In the wake of the resignation of Dr. Fred F. Heron, Dean of the IT departments at the University of Kansas College of Law, Dr. Ralph J. Butts, a former IT director of the university, was appointed to the position. In his new role, Dr. Butts will be responsible for overseeing the IT departments of the college and will work closely with the university's leadership to ensure the smooth functioning of the IT services. His appointment is effective immediately.

Dr. Butts has a wealth of experience in IT management, having served in various positions at the University of Kansas and other institutions. His appointment is expected to bring stability and continuity to the IT departments of the college.

New Analysis

For Comp Center

The biggest news in the last few weeks has been the announcement of the merger of the Telecommunications Center and the Computer Science Department. The merger, which was announced last month, is expected to be completed by the end of the year.

Outlook Bleak

For Comp Center

The merger of the Telecommunications Center and the Computer Science Department is expected to have a significant impact on the Comp Center. The center, which has been struggling to meet the demands of its users, is expected to see a decrease in its budget and staff.

Two of the 1520's tape drives

Aside from the changes in the management of the Comp Center, there have been several other changes in the IT department. One of the most significant changes has been the introduction of a new system for managing user accounts. The system, which is expected to go live in the next few months, will simplify the process of managing user accounts and improve the security of the IT infrastructure.

A new system for managing user accounts is expected to go live in the next few months.
Question: Do you think that service has improved since UNA took over the computer center?

Rich Pope

"No. For one, it is harder to get good technical advice. They could use more keypunchers."

Steve Rogers

"No. My tape was used several times. They should have better tape security. They haven't brought in all the peripherals they promised. The personnel is not the best."

Rita Lawrence

"I was dumped once. I like the remote reader, if it would work. It usually reads the cards wrong. Turnaround is bad. Not enough keypunchers either. The computer is down a lot."

Jim "Alphabet" Birse

"Yes. UNA seems to have fewer machine malfunctions and mainframe problems. But, why aren't there more keypunchers? Why doesn't UNA enforce a rule of keypunching on the keypunchers and debugging at the center?"

Rich Wetland

"No. Turnaround has not improved. Files get lost just as often as before. The remote card reader is down more often if not always. But I must say that the people are fine."

---

Comp Center

(continued from Page 2)

A remote reader (or both thereof) has been used for about a year now and it still doesn't work correctly. Often times it is not even in the system. We had a remote reader (technically RFI) when we had the IBM System 360-65. That thing (even though it was IBM) was extremely reliable. The only time it didn't work was when someone tried to read in a card with the rubber band on it! A decent remote reader would allow the operations staff to concentrate on more important things than formatting and re-reading 20 card decks.

Not all the faults of the computer center are caused by UNA or the IBM. Some of the most poorly solved problems are caused by students, teachers, or just plain usage. I mean, YOU! There is absolutely no reason in the world why people have to throw junk all over the tables and floor. Just a little effort on the part of those students would make the place look a lot better.

UNA: One Semester Later

Although virtually every IT staff member at UNA thought that the IBM computer in Student Building 9 was a complete failure, the fact that it was used by students was simply an unfortunate side effect of the attempt to save money. Here's how it happened:

In the fall of 1979, the university decided to replace its old computer with a more modern machine. The IBM 4321 was chosen because it was cheaper than the other options available. However, when the machine arrived, it was not set up properly and the staff was not trained to use it. As a result, the computer was not able to function properly and students were frustrated.

In addition, the computer was not able to handle the demand for computer time, especially during exam periods. The university had to purchase additional time from another university, which was costly and time-consuming. The university also had to spend money on software to make the computer usable.

Despite these problems, the computer was still used by students. However, the university realized that it was not worth the money and decided to purchase a new computer for the fall of 1980. The new computer was set up properly and was able to handle the demand for computer time.

Waste of Time?

"I'm not sure why we're still using this computer. It's been here for years and it's never worked properly. I think it's time to get rid of it," said one student.

"I agree," said another student. "I've had to spend so much time trying to figure out how to use this computer. It's a complete waste of time."

The university is currently considering whether to replace the computer with a new one.

"We're looking at our options," said the university's IT director. "We're considering a new computer that would be more reliable and efficient."
Now rent levels that respect college incomes and great apartments too:

Lake Village East
38 sides and features to match

Consider Number 1
Price

Studios... as low as $115 per month
One bedrooms... as low as $125 per month
Two bedrooms... as low as $150 per month

At last, rent levels that respect college incomes! All apartments will rent, according to special formulas, for not more than 25 percent of adjusted income of residents. The figure is subject to adjustment for income and family size. Reserve apartments now for spring, summer, fall occupancy. For a no-obligation preview appointment, or more information, call the Draper & Kramer Campus Hot Line, 624-4701, 24 hours a day.

Win $500
Receive 50 Certificate Free

If you rent at Lake Village East, you will receive a $50 merchandise certificate good for free furniture or accessories at the famous Form Co-op furniture store in Harper Court—PLUS a chance to win $500 in free furniture of your choice. The $500 prize will be awarded when the first 50 apartments are rented. Open only to students, staff, and faculty of Chicago area colleges and universities. It's an extra added incentive to check out Lake Village East now.

