PNC Faces Fire: Survives!

ATS Ends for Semester

The veil of secrecy that has surrounded the presidential search process in recent months has been lifted. Dr. Robert S. Sehgul, head of the search committee, announced last week that the search process is well underway and is expected to be completed in the next several weeks.

The search committee, chaired by Dr. Sehgul, consists of nine members, including faculty and student representatives. The committee met last week to discuss the status of the search and to consider the next steps.

Dr. Sehgul stressed the importance of confidentiality during the search process. "We are committed to maintaining the highest level of confidentiality," he said. "We will not release any information about the candidates until after the search process is complete."

The search committee is expected to make its final decision on the next president of PNC early next month.

This week was the final meeting of ATS, with Chancellor David Scott present as president. The next ATS executive council will be elected at next week's meeting. Important topics discussed included extended library hours, the ATS Spring Conference, parking lots, elections, and the ATS party.

Dr. Klaus Korschmann, incumbent ATS president, gave his report on the efforts of ATS to extend library hours on a trial basis. He is presently negotiating with the University administration to extend library hours and is hoping to receive approval in the near future.

Dr. Korschmann is also organizing the ATS Spring Conference to be held this weekend. The primary goal of the conference is to facilitate discussions and formulate suggestions about the long-range problems and possibilities facing IT.

This meeting was the final meeting of ATS with Dr. Korschmann serving as president. The next ATS executive council will be elected at next week's meeting. Important topics discussed included extended library hours, the ATS Spring Conference, parking lots, elections, and the ATS party.

Dr. Klaus Korschmann, incumbent ATS president, gave his report on the efforts of ATS to extend library hours on a trial basis. He is presently negotiating with the University administration to extend library hours and is hoping to receive approval in the near future.

Dr. Korschmann is also organizing the ATS Spring Conference to be held this weekend. The primary goal of the conference is to facilitate discussions and formulate suggestions about the long-range problems and possibilities facing IT. The amended version will not allow this.

The survival of PNC is still to be determined in the faculty meeting. Dr. Sehgul considers that the obvious communication between faculty and students on this issue is an important step in the right direction. And it all takes time.
Need a Room Techawk?

Librarian, assistant librarian for reader services:

Wanda B. Bibb, ranked 2nd among "student services worker" and "student services manager" according to the library services department.

Earlier this year when the search committee was tasked with finding a replacement for the retiring director of reader services, the committee was faced with the challenge of finding someone with the necessary skills and experience to fill the position. After conducting a thorough search, the committee was pleased to announce the hiring of David J. Smith as the new director of reader services. Smith brings with him a wealth of experience in the field of library services, having served as the director of reader services at a similar institution for the past five years. He brings with him a wealth of experience in the field of library services, having served as the director of reader services at a similar institution for the past five years. He believes that the key to a successful library is a strong sense of community and a commitment to providing excellent service to its patrons. Smith is looking forward to working with the staff and the community to continue to provide top-quality services.

\[ 	ext{PNC Compromise} \]

Continued from page 1 of the March 2003 issue of the student newspaper.

"We were aware that P/N would be a possibility," said P/N'svke president, David Bibb. "However, we were also aware that the P/N community would be working together to find a solution." The idea of a compromise was proposed, but it was not an easy decision. The students of P/N and the university administration were both committed to maintaining the traditions of the community. The university administration was concerned about the impact of P/N's presence on the larger university community. The students of P/N were concerned about the impact on their own community. The compromise was reached after several months of discussions and negotiations. The P/N community agreed to support the university in its efforts to promote diversity and inclusion, while the administration agreed to work with the P/N community to ensure that the University of Life would remain a safe and welcoming environment for all.

\[ 	ext{ATS} \]

Continued from page 1 of the March 2003 issue of the student newspaper.

"The decision to close the Piano Department was made after a thorough review of the budget and financial projections," said the department chair. "The department has been in financial difficulty for several years and it is clear that we cannot sustain it in the long term. We have explored every possible avenue to address this issue, including seeking new funding or restructuring the department, but we have been unable to find a solution.

