Spring Thing starts next Tuesday, October 16, when Union Board will distribute two thousand Spring Thing buttons and helium-filled balloons. WITF will sponsor their annual hopscotch tournament that day at noon in the IIT Student Center. Prizes will range from meals at Seaver's to TICKETRON tickets to an AM/FM radio. There is no entrance fee.

Thursday, between the hours of 7 and 9, Technology News will sponsor a pop-up pitching contest. Entry fee is five cents, in pennies. Prizes of $10, $5 and $1 will be awarded. Rules will be Standard south-side, with indoor variations, according to Duke in case of inclement weather.

The Union Board festivities will begin Friday when the final class in the "Find the Spring Thing" contest will be printed in Technology News. The person who finds the "Spring Thing" will also find himself $25 richer. US will feature Detroit (as in Dick Snyder and the --- Wheels) with Rusty Day (formerly of Carlin) and Weapons of Power in a concert later that day. Tickets are available at 5:30, each, ice cream will be served during the intermission.

The Fifth Annual Inter-collegiate Invitational Tricycle Race will begin Saturday morning at 10 AM when the drivers will meet with the race judges and receive their prizes. The unamplified race will begin at 2 PM, and will be followed immediately by the race of amplified entries. Prizes of $200, $150 and $50 will be awarded in both categories. Starting positions are still available with the entrance fee being $20.

Saturday night the events take a more serious turn as US sponsors another one of their infamous beer kites. Music will be provided by Eddie's Band, brew will be provided by Anchor Steam. Funds will be provided by you, $2.50 for guys and $1.50 for girls.

Your hang-over should be gone by Sunday afternoon and that will allow you to attend a free Folk Fest. The IIT Student Center will be the stage for Joe Cocker. Steve Kempa & John Devlin and Fred Holdeman, all well known folk artists of the Chicago scene.

Students Speak On Spiro

by Michael J. Harrington

Now the sports and comic page fanatics have heard the latest on former IIT student Spiro Agnew resigning two days ago, Thursday, October 10, 1973.

Eggers T. Agnew, a good old boy, has made history for possibly the last time in his life, or at least this week. His resignation came as a result of months of speculation about the controversy over his alleged participation in criminal acts. He claimed he had no evidence to support the rumors.

The IIT Student Union newspaper, the IIT News, decided to buy out the latest edition of the comics page in anticipation of the front page headlines. One student was quoted as saying, "We're not going to let them have our page again!"

These pages are bing bing so fast because this is the first issue where they printed the comics on the front page."

A random survey of Tech students on their reactions or thoughts about the Agnew resignation produced these comments:

"I'm thrilled about it!" -- Debbie Mager

"I think it's a shame that he got so far as he did with this kind of situation in his background."-- John Hogan

"If this is true, it's good for someone's."-- Dean Niles

"I'm surprised. I didn't think he would do it."-- Mike Fager

"I feel sorry for the dude."-- W. Brown

"I think there is nothing wrong with Agnew. I thought everybody was doing it. Maybe we need a better system."-- John Hog

IIT Honors Program Started

by Dan Trubick

IIT, after years of offering only a strict and rigid approach toward education, has finally begun to move toward becoming a true university. In a series of open meetings and faculty conferences last April, the decision was made to institute an honors program at IIT.

According to Dr. Edwin Stewen, chairman of the honors program committee, "The program may be divided into two sections depending on the participating student's year at IIT. For freshmen, the program will be offered honors sections for physics, math, and chemistry.

The program was designed to substitute for a regular section of any large lecture course. It is aimed to help the average or just below average student understand the material. In addition, it opens up the possibility of a student taking an honors class in a subject that he or she is not interested in."

Dr. Stewen said that the program will be offered during the fall and spring semesters. He added that the program is designed to be a "real honor" and not just a "cooler."
Visitors' Day

College financial aid will be the topic of discussion when ITT holds its Visitors' Day on Monday, November 20, at Emery M. Hermann Hall. Visitors' Day is primarily for college-bound students, especially those with the idea of attending ITT. Chicago area students, parents, and counselors are expected to attend. It starts off at 9:30 a.m. with tours of ITT departments and the campus.

