New ATS President Examines the Issues

The last ATS election was one of the closest that student government has ever seen at IIT, as incumbent ATS Vice-President Jack Grueskin defeated Aneesh Kothari by 16 votes for president.

To give the students some idea of the plans and viewpoints of the new ATS President, Mr. Hauk stated in an interview:

Will the fact that you defeated Aneesh Kothari mean that your opponents are not as interested in or have any other programs for the student body?

Getting involved means that you're interested in what the rest of the student body thinks, not just the student body that you're in contact with.

What is your opinion of the student body?

The student body is not as interested in what the rest of the student body thinks.

Do you have any specific goals for the next term that you intend to push for at the next ATS meeting?

I plan to focus on improving the student body's involvement in community service.

Is there any other issue that you think needs to be addressed?

The student body should be more involved in community service.

New CB Appointments

The ATS Communications Board recently appointed new members to ensure the board's effectiveness.

The new members are:

1. John Green, a junior in chemical engineering
2. Susan Jackson, a senior in electrical engineering
3. David Lee, a junior in computer science

These appointments were selected based on their involvement in student government and their ability to represent the student body's interests.

Residents' Council Meetings

The Residents' Council is a student organization that meets monthly to discuss issues affecting residents. The next meeting will be held on May 4, 2017.
Parents Day, Not Public Relations Day

Last Sunday, IIT put out its best for the parents who came to visit our campus on Parent's Day. The chimes of Washburn Hall played peaceful tunes such as "God Bless America," many of the students showed up in suits and ties, and ROTC set up a remote-controlled model display.

Perhaps more importantly, the HUB opened earlier than usual, so the Bog was in operation while the afternoon was still young, and the lawns were heavily-seeded. School officials, administrators, representatives from every department, and people students rarely see outside of their offices, were all out in force to answer questions and offer encouragement.

All this to give the parents a good look at the things we've done, special badges for them—a nice view of IIT as a university.

Parents Day 2022

Something New in Campus Mart

Technology News would like to commend the efforts of Mr. Larry Latman, acting manager of the Campus Mart. In the past the Mart has been condemned because it was a monopoly. Last semester it was charged with " overpricing" and even "quotas and inflated food." Although these charges were denounced as lies by the previous manager, some students still felt they were not being treated fairly.

Perhaps the disagreement between the Food Co-op and the IIT administration is an outgrowth of this continued friction. Perhaps some mistrust is inevitable when students and administrators have tight budgets and skeptical minds.

The new acting manager, however, seems to have a different approach to his job. "I want the store to be more meaningful to students," he says. Talk can be deceptive but this statement hardly sounds like that of an inept administrator, unaware of student problems. Mr. Latman's weekly sales report attempts to determine what students want. It is also an attempt to regain customers. Whatever the motives are, he is clearly out to operate and deserves a chance.

The editorials appearing on this page represent the majority opinion of the Editorial Board of Technology News. They do not necessarily (but may) reflect the opinions of the rest of our staff, the university, or the students.

Students can give him a chance by trying an atmosphere of cooperation. You might try putting yourself in his shoes or in the shoes of one of the cashiers. You might think about how it feels when your inventory is lower than what your sales would indicate it should be. You might think how you feel when you've found something you like and want to share it or when you've done something with it that makes it feel good. The sales manager is not part of a large organization, he is a person trying to make a living. He is not trying to steal from anyone but is trying to make a profit. He is trying to make the store more meaningful to you, the customer. He is trying to do his job well. If you give him a chance, he will try to do his job well.

There was NOT a Technology News staff meeting until Tuesday afternoon of 1 p.m. in our offices. But there will be a special meeting of the editors, bylaws, columnists, business personnel, and photographers. All those present will be invited. All other members of the staff should not come, unless they want their pictures taken for the last issue of this year's paper.

Dear EIC:

An incident occurred several weeks ago which I believe should draw the attention of residence hall officials at IIT Campus. Perhaps it will benefit from it.

On Sunday, April 28th, some residence hall officials were playing either on the campus or on a nearby hill. From what I know, it seems that one of the girls who was playing got too close to the edge of the hill, and fell. This happened around 10 or 11 o'clock on Sunday morning. The incident was eventually taken care of.