The closure of the Piano Department will have a significant impact on the university community. The department has a long history and a strong tradition, and it has served as a source of pride for many students and faculty. The closing of the department will be a loss for the university and the community.

Paving Plans Presented

By Pamela Hane

ATS has been making inquiries into the feasibility of paving some of the school parking lots. The idea of paving the lots was first presented at a meeting of the ATS Student Life Committee two months ago. The two prospective sites for paving are the HUB lot and the Fraternity parking lot. The HUB lot was selected first because it is the most often used ATS finally chose the Fraternity lot, however, when they were told that the HUB lot was a potential building site.

According to interested fraternity members, the cost of paving the Fraternity parking lot would amount to $38,000. They arrived at this figure from an estimate which claimed that it would require 1000 square feet to pave the lot with asphalt. This figure covers only the sides and the entire lot. To pave the entire lot would mean that the cost of drainage facilities would have to be added. Drainage facilities would add approximately $4,000 to the total cost of paving the lot.

The fraternity members have some support for their proposal from the Alumni Inter Fraternity Council (AIFC) - AIFC has pledged $5,000, however, is unable to give the fraternity any funds because they have no solid guarantee that they will be paid back from the students. AIFC believes that HUB should actually be paying for any paving because it would be an improvement to the university property. According to Jack Allison, ATS Vice President, the AIFC stands in wait until there is a new president since they have been unable to get funds from this administration.

Terry Bland, Chairman of the Student Life Committee of ATS, has proposed an alternate plan for paving the HUB lot. His proposal would require the purchase of a new asphalt and the hauling services to be provided by the city of Columbia. The total cost of the new asphalt would be $25,000. He estimates that the cost of paving the lot would be $50,000.

According to Bland, the student body would have to pay for the cost of construction. He believes that it would take two and a half years to pay for the construction. Bland has been working with the Fraternity members to work out a plan to pave the Fraternity lot.

Fraternity parking lot, directly adjacent to fraternity quadrangle.

If a car must pay a dollar every time it enters the lot. He arrived at this figure by estimating that there are at least 250 spots in the HUB lot. Since the lot is filled before the morning with day students and in the evening with night students, he estimated that 10 cars use the lot in one day. Thus, during a school week approximately 5000 cars will park in the lot. If a semester is 16 weeks long, this means the 4,000 cars will park in the lot, which could provide $4,000 a semester under his plan. The average student would pay approximately $20 a semester to park in the HUB lot. Bland has made no provisions for AAR parking and believes that the AAR part of the lot could be left to it.

Bland made his proposal at the last ATS meeting.

The major problem in getting any of the parking lots paved is basically that there is no one to have any money to pay for it. The school claims that it can't pay for paving, and so do the student groups. It has been proposed that a student group take out a loan from the school to pave the HUB lot, but all of the groups involved feel that they shouldn't be the ones to pay.

Another problem which would occur if a group other than ATS pays any lot is that the group would have to lease the lot from the school. This would be an additional expense. No matter who comes up with the money, Buildings and Grounds and Melvin Traxler, Vice President of Financial Affairs, will have to approve and supervise any work actually done.

According to Henry Wurst, Superintendent of B&G, if the students want the Fraternity lot paved and have the money to do so, the administration will allow the paving. No one, however, would say anything definite about the HUB lot.

HUB parking lot, directly adjacent to Hermann Hall.

Paving Priorities

For several weeks AT&T has been making plans towards the goal of paving the aisles of the fraternity parking lot. They negotiated with all of the important people necessary to arrive at the final plans including Melvina Tract, vice-president of financial affairs, Henry Mardir, director of Buildings and Grounds, and the alumni fraternity council (AAFC). After all was said and done it turned out that the AIFC was unwilling to seek a loan from IIT or pay for the paving of the lot because of financial reasons. The financial reasons are that the AIFC can't be assured of being reimbursed by the fraternity members who would be the primary beneficiaries of a newly improved frat lot. The AIFC also considers the parking of IIT's responsibility.

