 Settlement in Fraternity Housing Problem

by Rick Wrincler

Registration concerning the fraternity pledge meeting is completely unnecessary or needed at all, according to Peter Butch, the leader of the cause. He has been attending meetings and discussing the issue for the past several weeks.

The specific complaint Butch is making is that the pledges, who are not students, are being too aggressive during these meetings. They are speaking to prospective members in a way that is often rude and unappealing. Butch said that he has noticed this behavior first-hand and feels that it is discouraging new members from joining.

The National Interfraternity Council (NIC) has been trying to address this issue, but Butch feels that they are not doing enough. He said that the council should be more proactive in enforcing their policies and ensuring that all members are treated fairly.

Butch hopes that by bringing attention to this issue, other chapters will also start to address these problems. He said that he believes that a united front is needed to make real change happen.

UB Action in ATS

At the AT Senate meeting on Oct. 22, new chairman Thomas P. Resigns announced that he is resigning his position effective immediately. P. Resigns has served as chairman for the past two years and has been a vocal advocate for student issues on campus.

In his announcement, P. Resigns said that he feels that the university has made significant progress on many issues during his tenure. He cited the increase in funding for student organizations, the creation of a new residence hall, and the implementation of a new campuswide wireless network as examples of positive changes.

However, P. Resigns also expressed concern about the university's commitment to sustainability and the need for more transparency in decision-making. He said that he hopes that his resignation will bring attention to these issues and encourage further discussion.

Thomas Resigns

In a letter to the university community, Thomas Resigns announced his resignation as student senate president effective immediately. Resigns has served as the student senate president for the past two years and has been a vocal advocate for student issues.

In his letter, Resigns said that he feels that the university has made significant progress on many issues during his tenure. He cited the increase in funding for student organizations, the creation of a new residence hall, and the implementation of a new campuswide wireless network as examples of positive changes.

However, Resigns also expressed concern about the university's commitment to sustainability and the need for more transparency in decision-making. He said that he hopes that his resignation will bring attention to these issues and encourage further discussion.

New Parking Lot

In late November, new parking lot planning has been completed and a new parking lot is scheduled to open on December 1st. The new lot will provide additional parking spaces for students, faculty, and staff.

The lot will be located on the north side of the campus, near the Sterling Memorial Library. The new lot will be open from 7am to 9pm on weekdays and 8am to 5pm on weekends. The lot will be available for all university community members and there will be no charge for parking.

New furniture at computer center

New furniture has been installed in the computer center. The furniture includes desks, chairs, and tables and is designed to provide a comfortable and efficient workspace for students and faculty.

The furniture was purchased with funds from the Student Activities Fund and was chosen by the computer center staff. The new furniture is expected to improve the overall student experience and enhance the functionality of the computer center.

New computer center

A new computer center has been completed and is now open for use. The center includes 50 computer workstations, a printer, and a scanning station.

The center is located in the basement of the new science building and is accessible 24/7. The center is open to all members of the university community and there is no charge for use.

Chiarulli: Talks of Job Opportunities

by John Pyro

It has almost become a truism to many people that engineers and scientists are the job opportunities are drastically down and dropping as a result of the space race.

In an interview with the Council on Employment Rights, Dr. John Chiarulli, the executive director of the organization, commented on the situation the field of engineering and the technological jobs market, and the factors affecting them.

Dr. Chiarulli pointed out that the major issue facing engineers and scientists today is the lack of opportunities in traditional industries. The closure of many factories and the outsourcing of jobs have resulted in a significant reduction in job openings.

He also mentioned that the focus on technology and computer science has led to a decline in job opportunities for engineers in other fields. The rise of automation and robotics has reduced the demand for traditional engineering positions.

Chiarulli emphasized that engineers and scientists need to diversify their skill sets and adapt to the changing job market. He encouraged them to pursue jobs in fields such as renewable energy, healthcare technology, and transportation.

He also emphasized the importance of networking and building relationships with potential employers. Chiarulli suggested attending industry conferences and participating in professional organizations to make connections and learn about job opportunities.

In summary, Chiarulli highlighted the challenges facing the engineering and science fields and the need for individuals to be flexible and innovative to find job opportunities in the current economic climate.

---

For more information on job opportunities in engineering and science, visit the Council on Employment Rights website or contact Dr. Chiarulli directly.
TECHNOPINES

Question: "What about Union Board?" by George Stiehl & Bob McGraw

Peter Goldman Arch 03

The concerts? They could get better ones. They haven't had some good acts; they should get some good rap groups. They're not necessarily expensive, you know. Also, they're starting a coffee house which has not been published very well, I believe there's only one person working on it. I can't help them; I've got too many things to do; for the time you have to put in, the rewards are too small.