Sincerely yours,

Patricia Kinsley

Spring Conference Wrap-up: Final Results in Tomorrow

Specific, feasible goals and a consistent approach for attaining each will be outlined at a special Plenary Session of the ATE Spring Conference on Monday, April 29, at 10 a.m. in the HUB Auditorium. The Conference's nine Steering and Implementation Groups will report their continuing follow-up plans to utilize available resources to satisfy identified needs in the following areas: Rules, the R.A. Degree, Evaluation; Recruitment; Freshmen Year; Counseling; Honoring; Staff Governance; and JIT and Community Interaction. All participants in the April 14-15 Conference are urged to attend this brief but significant final Conference session.

The most frequent response to the evaluation question, "What did you like most about Spring Conference?" was that it provided an opportunity to meet and exchange views with diverse groups which are interested in JIT.

However, questionnaire responses also reflected problems encountered in the first two Conference sessions. Those changes, in ranked order, were suggested for the 1973 Spring Conference: Better organized Plenary Sessions and time schedule; better advance preparation of participants; reconsideration of the Full Conference or an earlier date in the Spring Semester; more time for the Conference, perhaps extending over several weeks; fewer subjects, perhaps determined by advance polling of participants; more attendance by JIT administrators, especially top administrators; and better attendance of the invited groups, with a commitment to stay until the end of the Conference. Committee members already recognize the need for better Conference organization, so that goals are defined and implementation plans are announced within the original time schedule, while both attendees and planners are at maximum strength. A need for better advance preparation of participants is also recognized. Student leadership of orientation groups was generally good, resulting from the two training sessions which were held for student leaders and advisors. Advance courses were also scheduled for apartment residents, community leaders, city planners, and others. However, not all Conferences illustrated these features. Consultations from the Psychology Department's Counseling Center were well-prepared and their role in facilitating effective communication within groups was appreciated by Conference delegates.

The open structure and broad participation of the 1972 Spring Conference are a new experiment. Both were endorsed by the evaluation questionnaire. The Conference's large-scale orientation seminars, seminars will depend upon effective, continuing leadership within each of the Conference's nine Steering and Implementation groups, so that momentum and support are maintained for achieving major goals.

Again, all Conference participants were thanked for their efforts. Special thanks are due to those who otherwise were not able to attend this final session.

Campus Mart Begins Change; Lower Food Prices Planned

The Campus Mart has a new look, one that has been attracting student attention. It opened when Mr. Larry Littman became the manager earlier this month.

Mr. Littman has tried to turn the store around. He started a weekly sales and special-sales program. Pictures and posters of the items (and their prices) are placed on the bulletin board in front of the Mart. Signs listing the basic contents of each aisle in the store were also added. New products are now on his agenda.

"This new manager said, "I want the store to be more meaningful to students. If possible, I would like to give them what they want. I am open to suggestions."

He already has many new things planned. Products will range from ice cream and flowers (a bouquet up to $18) to ketchup and a new line of compressed, soft-touch grocery bags.

The Campus Mart is the first food cooperative that will open in May, 1971. The store has a large selection of fresh produce and dried goods, and it is located at the corner of a major highway.

Draft Regulation Change

(Continued from page 1)

The local board and the existence of a state-level appeals board before which a registrant may appeal upon written request. Prior to the new regulations, witnesses were not allowed an appearance before the local board, nor were there provisions for a state-level appeals board. Also, if the vote of the state board is not unanimous, a personal appearance before a quorum of a presidential appeal board is allowed upon written request. Requests for a local board appearance, a state-level appeal, or an appeal to the presidential board must be submitted to the registrar's office. A person may also request a personal board appearance prior to the board's decision on his CO, but he may appeal as of right.

TECHNOLOGY NEWS
Alternate Media at IIT Community Newsletter

As the official student newspaper of IIT, Technology News attempts to cover the major events happening on campus, as well as noteworthy activities that may have some interest or importance to the students and all the groups that compose this university.

However, it is not possible or advisable for the newspaper to report on every single happening on campus. Although the University Relations publica-
tion Center Events Office tries to inform the readers to some extent, up to a few months ago, a void did exist.

The IIT Community Newsletter, which began publication in late November, is helping to remedy that situation. Its first issue came out on November 28, in which it was stated that "The Newsletter is our attempt to fill this communication gap between the various faculty, staff, student, and resident organizations at IIT Center."

The Newsletter has undergone a few changes since its inception late last semester, and some of them are for the better. The publication comes out at the beginning of every other week, and is distributed in a variety of ways, but mainly by personal delivery to various groups and buildings. Originally edited by Bob Niblett, the Newsletter now has an Editorial Board, and is made up of representatives from the University of Illinois at Chicago, CTA, ASG, Newmark, University Babies, Baby-Sitting Club, and others.