It should be noted, however, that the financial considerations and technical matters shade a greater issue. Why should the frat lot, of the 10 parking lots on campus, be chosen by AT&T for improvement? It would seem that a better use of IIT's money would be in sustaining and refurbishing the lots that need the most care. The HUB lot and those along State Street are in fact. The fact that those lots endure more abuse is exemplified in the fact that they are usually more torn up than the frat lot.

The other campus lots are used by day and evening students, that means that the lots are continually filled and emptied all day long. Whereas the frat lot, as evidenced by the AIFC statistics, does not undergo such massive transition.

To achieve the greatest good for the largest amount of people: it would be for AT&T to invest its time and money improving the more heavily used parking lots. Hopefully the AT&T plans for the HUB lot will prove fruitful.

Letters

God Does Kick

Dean John

Regarding the letters from Name Without By Request here come another 24 letters: I agree with them all. Stephen Nyberg (who I don't know)

As I stated last week, Technology News was the New World of N. A. Anthony's messenger. I might understand the line: "You may feel like an obligation to be a religious newspaper and it would be ridiculous to remain"

from "sacred" articles. When many Technology News readers don't even believe in God they do so, without meaning it, by stealing or deceiving that which is sacred. I think the word you were looking for is "idiosyncratic":

Anyway, twenty years on this earth have taught me that God (if there is one) often seeks you for an apparent reason. Dr. Barson observed praise for his intelligent and spiritual cartoon. Whether he or not He deserves it, I'm sure God will survive the step in the race he has drugged Dr. Barson's wretchedly published, I'm not sure. Crystal combined mixing, which is what will be a party to you, it is your U.S. Navy after graduating. I'd rather have the son of a priest ("God Knows Your Ass for No Apparent Reason") on my soul than the deaths of hundreds, maybe thousands, of people. "Thou shalt not" (Exodus XX. 13) "Jesus said. Thou shalt not murder" (Matthew vii: 16). "No murder hath stilled thee" (Joshua i: 13). Before you run around asking stolen, I suggest you look at yourself and decide which sin is greater.

Yours, in Christ,

Ritch Anderson

Freedom I

Dear Editor

So Khmash has been fired. Bob Khmash, the best writer on Tech News, a gentleman of taste and talent, has been sent off to the heedless executioner. His crime? Telling the truth in print.

I feel like I'm back on my high school newspaper. "You can print anything you want to," the administration would tell us, "as long as you mean it through us first and as long as no swear words are used, and as long as no individuals are attacked, and as long as it might actually be possible for people like Khmash to speak honestly about the administration without fear of censorship."

The firing took place at the bidding of a part-time assistant dean, Dennis Gehret. Gehret apparently was offended by some of the things Khmash said about his in their interview together a few weeks ago. TN February 15, 1974. Gehret should be noted, had a chance, before that article was printed, to read it over in the presence of the editor of Tech News. (That privilege was granted to none of the other interviewees.) After he read it, he made a few minor suggestions to the editor for possible changes in the tone and content of the article and the article was duly published.

At the end of the issue, Gehret apparently decided that he was sufficiently disturbed and that the article should be pulled. With no great ado, the article was pulled, and the editor was duly fired. After publication, though, it turned out that Gehret's vanity was still unhurt somewhat by the article, and he seems to have taken it upon himself to begin a vendetta against Khmash—a vendetta which culminated in Khmash's being fired from Tech News by Communications Board.

Since it was necessary for Gehret to find some legitimate excuse for getting rid of Khmash (who is not longer an IIT student), he apparently bullied Communications Board into ruling that no one who is not personally attending classes at IIT can write for Tech News. If IIT can write for Tech News, I apparently bullied" because only a week before the firing, CB was unable to even come to a vote on the issue, at the very next meeting they mysteriously came to a near unanimous decision in Gehret's favor. As a result of that decision Tech News also lost the services of Robert Weirich (another non-IIT student), who is the student's association's editor and who has written many good and important articles. He wrote reviews that were over the past several months.