Plus

Dozens more reasons this unique 36-sided new high-rise offers ideal accommodations for young singles and marrieds—

2. Brand new building: people planned. No sterile box, Ohio. A cozy corner tower with 36 sides to make home base a little more interesting.
3. Quiet and privacy, thanks to short corridors and only eight apartments per floor.
4. Varied, unusual apartment layouts (no two apartments on a floor are alike).
5. Spectacular views of the city (and at those low prices), plus plenty of light from full-length windows.
6. Campus bus service.
7. Express buses downtown at the door.
8. Good auto access to Lake Shore Drive, a minute away.
9. Shopping, with three centers nearby.
10. 250 trees, one for each apartment, in a landscaped plaza.
11. Outdoor beaches for summer studying.
12. Playlots (mostly for the kiddies).
14. Dry cleaning shop (last service).
15. Package receiving service.
16. Studio—large living and dining areas, good for singles.
17. One-Bedroom—especially spacious, with two different views of the city, great for young marrieds.
18. Two-Bedrooms—big living, dining area as large as 24 x 15 feet.
19. Master Bedrooms as large as 15 by 11 feet.
20. L-Shaped deluxe kitchens, with stainless steel double sinks.
21. Top appliances, including gas range and oven and large refrigerator.
22. Air conditioning (optional).
23. Fine wood cabinets, with plenty of counter space.
24. Ceramic tile bath, of deluxe fixtures.
25. Easy to maintain floor tile.
26. Master TV antenna (no charge).
27. Free drapery tracks.
29. Solid core apartment doors with peepholes.
30. Dead bolt security locks.
31. Colorful corridors, fully carpeted.
32. Refuse chute on every floor.
33. Free on-site parking, brightly lighted.
34. Luxury lobby with marble tile floor.
35. Bicycle and car storage room.
36. Security system.
37. East Kenwood location: $25 million in new construction in immediate area, second highest per capita income in the city.
38. Management by Draper & Kramer, specialists in integrated housing. Office on the premises.

The Move Moves On

by James B. Pluiter

As for all you Roy Wood fans who have somehow missed the movie, you won't miss your chance to see it again. The Wizard will play this Friday at the Plaza to make up for the previous week's sellout. The movie was a hit with the audience, as evidenced by the ovations at the end of the film. The Wizard was played by Roy Wood, who delivered a performance that was both humorous and heartwarming. The movie was a success, and the Wizard's character was well received by the audience.
Sythesized Music Matures

The Universal Cylindrical Synthesizer-Transformer

The Universal Cylindrical Synthesizer-Transformer is a unique device designed to produce a wide range of musical sounds. It operates by transforming electrical energy into mechanical vibrations, which are then converted back into sound waves. The device consists of a series of cylindrical tubes that are filled with a special fluid and are connected in a specific sequence. As electrical current passes through the tubes, the fluid is set into vibration, producing a variety of sounds that can be modulated by adjusting the current.

Order Your Integral Now

As you might already know, the imminent goal is to reach the point where the integral of the function f(x) can be calculated directly without approximation. This will necessitate the development of new algorithms and computational techniques. The University of Technology and the National Research Institute of Mathematics are currently working on this project.

Theater

Available in print this week is a review of the new show at the Old Liberty Theater. The production is "Hair," a musical about the 1960s counterculture movement. The cast features a variety of young performers, and the production is directed by a local theater veteran. The show is recommended for adults, as it contains mature themes and language.

Music

Allan's Ready! Here it goes again, blue, rock, jazz, and folk music. The club is open at 8 p.m., and the show starts at 9. Have a good time for just 50 cents. A $1.50 bus ride from Hopkins will bring you to the main event. Your tickets are $5.00, and they will be accepted next to 2 p.m. at 744 Broadway.

Book

The Quiet Rights is a novel about the struggles of a young woman in a patriarchal society. The protagonist, Mary, is forced to choose between her responsibilities to her family and her desire for a fulfilling life. The book is recommended for readers interested in feminist literature and social issues.

Film

Stumpy Hogan: The Man Who Fooled the Chicago Police is a documentary about a man who used his intelligence and cunning to elude the police for years. The film is a tribute to the ingenuity of the protagonist, who managed to outsmart even the most experienced detectives. The documentary is recommended for film enthusiasts and fans of true crime stories.

Misc.

Why Not Hypnotize Yourself? and Be the Person You Want to Be? is a guidebook for those interested in the art of hypnosis. The book covers the history of hypnosis, the basics of hypnosis, and how to hypnotize oneself. It is recommended for readers interested in self-help and personal development.

SPORTS EDITOR

Change is inevitable in the course of life. Fear is not the factor in change, we dearly hate being alone. The change is inevitable. We must relax and accept the new. We must adjust ourselves to the change. We should not fight it but should be ready for it.

It has been said that the best way to adjust to change is to change yourself. This is true. To change yourself is to be ready for change. To be ready for change is to be ready for the new.

As a result, we must accept the change and be ready for it. We must be ready for the new. We must be ready for the future.

Harvey Schultz