Dean Hune, ITT financial aid director, will hold a discussion and answer questions concerning the various forms of financial aid available to students, particularly those in the middle income group.

The current situation for obtaining financial aid on the federal level is chapter and verse. Because of the disagreements between the administration and the Congress, little movement has taken place. Federal funds may be obtained through the new Higher Education Opportunity Grant and there are already existing programs like the National Student Loan, the College Work Study Program, and the Federal Student Loan Program. An official of the federal government has warned that a major federal grant is in the works but little has been done.

• Honors Program

The Honors Program is intended for students of superior academic ability who desire special opportunities and privileges in their student career. The purpose of the program is to stimulate academic interest and provide enrichment opportunities for students who are not necessarily enrolled in the College of Arts and Sciences.

The Honors Program is designed to provide an opportunity for students to participate in activities not available to other students. These activities may include special courses, seminars, and workshops. Students may also be eligible for honors study abroad programs and other opportunities.

WTTW on RTA

Have you been wondering lately how you will be getting around while attending ITT Chicago because of lack of funds for a Regional Transportation System (RTA)? WTTW Channel 11, the non-commercial public television station serving the metropolitan Chicagoland area, is now organizing a campaign which will allow the public in the Chicago metropolitan area to provide feedback on its feelings about the RTA. To do this, Channel 11 will use a combination of mass media, including a television special, a newspaper campaign and over one million balloons distributed before the program is aired by a large number of community service organizations.

The television program entitled "You Can Get There From Here" will be hosted by John LeFleur of WTTW. It will be aired on Saturday, October 29, at 9:00 p.m. While more than 1,000 television sets will be on location in the studio to record the public's immediate reactions, the telephone number for the on-air telephone number will be on the program. The program was made with cooperation from the Chicago Public Service Commission and the Planning and Environment department.

In addition, leading experts involved in the controversy will take part in the program. Featured participants include: Lawrence Bobek, Secretary, Department of Mass Transit, State of Illinois; George A. Ramsey, Jr., attorney and former Chairman, Transportation Task Force, State of Illinois; Lawrence G. Bozy, CTA Board member; Theodore G. Schuster, Assistant Vice-President, Urban Services Department, Detroit, Michigan; M. Michael Chiesa, Director of Research, Northwestern University Transportation Center. An organization which has helped in the organization of the multi-media campaign is the Chicago Citizens of Greater Chicago Helping WTTW. A member of this organization is Eving H. Lande, a 1938 graduate from the Armour Institute of Technology in Mechanical Engineering.

The special will focus on the "horns" of a regional transit plan.

In general, I am satisfied with the bus and train service available to me now.

In the future, I feel that a Regional Transit Authority should be established to coordinate all bus and train services, and keep them running.

In the future, I feel that tolls should be used to get safe, clean, fast and better-coordinated bus and train service.

Please write your home address slip code here.

If you like Union Board Beer Blast where you pay $1.00 and get all the beer you can drink, it may be worth your while to check out the free Beer Blast tonight at 8 pm in St. James Hall. That’s no error—tonight’s beer blast is free, thanks to IIT’s Alumni Association and its President, John W. Befroy (CH 6). In addition to free beer, Mr. D and the Merry Hard will be featured. The blast will be run by Union Board and paid for by the Alumni Association.

Teller Dies

Teller, who died in New York City last week was an ardent student of the Institute of Technology and a frequent visitor to the campus. He was a member of the IIT Alumni Association and a regular attendee of the annual Alumni Banquet.

At the University of Chicago, Teller was a member of the Institute of Nuclear Physics and a frequent visitor to the campus. He was a member of the IIT Alumni Association and a regular attendee of the annual Alumni Banquet.

The Teller collection, now at IIT, contains over 3000 pieces. Among the items in the collection is a real eggshell. The eggshell was found by a student in the lab and brought to Teller for examination. He found that the eggshell was made of a special type of egg, only found in the area around IIT. Teller was amazed by the发现和 decided to add it to his collection.

Beer-Wine Discussion Topic

At a meeting of the M.T. Tracht, IIT Vice President and President of the IIT Alumni Association, and Dr. F.K. Emmerson, IIT ATM Vice President, the proposal to student possessions and consumption of beer and wine was discussed. The proposal was accepted and will be presented to the IIT Board of Trustees at their next meeting.