I'm afraid how much damage one man can do if he's got a horse.

This sort of thing only serves to reinforce the attitude of many at Tech that the administration exists solely to serve the students. Whether that attitude is true or not, not only the firing of good people but a classic form of reprimand which can be taken by the students at IIT.

Yours,

James Chapman

Freedom II

Dear Editor

I am a student at the University of Illinois, College of Arts and Sciences. Because my roommate attends IIT, I read Technology News frequently. Admittedly, your university is more conservative than mine, but I think there is no reason why you should feel that you are not for the First Amendment protections which an good editor lives by (without adhering of course, to the firing of bob Khmash. I fear that allowing this injustice is only the first step on an all too short path to a secure but undeniable mediocrity.

Rand Rippy

Letters to the Editor are your way of letting us know how you feel about anything. Technology News encourages students, faculty, staff, alumni, and parents to send in letters to the newspaper. We reserve the right to refuse publication of letters that are written in poor taste or contain obscenities, errors, or misrepresentations.

Letters should be typed on characters to a line, double spacing, and must be accompanied by the author's name and phone number. Letters will be published upon request.

Deliver all letters in person to the office in the Hall basement or mail them to: Technology News, 211 S. Federal Street, Chicago, Illinois 60616.
A Personal Evaluation of Kent

IT Chicago Kent College of Law has technically been an integral part of the IT community for several years now, yet it still remains at best a peripheral presence in the community. In an effort to provide a better understanding of the problems facing Chicago-Kent, Technology News has obtained the campaign platform of the recently president-elect of the Kent Student Bar Association (SBA), Ron Adelman. The SBA functions as the Kent student government. Adelman’s identification of the problems of the law school are, of course, only the opinions of a single person, but they are the opinions of a person in a position to know the problems. His qualifications include having served as managing partner of the Bookstore run by the SBA for Kent students, the elected Secretary of the SBA, chairman of the Student/Faculty Business Committee, and consultant to the Honor Code Committee.

Following are excerpts from Adelman’s “Blueprint for Change”:

1. Student Activities Fee
   The SBA must receive a larger proportion of our $15 activity fee. This is in order to function as it should:
   a. Our $15 fee is paid into a general account at IT – it does not go to the SBA at the time of registration.
   b. The SBA is allotted $1 per student per semester of which each year goes toward membership in the Illinois State Bar Association.
   c. The Law Review receives $14 per student per semester at the rate of $15.
   d. The remaining $5 per student per semester cannot be accounted for by IT. No other group of students at IT pay an activities fee for athletic, cultural, or academic purposes.

If you doubt the significance of these allegations, merely ask yourself in mind that we are talking about approximately $23,000 per year, $12,500 of which mysteriously disappears into IT’s accounting ledgers.

The money that the SBA is not getting back from IT is not going into the pockets of the Chicago-Kent students, so you are really paying twice for the same services rendered. I will appeal to your mandate and seek vindication of our rights.

2. Convert the Bookstore into a Co-operative Bookstore
   The SBA bookstore has been run with two purposes as mind first to reserve the students, and second to generate revenue for the SBA. Everyone has always been in agreement that the Bookstore should not make a profit off of the students. Now, this not for profit idea may have been supported by IT in 1971, but there was a $500 or more credit balance and second, the SBA is receiving much more).

The guiding principle of the co-op exchange is that the Bookstore functions as a co-op exchange for used books. The Bookstore is eliminated as the middleman that takes a cost of handling and margin profit. The Bookstore becomes merely the conduit for student to student transaction.

New idea or 20% lower price by IT is not in the public interest. If operated in this manner, the Bookstore could meet its primary responsibility of serving students. With the long term deficit eliminated, a future co-operative book exchange for Kent students is secured. The Student/Faculty Business Committee will see to it that it is completed.

