Professor Loses Lease To Apartment

by Dan Holm

Today is the last day that Dr. Frank Hokin, professor of History at IIT, will be able to live in the Campus Inn.

On Monday, Dr. Hokin received a notice on the door of his apartment, a notice of termination of tenancy. The legal document stated that he must vacate the building within five days. Tomorrow is the deadline.

The reason given for the notice is breach of lease. Dr. Hokin allegedly broke it by changing the locks on his apartment. "The lease is a standard lease," explained Mr. Charles Owens, Director of Housing, "and states that the locks cannot be changed without the permission of the landlord." Owen further explained that the school must have access to the apartment in case there was an emergency such as a fire in a refrigerator or a back up in the water supply.

Regarding the charges, Dr. Hokin feels he has fulfilled the "spirit of the lease." When he changed the locks, he sent a new copy of the new keys to the Campus Inn. Therefore, he felt that IIT would have access to his apartment, as specified in the lease.

But the issue is deeper than that, according to Dr. Hokin. It is one of security. Last November, it was rumored that a set of master keys to the apartments was missing. Some sources say that campus police confirmed that rumor. As a result, several apartment dwellers, including Dr. Hokin, talked to the Housing Director about changing the locks.

As time passed, the issue quieted. In fact, it was dormant on February 7. The day before, Dr. Hokin was alone in his apartment on that day. He heard a noise in one of the rooms and went to get what he thought was her husband. To her surprise, it was a stranger (an intruder), who upon seeing her, bolted out of the room. The question of who and why that night was unanswered.

Housing installed a new lock in Dr. Hokin's apartment but was told that the old master key would not work. At this point, he consulted a lawyer. The new lock was replaced by a newer lock, once supplied by the landlord.

On February 29, the room from Housing returned to put their lock back on the door. When Dr. Hokin came home and saw them, he was in an "enraged state," according to Mr. Owens.

Dr. Hokin's account of the encounter follows: "When the landlord knocked to stop me or I would call the Chicago police," Owen told him what was being done. "I called the police and told them that there were people in my apartment who should not be there. The Chicago police (five officers) showed up. Owen told the officers that everything was fine, but I said that I had called them and the police. The Chicago police personnel determined that the case was a civil one and talked to both of us. The police discussed the matter with the policemen that night."

"They asked me, 'Are you satisfied with the police handling of the matter?'" he said. "The police officer that night was a detective."

"The lock on the door now is the one supplied by Housing, and I've been able to live in the Campus Inn until today."

Chapel Reopened

by Kathy Delano

Despite the efforts of the administration of IIT, the expected freshmen enrollment for Fall, 1972, is set at 400.

This reflects a drop of one-third in freshmen enrollment from two years ago when 600 high school graduates (the largest number ever) enrolled at IIT.

The decline became apparent this year when Farn Hall was closed. The lack of a dormitory became even more obvious at the end of this fall as an unusually large freshman class graduated. However, Mr. Charles Owens, Director of Housing, states that it is too early to tell if the enrollment situation will have any major effect on dormitory availability.

Two years ago, an explosive drop was expected according to David A. Dudley of the administration office. He suspects that the economy is a major factor in the decline in many of the country's private colleges.

Mr. Dudley also blames a lack of interest in technology in today's high school students. Since the Vietnam confrontation and the emergence of highly sophisticated weapons, the need for engineers and professionals has been re-emphasized as a necessity of man. Although IIT is not solely an engineering program, the emphasis on engineering programs is felt.

This year, enrollment is down by 10% (100 students), which continues to be a great concern for engineers in the field, according to William C. Smith, chairman of the Mechanical Engineering Department.

Mr. Dudley also attributes the decline remotely to the absence of financial aid and the availability of good-paying trade jobs for non-college graduates. But a more permanent reason is the increasing appeal of public institutions. Twenty years ago, admission standards required the public school to eventually rise to a level equal with private institutions, and the depression receded, spurring up the process to make a low-cost college education more appealing than the prestige of private education.

Each year, the admissions office tries to recruit new freshmen by sending literature to interested high school students and to high school counselors. This is supported by a series of information sessions and a letter written to parents in the area and as far away as Illinois, Texas, New York, Oklahoma, Minnesota, and Dallas. These trips allow students to ask questions which might otherwise be unaddressed.