It has covered a wide scope of topics, including a continuous coverage of the on-campus situation on campus, the various fairs and openings of the St. Xavier Chapel, the Chi-Town Chattie, the University of Illinois at Chicago, the IIT Legal Defense Committee. There have been numerous articles of interest to faculty, staff, students, and the University Community.

The Newsletter has been improved in each issue, and provides a more adequate support for the services offered by Technology News.

One other publication which is not reported by IIT community students, is the South Community newsletter. The newsletter is in the business for quite a while longer than the Newsletter, and is put out by residents of the South Communities.

The first issue of the newsletter was published on November 18, 1976. It included articles on the history of the South Community, the upcoming events, and the various activities of the community.

The newsletter is published on a monthly basis, and is available at the South Community office, located in the South Community Building.

The newsletter also includes a section on local businesses, with articles on new products, services, and events in the South Community area.

The newsletter is a valuable resource for the residents of the South Community, providing them with information on local events and activities, as well as a means to connect with their neighbors and the community.

U.B. Tournament Results

Last Thursday, April 20, twenty-two players battled in the second annual U.B. Bridge Tournament of the season. With not many cancellations, Ron Bent and Keith Luhr took first in the eleven team field. Second were Carl Hittie and John Grace. Andy and Paul planned for May 4, L. Rogos and B. Murray assisted.

The table tennis tournament, singles, won by Chiu G. Lee by a score of 11-3. In the first round, Cheng was second, and Hou-Ching Chow third, in this department.

There was a fine turnout for theFullerton Oaks from the field this Friday to a Century Biological Corporation.

Problem Pregnancy Assistance

Women's Medical Assistance (WMA) is a self-supporting organization whose function is to assist those women concerned with pregnancy problems. WMA makes all necessary arrangements with Planned Parenthood, etc. to provide assistance. Women who are experiencing financial difficulty may apply to WMA for assistance. The application must be filed within 24 hours after the birth of the child, at any time after the birth. If assistance is approved, WMA will provide a service such as a hospital bill, maternity clothes, etc. Women who are experiencing financial difficulty may apply to WMA for assistance.

Learn to be a pilot. Fly in your spare time.

Flying...what a great way to spend your spare time. Undergraduate Pilot Training (UPT) is the Air Force Reserve's program that trains those who qualify to become Air Force pilots with a minimum of interruption from job, home life, etc. Qualifications include being between 26 and 30 years of age, in good physical condition, holding a bachelor's degree (or in your last semester), and satisfactory scores on the Air Force Officer's Qualification Test.

The program begins when you go to Lackland AFB, Texas, to attend Officer Training for 10-12 weeks. Upon being commissioned as 2nd lieutenant in the Air Force Reserve, you go directly to an Air Force flying school for classroom and flying instruction. After one year of training, you will return to your own hometown, follow the civilian career you've chosen, and fly with your local Air Force Reserve unit, during your spare time and on weekends.

For all the facts about the Reserve's Undergraduate Pilot Training Program, mail in the following coupon.

When you fly with the Air Force Reserve, you can really get away from it all!

Find yourself flying in the Air Force Reserve!
**Netters, Golfers Hit Hard Times**

by Harvey Schmitt

Techawka tennis starwants took a turn for the worse last week with the netters dropping two matches to fall 2-1 on the season. Coach Harry Avell's team was knocked out of the conference, ending the season with a 2-1 record. The April 21 meet with Trinity was run.

Loras, 60-1, lost its first match, when Loras captain Paul Cerdan was forced to default because of leg cramps. Paul Cerdan had split his first two sets, and Loras' 6-2 was the deciding set when he suffered severe leg cramps.

The netters continued to lose, as Loras lost its third match, losing to the conference. Loras, 6-2, was the deciding set when it suffered severe leg cramps.

This past Wednesday, the Techawks faced Rockford College. The date originally belonged to Elmhurst, but the Bluejays were forced to cancel because of conference scheduling conflicts. The season opened a day late, but the Bluejays won 2-1 on their home court, 6-2, 6-2, 6-1.

**More Techawk Baseball**

(Continued from page 19)

Loras tied and won, only to lose in the last inning, 4-3.

Loras matched four singles into two first-inning runs to grab the lead. Catcher Joe Wotring bopped home a run with a one-bagger in the second, and a two-run double in the third. Wotring took the lead in the top of the seventh, taking regulation, 5-3. To win the game, Loras put into play Terez's RBI single, and it looked like a win.