3. Create a Student Faculty Grade Review Panel
   Committee
   Grading, as we all know, is not an objective process. It is subjective. Each student must fill knowledge and skills in different fields. Since the time in time students have received grades below their abilities, I am not

talking about bad faith, for anyone can be a bad grade student. In our society, we have people who have received grade of 90 or less just by telephone. A student who feels his lower grade is the result of poor work, but on the other hand he has passed this year’s grade on the same subject. This year’s grade on the same subject. This year’s grade on the same subject.

4. Supply the Essential Student Services
   The SBA must respond to student demands and supply the services which the students have a right to receive. Manifestly, these include student handbook, a student directory. I need to point out that some services, full publicity and use of all available IT services, expanded speakers programs, extensive and practical orientation, and arranging for Kent dorms at IT. Once again, however, many of these services depend upon the amount of funds allotted by IT.

5. Make the Library Accessible to the Student
   The present operation of the library is intolerable because of the inaccessibility of the stacks, we don’t have

A library, we have an archives. The dumbbell system of giving the selection is inherently inadequate.

6. Make the SBA Accessible to the Student – Visibility, Coordination, Cooperation
   Both the SBA and the student body share the blame for our spotty representation of SBA meetings and functions is almost nil, unless beer or coin fee is being served. Attendance at career placement seminars is usually so sparse that one would believe that we all have jobs lined up already. Likewise, the biggest issue at most SBA meetings is whether or not there is going to be a quorum. Absentees are one of the primary impediments to Board action.

Having been an active SBA officer and representative for the past two years, I have observed firsthand what should and should not be done by the SBA President. If Presidents have been rather afraid to work the Board, or thought they could run the whole show themselves, I was not afraid to work the Board, and I would never attempt to run the whole show. The internal functioning of the SBA requires the cooperation of all the elected representatives, and if elected I will not accept less than genuine effort by every Board member. Will SBA do both genuine effort?

Can you pass the VD quiz?

True or False

You can assume you’re safe from VD if symptoms haven’t shown up within five weeks of exposure.

False. Women usually don’t have any clear symptoms of VD. And if they do appear, they often disappear in some cases. The same condition can happen for a few days or months after the infection.

Candidates for ATS Offices:

The following statements were submitted to Technology News by the candidates for ATS offices. The statements reflect only the opinions of the candidates. Submission of a statement does not necessarily mean that the writer is a member of the ATS. Therefore, some candidates may not be represented by statements.

Elections will be held Monday, April 22 and Tuesday, April 23.

Don Kates
Secretary

In past years students running for a position in student government have been in favor of parking lots, lower tuition, and have in general, favored all good things. Following this tradition, I too, favor all things and am equally opposed to sins and the forces of evil.

Rick Sanchez
Treasurer

I am running to be Representative of the Sophomore Class because I know that, as a Sophomore, I can be a better member of the community.

I felt a need to run because...
Vote on April 22-23

Sophomore Rep.

I am running for the office of Sophomore Class Representative because I know I can handle the job. I can become an active member in our student government.

I feel a need to enter this race because I was dissatisfied with the status of affairs in ATS. Of course I endorse many of the proposed improvements for student life which have been adequately covered by the other candidates. But, I also believe that the realization of the common goals of all ATS students will come only from a more representative student government that is respected by the students and administrative body.

I will strive for these goals so please vote for Doug Beck, Soph Class Rep.

Doug Beck
April 22

Urbomobile

The Urbomobile is not an unusual car. It is intended to be a commuting vehicle for areas in metropolitan areas. It is intended to be a car to replace the family car.

The Urbomobile is to be comfortable, safe, and economical. It is optimized to carry one or two people only. It will weigh between 400 and 600 lbs. Its top speed will be around 60 MPH. It can be driven around town and used as needed.

