Queen, Ugly Man Announced Wed.

This week's (1/31) wedding announcement in the Hawaiian Islands was not exactly what one would expect. Instead of the usual honeymooners, bride and groom were both paper-wearing, ugly men. Lisa E. Pelikan and Roblyer B. Rea, both computer scientists, met at the University of Chicago where they were members of the same research group. Nearby, Lisa was known for her work in electronics, while Roblyer was famous for his research in computer science. Despite their differences, the two were drawn to each other by their shared love of coding and hardware design. Lisa was the kind of person who could take apart a computer and put it back together, while Roblyer was known for his ability to create complex algorithms that solved even the most difficult problems. Their wedding was to take place on the beach in Hawaii, surrounded by family and friends who had come to celebrate their union. Lisa and Roblyer promised to continue their work together in the computer science field, using their combined talents to push the boundaries of what was possible. The wedding was to be a simple affair, with just a few close friends and family members in attendance. But for those who knew Lisa and Roblyer, it was a day they would never forget. They were a true couple, a team, and they would always be remembered for their love and dedication to the field they both loved so much.
Dewar Intrigued by Computers

March 1, 1974

Reluctant Dewar has taken his computer in his hands. After a week's trial, the world's Wally has given it up and gone over to the dark side.

Reluctant Dewar has taken his computer in his hands. After a week's trial, the world's Wally has given it up and gone over to the dark side.

RELuctant Dewar has taken his computer in his hands. After a week's trial, the world's Wally has given it up and gone over to the dark side.

Dewar is now using his computer to do his accountancy and bookkeeping. He has found that it is much easier to do it this way than to sit down and do it by hand.

The computer has also made it much easier for Dewar to keep track of all the numbers that he has to deal with. He no longer has to worry about making mistakes when doing the accounts.

Dewar is now much more efficient and productive with his computer. He is able to do his work in a much shorter time than before.

Dewar is now looking forward to using his computer for other tasks as well. He plans to use it to do his tax returns and to manage his investments.

Overall, Dewar is very happy with his computer and feels that it has been a great investment for him.

ATS Discusses Parking, Library

Police said parking lots and entrance to library were being left open for the following first Tuesday in March.

At least 400 campus students are to be on campus by 7 a.m. next Tuesday to start the week with music and dancing. According to Smith, more than 50 students have already committed to attend the event. The group will meet outside of the library entrance and will begin marching into the building at 7:45 a.m. The event is free to all students.

Placement

Campus Crusade for Christ Coming to IIT

The Campus Crusade for Christ is moving into the IIT campus. The Crusade is a national evangelical Christian organization. The purpose is to evangelize students, staff, faculty, and other members of the university community. The Campus Crusade is an international, nondenominational, Christian organization. It operates in more than 70 countries and has more than 500,000 members. The Crusade is committed to spreading the gospel of Jesus Christ around the world.

The Campus Crusade for Christ is currently located in the basement of the University Center. They are looking for a larger space in the future to accommodate their growing number of members.

The Crusade is working with the Office of Student Affairs to find a location on campus to host the group.

The Crusade is planning to hold events on campus, including a lecture series and a retreat.

All events are open to the public and are free of charge.

Student parking will be available near the event location.

More information can be found at the Campus Crusade for Christ website:

Suggestions For Union Board

As pointed out in last week's editorial, Union Board Activities are receiving weighty favor in favor of the resident students. We are not quite certain whether this is due to a newly awakened interest or a general dissatisfaction with the other resident activities. In either case, we are glad to see a considerable increase in student activities.

1. A Union Board Governing Commission should be established with representatives from ATS, CB, CTA, IFCC, IFC, UV and the ITT administration.

2. Events like Homecoming and Spring Thing should be scheduled to coincide with the management of the school. The difference in dates of these events was split between several people who worked independently of each other. Thus, the person running the Homecoming Queen/Western elections was unaware of what the person running the Ugly Man elections was doing.

3. Neutral elections officials should handle all aspects of the elections—voting, counting the ballots, and settling times for voting and polling places. Poll-watchers should be on hand to watch both polling and counting, but should not participate in the actual voting process. As presently used, poll-watchers are often more concerned with the final outcome than the accuracy of the voting process.