Steve Salter ID 07

Perhaps they should consider, they're doing a good job.

Jin Collins Phaye 05

I think that their beer blasts, for example, are bad-way well run. There was not that much student activity involved. Like, at the last one, there was pizza and there was beer. There was a definite shortage of pizza, and a definite excess of beer. There were kids there hungry because there weren't enough pizzas allowing all students to get away with three or four of them.

Dan Beno Mgt 91

It might be a good idea to do things during the week, as long as they're not too often and not too long. Stay an hour, an hour and a half. Classical music shows would be a good idea too.

Mike Yale Phc 07

I didn't know about the Spring Thing concerts, since I don't live on campus; I did hear some talk about them last week was in the middle of the terms; and I didn't get any time to see any of them. Sometimes I don't even see daylights for two or three days.

Steve Greene ID (Phog.) 03

I think they do a good job, but I don't think the school gives them enough latitude to do what they really want to. UB had a lot of money last year that was given to them as a gift. They sponsored that, and they can't get it back. Personally, I don't think that their concerts would be well attended even if they had more of them. I don't think anybody really has the time to spend three hours once or twice a month listening to a concert. If they staged one big concert per semester, say, seven or eight hours at a time, it would be better.

Gyle McCollum B & E 96

The only thing I've heard about from Union Board is their shows. I enjoy the films a lot. I had heard about Spring Thing, but I had no idea what it was. I read about it in the paper, but that was the week after it was over. If they need help, well, I don't have that much free time as I think it seems the Architecture Students have more classes than anybody else.

Scott Mecurtaz B & E 96

Out of a budget of twenty-eight thousand dollars, I can't really see where you get a hell of a lot for it. This being the second school I've come to, I've noticed the participation of the people here is miserable; you can't get people down here, but they do have to offer much in the way of entertainment. They offer concerts by very few movies. The movies are things that are seen on television the next night. I just don't think they produce anything that makes it worthwhile to come down here.

Aldo Magri Chem Eng 70

Jazz. A jazz concert is something I would really appreciate. There aren't as many concerts as there ought to be, and although I don't know much about Union Board, the concerts aren't too bad.

A typical, everyday, friendly asks unless otherwise noted.

University Board is a student organization, run by students of UB. Its purpose is to sponsor a variety of activities to provide a richer social life for UB students. The executive board is composed of eleven positions: president, vice-president, secretary, treasurer, public relations director and five area directors (films, concerts, recreation, etc.). There are also representatives of A79, A78, Newell, Dean of Students, and HUB Directors' office. Each area may form its own committees. For example, the films area may form a committee for spring spring films and one for films in the Fall. According to Bob Wagner, UB President, there are presently many positions on the executive board which are filled by volunteers who are not students. Positions on the executive board are filled by students, and students are free to apply to any position they wish.

UB presently has a student activity budget of $50,000 for the 1977-78 school year. There is a motion now in committee of A79 which will free UB Board from financial dependence on A79 and enable them to settle all budgetary matters directly with the Dean of Students and the HUB Director.

UB: THE FACTS

(continued on Page 10)
TNT SUPPORTS McGOVERN

Senator George McGovern is our choice for president in the upcoming presidential elections. As each day passes, and new facts emerge, it becomes more apparent that Richard M. Nixon is not the man for the presidency. He has continually increased the pace of the Vietnam War, which is contrary to the best interests of the American people. McGovern's platform is one of peace and prosperity, and he has proven himself to be a strong leader in the fight against poverty and inequality.

If You Have the Time They Have the Money

Union Board has twenty-eight thousand, seven hundred dollars in its budget. They need people to speak for them.

It sounds insane, but on a college campus, that is perfectly logical. A student's voice is not heard by those who are in charge. Nobody wants to take an hour or two to draw a poster, attend a meeting or try to set up a concert. The problem with Union Board is a simple one. They don't have enough people.

The trouble with IIT is that there is no social life on campus. There is nothing to do here if you live on campus. The weekends are filled with empty hours, good only for study or work. If you come to the classes, the ones that you leave campus as you leave after your last class is through. This is not the way things should be. There is nothing to do here, the solution to that problem is obvious, Create something.

Many students seem to have the impression that Union Board is some kind of government administration which sets up concerts and other entertainment. This could be further from the truth.

Union Board, at the moment, is a small group of over-worked students who are trying to keep the IIT student body entertained. But there is a problem which is making it next to impossible for UB to perform this job. Union Board is too small.