A team of four freshmen engineering students in the MEAE department is investigating a reduction of the gas shortage problem by introducing a new commuting vehicle called the "Urbomobile." In order to get reactions from the public of its acceptability, we would appreciate it if you would fill out the following questionnaire and deposit it in the box in the STU lobby.

Your Age: Male or Female?
Size Preference for Car: Compact or Midi
Size Preference for Number of Wheels: 3 or 4
Type of Vehicle: Which one?
Would you buy a new or used vehicle?
Would you use it for commuting?
How many people would you carry in it?
Do you own a car at present?

James Granger
April 21

James Mandelcshon
April 21

Though running unopposed, I would like to take this opportunity to say why I am running. I have been in A.T.S. for a relatively short time. Yet, I see inherent benefits for the common student through this organization. The Kiwanis Club is passing and new blood will run A.T.S. I want to be there to help pull up where we leave off at the end of this year. I want to be one of the committee members to be selected.

Richard Jacobs
April 21

The Urbomobile project is a student-designed vehicle intended for use in metropolitan areas. It aims to replace the family car by offering a comfortable, safe, and economical alternative. The vehicle is optimized for two-person use, weighing around 600 lbs and capable of reaching speeds of up to 60 MPH. It is part of a collaborative effort by engineering students in the MEAE department to address the gas shortage issue through innovative solutions.
Dangerous Visions II: Abuse of a Form

by Frank Brooks

I realized late in the game that I had not addressed the "problems," the reasons why I had not written more about the "problems," and the reasons why I had not written more about the "problems." Reflections on "The Exorcist"

by James R. Maltz

I realized that it was kind of late to write a review of The Exorcist, as it's not really a movie I've ever seen. However, after a recent viewing, I feel there are some interesting aspects that deserve discussion.

The movie's initial scenes, set in a small town in the deep south, are a stark contrast to the later scenes set in a New York City hospital. The small-town setting allows for a more intimate exploration of the family's struggle with the demonic possession of their daughter, while the hospital setting provides a more clinical and objective perspective.

The performances of the main actors are also noteworthy. The father, portrayed by Max Von Sydow, is a fascinating character who is both comical and frightening. His reactions to the events unfolding around him are both humorous and terrifying, creating a complex and multi-dimensional character.

The special effects of the movie are also worth mentioning. The scene in which the demon throws up on the hospital bed is a particularly well-executed moment that manages to be both unsettling and humorous at the same time.

Overall, The Exorcist is a movie that is both frightening and entertaining. It is a film that can be enjoyed on multiple levels, whether one is looking for a horror movie, a drama, or a comedy. It is a movie that is worth watching and re-watching, as each viewing reveals new layers of meaning and depth.

When we hired these researchers, we invited them to raise more questions than they answered.

Making your mark in business used to mean carving a comfortable niche for yourself and staying there. Promotion was simply a matter of time; provided you could spend 20 years in the process. But today, business depends on technology. Technology that can wait a moment if it's going to keep pace with what's happening.

That's why, at Kodak, our basic reliance on scientific research makes the need for creative minds more demanding than ever. We must have people with drive and ambition, impatient to put what they've learned into practice. People who get all the freedom and responsibility they can handle, and tackle our problems with their ideas.

Which, we're happy to say, has helped many of our scientists yield important discoveries. For example:

The woman on the left has devised new and improved photographic materials for specialized scientific applications in fields such as astronomy and biology. The young man is an expert on surface analysis. His work in photoelectron spectroscopy helps to identify unknown substances. The woman on the right has a dual background in gas chromatography and trace metal analysis, which she's applied to analyzing pollution in rivers and streams.

They came up with new problems while solving some of our old ones. But they've uncovered some promising answers, too. As they continue their research, you may read about them again. The oldest is just over 30.

Why do we give young men and women so much room to test their ideas? Because good ideas often lead to better products. Which are good for business. And we're in business to make a profit. But in furthering our own business interests, we also further society's interests. Which makes good sense.