The only additional business transacted at the Assembly was the appointment of Chuck Haas as Rules Committee Chairman. This appointment leaves an opening for a standing committee to be appointed by the Education Committee.

Correction:

Technology News apologizes for the incorrect figures given in last week's article on the CTA bill. The correct figures are a total of 75,000 votes out of approx. 250,000 people polled with 60% in favor of the bill.
Penny Pitching

Get your pitching arm warmed up. Sharpen up your eagle eye. Clean your fingernails and find your favorite Sports Illustrated or ESPN The Magazine. Following in the steps that have been laid by other great journalistic endeavors, is sponsoring a penny-pitching contest.

Next Thursday on the sidewalk just to the east of the HUB, you will finally get a chance to lag your cohort with respectability. No longer will you have to convince the kids of neighboring dorms that you’re just big for being twelve. We’re giving you a chance to come out of the closets. No longer will you have to explain how you happened to have your BINGO markers—you will be participating in an athletic event! No longer will you have to pretend that all the change is for the bus; you’ll be with others in a recognized school event.

The entrance fee is only five cents (in pennies please) and the remainder more than adequate with prizes of $10, $5, and $1 for the winners. If enough people enter we will increase the prize money and / or add special categories. The rules will be South-Side Standard with modifications as elaborated by Duke if the weather forces us indoors. Judges decisions final, unless you want to pitch for it.

Freebies

Hey all you critically inclined media hawks out there, how would you like to see, free of cost, a movie, a play, or concert? Or how would you like to dinner for two in a Chicago area restaurant (yes, even the big ones!) without paying a penny? Sounds like a dream? it’s all within the realm of possibility.

Every week Technology News gets deluged with freebies for movie reviews, concerts, theatre presentations, etc.—all—we need someone to go to them. Also, our unlimited resources enable us to pass these on to you for your tickets, (yes, two for you like), if they’re not a gift. The only catch is you have to write a printable review on what you saw it to purchase your place on the nightly newsletter. Of course, you can’t get paid back for any money you spend unless you write something and it’s also published. Does that mean you print almost anything!), but that’s all in the game.

So, take a check out to a dinner and a show, courtesy of Technology News.

If you’re interested, come and see us in the basement of the HUB or call one of the numbers below.

Letters to the Editor are your way of letting us know what you feel about anything. Technology News encourages students, faculty, staff, alumni, and parents to send in letters to the newspaper. We reserve the right to refuse publication of letters that may contain obvious errors or misrepresentations.

Letters should be typed of characters to a line, double spaced; signed, and must be accompanied by the author’s name and phone number. Names will be withheld upon request.

Deliver all letters in person to offices in the newspaper at the above address. All letters published in Technology News, 5241 South Federal, Chicago, Illinois 60615.

Your letter should be limited to one page and be typed double spaced. Please allow at least 24 hours for our response.

Monthly Subscription Rates: $5.00 per year or $9.00 per semester. Descriptions for advertising and personal ads is $75.00 per line, $75.00 per page. Publication Office Number is 725-9600, ext. 501 and 532.

Published every Friday during the school year by the students of Illinois Institute of Technology, 5241 South Federal Street, Chicago, Illinois, 60615.

Smiling Faces, Sometimes

Michael J. Harrington

IN PERSPECTIVE

It has come to my attention that my volume, of late, has meant little with events pertaining to my life as a particularly notable and significant phenomenon. The following was the message in work Americas with my primary school. There were numerous instances of my being somewhat of an anomaly, but this was not without reason. The following is not a personal account of my life, but rather an attempt to provide insight into the experiences and challenges faced by students in the current educational system. The following is not intended to be a comprehensive overview of the educational experiences of students, but rather a glimpse into the lives of students who have faced particular challenges.

