The Association of Tech Students moved Thursday to suspend Placement Vice-President Melvin Tracht for his actions concerning the cancellation of the proposed Triangle Michael Ross Blood Drive. The drive, which was to start on Wednesday February 14, was cancelled when Michael Ross failed to provide sufficient written proof that it would be protected from healthy claims resulting from the drive.

AT&T Vice President Dan Broush originally planned a nation-wide, anti-competitive campaign that would involve multiple states and medical institutions. However, after careful consideration and legal advice, Broush decided to cancel the drive.

Further criticism was levied at the administration's poor planning and decision-making. An anonymous source said that the administration had not adequately prepared for the potential consequences of the drive.

In other business, recommendations, effectiveness, and drawings of the proposed Honolulu Program were discussed. Though the program was well received, it was decided that it would not be implemented due to the lack of support in the campus community.

ATS assemblymen said that a majority of their constituents found the proposed programs to be too radical and too heavy-handed. They believed that the programs would alienate the student body and could not be implemented.

Other suggestions were to institute more seminar-type courses for more students and to create an extra extra-curricular program, such as a "Skills for the 80s" major. Also brought up was how the Honor's Program would affect Architecture and Business majors.

ATS President Chub Hsu announced that a meeting would be held next Tuesday at the University Center at 11:00 to discuss the Honor's Program. Dr. Edna Shtumann continued on Page 2.

The cancellation committed several days of discussion on the extent of insurance coverage that ITT would receive from Michael Ross. On Thursday, Feb. 8, Dean of Student Affairs Robert P. Grossman made it clear that the school was covered under the insurance policy for accidents and injuries sustained in the course of the drive.

On Wednesday, Feb. 14, and stated to both.

During our discussion the subject of the program and how it would be handled and monitored was brought up. The Dean of Student Affairs, Dr. Grossman, said that the insurance policy for accidents and injuries sustained in the course of the drive covered the school.

Dean Grossman referred the matter to VICE-PRESIDENT, who then decided that the letter was not delivered because of the inaccuracy of the information provided by the school.

The blood program had been scheduled for 9:00 to 2:00 on Wednesday and Thursday in the MUB Ballroom. Regular donors were encouraged to bring blood during the four weeks of work on the project.

When Mr. Tracht was questioned on the point of ITT being a valid recipient, he said that he did not know, but that they would like to have it on the record in case of any future problems. Members of Triangle are still not comfortable with the idea, and Rosen is currently doing a legal search to see if it would be valid.

Students took action on their own to ensure that the program and the Inter-Professional Counsel (IPC) passed resolutions which would protect the administration and the affair.
New Honors Program

by I T Cattaneo

As Honors Program will be presented before the curriculum committee on March 5. The proposed program will be open to students who have attended IIT for at least one semester. To qualify the student must have a cumulative GPA of 3.5 and a GPA of 3.75 in the preceding semester. To stay in the program a GPA of 3.5 must be maintained by the student.

To receive admission to the program a student must fill out a registration form and submit a letter of recommendation from a faculty member. The application will then be reviewed by an Honors Committee.

The committee will on a roll of five members; one chairman, two faculty members, two other faculty members and one student. The chairman is the chairman of the program. The committee will receive applications for admission to the program. Applications will be reviewed by the chairman.

The committee will also review applications for admission to the program. Applicants will be reviewed by the chairman.

The committee will then recommend to the program committee which students should be admitted to the program.

The program must have a cumulative GPA of 3.5 and a GPA of 3.75 in the preceding semester. To stay in the program a GPA of 3.5 must be maintained by the student.

The credit hours of the program will be the same as those of the regular undergraduate program. Students who have completed the program will have the same honors program.
Rush Week Activities Start Monday

The Illinois Institute of Technology is planning to conduct a special week starting Monday, February 19, and continuing through Friday. The week's activities are designed to acquaint interested freshmen with the various engineering, physical sciences, and ROTC programs available to them at IIT. Academic Rush Week is not restricted to freshmen, upperclassmen are also invited. A schedule of the week's events follows:

Chemical Engineering Tours of the Chemical and Analytical Laboratories will be conducted Monday from 1:30 to 4:00 p.m. A movie on Chemical Engineering will be shown in room 101 Franklin Hall at the same time. The activities will be repeated on Tuesday and Thursday from 1:30 to 4:00 p.m.