4. Gilmore voting should be eliminated, it harms to all candidates. The procedure should be by one-run, one vote.

5. The voting time schedule should be published in advance and should be rigidly adhered to. During this election, unlisted ballots were thrown in at McCormick Lounge Tuesday night. The polling place was not run by APD, but by people from 3rd North, who were not even working for Union Board. There was no attempt to open a second polling place for people who had been defrauded.

6. Events should be organized and plans made to accommodate the needs of all groups. For example, if Homecoming Queen and Ugly Man ceremonies had been coordinated earlier, perhaps more people would have attended.

7. Clearly, these suggestions can only be as effective as the individuals acting on them. Therefore, it should be the job of all students to work together, for the benefit of all.

Letters

Watergate

Dear Editor,

After reading the article, I feel that not only is it time for the Fall, but that there is a need for a new form of communication. The Watergate case and the subsequent controversy has led to a lack of understanding and respect for the government. It is important to recognize that the government is very complex and not just a group of individuals. The government is made up of many different people, each with their own interests and goals.

I believe that the government is an important institution, and that it is necessary to understand and respect it. It is important to recognize the complexity of the government and to be aware of its many different parts. The government is made up of many different people, each with their own interests and goals. It is important to understand that the government is not just one person, but a group of people working together.

I believe that it is important to understand and respect the government. It is important to be aware of the many different parts of the government and to understand the complexity of the government. It is important to understand that the government is not just one person, but a group of people working together. On Apartments

Dear Editor,

I recently moved into a new apartment and I have noticed a few issues that I believe need to be addressed. The first issue is the quality of the maintenance work. The repairs are often not done properly and the materials used are not of good quality. The second issue is the noise from the apartments above and below. The walls are thin and the sound can be heard clearly. The third issue is the pest control. There have been a lot of infestations and the management has not been responsive.

I believe that it is important to address these issues and improve the living conditions. I hope that the management will take these issues seriously and take steps to improve the situation.

Sincerely,

[Signature]
Some Cryptic Comments

Koloc, Quateman

By William Walker Barrows

Koloc and Quateman are disappearing from the TV scene. First it was "Koloc" and now "Quateman." Koloc was a mild-mannered plump boy who seemed to be put in TV to create a "touch of vitality." Quateman is also a boy but slightly more "vital" and was created to "round out" the "abnormal" male character of TV. Both characters have been eliminated because "miniature" characters are considered less interesting. The "latest" trend in TV seems to be toward the grotesque and the "abnormal." The future of TV looks bleak, but at least we can look forward to the "normal" characters coming back. "Normal" characters add variety to TV and make it more interesting. In the meantime, let's hope that TV will return to its "normal" state.

Letters

From John Smith: I agree with your point about TV characters. I think TV should have more "normal" characters. I remember when TV was first introduced, it had characters like "Mr. Roboto," "Mr. Normal," and "Mr. Abnormal." These characters were more interesting and added variety to TV. Now, TV seems to be stuck in a rut with the same characters over and over again. I hope TV will return to its "normal" state soon.

From Mary Johnson: I also agree with your point about TV characters. I think TV should have more "normal" characters. I remember when TV was first introduced, it had characters like "Mr. Roboto," "Mr. Normal," and "Mr. Abnormal." These characters were more interesting and added variety to TV. Now, TV seems to be stuck in a rut with the same characters over and over again. I hope TV will return to its "normal" state soon.

From Joe Brown: I think TV should have more "normal" characters. I remember when TV was first introduced, it had characters like "Mr. Roboto," "Mr. Normal," and "Mr. Abnormal." These characters were more interesting and added variety to TV. Now, TV seems to be stuck in a rut with the same characters over and over again. I hope TV will return to its "normal" state soon.

From Jane Doe: I also agree with your point about TV characters. I think TV should have more "normal" characters. I remember when TV was first introduced, it had characters like "Mr. Roboto," "Mr. Normal," and "Mr. Abnormal." These characters were more interesting and added variety to TV. Now, TV seems to be stuck in a rut with the same characters over and over again. I hope TV will return to its "normal" state soon.

From Bill Jones: I agree with your point about TV characters. I think TV should have more "normal" characters. I remember when TV was first introduced, it had characters like "Mr. Roboto," "Mr. Normal," and "Mr. Abnormal." These characters were more interesting and added variety to TV. Now, TV seems to be stuck in a rut with the same characters over and over again. I hope TV will return to its "normal" state soon.

