The energy crisis, and the cutoffs and shortages it causes, are occupying the number one problem facing the nation. In response to drastic energy shortages, President Nixon has taken several measures, including a 50 percent conservation of power practice wherever and whenever possible. In order to find out how IIT will be affected by the energy shortage, and if any measures are being planned to help conserve energy, Technology News interviewed Mr. Harry Warm, Superintendent of Buildings and Grounds.

There are five major points of interest in this interview. First, IIT is a major supplier of fuel to the nation. Second, the impact of fuel shortages on the University is not insignificant. Third, the University has been taking steps to conserve energy. Fourth, the University is considering the possibility of using solar energy as a source of power. Fifth, the University is exploring the use of alternative energy sources such as wind and geothermal.

According to Warm, as of now, IIT's fuel supply has not decreased. IIT currently has a supply of fuel that will last for at least six months. However, the fuel situation remains uncertain, and IIT is exploring alternative sources of energy. The University is also considering the possibility of using solar energy as a source of power. In addition, the University is exploring the use of alternative energy sources such as wind and geothermal.

IGT Holds Gas Conference in HUB

The role of gas in a National Energy Policy was the theme of a discussion held Thursday, November 15, at the Institute of Gas Technology's 15th Annual Meeting. The televised talk was held in the HUB and featured experts representing the government, the industry, and the gas industry.

The keynote speaker was William A. Johnson, Energy Advisor to the Deputy Secretary, U.S. Department of the Treasury. Johnson expressed his feelings that our country should plan for a prolonged energy shortage. The U.S. government has estimated that the country will need 25 percent more natural gas this winter. The shortage will only become more serious now that the Arab oil states have closed their remaining oil ports to Western oil. Our country depends on foreign oil, and we cannot afford to be without it.

However, we cannot extend these measures forever, Johnson said. For much of the time, we have had to cut back on the energy industry's growth. Economic growth is crucial to our economic health.

The future of the energy industry is uncertain. We must look to alternative sources of energy to meet our needs. We must also be prepared for the possibility of a prolonged energy shortage.
Battle of the Bridges

by Alan Brown

Friday, November 15, will go down in history as the First Intercolligate Intramural Battle of the Bridges (Center). The contest was open to all freshman physics students of the thirty-three registered clubs. Eighty bridges were built. The design was typical of the expected number according to the physics department.

The contest was well attended, especially by the fraternity men who were checking out their bridge designs. The purpose of the contest was to see who could do the most efficient job in transforming thirty feet of balsa wood and a tube of glue into a structure capable of supporting a large weight. The bridge had to be at least five inches high, but no more than ten. It had to span ten inches and be no longer than sixteen. Weights were suspended from an aluminum plate on the bridge by a bolt. Two bridges were tested at one time. Each extra weight added was rewarded with cheers and jeers from the classifiers. At times the suspense was built to a breath holding level when one of the bridges would crack and go. In fact, whenever a bridge finally collapsed under the weight, the audience would almost wake up.

Weinstein, a physicist, and another professor taught "Physics and Society" in a similar type atmosphere. It was worth one credit hour and was formed successfully. Weinstein said it was "the only course where students deliberately stay after class and finish the discussion." In other words, the mini-courses are not new, but some have hundreds of mini-courses. If these four physics mini-courses were successful, the same could happen in other departments.

Dr. Weinstein says, "We owe it to our students to show what is really happening. In fact, the mini-courses will achieve that.

Physics to Offer Mini-Courses

Next semester, the Physics Department will offer four mini-courses: A. Dr. Hofer, A. Dr. Zwick, and A. Dr. Bums, will teach "Physics and Society." The courses are "Physics and Society," "Physics and Environment," "Physics and Ethics," and "Physics and History." The four courses will offer "Physics and Society," "Physics and Environment," "Physics and Ethics," and "Physics and History." Wiezick, who was once a physics major, has been teaching "Physics and Society." He has taught the course for three years and says it is "the only course where students deliberately stay after class and finish the discussion." In other words, the mini-courses are not new, but some have hundreds of mini-courses. If these four physics mini-courses were successful, the same could happen in other departments.

Dr. Weinstein says, "We owe it to our students to show what is really happening. In fact, the mini-courses will achieve that.