After all, our business depends on society. So we care what happens to it.

Kodak.
More than a business.

Science Seminar

A new monthly seminar on Science and Society has been created by a group of IIT faculty, IIT/NSF scientists, and near south side clergy. Each meeting will concentrate on a different aspect of the impact science and technology have on everyday life, locally and nationally. In addition, the series hopes to provide thinking among scientists and technologists on their own values and how they relate to the way we work and the world around them. Each seminar will feature a knowledgeable speaker and a question-and-answer session, over lunch. Prof. Peter Lykos, Dept. of Chemistry, will speak at the first seminar on "The New NSF Program on Computers and Society." The meeting is to be held on Tuesday, April 30 at noon in ITTR dining rooms D and E. Prof. Lykos was formerly chairman of ITTR's Information Science Center, which evolved into the Computer Science Department, and spent the last two years with the National Science Foundation Office of Computing. This office is the agency in charge of developing and funding research programs in computers and society. All members of the Technology Center community, students, faculty, and staff are invited to buy their lunches at the ITTR cafeteria and join Prof. Lykos in dining rooms D and E at the east side of the cafeteria. ITTR is located at 36th Street and State. A discussion period will follow Prof. Lykos' talk. Future seminars are being planned on the potential conflicts between energy and ecology, research and responsibility, and the role of the urban university in its community. The seminar audience is invited to suggest topics of interest and potential speakers.

Physics Picnic

The Society of Physics Students and the Physics Department are sponsoring a picnic on Saturday, April 27. The picnic will start at 11:00 am and will be held in section 2 of the picnic area at the Little Red Schoolhouse, located at 106th Avenue, southwest corner of 39th Street. The facility is located in the University of Illinois Research Park. The event is open to all students, faculty, and staff. A kite-flying contest is planned. Plenty of food and drink will be available. Everyone is invited to attend. Admission is $5.00 for adults, $3.00 for children, payable in advance to the Physics Dept. secretaries. For more information or to arrange transportation, contact the Physics Department.

CTA Elections

ATTENTION ALL COMMUTERS! The CTA will be holding a-large election in all commuter offices. The offices of chairman, vice-chairman, and secretary-treasurer will be filled when the election is held April 29 and 30. Voting will take place from 11:30 - 1:50. To be on the ballot you must register your name with the HUB Director's office between April 29 and 28.

Phi Eta Sigma

Phi Eta Sigma will hold its annual initiation ceremony on Friday, May 3. All active members who intend to take part in the ceremony and the dinner afterwards are requested to contact Hans J. Enderle, room 312 North Hall, no later than Wednesday, April 24.

AIA Meet

The student chapter of the AIA will be hosting the regular monthly meeting of the Chicago chapter of the AIA on Monday, April 22 at 8:30 P.M. in the HUB Auditorium. The guest speaker will be Richard Rude, chairman of the Butler, PA. He will deliver a visual presentation dealing with the use of solar energy in building design. Student admission will be $1.00 at the door.

BSON Meetings

There are only three Black Students Association meetings remaining this semester. For the meetings are:

Thursday, April 18 in the HUB, 12:30 Discussion of Constitution, dues, financial proposals. Also nomination of officers for next year.

Thursday, April 25 in the HUB, 12:30 Election of Officers.

Tuesday, April 30 in the HUB Mezzanine 303, 304 at 12:30. Discussion of plans for next year.

We Double and Triple Dare You!!!!!

We the members of CTA do hereby challenge the members of ATS to an open light in the final contest, a softball game. We are publicly challenging you and in fact dare you not to accept it. This contest will demonstrate to the entire student body which group is effective in achieving its goals. We expect to be notified by your迅速回复 next week so that the time and place fixed next in Stuart Building can be announced to the student body through this prestigious publication Technology News. We await your response ATS.