From Susan White: I also agree with your point about TV characters. I think TV should have more "normal" characters. I remember when TV was first introduced, it had characters like "Mr. Roboto," "Mr. Normal," and "Mr. Abnormal." These characters were more interesting and added variety to TV. Now, TV seems to be stuck in a rut with the same characters over and over again. I hope TV will return to its "normal" state soon.
This is when the long hours of practice pay off. When you know you're as good as you can be. When you can enjoy it, the way it was meant to be.

It's the same with Pabst Blue Ribbon—It takes a lot of time, patience and skill to create our good old-time flavor.

Pabst—it's the way beer was meant to be.

PABST
Good old-time flavor.
The way beer was meant to be.

announcements

Stump Contest
The annual Stump Contest, sponsored by the Technology Club, will be held on April 15. The grand prize is a cash award of $100. Prizes will also be awarded for the largest, smallest, and most creative stumps. Entries must be submitted by March 30.

MMAE Speech
The Department of Mechanical and Materials Engineering will host a seminar on March 22. The keynote speaker will be Dr. John Doe, a renowned expert in materials science. The seminar will focus on the latest research and developments in the field.

EE Expo
The Electrical Engineering Expo will be held on April 8. Visitors will have the opportunity to see the latest in electrical engineering technology and meet professionals in the field. The event is free and open to the public.

present

Spring Get Away
OVER $300 IN PRIZES TO BE AWARDED! ENTER NOW! YOU COULD WIN THE VACATION OF YOUR LIFETIME!

Grand Prize

- One round-trip coach airfare for two to New York City
- A 5-night stay in a luxury hotel
- A dinner for two at a Michelin-starred restaurant
- A private tour of the Metropolitan Museum of Art

10 Each Second Prizes

- A $100 gift card
- A 1-year subscription to a magazine of your choice
- A $50 Amazon gift card
- A $25 coffee gift card

1,000 Third Prizes

- A free consultation with a financial advisor
- A 1-night stay at a local hotel
- A free meal at a local restaurant
- A 1-year membership in a local gym

RULES AND REGULATIONS

1. Open to legal residents of the United States and District of Columbia, 18 years of age and older.
2. One entry per person per day.
3. Employees of Curtis Enterprises and New Era Records are not eligible to enter.
4.Void where prohibited by law.
5. No purchase necessary to enter or win. Odds of winning depend on the number of eligible entries received.

**B-Ball Season Ends**

To Tad's parents:

The Wednesday night of the CIF West Branch Basketball Tournament—colloquially known as the "Big Game"—was marred by a series of unfortunate events. The game, which was the final match of the season, was held in the historic Tad Arena. The match was a heated battle between the home team, the West Branch Warriors, and the visiting team, the East Branch Knights. 

The game started off with high energy, with both teams scoring points quickly. However, the momentum shifted when the West Branch Warriors took control in the second quarter, leading by 15 points at halftime. The East Branch Knights tried to comeback in the third quarter, but the West Branch Warriors maintained their lead, ending the game with a 60-45 victory. 

Tad, in particular, had an outstanding performance, scoring a total of 18 points and grabbing 10 rebounds. His coach, Coach Jones, praised him for his efforts, saying, "Tad is a true team player. He never gives up and always supports his teammates." 

The victory marked the end of the West Branch Warriors' season, but it also marked the end of Tad's high school basketball career. Tad's parents, as well as the entire community, congratulated him and his team on their successes. They expressed their pride and gratitude for the hard work and dedication that went into making the season a success. 

As the final whistle blew, Tad's emotions were a mix of sadness and pride. He knew that this was the end of an era, but he was also excited about the future. Tad decided to pursue a basketball scholarship at a university, where he could continue to play and further his education. He looked forward to the challenges and opportunities that lay ahead. 

End of Season Celebration

The West Branch Warriors hosted a victory celebration at the Tad Arena on Saturday night. The event was packed with fans, family, and friends, all coming together to celebrate the team's success. Tad was presented with a custom basketball as a token of appreciation for his contributions to the team. The ceremony was attended by the entire coaching staff, the school administration, and the local community. 

Tad's parents delivered a speech, highlighting their son's achievements and expressing their gratitude for the support of the community. The event concluded with a group photo session, where Tad and his teammates were seen smiling and embrace each other, reflecting on the memories and friendships that were formed during the season. 

The West Branch Warriors' basketball team will be forever remembered for their dedication, resilience, and sportsmanship. They set high standards for future teams to follow, and their legacy will continue to inspire generations to come.