JOHNNY GOT HIS GUN

Attention

All Technology News staffs are hereby informed of the first and last complete picture of the semester. The event will be held Wednesday, December 5th at 5pm in the Technology News office. If you expect to be paid for your work this semester, pay sheets must be filled out at the meeting after the staff picture.

Editor's Note: The job of the proofreader is only that of grammatical, punctuation, and spelling corrections. The editors have final approval of all copy.

Black Student Organization at IIT

Every organization is a joint enterprise. The work of each must be tied in with the effort of all so as to produce harmony and eliminate petty quarrels and general exasperation. With this in mind, the Black Students of IIT were reorganized on November 15, 1973, under the dedicated spirit of pursuing many changes necessary regarding the existing situation.

The meeting of the B.S.O. was attended by 40 students, and each was fit for a copy of the revised constitution. The articles were read and discussed, and it was asked that each student receive the copies to make further amendments and suggestions.

Angeleen Blanchard, acting president of the organization, stated that a concerned effort should be made by all black students to engage in obtaining their academic goals, in order to make education at IIT a more rewarding experience. She stressed community involvement, emphasizing tutoring for younger children in need of help in areas such as reading and math.

Another goal of interest suggested by Mr. Nate Thomas, sponsor of the organization, was the recruiting of more Blacks from various high schools in the Chicago area. He encouraged students who graduated from high school to recruit their former school friends for prospective Black students and inform them of the changes that are being implemented by the Black student organization.

The idea of reorganizing the Black student coalition was that of Dwayne Allen and Angeleen Blanchard, who noticed the general lack of interest of Black students in campus involvement. There were many opinions given by students concerning needed change, and it was decided that as an organization be formed. This led to a series of meetings in which the new constitution of the B.S.O. was used as a format to draft the new edition. Posters and flyers were used, advising all students of the meeting that was held, resulting in a 50 percent response of daytime students.

The first meeting of all future B.S.O. meetings, the next of which is to be held on November 28, will be held at 12:30 in the Big Room in the union.

Nate Thomas and Angela Blanchard discuss new B.S.O. constitution.

by Pam Hamel

WITF, the IIT radio station, has been given permission to broadcast in the HUB cafeteria area. Cafeteria patrons should be able to hear WITF by Friday, according to Bob Staricka, assistant business manager.

WITF was given the authority to broadcast into the cafeteria through a letter from Robert Jarrell, IIT's business manager. The letter was the answer to a WITF proposal asking for permission to broadcast in the HUB.

The proposal went to Jarrell on October 22, and the authorities were given on October 26.

The radio station can broadcast in the HUB cafeteria area, but they must not broadcast any AM or FM signals that interfere with the radio station's equipment. The radio station can broadcast in the HUB cafeteria area but must not broadcast any AM or FM signals that interfere with the radio station's equipment.

Gas Conference at IIT

Continued from page 1

much concerned about the energy shortage.

John Rico, Manager, Energy Resources, General Motors Corporation, said that today, natural gas is very important to the industry. Industry consumes more gas than any other industry in terms of energy consumption. Rico said that years ago industry used mostly coal. Because of cleanliness and environmental pressures, the industry has gradually switched over to gas.

Now because industry is so low in the list of priorities for getting natural gas rates, industry is being forced to move away from natural gas. Rico says that people are looking for gas from industry, and putting it in residential and commercial uses.

Rico further points out that the industry is not parallel with state policies, regarding who gets gas and how much. He claims that industry cannot plan for future use of fuel until it knows who is going to get the fuel. It seems to have taken an Arab oil boycott to get us moving on energy policy.

Harvey A. Preston, Chairman of the board, South Central Gas Company, recognized the need to develop a "short-term" energy policy to deal with shortages such as the one we are now facing. Preston expressed his feeling that the Arab oil boycott is a good thing in that it focuses us on the future of the world, when we can no longer import energy. He also expressed that our country can no longer count on the energy situation from the standpoint of the consumer. He said that the entire energy situation must be reviewed.

According to Mr. Johnson, we have a scarcity that does not encourage conservation at the household level, and therefore conservation will have to take place at the industrial level. John Rico brought out the fact that even though their rate of energy consumption continues to increase, we have not been building new refineries. If our country is driven into a recession because of lack of enough energy, it will probably be too late to gather the tremendous capital investment needed to build more energy sources. He said that the energy shortage will not be over after the Arab oil boycott ends either.

