Math Team
Places Fourth in Nation

The Math Team placed fourth in the nation this year. The team consists of four members: Will Smith, John Doe, Jane Roe, and Michael Brown. The team worked hard throughout the season to prepare for the national competition, where they faced tough competition from other top teams.

The team members were thrilled with their fourth-place finish, which was a significant improvement from their previous years. They were also proud of their individual performances, with Will Smith winning the top individual award and John Doe coming in second.

The team's success was attributed to their hard work, dedication, and the support of their coaches and school.

Well-O rganized Dorm Raid
Met with Little Resistance

The dormitory was hit by a well-organized burglary last night. According to the security report, the burglars entered the building through the front door, which was left unlocked.

The students were not aware of the break-in until they noticed their belongings missing. They immediately reported the incident to the campus security.

The campus police are currently investigating the case and have set up increased security measures to prevent similar incidents in the future.

President Sees ATS Committee Today

Dr. John Johnson, the new President of the University, met with the ATS Committee today to discuss the upcoming budget allocation.

During the meeting, Dr. Johnson expressed his concerns about the current budget situation and the need for efficient allocation of funds. He also stressed the importance of transparency and accountability in the decision-making process.

ATS Committee is expected to present its recommendations to the President and the Board of Trustees in the next few weeks.
Refuge for the Unrepresented

For the past two months, IIT has been part of an experiment in political theory and application. The ATS set-up, based on the unique idea of involvement by petition, has some notable advantages. However, we must also consider the disadvantages that this system brings with it.

A discussion of ATS's accomplishments to date - if any – would be out of line with any arguments on the success of the theory. In terms of getting students involved, ATS is certain to fall far short of its goal. As of now, there are 28 certified Asmbly members and women, directly representing 1400 students. Compared to if ITSA's statistics – about 18 students in overlapping representation, with no individual students involved in the extra structures.

At the time ATS was coming into existence, there was an understandable demand for some kind of representation by the students. A few people in government, and those who write about them, have called this new system a "better way" - on the basis that it is fairer than the old, despite its flaws.

Minor rephrasing of the ATS constitution would be necessary to enact this plan fully - but such a change (and costly) efforts are justified in the interest of the students.

Harry Heilitz, current ATS President, ran for office on the platform of "Let's Get Tech Moving!". However, he has moved Tech nowhere. The accomplishments of the student government under Heilitz have been inconsequential and, if anything, have hurt the student body. At least the political appointees to the student government have taken the initiative of reforming the system.

Every time that students are asked to vote for someone, the candidates are asked to present their plans for the future of IIT. It is clear that the current ATS President has failed to address any of the major problems that face IIT students.

Item: The one problem that has not been addressed is the lack of parking. This is a problem that has been mentioned several times, and it is one that has been ignored by ATS leaders.

Item: Harry Heilitz is almost as hard to pin down to a definite stance as Dr. Brophy on the question of parking. (Read the letter that Heilitz has in the letter column next to this editorial.)

What ATS needs is someone who will stop forming committees and get to work, someone who will weld the Assembly into a cohesive unit working for the student body as a whole, with reasonable, realistic, well-planned solutions and ideas. Here is where Heilitz has failed. He has been proven to be an average student leader.

There are two more months until the next ATS election. If Harry doesn't "Get Tech Moving" by then, let's get Harry moving out.

LETTERS

Dear Editor,

It has been brought to my attention that there is a proposal to increase the tuition at IIT. I have been informed that this is an attempt to increase the tuition to meet the needs of the university.

I believe that this is a step in the right direction. With the current economic climate, it is necessary for the university to increase the tuition to meet the financial needs of the institution. However, I also believe that the university should be transparent in regards to the use of these funds.

To the Editor:

During the past week, I have had the opportunity to talk with several of my classmates about the proposed tuition increase. Many of them have expressed concern about the impact this increase will have on their ability to afford higher education.

It is important for the university to consider the perspectives of all students when making decisions about tuition increases. The university should be committed to providing a high-quality education to all students, regardless of their financial background.

Sincerely,

E.B.

LAST STRAIGHT ISSUE BEFORE BREAK

The March 26 issue will be the last "straight issue" before Spring Break. We are not working any specials, and we will not hold the April 2 issue (April Fool's Day issue), to anyone who has something that won't make public between now and the next straight issue (April 23) will be well advised to get it in by "THEIR COMING TUESDAY" for inclusion in the March 26 issue.

P.S.

IIT Division of Power From The Top Down

This chart delineates, as much as possible, the division of power and responsibility at IIT. Where possible, offices and phone numbers have been indicated for the major area heads.

Several points may remain ambiguous — for instance, the title of Vice-Chairman over the President. However, these specifics can be explained more easily by the officers concerned — we've pressed for space. (Notice the six-page layout, the clustered ads in the back, etc.). Certain elaborations can be made here, however.

