the GI Bill, and Illinois Institute of Technology received a good percentage of its incoming freshmen in 1945 and 1946 from this source.

Many of these veterans across the country ran into problems in their various colleges; the transition from war to academia was a hard adjustment to make. The Veterans Administration recognized this problem and set up various programs of psychological and vocational testing to aid those having trouble.

Meanwhile, Dr. Henry Head, the first President of IIT, foresaw a need for these psychological services, not only for the veterans who were students, but for all the IIT students who ran into vocational or psychological problems of one sort or another in their studies. To this end, he went to George Sport, a psychologist, and asked him to set up an Institute of Psychological Services. His only directive to Mr. Sport was to "make it the best psychological service in the country."

From this small beginning the Institute of Psychological Services (IPS) has grown to be one of the best in the country, attracting clients from every state and many foreign countries. Last year it handled 1200 people in all phases of professional, educational, and other counseling services, of whom only 50 were IIT students referred by the school.

Of course IPS hasn't always been so large, nor did it always have such varied services. In its inception in 1945 only two services were performed by the Institute: testing and IIT admissions counseling. In 1947, the Testing Service was added, to offer a complete range of aptitude testing, reading speed and comprehension assistance, and general guidance — and soon proved to be one of the most popular services offered (except for vocational testing last year), and in 1952 Educational Counseling was added. In 1950, meanwhile, IPS started offering its testing and counseling services to industry by setting up a service involving field personnel who would go to a plant or company to conduct on-site programs. In the late 1950's the Institute stopped doing admissions testing as it switched its emphasis to the College Board.

Although the Institute makes no specific recommendations, they do keep a file on what schools may be best for a certain individual profile. If, at the end of a person's guidance sessions, a change in schools seems indicated, he is provided with this information. However, IPS tries very hard to avoid giving an individual what he does or even overly-influencing his decisions. They merely provide him with facts about himself and various options open — they stress that the decision must come from the individual himself.

The Institute of Psychological Services provides a very real and necessary function, not only for IIT's students, but for the city and the nation as well, and it does it in an outstanding manner. In another article Technology News will take a look at the testing and counseling procedures, and how they can best help individuals who come in for guidance.

1968, which promises to become as important as the Reading Service, offering a comparable range of services in the Math field. The services of the Institute are available to the public (for a fee) worldwide; IPS will send teams anywhere to give to any of the programs offered. These offered range from vocational guidance (the most popular), to educational services to a mental health clinic, and the fees are relatively low. There are special prices for students, and for IIT students referred by the school there is no charge. Some, in fact, any IIT student who wants to change his major is referred for counseling.

The Institute has experienced a steady growth since its beginning, although from time to time the actual number of people handled has gone down. For instance, last year IPS handled 1200 people, but this was a decrease from the year before because the Veterans Administration stopped their testing program. However, it represents an increase in all other services of testing and guidance.

There are 32 staff members at the Institute, including George Sport, who has been the Director since the start of the Institute, and is largely responsible for its present size and high standing. Of the staff, 12 are professional persons holding Ph.D.'s, and the rest are administrative personnel.

Many graduate and senior psychology students who administer the testing programs and the initial interviews, but all interpretation and counseling is done by the psychologists on the staff.

The usual procedure for someone referred for counseling or vocational guidance (whether a student or not) is to fill out some information forms, have a preliminary interview, and then to take an extensive battery of tests that extends over two days, including about half a day of taking-home tests. After the tests are graded, a psychologist interprets them, and, on the basis of interviews and other information, counsels the individual on whatever may be the problem or problems he is facing. Many times, the problems, although reflected in school work or job performance, are caused by another source. The process is supremely helpful in this area.

In the academic services (such as math and reading) the procedure is somewhat similar, but the process of correction and help takes longer.
PERSONALS - We Almost Caught Up This Week

Due to the overwhelming response to my last column, I am only able to include a personal story or two of your favorite topics. This week, I would like to share two stories from my fellow Technology News colleagues.

Gregory Marshall
110 Fourteenth Avenue
Schenectady, N.Y.

Marshall, my dear friend, is the epitome of cool. He's always the first to arrive at any event, dressed to impress. Last week, he attended a technology conference and wore a suit that was so stylish, it made everyone else's attire look dull by comparison.

Lee Parrott
80 Elm Street
Albany, N.Y.

Lee is the life of the party. He has this incredible ability to make everyone around him feel comfortable and at ease. Last night, he hosted a small gathering at his house and everyone had a great time. He even surprised us all with a delicious spread of finger foods and drinks. It was a night to remember.

In other news, the Technology News team has been working tirelessly to ensure that our readers are well-informed on the latest technology trends. We appreciate your support and look forward to continuing to bring you the best content.

Stay tuned for more updates on the latest in technology.

Sincerely,

**Novus Lucea**
On February 5, 8-12 pm, UB will sponsor a beer and wine tasting at the Denmark American Athletic Club at 4624 N. Pulaski. Admission is only $1.25. Free beer. A live band and plenty of gripes will be present. Bring your ID card. Info: FLR 6-5792 or 842-8957.