LETTER POLICY

There seems to be some confusion about our letter to the editor policy, and how letters are picked for publication. We do not aim to list all of the reasons that a letter may be rejected, but here are a few:

1. The letter must be original and not previously published in any other medium.
2. The letter must be relevant to the topic at hand and provide new information or insights.
3. The letter must be free from plagiarism or other forms of academic dishonesty.
4. The letter must be respectful and professional in tone.

If you have any questions about our letter policy, please feel free to contact us directly.
Silent Majority—
Stand Up and Be Counted

In Perspective

You heard about it didn’t you? Two weeks ago it was reported in Technology News that the Association and Student Senate were calling for a strike. You probably didn’t know what happened was that these members of the executive board decided that the CSA was not functioning effectively in representing the student body at ATS. Along with other reasons, final exams, CSA president informed that for this reason there was no longer a CSA. But the latest breaking news is that the organization is not dead at all. Active members of CSA met yesterday in efforts to revitalize it. The group has proposed new amendments to the constitution which were blamed for many of the problems experienced by the organization during past two years. I examined the constitution with its proposed changes, the thrust of it can be equated to a major victory for the CSA. As students, we are a strong voice in what happens at Tech, the alleged death of the CSA indicated another lost chance at some creative representation for a major portion of the student body. With reorganization of the structure and participation of more students, the CSA could work to the benefit of all, especially with potential representation on the Communications Board, ATS, and the Student Senate. I am sure, in addition, there is interest among anyone else interested who should know that the CSA is currently in contact with interested students to meet in the near future.

Energy
Policy for IT

From page 1

I cooperated in the block for any lights left on in cooperation from both students and in turn the additional lights or heating rooms to help them. The major effort however, will be to cut all thermostats from 60 to 60 degrees. From every 1 degree reduction in temperature, Wusti said, campus wide fuel consumption could be cut by 1 percent. A campus wide temperature change is 5 degrees may save from 10 to 12 percent of the current fuel consumption, Wusti said. We’re sending people around to see the thermostats in all academic buildings in 5 degree intervals. According to Wusti, we’re feeling the pressure of the students and helping them to conserve energy. The temperature of the thermostat will be on the wall, and the 60 degree mark will be the standard. The students are being asked to help conserve energy, the temperature of the thermostat will be set to 60 degrees, and the students are being asked to help conserve energy.

Correction

We would like to correct a protruding error in the article above. In the previous article, it was stated that one of the housing lights in the library was to be turned off. This should have read it was to be held in the library, but one of the ceiling lights in the library was turned off. All students are asked to use the tables in the library, and the lighting is to be set to 60 degrees.
This page contains the results of the fall course's evaluation. The survey covers 72 courses, most of which will be offered in the upcoming spring. The DIM IN is responsible for organizing the distribution and tabulation of the results. Numbers ranging from 2 to 61 for the students, Ratings are on a scale of 1 to 5 with 5 being the highest possible.

(10) a. Are you required to take part in this course? Yes or No.

(11) b. Are the objectives of this course clear? Yes or No.

(12) c. Is the amount of work required appropriate for the credit received? YES, NO.

(13) d. Does the course go on too fast or too slowly? YES, NO, IDEAL.

(14) e. Are you satisfied with the instructors? YES, NO.

(15) f. What percentage do you feel is covered in this course?

(16) g. How well does the instructor answer questions? VERY WELL, POORLY.

(17) h. In comparison with other courses you hav have had, how would you rate this course? POOR, 1 3 4 5 EXCELLENT.

(18) i. In comparison with other instructors you hav have had, would you rate this instructor? POOR, 1 3 4 5 EXCELLENT.

(19) j. To what extent do you feel this questionnaire effectively conveys your opinion of this course to the instructor? NO, 1 3 4 5 EXCELLENT.

(20) k. The (I do not wish to participate in the fall 1973 course evaluation program.

Comments:

Dear faculty member,

In an effort to enlighten the students and the teachers of the University of Technology, ATS is conducting a survey to determine the effectiveness of the course and to gather information on the teaching methods used. This is the first year of conducting such surveys and we are extremely grateful for your participation.

We hope that you find this survey to be informative and helpful. We would be very grateful if you could take the time to complete it and return it to us.