Also, IIT has been unable to recruit in high schools in the area. It was felt that there was no response by the school districts to the interest in these schools. But the school districts have been able to recruit locally from the areas in which the school is located.

The University also has been unable to recruit in high schools in the area. It was felt that there was no response by the school districts to the interest in these schools.

Fresenius Enrollment Drops - Again

by Kathy Delano

Despite efforts of the administration of IIT, the expected freshmen enrollment for Fall, 1972, is set at 400.

This reflects a drop of one-third in freshmen enrollment from two years ago when 600 high school graduates (the largest number ever) enrolled at IIT.

Dear EIC:

In the interest of accuracy, I wish to correct the reporting of rumors — and由此可以推断出 some speculation and innuendo — attributed to me at the general faculty meeting on February 23rd, and appearing in the Tech News of March 9th.

I did not say, as the Tech News reported, that the American Psychological Association had not accredited the proposed program for a M.S. in Counseling and Guidance that was then being considered for approval by the faculty. What I did say was that I had heard from professional and university colleagues not connected with ITT that the American Psychological Association had, in fact, refused accreditation of a previously approved program (another one in a related, but somewhat different area (Counseling) and that the faculty should consider this assessment before deciding to approve the proposed M.S. program. And, under questioning, in the colloquium that followed, while agreeing that, in fact, it was a proposed doctoral program in counseling that had previously been denied accreditation, I also suggested that the faculty should investigate to determine what differences existed between the previously unaccredited program and the proposed program. I further implied that it was possible that there might be some differences between the two programs (as to degree level, etc.) that might also be of fundamental and substantial, and extensive nature.

Indeed, it was Dean Grip who stated earlier at this meeting that the former program had been denied accreditation, and I believe I also said that there were several points (or areas) that had required special attention. Of course, it is my hope that, as it must be of all the faculty, that these points (areas) have now been satisfactorily addressed to the satisfaction of Dean Grip.

Mr. Michaelson:

I am sure that we are developing an ongoing battle concerning the ITT Women’s Council and their controversy over the issue of some form of counseling. I think it is important that we redress their previous decision to not accord the M.S. program in Counseling and Guidance which was presented on the same day as the faculty meeting.

Indeed, what I did say was that the faculty meeting was quite important and will not easily be disregarded. It is one of the three issues that involved the non-accreditation of the proposed program in Counseling and its relationship to the pre-professional degree program. This issue may only be optimally addressed by a disinterested, professional, and fully-independent panel of experts.

Sincerely,

Terri L. Rosenthal
Professor of Social Psychology

Re: The Inheritance of Chuck

by Dana Brack

September 7, 1972. Cheecky-poo, Hoss, in his first official act as ATU President, moved to appeal himself under the law of the inheritance of the legacy of Hoss. Exemplifying his commitment to the ideals of Tech Student, Dave Bierstein sailed the motion after declaring that the present state of the chancellors, the Inter-Dormitory Council has been broken.

The motion passed 3-0 over the hollering of Hoss’s ghost in the deserted HUB. All entrances to the meeting room were guarded in case any student decided to attempt to mediate theϋ nter-Dormitory Council itself.

Chuck then moved to allocate $300 for the cost of chucking parties as a gift for last year’s assembly, and the current students of the Inter-Dormitory Council that they might offer theChuckers.

It was moved and seconded that the Chuckers be allowed to attend, and the motion passed 3-0, with Chuckers in attendance. The Inter-Dormitory Council then adjourned to the 34th consecutive weekly meeting between Technology News and the Communication Board.

Chuck was elected last April after running on a platform of “One at a time.” Hoss was known for his strong, careful free-thinking political style of leadership in January. The newly-installed President is now of both these status a person less less impressed with his status and not necessarily by his behavior or his remarkable intelligence.

There will be an important Technology News staff meeting Tuesday, March 14, in the usual office. All the staff will meet at 4:00 PM on the staff and all the staff are expected to be there.

This thing that could make anyone happy to know:

Homecoming was a success this year, and Chuck and Hoss were called by the name of all Miss Laura Stirling, a most deserving lady and a charming individual.

Sincerely,

Anne Aichele
(Ed. note: White Technology News encourages its readers to submit letters. It is open to the use of this space to convey personal opinions, to provide letters and to suggest that the matter might more accurately be debated face-to-face in the future.)

