Resident 'Uprisings' Stir IIT, City Police

by Dick Milnebaum

Several disturbances rocked the normally quiet IIT campus during the past week. A dormitory and fraternity residents left their individual living quarters and met in small groups to protest various issues. While a few arrested complaints were received by the police department, the overall tone was more in the nature of minor complaints.

At the residence hall, a disturbance occurred when students from the dormitory attempted to hold a meeting. The dormitory residents, who are not subject to the same regulations as the students in the fraternities, were denied the right to use the auditorium. The disturbance continued for several hours, with the police eventually being called to end the situation.

The second disturbance occurred at a fraternity house, where a group of students attempted to meet without the approval of the fraternity. The police were called to prevent the meeting, but the students continued to gather outside the house and were eventually dispersed by the police.

ATS Schedules Treaty Referendum

At last Tuesday's Association of Tech Students meeting, representatives voted to conduct a referendum on the Treaty of Peace with Vietnam. The vote was 22-1 in favor of the referendum.

The purpose of the referendum is to determine whether the students want to withdraw all military forces from Vietnam. The vote was taken in accordance with the Michigan Act, which requires a two-thirds majority to pass a referendum.

At the meeting, the students also discussed the possibility of forming a Student Peace Council to coordinate activities and provide a forum for discussing peace issues.

Poll Results: 23 of 30 May Go

The results of the poll conducted last week have shown that 23 out of 30 students agree with the treaty. The poll was conducted by the IIT Student Affairs Office.

The poll questions addressed the following issues:

- Are you satisfied with the current status of the Vietnam War?
- Do you believe that the United States should continue to support the South Vietnamese government?
- Should the United States withdraw all military personnel from Vietnam?

The results of the poll were as follows:

- Satisfied: 25%
- Dissatisfied: 75%

The results indicate that the majority of students are not satisfied with the current situation and believe that the United States should withdraw all military personnel from Vietnam.

The poll was conducted by the IIT Student Affairs Office and was distributed to all IIT students. The results were tabulated and analyzed by the office staff.

The poll was conducted as part of the IIT Student Affairs Office's efforts to gauge student opinion on important issues.

The results of the poll were shared with the IIT administration to provide them with a clearer understanding of student opinion on the Vietnam War and related issues.
EDITORIALS

One More for the Bookstore

In less than a month, the bookstore has again slipped into anony-
mity. TN will be sold at the point fur-
ther, at least in a manner that will be
evaluated by the new committee.

The committee, chaired by George Stachnik, will conduct secret meetings to
negotiate with the bookstore on the
future of the store.

There are several alternatives to
the bookstore: one is to continue
selling books through the regular
渠道; another is to open a co-op
store; and the third is to close the
store and turn it over to the
students. The committee will
consider all of these options before
making a final decision.

Unregistered Events

The raids on Women's Residence
Hall have finally stopped, and the
snowball fights are over, at least for
the winter. However, there is a
number of incidents that occurred
during the winter that need to be
addressed.

The broken glass door in Graduate
Commons caused a lot of commotion.
Icy conditions and broken glass can
be dangerous, and it is important to
address these issues.

Letters

Dear EIC,

I was curious in the March 5th edition of
the Technology News in a way that
needs correction. I have read several
articles that I thought admissions
were not required of any of the
students from the Chicago area. In
light of this (I consider it a raise of
lobbying to bring up on
university's official stance), I was
surprised to learn that the
administration is not aware of any
lobbying efforts by the
administration.

In the first place, I was not aware of
any lobbying efforts from the
administration.

The administration is not aware of
any lobbying efforts from the
administration.

Hopefully, however, an article in
the position of authority will
recognize the raids and snowball
fights for what they probably are:
just an outlet for some students, enabling
them to blow off steam. Although
one cannot completely condone their
actions, they are at least understandable,
what with the winter conditions and
snow. Let's hope the administration
takes these events with a grain of
salt, and doesn't overreact.

It's been a long, long winter.

The Truth About Technology News! (Operations)

by E. Michael Blake

During a nine-hour span—6 p.m. Sunday to 3 a.m. Thursday—13 times a day, a handi of workers gather all the rumors, suppositions and conjectures on computers, excerpt the fact content, and present the facts to the students—so Technology News.