Mark, like many little boys his age, is a very bright child. On one occasion, he had been told by his principal that he was the smartest student in his class. Mark was excited by this news. He had been told that he was the smartest student in his class for the second time in his life. He had been told that he was the smartest student in his class for the third time in his life. He had been told that he was the smartest student in his class for the fourth time in his life. He had been told that he was the smartest student in his class for the fifth time in his life. He had been told that he was the smartest student in his class for the sixth time in his life. He had been told that he was the smartest student in his class for the seventh time in his life. He had been told that he was the smartest student in his class for the eighth time in his life. He had been told that he was the smartest student in his class for the ninth time in his life. He had been told that he was the smartest student in his class for the tenth time in his life. He had been told that he was the smartest student in his class for the eleventh time in his life. He had been told that he was the smartest student in his class for the twelfth time in his life. He had been told that he was the smartest student in his class for the thirteenth time in his life. He had been told that he was the smartest student in his class for the fourteenth time in his life. He had been told that he was the smartest student in his class for the fifteenth time in his life. He had been told that he was the smartest student in his class for the sixteenth time in his life. He had been told that he was the smartest student in his class for the seventeenth time in his life. He had been told that he was the smartest student in his class for the eighteenth time in his life. He had been told that he was the smartest student in his class for the nineteenth time in his life. He had been told that he was the smartest student in his class for the twentieth time in his life. He had been told that he was the smartest student in his class for the twenty-first time in his life. He had been told that he was the smartest student in his class for the twenty-second time in his life. He had been told that he was the smartest student in his class for the twenty-third time in his life. He had been told that he was the smartest student in his class for the twenty-fourth time in his life. He had been told that he was the smartest student in his class for the twenty-fifth time in his life. He had been told that he was the smartest student in his class for the twenty-sixth time in his life. He had been told that he was the smartest student in his class for the twenty-seventh time in his life. He had been told that he was the smartest student in his class for the twenty-eighth time in his life. He had been told that he was the smartest student in his class for the twenty-ninth time in his life. He had been told that he was the smartest student in his class for the thirtieth time in his life. He had been told that he was the smartest student in his class for the thirty-first time in his life. He had been told that he was the smartest student in his class for the thirty-second time in his life. He had been told that he was the smartest student in his class for the thirty-third time in his life. He had been told that he was the smartest student in his class for the thirty-fourth time in his life. He had been told that he was the smartest student in his class for the thirty-fifth time in his life. He had been told that he was the smartest student in his class for the thirty-sixth time in his life. He had been told that he was the smartest student in his class for the thirty-seventh time in his life. He had been told that he was the smartest student in his class for the thirty-eighth time in his life. He had been told that he was the smartest student in his class for the thirty-ninth time in his life. He had been told that he was the smartest student in his class for the fortieth time in his life. He had been told that he was the smartest student in his class for the forty-first time in his life. He had been told that he was the smartest student in his class for the forty-second time in his life. He had been told that he was the smartest student in his class for the forty-third time in his life. He had been told that he was the smartest student in his class for the forty-fourth time in his life. He had been told that he was the smartest student in his class for the forty-fifth time in his life. He had been told that he was the smartest student in his class for the forty-sixth time in his life. He had been told that he was the smartest student in his class for the forty-seventh time in his life. He had been told that he was the smartest student in his class for the forty-eighth time in his life. He had been told that he was the smartest student in his class for the forty-ninth time in his life. He had been told that he was the smartest student in his class for the fiftieth time in his life. He had been told that he was the smartest student in his class for the fiftieth and final time in his life. He had been told that he was the smartest student in his class for the fiftieth and final time in his life.

Mail-Electrostatic Generator

The Mail-Electrostatic Generator is a device that uses electrostatic principles to generate electricity. It is used in various applications, including in the production of paper and other materials. The device works by creating a static charge on the surface of the material being processed, which is then used to drive a motor or other mechanism. The Mail-Electrostatic Generator is a simple and effective tool that can be used in a variety of settings, from small workshops to large industrial facilities.
This issue makes the return of a popular feature of Technology News last year called Technopinions. Technopinions is a random sampling of student opinion on campus and in no way tries to represent all sides of an issue. The method in which Technopinions is usually done is a reporter and a photographer go to a busy area on campus, stop people, and ask questions and then select the more typical, interesting and unusual comments about the subject in question.

The week's controversy is AAR's use of reserved parking in the HUB parking lot instead of parking on Federal St.

Mark Klecka, MATH 67: I usually get here early in the morning so I don't get hassled too much. My biggest complaint is the general condition of the parking lot - maybe they could open the pay lot.