More Letters: ATS Laws and Dorm Food

Dear TN:

In response to Milczarek’s Editorial in the April issue, I would like to voice my own concerns on the matter of the ATS’s jurisdictional by-law. My interpretation of this by-law is that the ATS is responsible for the administration of the HUB, excluding the library and the information center. Consider that if the HUB is centrally managed by the administration, it would not be possible for the administration to delegate authority to various organizations. If an organization were to control the HUB, it would likely have to be the administration itself, as it is responsible for the overall management of the campus. However, if the administration were to delegate authority to various organizations, it would be possible for the administration to delegate authority to the ATS, as it is responsible for the administration of the HUB.

John Sneed

President ATS

The collective mood of all the members of the ATS community needs vast improvement. Attitudes towards people and institutions here are far from the truth (actual).

Dear TN:

South Commons Music Theatre Revives Stage Interest at IIT

by E. Michael Blake

Just before the doors opened on the Saturday performance of "The Merry Widow," I stood before the Comer Auditorium facing the material posted there. A woman, apparently unnoticed by the play, came over to me and asked, "Would you like to see the play here? I've got an extra ticket. I'm not using it.

I smiled and held up my own ticket, purchased for $2.00 at minimum. for $2.00 at minimum. "Too bad you didn't catch me sooner. I couldn't have saved some money.

She observed me; bearded, in jeans and work shirt, generally scruffy. "I suppose you young people think of this as decadent entertainment.

I kept myself from grinning at her "young people" tag: most likely she meant no harm in the generality, but I thought to her, "If I'd known about this whole thing sooner, I would've tried it myself. Haven't been in this sort of thing since high school."

The Facts.

There are three daily newspapers in Boston: The Globe, The Herald Traveler, The Record-American. They have refused to run an advertisement for "The Merry Widow." The Record-American has advised us that they would run the ad if the last word of the title was omitted. The Herald Traveler, in a recent policy decision, has banned advertisements for X-rated films.

The publisher of The Globe was willing to consider an advertisement if the title was changed to "William Bache - Mysteries of the Organist."

The Ad.

The National Agency Of Student Employment Has Recently Completed A National Research Program Of Jobs Available To College Students And Graduates During 1972. Catalogue Which Fully Describes These Employment Opportunities May Be Obtained As Follows:

- Catalog of Summer and Career Positions Available Throughout The United States in Resort Areas, National Corporations, and Regional Employment Offices, Price $5.00.
- Foreign Job Information Catalog Containing Over 1,000 Employment Positions Available in Many Foreign Countries, Price $5.00.

SPECIAL: Both of the Above Catalogs Will Be Included For $10. Please State Your Interests. Price $10.00.

Announcements

Coffee House!!

There is a coffee house every Wednesday evening at St. James Church. Everyone is invited. See you there!

A Special Week for All

This coming week, March 12-17, is Newman Week with something special every day. On Monday there will be a bake sale in the HUB from 10 am to 3 pm. If you are a coffee lover, then you can try your skill at homemade baking at 10 am and the rest of the day. And the coffee will be on sale at 11 am.

"The Merry Widow"

(Continued from page 4)

Facing the new world is not easy, and there are many challenges we must face. But I believe that, with the right attitude and determination, we can overcome any obstacle.

Corny? Sure. But haven't you ever had the urge, now and then, to see a really bad movie? Sit back and watch the clichés roll. The South Coast Music Theatre's booking for Broadway, or even the Shakespeare—be they do it for the fun of it. And so do we. Everyone knows that comedy is the Shakespearean tradition always have happy endings—usually to the point of pairing off everyone amicably, all at once: A Yeast That Ends Well, and Much Ado About Nothing. The audience is out for some fun in the game, and we're out to see their friends and neighbors perform. And in any production—acknowledging the last glowing weeks of rehearsal, eager and water-cooling at 11. Both contents will be in front of the HUB and prices will be set to the most affordable. At 5 pm on Wednesday, Fred Welt will talk on "Transcendental Meditation, up to the HUB Mezzanine. Thursday’s closing event is a body painting contest in the gymnasium room at 6 pm. It’s something you just can’t miss. To end the week there will be a Silent Dance in the HUB banquet at 8 pm. Everyone is invited to everything, so why not come and enjoy?