That’s right, this week we’re calling ourselves “Technology News”—not to get our names in print. Recently we’ve had reason to believe that many people are in the dark concerning the operations of TNI. Two weeks ago, US President Dan Kukka informed me that he didn’t know that ads determine the length of each issue. All this time, I assumed that the student organizations, at least, knew TNI’s mechanisms. But with ever-changing personnel, such knowledge can indeed pass out of the organizations. To help remedy that situation, and to answer many of the general queries made about TNI, I’m presenting this inside look at ourselv-

The Deadline

At 8 p.m., the issue is closed to outside material—for the sake of setting up the issue more quickly. Articles are arranged on the pages by the layout staff—using lengths determined by line-counting rules (which is why all material must be typed, 60 characters to a line—to give us some idea of how long it will appear in print). The layout staff then lays out the pages by the layout staff—using lengths determined by line-counting rules (which is why all material must be typed, 60 characters to a line—to give us some idea of how long it will appear in print). The layout staff then lays out the pages by the layout staff—using lengths determined by line-counting rules (which is why all material must be typed, 60 characters to a line—to give us some idea of how long it will appear in print).

TNI’s Newsroom

The Newsroom is a large, modern building with a wall of windows overlooking the city. The newsroom is divided into several areas: the editorial area, the production area, and the photography area. The editorial area is where the journalists write the news stories and produce the articles. The production area is where the layout staff produces the final layout of the newspaper. The photography area is where the photographers take the pictures that accompany the stories.

The Production Process

Once the articles are written, they go to the layout department, where they are arranged in the final order. The layout staff then takes the articles and the photographs and creates the final layout. This layout is then sent to the printing department, where it is printed on paper. The printed paper is then folded and delivered to the newsstands.

The Final Product

The final product is a newspaper that is made up of several sections. Each section is dedicated to a certain type of news, such as local news, national news, sports, etc. The newspaper is delivered to the newsstands once a week, and it is also available online.

WHOSE FAULT IS PREGNANCY?

It takes two to tango. Who must share the responsibility for preventing unwanted pregnancy? After all, it’s your future and the future of our children that is at stake here. You and your partner must take responsibility for preventing unwanted pregnancy. This includes using effective contraception, such as condoms, birth control pills, or intrauterine devices. It also means that you must be aware of the signs of an unwanted pregnancy and take action to prevent it. This might mean getting an abortion, seeking counseling, or having the baby. Whatever you choose, you must take responsibility for your future and the future of your partner.

GOIN’ DOWN THE ROAD

"The three best things to do with your hands are to eat, to sleep, and to sing.”

- Thoreau

Duke Sez — Sink and Walsh Moving Up?

by The Duke

Over the last month or so I believe that the trend is upward all over the far southwest side, chalked onto sidewalks, painted on walls, in coffee houses and the like. All of the messages say the same thing, i.e., "Sink and Walsh is coming." After a week of letting my curiosity get a firmer hold on me I finally went about trying to find out who or what is a "Sink and Walsh." I'm not sure I found out all of the individuals but I came home with a few names.

S&W is John Sink, a very, very talented guitarist, and Kevin Walsh, a vocalist and composer par excellence. Backed up by about four or five others including two guys — Terry Stevens, another excellent vocalist, and Steve Raleigh, another guitar player — and two girls: Wendy Greenwood, vocalist and pianist, and Kathy Bahough, whose creativity should not be missed. S&W is John Mizehan and Debbie Ticea also help out at times.

After having met these talented young musicians, I found that I did not have to go far out of my way to find them, because there is has it that they will be playing there at ITT this spring. If you want to hear how they sound, WITF has a copy of their single, "High Tide," and may play it if you request it.

Rosalee, Lake and Palmer
Cohutta SID #9040

Keith Emerson (formerly of the Nice), Greg Lake (of King Crimson), and Carl Palmer (formerly of Atomic Rotters) have a million seller with this, their first LP. Apparently "Lucky Man" has been taken off of it and released as a single and can be heard on Top 40 radio. E. L. & P. begin a U.S. tour in late April — it would be good if you could make it and see them.

McDonald and Giles

Both of these guys are also from

Raid, Snowball Fight, Other Campus Funnies

(Continued from page 1)

squadrons entered the area around the quadrangle and the women's dormitory. Reacting to the growing force of low officers with a remarkable degree of cooperation rarely seen at ITT, the snowball fighters attacked the squad cars (with firehoses inside some snowballs) according to the campus police and held their ground.

Time was running out, however, for the midnight miscreants. Twelve Chicago squad cars, including two puddle wagons, drove onto Thirty-Third Street and parked along the roadway. Police left the relative safety of their cars and lined up along the sidewalk amid a barrage of snowballs. One officer with a bullhorn screamed to the crowd that arrests would be made if people did not disperse. To make his point, an officer went up to the effect that anyone throwing a snowball could be arrested. At this point, the crowd started to lose interest and fell off the sidewalks and then to the grass. The police pulled back from the line and watched as the snowballs continued to snowball in the area. The police officers were not hurt in the scuffle.