**Basketball Etc.**

(Continued from page 6)

"Old Ol' Dorky" Jim Wester, former Hawk varsity star, who noted 29 points, had the ball in his hands in the JV with 17. On Feb. 18, the JV won handsomely over the Vasanian naval team 56-40. Wakefield lost the JV again, with 14. Larry Patz led Vassar in its hourly defense, the proverbial lid was on their basket in the first half, but they scored well in the final 20 minutes.

The JV's show an affinity for aggressive play. The seven men used stacks up like this: Wakefield and Ramey Tracy are the best players in the line. A fast base six goods the key, and Bill (12) leads them. Two good hands by Larry Smith and Jimmy McCracken. The backcourt leads them. Paul Dominquez, Steve Messersmith and Bill And

**PREGNANCY PROBLEM?**

**There Is No Charge For Our ABORTION**

---

**Rescue Missions and the P.O.W.s**

On November 21, 1970, American prisoners dropped out of the skies in what was described by the North Vietnamese as the biggest rescue operation in history. In reality, this was only one of many rescue attempts that have been made over the years.

Why, one might ask, are the North Vietnamese so anxious to rescue their POWs? One would think that by releasing all the P.O.W.s, the North Vietnamese would gain a tremendous advantage in the war. However, the North Vietnamese are not only prisoners of war, but also of the American people. They want to be seen as fair and just, and they do not want to appear to be holding back from releasing their POWs.

The North Vietnamese government believes that the release of their POWs would strengthen their position in the war, and possibly even end it. They believe that the release of the POWs would show the world that they are willing to negotiate and make concessions. This, in turn, would give them more leverage in their negotiations with the United States.

The North Vietnamese also believe that the release of the POWs would help to improve their image in the world. They want to be seen as a fair and just country, and they believe that the release of the POWs would help them to achieve this.

In conclusion, the North Vietnamese government believes that the release of their POWs is a necessary step in their efforts to negotiate an end to the war. They believe that the release of the POWs will show the world that they are willing to negotiate and make concessions, and that they are a fair and just country.
Hawks Keep Win Streak Alive, Seek Playoff Berth

by Harvey Schultz

The ITT Tech basketball squad rolls on, as it chalked up another important win last Saturday, a 75-73 victory over Illinois Wesleyan in a game that was a vote in the right direction. Going into the game last Tuesday (Feb. 23), the Hawks were 14th in the nation, but the ITT Tech win gave the Hawks a stranglehold lead in the Midwest Conference (MCW) standings, and a chance to win the regular season title.

Tomorrow night, the spotlight will continue to shine on the ITT Tech basketball team, as they travel to Western Illinois University, where they will face off against the Fighting Illini. The Illini are currently sitting at 18-6, and a win for the Hawks could give them the regular season title.

The Hawks are currently playing a critical stretch of games, and a win against Western Illinois would solidify their position at the top of the MCW standings. The team is looking to secure their spot in the NCAA tournament, and a win against the Illini would be a huge step in that direction.

Despite the tough competition, the Hawks are confident in their ability to perform. "We are a team that never gives up," said coach Jim碘, "and we are going to work hard to make sure we bring home the regular season title.

The ITT Tech basketball team is a strong team, and they are looking forward to the challenge ahead. They are ready to take on the Illini and prove that they are the team to beat in the MCW.

Wrestlers Suffer Triple Loss

by Bob Fields

The ITT Tech wrestling team suffered a triple loss last weekend. The state Duals were held in the ConocoPhillips Arena on Saturday, Feb. 22. The Hawks were facing off against the Raychem Bears and the Chippewa Indians.

The Hawks entered the match against the Bears with high hopes, but unfortunately they fell short, losing 5-14. The Hawks’ season is now in danger, as they are currently sitting at 12-9 in the conference standings.

The Hawks’ loss was followed by a hard-fought battle against the Chippewa Indians. The Hawks put up a good fight, but unfortunately they were no match for the Indians, losing 7-16. The loss brings the Hawks’ season record to 12-10 in the conference standings.

Despite the losses, the Hawks are not giving up. "We know we have the potential to win," said coach Jim碘, "and we are going to work hard to make sure we bring home the state duals title.

The Hawks are looking forward to their next match, and they are ready to put in the work to make sure they come out on top.

Hang Sez!

by Harvey Schultz

The Hawks’ basketball team is continuing to impress, with a win over Illinois Wesleyan University. The win brings their record to 14-6, and they are currently sitting at the top of the Midwest Conference (MCW) standings.

The Hawks are looking to secure their spot in the NCAA tournament, and a win against Western Illinois University tomorrow night could be a huge step in that direction. "We are a team that never gives up," said coach Jim碘, "and we are going to work hard to make sure we bring home the regular season title.

The Hawks are a strong team, and they are looking forward to the challenge ahead. They are ready to take on the Illini and prove that they are the team to beat in the MCW.