Rob Stein, PSYCH 67: I have seen it worst at other schools...not much you can do about it.

Jeff Forse, ECON 66: Doesn't really bother me. I usually take the car to school about twice a week and usually find a parking space.

Paul Wojdele, ARCH 66: Can't talk to you now...got to find a parking spot.

Jeff Golon, EE 66: It's time for a re-evaluation of the parking situation by AAR. It seems that by 9:00, all student spaces are filled, while faculty and visitor lots are at 25 percent capacity. When the HUB lot is filled, I try to find a space in one of the other lots, living in constant fear of parking in an unpaved or not obviously posted no-parking zone (i.e. AAR).

Bill Month: I'M 90. Pretty crummy - we pay the tuition and AAR is using the parking space.

The Circus As Reality

by Michael J. Harrington

One's expectations can either add or detract from an expected event. This was my first time visiting Ringling Bros. and Barnum and Bailey Circus. My expectations were almost entirely preemptive and so I was surprisingly unprepared for the actual event. The audience was estivating and I could feel the vibes of excitement in the atmosphere. The acrobats and clowns captivated the audience with their skillful performances.

Mr. Thunderbird of the Tropics, Elvin Baskin dressed as an Indian Chief in flowing orange and yellow costumes, threw off the cape and climbed up the rope. Mr. Thunderbird performs, of course, with a great deal of style and grace, and the audience was captivated.

Mr. Thunderbird's performance was quite convincing, and it seemed that the audience was truly enchanted. The clowns and acrobats were all very talented and entertaining. The overall atmosphere was electric and the audience was riveted to the performance.

Mr. Thunderbird is a perfect example of how to captivate an audience and create an unforgettable experience. He is truly a master of his craft and his performance was nothing short of breathtaking. The clowns added a touch of humor and the acrobats displayed their incredible skills.

In conclusion, I was pleasantly surprised by the performance of Mr. Thunderbird and the rest of the performers. The audience was thoroughly entertained and the overall experience was worth the wait.

Peace

American Funk

We're an American Band. A perfect combination of funk, rock, and hip-hop, the American Band is a true representation of what it means to be an American band. The band's sound is unique and captivating, and their live performances are a must-see for any fan of modern-day rock music.

The band's debut album, "American Funk," is a collection of thirteen tracks that explore a range of themes, from love and relationships to social issues and political commentary. The album is a testament to the band's musical talent and creativity, and it's clear that they have a bright future ahead of them.

Performances by the band have been well-received, and they've gained a dedicated following both in the United States and internationally. With a combination of catchy hook lines, strong lyrics, and a powerful live show, the American Band is a band to keep an eye on in the music world.

Thoughts On Agnew

Continued from page 1.

It is frequently used in advertising. The Spring Thing comes in a bag. It comes in a box 1" x 2" x 4".
It is used by both college physics teachers and ten year old's. You can order one through the Sears catalog. Almost any gas station has one. It works well with a string. The Spring Thing is real and worth $25 to whoever finds it and claims the prize.

Agnew's resignation was the most serious thing to occur in light of his income tax evasion conviction. Agnew said that the decision to resign "rests on my bare belief that the public interest requires swift disposition" of his case.

Under the new 10th amendment to the Constitution, President Nixon must pick Agnew's successor with the approval of both Houses of Congress.

Bike Freaks

Attention Bike Freaks and occasional bicyclists! Saturday at 11:30 am on the quad everyone is invited to meet for a ride to Evanston and for the more ambitious, a visit to Glencoe, Highland Park or even Lake Bluff. For any last minute information contact Jack Toren, 371-2155 before Friday, or Dave Manzer at x-791.

Electons Next Week

ATS elections are Monday and Tuesday. People running for office are: Pamela Rekar and Mark Pekrulka for ATS Secretary; Jerome Mrozak, Tim Tolosan, and Donald Zinger for Freshman class president. Charles Haas for ATS grad rep. All students are encouraged to vote.

Hopscotch

WIIT will sponsor a Hopsotch Tournament on October 16 at noon in the HUB fireplace. The first prize is an AM/FM portable radio. The second prize is a bicyle. There will be two rounds, with the winners declared after the second round.

Eat Pizza

CTA will hold a pizza party Wednesday, October 17, in the ARC from noon to 1. Admission is 10 cents. There will be pizza and drinks until they run out.