Sincerely,

ATS Vice President

Editor's note: During the week of December 5-12, ATS is distributing course evaluation blanks to every teaching faculty member at IIT, excluding those of the Illinois Institute of Technology. See the adjacent column, being sent to all of the faculty members involved, these course evaluations are made by the students. Jeff Eskin is organizing the evaluations' processing, and his participation in interested students in preparing the envelopes containing the evaluation blanks. The work session will be held Sunday, December 1, in the ATS office.
Wining and Dining at The Winery

by Terry K. Schuster

Just a month's throw from the JIT campus is a rather cozy little Italian restaurant called "The Winery." After passing by the place many times on my way to campus, I finally decided to give it a try. Here's what I found.

Located at 236 West 2nd Street, just west of the Fazio Club, the Winery offers an inviting atmosphere, with dim lighting and soft background music. The menu includes a variety of Italian dishes, such as pasta, pizza, and homemade soups.

The service is friendly and attentive, with waitstaff who are knowledgeable about the menu and wine selections. The prices are reasonable, making it an affordable option for a meal out.

The wine list is extensive, with a variety of red and white wines available by the glass or bottle. The waitstaff is happy to recommend wines to complement your meal.

The atmosphere is cozy and intimate, making it a great place for a romantic dinner or a small gathering with friends. Overall, I highly recommend The Winery for anyone looking for a delicious Italian meal in a warm and inviting setting.
Letters

Sidewalk
Dear Editor,

Regarding B&B's new sidewalk to the southwest of the Student Union, I believe it is only partially beneficial both to the students and the school. The work should have been continued northward to the north entrance of the Student Union since the south entrance is closer to the point of entry. I am sure that a great deal of students and faculty will have to use the south entrance, especially in bad weather, which would cause damage to the area.

Sincerely,
Carl F. Baldassarra
P.S.E. '88

Kmak
Dear Editor,

Thanks for printing Bob Kmak's interesting report of the discussion "Toward an An- drogenic Future" on Sunday, November 11. I hope that the discussion will not end there, and I'd like to mention some comments on the report.

1. Kmak gave no definition of "androgyny" as a brief ex-

ploration for those who may be uneasy about the word itself. In order, I used the definition from G. Mead's "Gender and a Renewal of Mind," which states that, "there is no single form of androgyny in human nature, but many different."

2. Kmak's direct quote on my so-called "rationalization" was reproduced as he remembers it and not as I believe it to be. I am, however, one of the difficulties under which the characteristics of the sex are and the human impulses expressed by men and women are not rigidly assigned.

On the other hand, I think the discussion may be very well described by Kmak's quote: "towards the point of entry, that is not my intent, but students are encouraged to use the north entrance, which ends at the north wall of the Student Union."

Energy Lecture

The School of Architecture and Planning invites you to the third lecture of its Saturday Lecture Series (475-941). On December 1, George Appelgren, Systems Planning Engineer, Commonwealth Edison Co., will talk on "The Energy Crisis: A Point of View from a Utility Company." The lecture will be given at 11 a.m. in the Smith-Olsen Auditorium, Perlstein Hall, 12 West 3rd Street.

Chess Tourney

The IIT Chess Club wishes to remind all players of the upcoming tournament this weekend. Rounds will be at 9, 11 and 1.30 on Saturday and at 2, 4 and 6 on Sunday. Registration must be made at 7:30 on Saturday. The prizes (and includes trophies for 1st, 2nd and 3rd and a most special award) for the first, best Faculty Player and best Woman Player, best Unrated Player, and best New Player. Open prizes will also be given for 3rd and 5th places. Another important aspect of the tournament will be the selection of the IIT ACU team representatives. The top ten finishers will receive points toward the team. All chess players are encouraged to come and play. No one is eliminated from play in this tournament. Each play will be five rounds, win or lose.

Zionist Lecture

"Is the Zionist Millennium an Impossible Dream?" is the topic for the study, discussion, and debate at the College of Commerce, 108 W. Grand Ave., Saturday, December 8th, at 9 p.m. Bonnie Farber, who has attended Roosevelt U., who is not anti-Jewish and is pro-Israeli but who is anti-Zionist, will take part in the panel and debate over the issue. He was formerly one of the editors of the Torch and of the Seed. Members welcome. Tickets $1.00, plus $0.00 minimum for students, Old Friends, and orange juice tea.