Abortion Counseling, Information and Referral Services

Abortion up to 24 weeks of pregnancy are now legal in New York State. There are no residency restrictions at cooperating hospitals. Only the consent of the patient and the performing physician is required.

If you think you are pregnant, consult your doctor. Don't delay. If you choose to have an abortion, early abortions are safer.

Abortion should be performed by Board certified obstetrician and gynecologists, with Board certified anesthesiologists attending, in fully licensed and accredited general hospitals. You should not have to pay excessive charges for any of these services.

If you need information or professional assistance, including immediate registration into available hospitals, telephone The Abortion Information Agency, (212-873-6650), which has helped counsel and place more than 22,000 women for safe, legal hospital abortions.

The total cost at good facilities range as follows (in-patient hospital service, except as noted):

For D & C, Pregnancy up to 9 weeks, $365-510 (out-patient hospital service); up to 12 weeks, $355-510; up to 14 weeks, $450. For Saline Induction: 16-76 weeks, $560-995.

This is the way it is. We're in it.

Announcements

Here are a few announcements that may interest you:

**Unlimited**
Three Undergraduate Engineering sessions are coming to E.E. Crawfurd Auditorsium.

**J. T.**
Monday, March 16, Dr. S. B. Smith talks on I.E. and related projects, activities, and contacts I.E. with general engineering.

**O. N. S.**
Thursday, March 19, There will be a meeting of the I.E. and related projects, activities, and contacts, led by Professor V. Thompson and Messrs. Kawasaki and Goldberg.

**T. E.**
Tuesday, March 21, Discussion of the changing I.E. curriculum at I.I. and the I.E., job market, by Dr. Haman and Dr. Smith.

**A. C.**
Thursday, March 18, at Noon, Main Konaud, the story of the life and death of Adolf Hitler will be presented in the HUB Auditorium.

**C. E. R.**
Saturday, March 19, the College of Commerce, 1011 West Grand Ave., St. Regis Cafe, will present Pat Butcher on the Health Care Revolution. Admission is only $1.00. Please Welcome.

**O. T. N.**
Friday, March 20, at 7:30 PM, once again, my fellow Americans, and foreign students also. The French class is in need of bodies to fill offices. Anyone interested in a position, call Steve Foss at ext. 460 or Yi 2-8766.

**U. P.**
Film Program — Fri., March 21, 1:00 PM, 1:30 PM, 2:00 PM, 2:30 PM, and 3:00 PM. A SPACE ODYSSEY. It is the year 2001.

**A. P. A.**
A professional abortion that is safe, legal, and inexpensive can be set up on an outpatient basis by calling THE PROBLEM PREGNANCY REFERAL SERVICE 213-722-5348.

THE ROLLING STONES. Start: FRIDAY. 4-TRACK STEREO SOUND SYSTEM.
Niven, Anderson, Lafferty Win Euclids

The results are in — in shorn.

The first annual Euclid Awards, which are not physics items, but testimonials — for the best science fiction of 1970 have been voted by participating IF: Science-Fiction fans.

Larry Niven’s RINGWORLD, the winning novel, was a massive best-seller, and a critical success. Parts of it have been criticized — particularly the unpleasantness of a habitable hand of matter stretching across a sun, and the somewhat hasty plot device based on the heroine’s lack of an identity.

Niven was, quite possibly, in over his depth — but there was so much of this book that was good that it won anyway. It was big enough to finish his “Neutron Star” series — the continuation of a well-detailed future universe.

Though the competition in non-fiction was too thin to miss an award

Due to lack of space, the fact that it isn’t really yet, the Hugo Table of Organization doesn’t appear.

In the 1971 Annual Meeting held yesterday at the Eastern Convention, a new one to be held at ASM in California, the following were announced:

P.A. COWLING

S.M. HABBAH

Handbook

Next week, space permitting, the table will appear

In that category, there was so much of no winners. The best, the

in the New Orleans category, Paul Walden’s much-overlooked OVEROPERATION AREAS, Wilson Tucker’s gridy THE YEAR OF THE QUEEN, Frank Herbert’s complex WHIPPED STAR, Robert Silverberg’s surprising DOWNWARD TO THE EARTH, and Robert A. Heinlein’s disappointing I WILL PEAR NO

In spite of the small field, Edward Wollman’s HIJACK probably deserves to be best novella anyway — noble efforts were also made in the Harlan Ellison in the REGION BETWEEN, and

Thomas M. Disch’s THE ASIAN SHORE.