Chemistry Students are invited to visit open laboratories throughout the week in the Chemistry Building. Chemistry faculty will be on hand to answer questions. Open houses will be held on Monday from 1:30 to 4:00 p.m., Tuesday from 1:30 to 5:00 p.m., and Thursday from 1:30 to 4:00 p.m.

Civil Engineering The Civil Engineering department is planning to hold open houses on Monday from 1:30 to 4:00 p.m. and Thursday from 1:30 to 4:00 p.m. in room 101 Franklin Hall. Students are invited to visit the department and meet faculty members.

Computer Science The Computer Science Department is planning to hold open houses on Monday from 1:30 to 4:00 p.m. and Thursday from 1:30 to 4:00 p.m. in room 101 Franklin Hall. Students are invited to visit the department and meet faculty members.

Mechanics and Materials Engineering There will be a special tour of the Mechanics and Materials Engineering Department on Thursday from 1:30 to 4:00 p.m. in room 101 Franklin Hall. Students are invited to visit the department and meet faculty members.

The above schedule is tentative and subject to change. Students are encouraged to attend the open houses to learn more about the various programs available at IIT.

February 16, 1973
In an editorial published by this newspaper in January 20, Technology News advocated adopting a plan which would permit students to live four nights per week in the dorms, and then commute on weekends.

The editorial quoted ATS President Chuck Hoss as claiming that itT stood to make an extra $200,000 per semester by adopting such a plan. In fact, Mr. Hoss stated in an article which appeared in the January 19 Technology News, "If 25% of the student body of 2000 would choose this option, itT would gain an increased income of over $200,000 per year.

First, we would like to apologize to Mr. Hoss for misquoting him. This is the only letter we have received expressing a desire to live four nights per week in the dorms. The idea of the dorms being used as a source of revenue for support of Kesmer in extending services and student borrowing privileges is not in keeping with NCA standards.

The idea of the dorms being used as a source of revenue is not in keeping with NCA standards. It is the responsibility of the institution to provide institutional library services without the payment of a step fee. This specifically impacts the thinking that the college should be a source of revenue for the library. The North Central Association of Colleges is concerned with the adequacy of the institutional library's facilities, and the adequacy of the institutional library's facilities. The library is not a source of revenue, but a service to the institution.

Second, ATS has adopted its policy of using the dorms to support the library. This policy should not be confused with the policy of using the dorms to support the library. The dorms are used to support the library, and the library is used to support the dorms.

Dear Sir,

The only letter we have received expressing a desire to live four nights per week in the dorms. The idea of the dorms being used as a source of revenue for support of Kesmer in extending services and student borrowing privileges is not in keeping with NCA standards.

Pete "n" Tillie

by Richard Anderson

The only problem with Pete a Tillie is that movie star Walter Matthau and Carol Burnett in it just can't decide what it wants to be.

It starts off as a unique comedy, where thirty-five-year-old guy movie star Walter Matthau, as Pete, has a reputation for saying risqué things to women and Tillie, played by Carol Burnett, is somewhat of a prude, which leads to some great, funny situations. Against Tillie's better judgment, they get to know each other better, and after some hilarious love scenes, they decide to get married. Then the whole direction of the movie changes. Suddenly, Pete and Tillie become a typical suburban couple, complete with kid, Marcus, Walter's ten-year-old, and a new house.

The remainder of the movie deals with the tragedy and it's aftermath. The funny lines and situations that made the original Matthau-Burnett film a hit, however, seem to be rather a laugh. In fact, the title role of Tillie was played in a rather serious, almost tragic way, and operators until we realized it was meant to be funny. The end is in keeping with the unadulterated nature of the second half of the film. It is too bad, too, because there is potentially some fine acting talent in the cast of performers, yet, it won't be disappointed.

This film had so much potential, but the overuse of the Matthau-Burnett partnership was too much. The director felt compelled to rework it in a more conventional format in the second half. Most of the jokes are lost in the transition. The performance of Matthau, however, is the one thing that will be remembered long after the movie has been forgotten.

Cave Diving Seminar

The Sixth Annual National Cave Diving Seminar will be held at Lindenwood College, St. Charles, Missouri on June 16-17, 1973. The annual seminar is sponsored by the National Association for Cave Diving, 2900 N. 29th Avenue, Florissant, Missouri, 63040.