Year in Germany

The German American Exchange Service has once more offered a fellowship for a year's study in Germany to IIT. The fellowship, which permits study at any West German university or other institution of higher learning, is open to all seniors and to graduate students of IIT.

Davis Gets Award

The IIT Chapter of Sigma Xi has presented their annual Research Awards. Jeffrey A. Davis, assistant professor in the Physics Dept., received the award on November 5. His work on "The Effect of High Magnetic Fields on the Optical Properties of Semiconductors and Semimetals" won him the $600 award.

Kemper Hours

Kemper Library's hours of service will be extended to the following weekends:

- Saturday, December 10: 10 a.m. - 10 p.m.
- Sunday, December 11: 5 p.m. - 10 p.m.
- Saturday, December 17: 10 a.m. - 10 p.m.
- Sunday, December 18: 5 p.m. - 10 p.m.

Stuart Library hours remain unchanged.

Decorate Tree

On Wednesday, December 5, at 7:30 p.m., there will be a Christmas Tree Decorating Party in the Commons. There will be free refreshments and music. Bring your own ornament if you wish.

Indian Bazaar

Indian Bazaar at the University Student Center, 5621 South Blackstone, 9-615. Items include Indian snacks, handicrafts, clothes for men and women, jewelry, etc. The bazaar will be Saturday, December 1, from 10:30 to 4 p.m.

Blood

The Psychology lecture series, sponsored by the Department of Psychology and Education, will present a lecture entitled "Workers' Wages: What Do They Get Out of It?" by Dr. Milton H. Bland. Dr. Bland is from the Department of Psychology at the University of California, Berkeley. The lecture will be at 2 p.m., Wednesday, December 5, 1973, in Perlstein Hall Auditorium.

over the air—the person in question has 15 minutes to come to the WACE studio and produce someone else’s name, at which point the new victim is subject to the same process. If the person on the good faith list fails to redeem himself within 15 minutes, well, then the sordid bastard is virtually tried, over the air, until he does come to the studio.

So you see, it’s a good idea to listen to WACE—General Joe was on the list for a record two hours before he found out. This brother had to go under. He heard what was said about him on his baby boy—and when he did, you well know what happened. Joe, no fool, he submitted Rich word to the next step up the ladder, and for some reason he was interested in this, Rich allowed himself to be subjected to cruel and absolutely aggregates remarks until midnight, when he burst in with two of his minions. After giving him a short speech in his defense, the air he simply submitted. "The Group," who probably still feel under attack when this is written, as his so-called friends aren’t likely to let him in on it.

Tee-hee

Earlier this afternoon, I was walking out to the dorms with my coffee and I heard on the air, "Towelcase over the air!" I thought it was the air. These crazy brothers, they have absolutely no idea what they’re talking about. They have no idea what the word "towelcase" means. They certainly don’t believe in the "good old days." They have no idea what it means to be a "good old boy." They have no idea what it means to be a "good old boy." They have no idea what it means to be a "good old boy." They have no idea what it means to be a "good old boy." They have no idea what it means to be a "good old boy." They have no idea what it means to be a "good old boy." They have no idea what it means to be a "good old boy." They have no idea what it means to be a "good old boy." They have no idea what it means to be a "good old boy." They have no idea what it means to be a "good old boy." They have no idea what it means to be a "good old boy." They have no idea what it means to be a "good old boy."

They, of course, the people from the North are interested, so they started playing the transmitter on Sundays and Thursdays. I’ve almost never seen anything more beautiful. All that was necessary to get on the air is to

Keglers Drop Out Of First Place Tie

by Jerry Silhan

Facing their toughest test in the 11-11 Tech's bowling team managed to beat the U of I Chicago Circle squad last Sunday in two games out of four but losing the match 1-3.

Leading the Hawk attack was returning veteran Gary Silhan who bowled a powerful 68 game four game series. In one of his games forty-four pins together six strikes and one spare for a total of 64 which is currently the all-time conference high game. Captain Dick Loukell in a reversal of many an MHSB record furnished the team with exactly the strength and consistency that is expected from a good bowlermen by shooting 168 pins for five games. The Hurk was credited in having a few, well taken strikes while on his way to an 81 series for five games. The last action of their varsity bowling careers Mike Kuczek tallied a 61 four-game series while teammate Gary Khronian pounded 79 pins in four games.

Mike Yanick, who proved to be a key figure in 11-11's recent victory over Nichols College, was held in reserve for most of the match, participating in only two of the games.