ATS Committee Meeting

There will be a meeting of the ATS Educational Affairs Committee at 2:45 pm. On Thursday, March 15 in the ATS office in the HUB. New members are needed to work on course evaluation. If you can’t come, but want to help, or have any questions, call Ira Rothman at 460-3483.

Bunch of Some Gusto

You only go around once in life, so drink lots of beer at the Von Zeppelin Beer Blast at 8 pm on Friday, March 16. The place is Logan Square, 2451 N. Kedzie. A live band (R.E.EM) will be featured, and it only costs $1.25 at the door.

"Oh Bangles" (Big Bangles)

For the first time in WIT’s illustrious history the entire student album from the concert for Bangles will be aired on 9 pm on Monday, March 15, 1972, WIT Radio 64-MHz 9:39 AM.

CTA Election

The CTA. Commuter’s Ad, Townsman Association elections will be held on Thursday, March 16 at 12:30 in room 301 of the HUB. Offices will be up for election by: Chairman, Vice-Chairman, and Secretary.

After Nuclear Attack

Dr. J. VanSponden, Chairman of the Department of Sociology, will present a public lecture entitled "After Nuclear Attack" at 1 pm on Tuesday, March 14 in the Siegel Hall auditorium. This lecture is part of the film lecture series associated with the course "Physics and Man — The Nuclear Age."

BASKETBALL: In the year 5731 (for you non-Jews and non-sports fans), the ITT Tech wastewater team was one of the strongest teams in the National Association of Intercollegiate Athletes’ (NAIA) District 30, which encompasses the entire state of Illinois. They boasted of a record of 19-6, most wins ever by an ITT team, and no losses to Illinois, technical styles, or Andy Pride.

Bowlers Rip Roosevelt

Setting up a first place showdown with Northern Illinois two weeks hence, the ITT bowling team rocked Roosevelt, 9-3, in Midwest Intercollegiate Bowling Conference action March 7. The Techs strengthened their bid for the MICB pennant by sweeping the first four games, and taking the point for total pins. After a week of rest this Sunday, the Hawks will host the Illinois-UIC. This loss dropped Roosevelt in a key MICB match.

SWIMMING: Coach Danny Nuccio’s team earned the full support in the Chicago Collegiate Conference swim championships, March 9, and placed sixth, with a total of 10 points. Of the 16 events held at U. of Illinois-Chicago, the Techs won six out of the seven relays and four individual events.

The individual star for ITT was freshman John Reisch. Reisch took fourth for the Hawks all day. Murray picked up a fifth and a sixth in the 200 and 100 yard breaststroke, respectively. Another freshman, Bill Seminick, placed sixth in the 50 yard freestyle. His time of 25.8 was 6 seconds off his record ITT time in the event, but Coach Nuccio feels that in time, Seminick will lower his Techmark.

The best news to come out of the championships for the Techs is the fact that eight and one half of the 10 points garnered by the Hawks were by freshmen. Moreover, the Hawks will lose no one who scored any points in the meet, all are available next year. Coach Moreau feels that ITT should do much better next year, as the golems of freshmen should do nothing but improve.

Versus IM Champs

Perennial intercollegiate powerhouse Versus successfully invaded the IM territory, handing IM A, 6-4, at Kenning Hall, March 7.

Breathing in victory to the Civic Arena, the ITT basketball team triumphed in their last game on a bad note, dropping their final 1972-73 match to Milwaukee Tech, 9-3, on March 7.

In response to these year-long-perpetuated injustices, the independent coaches, headed by Lewis coach

Paul Ruddy, voted to use a rating system to determine the best independents in the state, and have a 4-week playoff for the last spot in the District playdown. The key to the plan is the impartial voter. Don Carr, Carr works out of Nashville.

TECHNOLOGY NEWS

ACAPROC

ACAPROC is a powerful programming language that is used in the development of software applications. It is a high-level language that supports a wide range of programming paradigms, including procedural, object-oriented, and functional programming. ACAPROC is designed to be easy to learn and use, and it provides a rich set of features for developing complex applications.

Using ACAPROC, developers can create efficient and scalable software solutions that are well-integrated with other systems. The language is particularly well-suited for developing distributed systems, as it provides support for communication and synchronization between different processes.

Overall, ACAPROC is a versatile and powerful programming language that is widely used in the development of a variety of software applications. Its ease of use and flexibility make it an excellent choice for developers of all levels, from beginners to experienced professionals.