All clarifications are directed at the Academic chart. The operations of the James Kemerer Library are overseen by the Graduate School Dean's Office, but the Library itself is handled by the John Creer Library, through the terms of Creer's issue with IIT. The Business and Economics Department, currently under Liberal Arts, will become a separate school next fall, and may be given its own Dean. The number school isn't stated as a separate operation of the Institute, but as a departmental function; all summer-courses inquiries should be directed to the department offering the course. The Education Science Course area will be made a full department of the College of I. & P. S. and fully the Cmp. Ctr. Director will continue to direct Information processing. Finally, Ed Glauny will replace Bernard Welsman as Director of Athletics on June 1, 1971.
Announcements — Spring Conference, Union Board, Etc.

The second Technology News Ernsting Auction will be Thursday at noon in the HUB. Student ASME members will have the opportunity to bid on items donated by various professors and departments.

The American Society of Mechanical Engineers (ASME) Student Section will announce its meeting on March 22 in the HUB. The meeting will be open to all, and the department of mechanical engineering will provide refreshments.

The Lutheran Student Fellowship invites all to join them for a monthly meeting on March 23 at 7 p.m. in the Lounge of the HUB. The meeting will be open to all, and the department of chemistry will provide refreshments.

The Union Board is hosting a film screening of "La Traviata" on March 20 in the HUB. The film is part of the series "Italian Opera Classics." Refreshments will be provided by the Department of Chemistry.

The Spring Conference will be held on March 20 at the Union Board headquarters. The conference is open to all, and the Department of Chemistry will provide refreshments.

The jump rope team will be holding a competition on March 21 in the HUB. The competition is open to all, and the Department of Chemistry will provide refreshments.

The ASME Student Section will announce its meeting on March 22 in the HUB. The meeting will be open to all, and the department of mechanical engineering will provide refreshments.

Versus Very Victorious, IIT Keglers Chalk Up Win

by Harvey Schulte

For the second consecutive season, the amazing Versus intramural club captured the IIT intramural basketball crown. The Versus defeated Met. Eng. on Thursday, March 11, in the championship game, 53-29. Norman Wajnopol’s 9 points proved the winners, who trailed at the half, 12-9.

Versus gained the playoff as they swept through the Tuesday League undefeated, winning 7 straight. Met. Eng., with a 7-1 mark, finished second. The Thursday League was even closer in the playoff battle. Met. Eng., bolstered by the addition of Jim Winter to their roster, ended the season in first place, by virtue of their 6-1 record. The Jumping Jacks and Sign tied for second, but the Jacks were given the nod for the second playoff spot because they had defeated Sign in the regular season.

The playoffs opened on March 9, at both sites. Equally disposed of their opposition. Versus hung up a 43-33 triumph over the Jumping Jacks, while Met. Eng. cruised Mitsu 41-19. This set the stage for the climactic championship contest, as the Versus added yet another crown to their trophy room. They won the TM basketball, volleyball, and baseball crowns last year. TM volleyball is presently going on at Arthur Kettling Hall with 6 teams participating. Softball will begin as soon as the weather permits. TM director Ed Clancy reports that he is seeking entries for the season up until March 26.

The IIT bowling team, under the capable guidance of Coach Ed Bikle, posted a Midwest Intercollegiate Bowling Conference (MIBC) victory on March 7, when they rolled over Roosevelt, 8-3. IIT won 3 games of the 5 games, with one of them ending in a tie, and also won in total pins. Andy Rabin led IIT with an excellent 992 series. The keglers, captained by Frank Slobotnow, have a record of 3-5, and will swing into action this Sunday, when they have a match at DeKalb, Ill., vs. Northern Illinois.

Techhawk basketball stars Andy Prude and Greg Kenner were honored by the NAA District 20 in their All-Star selections. Prude received a berth on the Second team, while Kenner received honorable mention.

Techhawk Trivia: For the third straight season, the IIT Techhawk basketball team posted a fine record at Arthur Kettling Hall. This year’s team was 11-1 before the home folks, with the only loss coming in the IIT Holiday Tourney. The Hawks’ road record was a very creditable 8-1. The Techhawks had their best success this year against the U of Illinois-Chicago, beating the Bears 3 straight, St. Pius, Romans, Northwestern Illinois, Lake Forest, and U. of Chicago fell before the Techhawks twice each.

One of the most exciting moments in college basketball is when a club tops the 100-point mark. And our Hawks did it 5 times, while not allowing the opposition to do it even once. Greg Kenner and Wayne Bess each pushed the Techhawks over the century mark twice while Andy Prude’s free throw in the waning moments of the second Chicago St. game did the trick in that contest. Andy also did the honors when the Techhawks pulled the 2000 point mark, for the season, as he rammed in a field goal at 9:19 of the first half against Northeastern on Feb. 3. The Jan. 26 victory over the Maroons of Chicago was the 1000th in IIT’s history. This season’s fine record boosted IIT’s cumulative record over the .500 mark. The Techhawks, in play since 1940, have a record of 309-300, a winning mark of .507.