The Purpose of the Seminar is to encourage the development of safe, scientific techniques and equipment as well as to expand research interest in springs. Participants in the Seminar are to be undergraduate and graduate students interested in caving, diving, the Natural Sciences, or the Hyperbaric Sciences.

The Seminar Program and registration forms will be sent to any student mailing a self-addressed, stamped envelope to: NACD, 2900 N. 29th Avenue, Florissant, Missouri, 63040.

Boredom

America may be becoming "the land of the free and the home of the bored," according to the testimony of the doctors who treat patients for simple complaints. The nation's SCIENCE DIGEST reports that running and other vigorous exercise are two things doctors suggest as antidotes. Another is therapy where you go to bed and not get up until the patient can think of something they really want to do. But behaviorists suggest interesting, more than just keeping people busy. Research in aging shows that anger, hostility, and even despair are strongly linked with the physical and psychological well-being of people over 50.

The Organisations

by Chuck Ihas

Student government at IT is in flux. Deadlocked in the past few years, it has undergone a drastic reorganization. The major organiza-
tions, the Associated Students of IT (ASI), the University Student-Run Corporation (URC), the Associated Student Body (ASB), and the Associated Students General Assembly (ASGA), have been active, though unstable, for this past year.

The power conflicts that characterize student government organiza-
tions last year has been stabilized, and the diet has cleared, leaving a picture of what roles each group must fulfill.

ASB has been given more autonomy in its day-to-day operations. Only appointments and formal budget approval remain an issue of contention within the ASB. Nevertheless, the leadership of ASB has been able to successfully utilize its resources. Only more student involvement has been lacking.

Communications Board is completely autonomous from any other area of student government. It reports directly to the Director of Student Affairs. Here, there is a conflict of interest between the Board of Directors and the various organizations. The Communications Board feels that it has a conflict of interest, as it is subject to the advertising policies of the publications department of ASB. ASB has not made a formal decision on the issue, as it has been deferred by the Board of Directors.

The overall problem of the student organization is one of cooperation. It is frustrating to have the conflict over any activity with criteria from other organizations who do not even put in the effort to be heard, much less to respond to a student activity. This is a common complaint shared by those in ASB, URC, ASGA, and the Associated Student Body.

Thank goodness some things never change.

Good things, like the experience of returning your love with a diamond.

And good things, like the 62 year old Hollands Jewelry policy of returning your money if you're not satisfied.

Lots of things have changed. For the better. Like the newest cuts in diamonds, especially our exciting new heart shapes. And the large selection of beautiful new settings that you find at Hollands Jewelers today.

by James R. Molner

DON McLEAN - Don McLean is a singer-songwriter and composer. He is best known for his hit song "American Pie," which topped the charts in 1971. "American Pie" is a classic rock song that has been covered by numerous artists.

The song tells the story of a young man named Don McLean, who is on a cross-country bus trip with his band. During the trip, they stop in New York City, where they encounter a group of young revolutionaries. The group becomes involved in a series of events, including a protest against the Vietnam War.

McLean's song has become a symbol of the anti-war movement and has been covered by numerous artists, including Bob Dylan and nirvana. "American Pie" is considered one of the greatest rock songs of all time and has become a classic of the rock music genre.

by Tom Barry

A Last Call for Tom Barry's Last Call is a quarterly newsletter that was published for the last time in 1999. The newsletter was founded by Tom Barry and was dedicated to the preservation of local history and culture.

The newsletter covered a wide range of topics, including local history, events, and personalities. It also featured articles on local politics, business, and the arts.

The Last Call for Tom Barry's Last Call was dedicated to the memory of Tom Barry, who passed away in 1999. The newsletter was published in his memory and as a tribute to his contributions to the community.

Aerosmith: Rock & Roll All Night (A&M) AQCQZ-AKit. Aerosmith is an American rock band that formed in Boston in 1970. The band's name was chosen by bassist Tom Hamilton during a jam session.

The band consists of singer Steven Tyler, guitarists Joe Perry and Brad Whitford, bassist Tom Hamilton, and drummer Joey Kramer.

Aerosmith's music is characterized by its hard rock sound, with a mix of blues and pop influences. The band's songs often feature Tyler's powerful vocals, which are accompanied by Perry's guitar solos.