Knowing how many writers are fond of Theodore Sturgeon, that author’s SLOW SCULPTURE may take the Nebula over Anderson — especially since Anderson may defect himself, with his THE FATAL FULFILLMENT also in the running. Katherine MacLean might first in a few weeks with RESCUE SQUAD FOR AHMED, as could Ben Bova and Harlan Ellison with BRULLO.

So many good short stories were presented in 1970 — it made our preliminary ballot — that it is hard to say which will come out on top. Perhaps they will all be winners, because he put forth so not less than six award-candidate short stories — and the winners to win top will be Avran Davidson (TIMESERVER), Gene Wolfe (THE PACKER’S METHOD), A. Bertram Chandler (THE PROPER GANDER), James Tiptree, Jr., Piers Anthony, Greg Benford, Lee F. Kjeldy, Roy Ren- nel, Hank Dempsey, Terry Carr, Frank Herbert — you get the idea.
Tech Sports — Post-Mortems to an Excellent Year

by Harvey Schuler

Paradox Lost Day?!: Evanville, Ind., in mid-March is not exactly a place one normally associates with the IT basketball team. However, the IT could not have been happier when the season ended and the team had the chance to play once again. The Hawks' 1970-71 season was one of the most successful in the school's history, and the team's success can be attributed to several key factors.

The Hawks' success can be attributed to their strong defense, led by senior standout Andy Pride. Pride was named the Most Valuable Player of the season, and his leadership and skill were instrumental in helping the team achieve their goals. The team's offensive game was also strong, with senior forwards Ken Anderson and Greg Shaw leading the way.

The Hawks' season was marked by several key moments, including their victory over a highly ranked team in the NCAA Division III tournament. The team's success can also be attributed to their strong work ethic and commitment to the sport.

The team's success has brought them a great deal of attention from fans and the media, and they are looking forward to continuing their success in the future. The team's dedication and hard work have paid off, and they are confident that they will continue to be successful in the years to come.

Wrestling Season Through: Final Varsity Records: 3-10

by Bob Pahl

After posting a 1-13 record over Aurora College, the Tech wrestlers narrowly lost their final home game of the season to Milwaukee Area Technical College. The last match was held at MATC, the score being 19-13.

If things were better, it wouldn't have been so bad. Unfortunately, the winning team was already sporting a low record of 5-9. This year's record was not only disappointing for the team's morale but also their chances of winning a conference title. With the loss, the team's chances of finishing in the top three in the conference are slim.

The Milwaukee Area Technical College team was led by senior standout Andy Pride, who was named the Most Valuable Player of the season. The team's strong defense and solid technique helped them to a win despite the score being very close.

The team's season was marked by several key moments, including their victory over a highly ranked team in the NCAA Division III tournament. The team's success can also be attributed to their strong work ethic and commitment to the sport.

The team's success has brought them a great deal of attention from fans and the media, and they are looking forward to continuing their success in the future. The team's dedication and hard work have paid off, and they are confident that they will continue to be successful in the years to come.

Abortion: Low Cost, Safe, Legal

Announcing a series of three sessions planned for those who are concerned with selecting minor or majors. Everyone is welcome.

THE NEW INDUSTRIAL ENGINEERING
Crawford Auditorium, Engineering I Building

Session I: Industrial Engineering Today
Time: 1:00 - 2:00 P.M., Tuesday, March 16
Speaker: Dr. Spencer B. Smith
The job of today's I.E. Differences from other branches of engineering. The tools employed. Examples of I.E. projects.

Session II: A Sampling from I.E. Toolkit
Time: 1:00 - 2:00 P.M., Thursday, March 18
Speaker: Dr. Nick T. Thomopoulos
Regression Analysis (How not to lie with statistics)
Speaker: Thomas W. Knowles
Optimization (Reaching the top)
Speaker: Martin Goldberg
Computer Simulation (Adventures in fantasyland)

Session III: Program and Prospects
Time: 1:00 - 2:00 P.M., Tuesday, March 23
Speaker: Dr. M. Zia Hassan
The Undergraduate I.E. Program at IIT (The curriculum. Opportunities available. Some important changes planned for Fall 1971.)
Speaker: Dr. Spencer B. Smith
The Job Market for '71 (Prospects for the 1970's)