Poetry Contest

The National Poetry Press has announced its spring competition for the College Student's Poetry Anthology. The closing date for the submission of manuscripts by college students is November 5, 1973. Any student attending either junior or senior college is eligible to submit his work. There is no limitation as to form or theme. Shorter works are preferred by the Board of Judges, because of space limitations. Each poem must be typed or printed on a separate sheet, and must bear the name and home address of the student, and the college address as well. Manuscripts should be sent to the office of the press, National Poetry Press, 3150 Sibley Avenue, Los Angeles, California 90008.

Need a Job

Looking for a job? Need assistance? Here is something which might help!

A job placement counseling seminar will be held by the India Community League and India Association of ITT in the HUB Mezzanine room 301 on Sunday, October 23 from 1 to 5 pm.

Topics to be discussed are resume preparation and correspondence, sources of job information and approach, job interview and development, and special problems of foreign students including the visa problem. Speakers include Mr. W.J. Smith, ITT Director of Placement; Mr. David Finnegan, Director of Industrial Relations at the Illinois State Employment Agency in Chicago. 

Donation for members is $1.00 with preregistration and $2.00 without. Donation for non-members, $2.00 with preregistration and $3.00 without preregistration.

Wilmouth

Stuart School will present Robert K. Wilmouth, executive vice president and director of the First National Bank of Chicago. Next Thursday, October 18, from 6:30 until 9 in 113 Stuart Building. This is part of Stuart School's continuing series of speakers from industry management information systems efforts. The whole IT community is invited.

Recycling

The Hyde Park-Roscoe Community Recycling Center will accept your flattened cans, bottles, aluminum, newspaper and cardboard every Saturday, 10 to 4, and Sunday, 1 to 4 pm. The Center is located at 54th and South Lake Park Avenue. This is an ongoing weekly project of the Conference so there is no time limit.

Spring Thing

Union Board is kicking off "Spring Thing" by giving away balloons and helium-filled balloons on Thursday, October 18, somewhere near the HUB between the hours of 12:30 pm to 2 pm. Balloons and balloons will be given away on a first come, first served, basis so be there early!

Lecture

Former Apollo 14 astronaut Edgar Mitchell will be in Chicago Friday, October 19, to speak on the subject of "Outer Space and ESP." The lecture is being held at the Fine Arts Building, 110 S. Michigan, at 8 pm. Admission is $3.00 at the door.

"Black Comedy"

The dramatic arts reach the ITT stage as Theatre III, ITT's one and only student theatre group, stages their first production of this season: Black Comedy, by Peter Shaffer, will be performed one night only on Saturday, October 20, at 9 pm in the HUB auditorium. Admission is $1.00 for the general public, 75 cents with a student ID.

Trike Judge

Union Board is seeking people interested in being a judge for the Trike Race on Saturday, October 30. Interested persons should contact Bob Peschke at room 206, North Hall, or call ext. 1505.

• Mailer

Continued from page 4.

"The best place to be," Mailer declared, "is at a book store or a book fair. It's a safe place to be, a place where one can feel secure." Mailer's words were met with a round of applause from the audience.

"The book is not only a reflection of the writer, but also a reflection of the reader," Mailer continued. "It's a place where one can find a sense of security." Mailer's words were met with another round of applause from the audience.

"The book is not only a reflection of the writer, but also a reflection of the reader," Mailer stated. "It's a place where one can find a sense of security." Mailer's words were met with another round of applause from the audience.

Golf Team Meeting

Continued from page 12.

The spring varsity golf team will hold a meeting in the Shamrock Room on the west side, first floor of Keating Hall on Tuesday, October 15 at 12:15 pm. All interested are welcome.

Joggers Club To Start

The Joggers Club will start Monday, October 21, meeting in the west end room at 12:15. If possible, they will meet on Monday and Tuesday at 12:15. The club will run one race every semester for club members only.

If you run 30 miles per month you will receive a T-shirt. If you run 100 miles per semester, you will receive a small plaque.

The rules are:

You must register with Coach Swanson, Keating Hall, ext. 24.

Your name will be placed on the chart, record the number of miles you run every day on the board.