INSTRUCTIONS: Place an 'X' in the box next to the candidate of your choice. You may vote for only one candidate in each office.
Baseball Team Works for 7-6 Record

The ITT Baseball Team now holds a good 7-6 record, and the team is looking for more wins. Since the ITT spring trip to Mexico, the team has been working well; it has won six and only three losses so far.

At Kueker's, the Hawks went to Chicago with a 3-0 lead, as they booster ITT pitching in 1. Outfielding got the second loss in this game. The Hawks scored two runs in the first inning and went on to win 6-7. Two of those runs came in the seventh. The Hawks scored two in the sixth and one in the ninth.

In the second game, the Hawks' second baseman was Bob Anderson, who batted .400. The Hawks scored three runs in the fifth and a half and went on to win 7-3.

In the third game, Steve Miller started for ITT and pitched seven innings. The Hawks scored three runs in the third and fifth innings and went on to win 7-3. The Hawks scored four runs in the fifth, and the ninth. The Hawks scored three runs in the sixth and fifth, and the ninth.

In the fourth game, the Hawks scored three runs in the third and fifth innings and went on to win 7-3. The Hawks scored two runs in the third, and the ninth. The Hawks scored two runs in the third.

In the fifth game, the Hawks scored three runs in the third and fifth innings and went on to win 7-3. The Hawks scored two runs in the third, and the ninth. The Hawks scored two runs in the third.

In the sixth game, the Hawks scored two runs in the third and fifth innings and went on to win 7-3. The Hawks scored two runs in the third, and the ninth. The Hawks scored two runs in the third.

In the seventh game, the Hawks scored two runs in the third and fifth innings and went on to win 7-3. The Hawks scored two runs in the third, and the ninth. The Hawks scored two runs in the third.

In the eighth game, the Hawks scored two runs in the third and fifth innings and went on to win 7-3. The Hawks scored two runs in the third, and the ninth. The Hawks scored two runs in the third.

In the ninth game, the Hawks scored two runs in the third and fifth innings and went on to win 7-3. The Hawks scored two runs in the third, and the ninth. The Hawks scored two runs in the third.

Tennis Team 3-1

The ITT Tennis team played at home in two home matches last week and took on some strong teams at the Illinois Open. The ITT team lost to Western Michigan University on Friday night and then played a close match against Illinois State University on Saturday. The ITT team won 3-1 in both matches. The team is currently 7-2 for the season.

IM Softball

The IPC and IM softball leagues have been playing for a few weeks now, and the Fraternity teams have been over at both athletic fields at every chance, trying to get in a grueling schedule with the nine teams and the senior match playing one another. The IM play schedule is shorter, but it is a struggle to make up the lack of matches in the single-elimination round.

The Wednesday ITT went south in Chicago's campus to take on Western Michigan University. The ITT team won 7-3 in a close match. The ITT team is currently 4-1 for the season.

Soccer

The Varsity Soccer Team and all interested persons will hold workouts Tuesdays and Thursdays at 11:30 on the field west of the Stuart Building. For any additional information contact Coach Wunsche at Keating Hall or at 9-6184.

Congratulations! Technology News extends congratulations to Coach Tina Klein and her wife Cindy on the birth of their son Monday, April 15. Maybe a Klein will retake the baseball scoring records of all the greats and best wishes to the Klein family.

Athletes Honored

ITT Athletic Banquet

Four ITT student athletes have been selected to appear in the 1984 edition of "Outstanding College Athlete of America." The selection of these persons is based upon leadership, sportsmanship, and athletic accomplishment.

Chosen for the honors were:

- Ira Klein, in the Men's Basketball department, and a member of the varsity tennis team.
- Calvin Chow, a sophomore in the Men's Swimming department, and a member of the varsity swim team.
- Bruce Glawe, a junior in the Men's Swimming department, and a member of the varsity swim team.
- Elaine Aldridge, a sophomore in the Women's Swimming department, and a member of the varsity swim team.

The banquet is held at the ITT Athletic Banquet on May 10, and the selections are based on the candidates' athletic achievements and contributions to their teams and the University.