Aerosmith has released over 15 studio albums, including their debut album, 'Spanish flights,' which was released in 1973. Their most successful album to date is 'Rocks,' which was released in 1976 and featured the hit single "Dream On." The band has sold over 150 million records worldwide, making them one of the best-selling artists of all time.

The band was inducted into the Rock and Roll Hall of Fame in 2001.

You can listen to Aerosmith's music on various streaming platforms or buy their albums on CDs and vinyl. You can also attend their concerts or see them live on a tour. The band's music is also frequently used in movies, television shows, and commercials.

McQueen, McGraw & The Good Bad-Guys

by Anthony Justin

When you hear the title of Sam Peckinpah's new film, The Great Train Robbery, you can easily predict what's going to be in store. You might even think it's a wrong choice for some time, but you'd be wrong. You'd be wrong, of course, because most people would agree that the film is a classic. The Great Train Robbery is a classic, and it's going to be one of the most significant films of the year.

The film is about the train robbery, and it's a story of courage and determination. The plot is simple, but it's well executed. The characters are well developed, and the acting is top-notch. The film is a testament to the power of cinema, and it's a reminder of the importance of storytelling.

Peter Fonda, Burt Reynolds, and Bo Hopkins give outstanding performances, and the film is a masterpiece. It's a must-see for anyone who loves cinema, and it's a film that will be remembered for years to come.

Comments? Suggestions? Tom Barr, Senior Editor. Call him anytime. He's always there to help you with your film-related issues.

ENGINERS--Chemical...Metallurgical...Mechanical...Industrial...

START RIGHT WITH N L INDUSTRIES.

If your interest is in research and development, technical sales, production, accounting or data processing, you should consider N L Industries, Inc.'s Business. N L Industries is procuring essential industries with essential products - ranging from industrial chemicals and metals to nuclear products and services, plastics, paints, and polyelectrolytes. We have 27,000 employees operating over 200 plants, offices, mines and laboratories throughout the U.S. and the world.

CAMPUS INTERVIEW DATE: FEBRUARY 27, 1973
by K. Broun

Bowling: Finishקובש! Can you? How do these seemingly unrelated sports fit together at IIT? Well, on February 9, 10, 16, and 17, four IIT students representing seven different sporting events are at Oakland, Wisconsin, for the A.C.I. (U.S. Gymnastics) held at Wisconsin State University. There were 102 students present with no less than 200 students participating.

This all began a few weeks ago. The Blue Devils and Union Board have a member of the Association of Collegiate Unions. The winners here at Tech then competed in the Region 20 competition at Oakland. The winners from each school and team would then compete in the national competition in various places throughout the United States. At one instance, the women bowling team finals will be held in Los Angeles, Nevada, and $10,000 away will be the bridge team finals.

Our men's bowling team consisted of Gary Bluestein, Thor Gunston, Laverne Zurch, Mike Karras, and Don McGrew. Last week, Tech took a total of 8 games on six different lanes. The total score of the team determined the winner. The team average for the 9 games was about 170 per person.

The tip of Dean Gebrat's big toe? Charlie Band's organic pacemaker? Your guess is as good as mine. Starting this week, the Macromolecular Engineering Department will be sponsored by the Society for Continental Materials Engineering. Every Friday, the Club will supply a photo of some familiar everyday object taken by S.A.E. Microscopes owned by the department.

The club in offering a five-dollar prize to the person who first identifies the object pictured. The club is also offering five dollars each week to the person who submits the most correct answer. The correct answer will be published in the following week in Technology News.

Members of this group are not eligible. All entries should be submitted to Dr. Albritton in room 260 Peristyle Hall.

In recent addition, the station's clipping department has given the transmitter something of a shakeup, making the station easier to listen to even before going through the days and through most of the week. WITI has also been touting its new service, (Earth News), and a live talk show (WITI Forum) in its weekly schedule.

Sunday
2-4 pm, Jazz Hour. Famous local jazz bands.
4-6 pm, Music for Youth: Classical and pops.
6-8 pm, Dave Brown and friends.

4-6 pm, Jon Costello.
6-8 pm, Open.
8-10 pm, Jon MacGillivray.
Muddy Waters at IIT

by C. Holt

Though Muddy Waters and his famous electric guitar have been a favorite at Chicago's blues clubs, Muddy has been no stranger to the halls of the Illinois Institute of Technology. The musician, who was once a student at the institute, frequently returns to perform for the students. His powerful and energetic style has made him a favorite among IIT's blues enthusiasts. In fact, Muddy's music has been a source of inspiration for many of the students, including some who have gone on to become successful musicians themselves.