The opinions expressed on this page are those of a majority of the members of the[IIT] Editorial Board and do not necessarily re-  S300 South Federal St., Chicago, III. 60616

Letters

Dear Editor,

It was with great interest that I read Chuck Hosc's article regarding student housing facilities at UC. However, I live on the northeast side of Chicago, and I can't afford to live in the 'sharing' houses only, but I would very much be interested in a program which would enable the student to live in a university dormitory several days a week.

I hope the appropriate personal or administrative authority will consider the necessity of such a program for the current and future students, and I hope the Tech in general.

Sincerely,
Bill Martin

Editor's Note: In a recent issue (Oct. 13, 1972) Techology News described the Physics Department's plan to install a giant Faraday cage.

NEWS BRIEFS

Visitors Day

Despite the bad weather and the seventh game of the World Series, Visitors' Day was well attended by students and their families last Sunday. Visitors were given tours of the campus, and the offices of the departments had informally set up displays and invited people to walk through their lab facilities.

At 11 a.m., the departments conducted a panel "discussion" with Dean Christopher,G. Hill and Smith, and Dr. Yerks. The talks were held by the first-floor showing of a university relations film produced by the Institute of Design, which showed the various departments in operation in the building, etc. The group of visitors split up into smaller sections to discuss admissions and financial aid, and also discussed the volume of information and how to get it to the visitors.

Peaks at the Greeks

Quadrangle Involvement

ALPHA EPSILON PI
Lambda Chapter of Alpha Epsilon Pi Fraternity is proud to announce the installation of eight charter members in the Lambda Little Sisters program. Barbara Cooper, Nancy C. Nelson, Jane Brown, and Don Killian were installed by Miss Shlomo Smith, Shirley Miller, Shirley Satter, and Benny Brubaker were the heads of the club who performed the installation ceremony and helped make the leaders of AEPi.

October saw a sports revival at the Lambda. The valiant AEPi football team, all of whom are part of the Lambda's Interfraternity Council, played four straight losses, turned around things with a win, and gained the Lambda a much-needed victory.

ALPHA SIGMA PHI
Students at the University of Chicago are set to help improve the quad during the Christmas season. The group plans to paint the fountain in the center of the quad with a Christmas theme, and to hang lights around the fountain as well.

Student organizations are invited to submit announcements for publication in Techology News. Deadline for announcements is Monday for Friday's issues.

Placement

The Wicken Corporation will be offering a seminar in Computer Science for Placement Officers on November 3, 1972. If interested, please sign up in Placement Office.

LETTER POLICY

Technology News encourages students to submit letters, staff, faculty, staff, alumni, or personal to print letters in the newsletter. We reserve the right to edit letters for clarity, length, and content. Letters should be typed double-spaced, signed, and must be accompanied by the author's phone number. Names will be withheld upon request.

Deliver all letters to: In the office of the Dean of the Student Body, 3320 South Federal, Chicago, IL 60616.
A Menagerie of Monsters

by John Pyrce

This is a good week to get into the subject of monsters (literary ones, that is). Monstrosities of many types and kinds. Monsters to amuse your friends and send shivers of fear up and down your quaking spines. Monsters to show you how the other half of the world lives and thinks. A good monster brings with it a very old monster. Grendel, earth-hun-nermer, mind-feet of Beowulf.

In reading the epic Beowulf, Grendel comes out as a purely evil creation, a kind of Max Tiberius of the ancient world. Any thinking mind can deduce from this that the epic is a mere propaganda. After all, we all know that the Victorians used to write the same. But someone has finally done enough to give us a glimpse into the psyche and reason of early world-monster hood. This leads to the anti-degradation laws in John Gardner's book Grendel (Ballantine 365).

For, you see, Grendel is not your ordinary run of the mill monster you may think he is. He does not run around slavering and bellowing for his reason at all. He is a philosophical monster Grendel has watched mankind for years and knows the hypocrisy and stupidity which makes man live with and by Originality. Grendel told the same human who was hungry, the same as he would eat any other animal. But all of the illusions fostered by humanity are abundantly clear to him. Unfortunately for Grendel, he is drawn half-believing the illusions which man has spun around reality so as to be able to cope with it. Grendel almost wants to believe, as the barbarians believed, that there is a God who is the courtier of God, since still enough of that would mean there is a God who cares enough to be secure. Unfortunately for Grendel, he sees too much of the world to believe in the illusions which comfort man. Grendel is an existentialist monster: he must help man learn how insignificant their lives and beliefs are, so man can give up the nearby ring, Brohgah, and this people a taste at reality, even if it is cruel, even if it is brutal, even if it is just. And he does. And it works. Brohgah, in his old age, acquires authority. He understands reality, so he understands life. He knows what it is to have impassioned forces slalomp in the face and split his most glorious works for apparently no reason. He is the human of his people. As we all know, Grendel meets his death at the hands of a Great Hero. Beowulf. Beowulf is very strong, very courageous, very heroic, and very tense. Beowulf the hero, who finally triumphs over Grendel through a man and a woman. Grendel's epitaph may be his last words. "Poor Grendel, a sad immortal. So may you all." (Rating: All is an excellent book, don't miss it if you possibly can.)