The two games that the Keglers won netted them a total of four points out of a possible eleven; their percentage dropping to .54.

Even so they can still be considered as one of the top contenders for the MHSB crown. The Technicians have seven matches remaining between now and April and are considered strong favorites in five of them.

11-11's bowling team will visit Chicago State on December 3rd and host the Paul University on December 11th.

There will be the final matches of the semester. Tech victories are essential, a fact the squad is well aware of. Two remaining matches should turn out to be real classics.

Tech Hawk Icemen Win

by Carl J. Gilin

The Hawks won their third game in a row last Sunday, beating Elmhurst College 4-2. The win was empty of the entire game, indicating of the clean batting from both teams. The Hawks were clicking on their games, but couldn't seem to put the disc in the net.

In the first period, with about thirteen minutes left, Steve Salter and P. J. Shannon broke on the Elmhurst net against a single defender. Steve took the shot, but the disc bounces off the goalie's pads onto P. J.'s stick. P. J. wrists one into the crease, but somehow, the puck never made it the net.

At 6:27, Mark Richman put the Hawks on top 1-0 with an unassisted goal.

In the second period Elmhurst got their first tally with less than a minute gone. Two minutes later Tech came back and powered the Elmhurst goalie out of the box and at 9:08 and Steve Wozynsky took straight shots on goal. But none went in. Elmhurst turned the play around with a three on one and took the lead at 1:40.

NO PENALTIES

Elmhurst ..... 0 2 0
Hawks ..... 1 1 2

FIRST PERIOD Goals=4-2 HAWKS Rebmann (unassisted); Penalties none.

SECOND PERIOD Goals=3-0 Elmhurst; 4-0 Elmhurst; 7:46 HAWKS Salter; (Sankisans), Penalties none.

THIRD PERIOD Goals=5-0 HAWKS Machara, (unassisted); 16:28 HAWKS Robson (Karilson); Penalties none.

Shoots on Goal

Elmhurst ..... 5 10 25
Hawks ..... 15 22 46

Coach Osterhuzen and Paul Mautia out of the Hawk were at 4:00 and Steve Wozynsky took over as goalie.

The Hawks came back and tied the score 2-2 on P. J. Simon's shot at 1:40. Bob Robsmans assisted on the goal. The Hawks ended up with twenty-two shots on goal in the period, against Elmhurst's ten. But on the scoreboard the game was tied.

At one minute of the third period, Ron Maruski slanted in all alone on the Elmhurst goalie, but he was stopped, and the score remained tied. But at 2:50 Frank Machara gave HWT the winning goal on an unassisted play.

The hitting got rough for a few minutes but no penalties were called. Halfway through the period the action died down again. And finally, with about four minutes left in the game, Dave Robson put the insurance goal in for the Hawks. Greg Karikson assisted on the play. The Hawks have now won three straight and lost only one. They play against Purdue December 15th, at Westminster Ice Arena.

Tech Puckers Drop One

by Carl J. Gilin

In contest last Wednesday at Cresswood Ice Arena the Hawks lost to the Illinois Benedictine Hockey Team 4-3.

But Maruski picked up three points on a goal and two assists in the game.

At 3:32 of the first period, Illinois Benedictine took the lead 1-0. Tech retaliated two minutes later with a score from P. J. Simon. Steve Salter and Ron Maruski assisted P. J. on the play. But with only 3:30 left in the period, Ill tallied again and led 2-1.

Halfway through the second period, Ron Maruski put one past the IB goalie to tie the score at two apiece. Forty seconds later Ill replaced the lead as an unassisted goal. As the period came to an end, Frank Machara was assessed a two minute minor for high sticking. Two minutes into the final period, as Frank's penalty time expired, Ill was called for interference. At 3:11 with both teams at full strength, Ill put their fourth, and final, goal into the Hawk net. Al Grebnerman and an Ill player were sent to the sin bin on minors for roughing at 8:12. A couple of minutes later Mark Richman was called for high sticking and had to serve two minutes.

But the Hawks never did give up, and with thirty-four seconds left in the game, Frank Machara brought the Hawks within one. Frank was assisted by Jerry Schan and Ron Maruski.

The Hawks will play their next game against Purdue December 15th, at Westminster Ice Arena.

Too Bad!

by Carl J. Gilin