The Techawks were effectively stopped at the plate, but Loras put up a fight. Tom Wolsey, 1-0, 1-2, 1-3, led the top of the seventh, taking the lead in the last inning, 4-3. "Loras pitched twice, one with great control, and the other with a great finish," Terez said. "The Techawks are in a rhythm, and the Iowa State seniors have a lot of confidence." The Iowa State seniors have a lot of confidence.

With John Terez securing the win, his pitching was impressive. Much of a pitcher's score (or lack of it) is his defense. Terez has worked on his defense, and the Iowa State seniors have a lot of confidence.

Loras allowed 10 hits, but walked only two, while walking out seven. His control has improved as the season comes to a close. Terez's high hanging curve ball to Placement in the seventh. The nightcap was not complete.

Tech Gets Enforcement Grant

The Industrial and Systems Engineering Department of IIT has received a grant of $65,731 from the Illinois Law Enforcement Commission to develop a more effective system of distributing urban police patrol units. The study will investigate computerized solutions to this problem.

Aurora will be used as a prototype city for the study, according to Dr. Spencer Smith, Chairman of the IIT Industrial and Systems Engineering Department. The city is located just west of Chicago and has a population of over 50,000. Dr. Smith added that IIT has contributed $11,917 to the study, on a cost-sharing basis, thereby making it a $77,648 project.

Dr. Smith stressed the importance of this project to urban law enforcement. "The probability of a criminal being apprehended in the act by urban police depends very strongly on the speed of response by police patrol cars, which in turn, depends on how they are distributed," he said.

He then outlined the program. The study will not only include a method of improving response time, but a display of data as well. Calls for police aid will be charted on the basis of type, data, block, location, and hour. The charts will help to predict problem areas.

The above data on police calls will be fed into a completely new computer system, along with predicted hazards and available manpower and vehicles. The computer will then figure out patrol beats that minimize the average time between the call and the arrival of a police car at the scene of the crime. The system is being designed for one- and two-man patrol cars.

Dr. Smith also pointed out that the project will be periodically audited by an inter-city committee. The law enforcement people will offer suggestions that will make the system applicable to their city.

Go Fly a Kite:
WIIT Offers Cash Prizes

WIIT will welcome in the season of spring with the Second Annual Amelia Earhart Memorial Kite Flying Contest this Sunday, April 26 at 2 pm at the new athletic field just east of Arthur Kesting Hall.

Here's the breakdown on cash prizes that will be distributed during the contest. (The station also plans to hand out record albums as prizes):

- Best Original Kite $10
- All-Out Dogfight $15, 1st place
- Farthest Out $15, 2nd place
- Largest $15
- Prettiest $5
- Longest Tail $10

A complete and comprehensive list of the rules is on display outside the radio station in the HUB basement.

WIIT suggests that all would-be aviators and Red Barons come out early to the games. With a little bit of wind and a lot of hoot, who knows?

Juicy.

Oranges, Lemons, Limes. Gallo mixes all these flavors together into a good red wine to create Spana'da. Chill it. Or spash it on the rocks. Just bite into a fruit of Spana'da. You'll know why we call it Juicy.

California grape wine and natural fruit flavors. Gallo Vineyards, Modesto, California.
Swanson New Hawk Coach

by Harvey Schulte

Rich Swanson, who has served as assistant basketball and baseball coach for Illinois Institute of Technology this past year, has been named head basketball coach of the Techhawks. He will take over for the 1972-73 season. The announcement was made last Wednesday by IIT Athletic Director Ed Gracy.

Swanson, 24, replaces Tony Delgado, who resigned after one year as head man of the Hawks to take the head basketball post at North Park College in 1969-70. He joined the IIT staff last year, and, together with Delgado, helped lead the Hawks to a trip into the strong-IIT athletic program. Their basketball team finished with a remarkable 14-11 record, and the basketball

Hawk Bats Cold; In Hit Slump

by Harvey Schulte

When was the first mention of baseball in the Bible? Answer: In the big-inning, G-d created, etc., etc.

Whether you believe in runs for the Bible, for that matter, or not, the fact remains that baseball man everywhere believe that the "big inning" is the key to success in America's National Pastime.

A firm subscriber to the aforementioned theory is IIT Techhawk baseball coach Tony Delgado, who emphatically declares, "Baseball is won by the big inning." Coach Delgado has played, first-hand evi-