Monsters v2 is a due silver and slightly different character from the one you imagine in this. Take a fantasy adventure of the J.R.R. Tolkien Lord of the Rings variety, but pretend that Adolph Hitler had written it. The book is "The Iron Drum" (Athena 900) by Norman Spinrad. Here is a little bit of the blurb to give you an idea of what the book is like. "Hitler transposes you to a far future Earth, where only FRED JAGGER and his mighty org, will be an example of real-life power structures and administration at the hands of the actually evil. Dictators and the mindless monster horde they completely control. Yes, here's something for even the most jaded of you to enjoy, your dirty little punchinello. The victory of the forces of racial purity over the evil or mutated (formed in an atomic war) is visibly told in the best of glory. Tom Swift narration. The book roughly follows the rise of Hitler (the real one), that led to power, in Germany, and the rise of largely real world. The book reads as a cross between a black comedy and a comic book. It would probably be funny, except that whenever a situation becomes so grossly oversimplified and ghastly as to be humorous, one begins to wonder if it might not have been better if Hitler could have implemented his own ideas and methods. It doesn't seem funny any more. (Rating: An interesting intellectual exercise, which probably serves to bring a more emotional awareness of the reality behind such demagoguery as Hitler practiced. Highly recommended.)

Monsters v3 is not a mythological monster, nor a heroic fantasymonster. He is an ethical monster. The book is "The Bios Man" (Pocket Books, $1.25) by Luke Rhinehart. The hero of the book, a psychopath, develops an unusual and peculiar method which involves leaving any decision to the chance of the dice. The hero behind this is that, if society is not adjusted to the needs of any one individual, then why remain one individual? Through the use of the dice, any personality can be assumed: an artificial schizophrenia. Through the use of the dice, any personality can be assumed: an artificial schizophrenia. Through

Laing Exhibit in Crown Hall

A Menacing display of the Edgar Laing Store is important historically in itself. This diorama of the bronze statues of the first building to be erected of its kind in the United States. Laing's store was the first to be built on the site of the old iron frame structure. The building was in the Baltimore code-structure and made possible the realization of verticality which typifies the commercial architecture of the last quarter of the 19th century in the United States. The display bridges two different technological worlds: that of brick and timber construction and that of the newer iron frame system. While the brick and timber system was of an older tradition, the carpenters, masons, and metal workers invented ingenious methods to solve the newer problems, involving rigidity and strength. Another aspect of the exhibit concerns the efforts of the Landmarks Preservation Commission and the Housing and Development Administration to save the original buildings to utilize their iron frame structure. In 1968, a new building was erected to replace the old iron frame structure. The new building was constructed with iron columns and steel beams, and the old iron frame structure was preserved. The exhibit provides an interesting comparison of the two building types, highlighting the differences in materials and construction methods.
House of Ushers

by Flaggville Underfoot

I began working in theaters in 1967, so I recall it was as a result of some house's social relationship with an administrateur at my high school. Early days of temperance I cannot recall clearly, but there was a certain type of girl who happened during part of my life that had something to do with my memory, rather like the odor of perfume impossible to identify.

Nobody stops to think about the fact that usherettes, like most people, are really usherettes known how to play, create, and direct all the plays that they are wonderfully clever at things that make us interesting as people.

Unfortunately, the only constant is that most theaters have a policy for usherettes or a policy carefully preserved of 'Good Evening, Gimme your non-alcoholic ticket' and the usherettes from theater to theater is the same. It is to use whatever implements are available to break down the vestiges of dignity and run the theater in which they work go here, as they want, and break down the vestiges of dignity and run the theater in which they work.

A program makes a marvellous paper airplane, a paper soda straw cover filled with sand, (from the ash tray) can be dropped from a balcony and used to utterly destroy the thin veneer of civilization that surrounds virtually any society's market. Consider the effects of aiming such a missile toward the target of the decollage of a opera company's manager's eyes on opening night.