Offensive Kissing?

by Charlie Reid

On page 12 of the September issue of the Student Voice, Emma Bassett's article, "Offensive Kissing," generated much controversy among students. Bassett's article highlighted the issue of offensive kissing on campus, which she argues is a form of harassment. The article sparked a heated debate among students, with some supporting the author's stance and others arguing that the issue is overblown.

Scheming at the Ocean

by John Steinbeck

In his novel, "The Grapes of Wrath," John Steinbeck's characters, the Joad family, are forced to live on the ocean's edge during the Great Depression. The family's struggle to survive in the face of economic hardship is a central theme of the novel. Steinbeck's writing style is known for its vivid descriptions and complex characters, which make his work both captivating and thought-provoking.

Segovia

by Joe Fallon

Last summer's appearance of Spanish guitarist Francisco "Segovia" at the IIT campus was a highlight of the summer's cultural events. Segovia's prowess and technical skill left the audience in awe. His performance was a testament to the enduring popularity of classical guitar music and the legacy of his late teacher, Andrés Segovia.

REEL NOTES

CREATE your own adventure at the REEL NOTES不佳. By selecting an appropriate option, you can customize your viewing experience. The options include genre, actor, or director preference, as well as a rating system to help you choose the right film for your taste.

Train of Thought

Train of Thought

For train enthusiasts and history buffs alike, the documentary "Train of Thought" offers a fascinating look at the history of rail transportation. The film follows the development of the railroad system in the United States, from its early origins to its role in shaping modern society. The commentary is engaging and informative, making it a must-see for anyone interested in the subject.

IT Resurgence

PHOTOS: RHYAN RUSSELL

Slingshots aren’t standard equipment at a basketball game, but the ancient weapon might have been the best thing to happen to the IT Resurgence. The Resurgence had been struggling through a losing streak when Slingshooter, a local medical student, showed up at the game with a bag of slingshots. “The Resurgence needed a spark,” said Slingshooter, “and I knew my slingshots could provide just that.”

The Resurgence had been down by 16 points at halftime, but Slingshooter’s 15 shots in the second half helped the team comeback to win the game. Slingshooter’s accuracy and powerful shots proved too much for the opposing team, leading to the Resurgence’s much-needed victory.

“Slingshooter’s addition to our roster has been a game-changer,” said Resurgence head coach Jack Martin. “His creativity and ability to find his own shot opportunities were exactly what we needed to break our losing streak.”

The Resurgence now sits at 3-1 on the season, with five games remaining in the fall season. Slingshooter’s impact has not gone unnoticed, as his slingshots have become a staple of the team’s offense.

“Slingshooter has brought a new level of excitement to our games,” said Martin. “His shots not only provide us with points, but they also keep our opponents on their toes, knowing that anything can happen.”

As the Resurgence continues their season, they hope to build on their momentum and challenge themselves to become a force to be reckoned with in the league. And with Slingshooter leading the way, there’s no telling what kind of impact his slingshots will have on their upcoming games.

The Resurgence’s next game is against the reigning champions, the Slingshot Showdown, in what promises to be another intense match. But with Slingshooter on their side, the Resurgence is ready to take on the challenge and emerge victorious.

“Slingshooter has shown us that anything is possible,” said Martin. “We are confident in our ability to overcome any obstacle and excel on the court. We can’t wait to see what our next game brings.”

**SPORTS BRIEFS**

**SOUCHEK NAMED GOLF COACH**

Ed Glancy, IT Director of Athletics, has announced the appointment of Joe Soucek as the new golf coach at IT. Soucek, a former IT student, was most recently the golf coach at the local community college. He replaces Jim Wills, who retired after a 30-year coaching career.

Soucek comes to IT with a wealth of experience, having spent his entire coaching career at the collegiate level. He brings a strong track record of success, having led his previous teams to multiple conference titles and national appearances.

Soucek is excited about the opportunity to coach at IT and work with the talented golfers on campus. "I am thrilled to be a part of the IT golf program," said Soucek. "I look forward to working with the players and helping them reach their full potential."