Give Coach Swanson your name and phone number.

We want to encourage Physical Fitness throughout the campus community.

We want to encourage people to get out and run together. Develop new friends.

We will always start with light calisthenics.

Personal: Perry Mason Impotent

To Dave: Hi! I want to ask you a question about your Perry Mason Impotent. I'm a fan of the show and I'm curious about how the impotent Perry Mason solved cases. Can you please provide some insight into his solving techniques?

To Dave: It's actually a funny situation. I was at a conference recently and someone mentioned Perry Mason Impotent. I think they meant Perry Mason, the famous detective, but I was intrigued by the name. Do you have any thoughts on how someone might come up with that title?

To Dave: I'm also curious about the creator of Perry Mason Impotent. Who was behind the idea and how did they come up with it?

To Dave: I've been trying to find more information online, but I can't seem to find any details about Perry Mason Impotent. Have you seen any references to it before?

To Dave: I'm also interested in the legal aspects of Perry Mason Impotent. How did the creator incorporate legal knowledge into the show's plot?

To Dave: I've been thinking about writing a similar series myself. What kind of research and preparation would you recommend to someone starting from scratch?

To Dave: I think Perry Mason Impotent could be a great addition to the legal fiction genre. What do you think of the idea overall?

To Dave: I really enjoyed the legal cases you came up with in your previous episode. I'm looking forward to seeing what Perry Mason Impotent will do next.

To Dave: I think it would be fascinating to see Perry Mason Impotent take on some challenging cases that require a lot of legal expertise.

To Dave: I'm also interested in the possibilities of incorporating modern legal issues into Perry Mason Impotent. What kind of contemporary topics do you think would be relevant?

To Dave: I'm excited to see how Perry Mason Impotent will evolve over time. What kind of stories do you think would be interesting to explore?

To Dave: I think it would be great to see Perry Mason Impotent tackle some social justice issues. What kind of cases do you think would be impactful?

To Dave: I'm looking forward to seeing how Perry Mason Impotent will continue to grow and develop over time. What kind of future do you see for the series?
Bill James Scores First IIT Goal

By Terry Woodworth

Saturday, October 6, will go down in the annals of IIT’s sports as one of the most important dates in the development of IIT’s varsity sports. In the absence of Terry Woodworth, University of Wisconsin at Madison, for the game with the bartenders on Saturday, Bill James scored the first goal for the Scarlet Hawks as a varsity team. This was also the debut game for Terry, who was named as the first soccer game ever to be broadcast on the radio. In his report in Wisconsin NCB News, Woodworth considered the game important enough to write a report to cover the game.

Coach Pete Wendt observed that the score of the game didn’t indicate the “spark” that the team had. They were very aggressive, going for the win and playing well. Wendt said both coaches were “surprised” by the game’s outcome.

Fall Baseball Season Ends

by Terry Woodworth

Varsity baseball headed by Coach Rick Klein, has concluded its 1973 fall season with a 12-5-1 record. The team, which functioned as practice and tryout season, and games were played on the field of a local community, even playing against local teams.

Basketball Practice

Varsity basketball practice starts Monday, October 15 at 4:15 in the gym.

IF Track Meet

An intramural track meet will be held Sunday, October 14 at Sunny's East.

IM Swim Meet

The intramural swim meet is scheduled for Tuesday, November 6.

IIT Masters Swim Club 11th In Nationals

IIT’s Master Swimming Club, which has been a regional favorite in the national championships at Chicago, recently competed at the National Championships in Chicago. The team was composed of 12 swimmers, and included 800 competitors.

The top ten finishers in each of the 11 events were selected to participate in the national championships. The events included the 100 and 200 freestyle, the 100 and 200 breaststroke, the 100, 200, and 400 individual medleys, the 100, 200, and 400 yard freestyle relays, and the 200 and 400 medley relay.

The team’s best performances came in the 100 and 200 freestyle events. In the 100 freestyle, Terry Woodworth set a new personal record in the 100 yard freestyle, with a time of 27.31. In the 200 yard freestyle, he set a new personal record with a time of 34.22.

IIT’s top performers included Woodworth, who placed 10th in the 100 yard freestyle, 9th in the 200 yard freestyle, and 4th in the 200 yard medley.