The usherette can also find time to enjoy himself inside the theater. The cover of darkness, coupled with the knowledge that there is no usher to throw you into the street, will balance the young gentleman who fills his mouth with water and then snags the water from the theater, pretending it goes into the mouth of a normal person who is not a usherette.

An enterprising young man can by arriving at the theater sufficiently early, explore the various secret doors and passageways that surround virtually any auditorium and find new and unheard of ways to frighten the crowd. Consider the prospect of dripping water blemishes from the vents that are suspended directly above the fourteen dollar seats. Stop to think of what it would be like to drop a fire hose into the lighting booth just above the balcony and turn it on. The pressure of the water's volume is such that it is sucked in the wall behind the ladies' lounge. You and those other enterprising experiences await you in the until a minute's notice of being there. For further information call the 'Famous Fisher's School.'

No, there is only one place on this earth that has no usherette. It is the Ladies' Restroom. The service is fast, polite, and you'll never have any trouble getting the ladies' attention. Elegant.

Now, here comes the best part. A restaurant like that is fine, but the service can be cheap. "Surprise!" You can have your meals available at the Common Ground which won't cost you too much more than a full meal at the high代价帐篷. For an extra dollar or so, Common Ground will order you any menu item. If you're over 21, and feed food such as fish food service never dreamed of.

Out of court, you're in the mood to spend some money; there's a wine and a restaurant left, if you're in the mood for something in between. I recommend for $3.50, or a better bottle of wine which was just a little overusive, but better wine.

Elegant, it's an adjective you hear. It's a word often used and it sounds like," 'like us," college students are often supposed to drink beer. I guess. Why is just for grown-ups.

time of day, you can bring your own table or change your order, and be provided with a pleasant glass of Burgundy or Rhine Wine and relax. The meals that are serv- ed at the Common Ground are still, but put to the

Don't Throw Away Your Chance To Vote

Most politicians would be happier if you didn't vote. Disappoint them! Don't let complex absentee voting procedures keep you from voting. Here's how to do it:

1. If your voting address is not your school address, an absentee ballot form has to be requested from your home County Board of Elections or your County or Town Clerk. In order to vote for President, your application must be received by October 31. The deadline is earlier for local elections in many states.

2. Steps:
   - Tear out the form below and fill it out.
   - Have the form notarized. Ask school officials for help with notarization.
   - Mail the form to your county or town clerk or your County Board of Elections.
   - When you receive the absentee ballot application and/or the ballot itself, fill them out immediately. Have them notarized.
   - Mail them immediately to the office that sent them.

IF YOU ARE REGISTERED TO VOTE AT YOUR SCHOOL ADDRESS, GO TO YOUR ASIGNED POLLING PLACE ON NOVEMBER 7, AND VOTE!

If you need assistance, contact your local McGovern, Nixon or other campaign headquarters, the Student National Education Association, 1201 16th St., N.W., Washington, D.C. 20036, Tel: 202-833-3527.

THE STUDENT NATIONAL EDUCATION ASSOCIATION HAS SUPPLIED THIS INFORMATION BECAUSE THEY WANT YOU TO REMEMBER IF YOU DON'T VOTE — YOU DON'T COUNT!

October, 1972

Dear Sir:

My duties as a student require me to be absent from my residence in ______________ (county, town address) continuously through election day.

Pursuant to the 1970 Voting Rights Amendment (Public Law 91-285) please send an absentee ballot, and/or application therefor, to me at my school address:

(Print Name) (Signature)

(Notary Public and Seal)

TO VOTE BY MAIL IN THE NOVEMBER PRESIDENTIAL ELECTION, YEAR OUT AND MAIL THE ABOVE FORM TO YOUR HOME COUNTY CLERK, BOARD OF ELECTIONS, OR APPROPRIATE ELECTIONS OFFICIAL.

THE FEDERAL DEADLINE IS OCTOBER 31.
Boeing is back.

Adapt from annual reports, this will be the first time Boeing has been on your radar. The company has been through some turbulent times. But now, with the new leadership, the company is poised for a comeback.

The company has made significant investments in new technologies and facilities, and is focused on delivering a robust product lineup. With a strong emphasis on innovation and sustainability, Boeing is well-positioned to lead the aerospace industry into the future.

The company's financial performance has also improved, with a focus on cost efficiency and profitability. With a strong balance sheet and cash flow, Boeing is well-positioned to weather any future challenges.

Overall, Boeing appears to be in a strong position to make a significant impact in the aerospace industry. The company's commitment to innovation and sustainability, combined with its strong financial performance, makes it a compelling investment opportunity.
