McNeil: A Commitment to the City

by Michael Harrington

"I don't call myself a politician. I'm a businessperson. I think that politicians have made the decision to raise taxes, and I have made the decision to leave Illinois.

McNeil spoke Tuesday at the Municipal Auditorium. He is a candidate for mayor of Chicago.

For the past five years, he has been president of the Daily Press T.V. (organization that sponsors the projects of T.V. under McNeil's leadership. He is also working on a business plan for the West Side community, founding a school and running a business district.

McNeil announced that he would run for re-election in 1987. He has said that his campaign will focus on crime, education, housing, business, and industry. From his perspective as a businessman, he feels that the city needs to focus on commerce.

In his speech, McNeil discussed many of the issues facing the city, such as crime, education, housing, business, and industry. He said that the city needs to focus on commerce.

The fact that business is being praised is a sign of the times.

Science and Society Seminar

The cause of privacy has been greatly helped in the past by its invisibility. Today, for the first time in history, the government has the tools to see what we do in our homes.

James Martin

The concept of personal privacy has become an issue of great concern to people. In recent years, there has been a significant increase in the use of surveillance technology, which has raised concerns about privacy.

The concept of personal privacy is a right that is enshrined in the Constitution. It is the right to be let alone and the right to make our own decisions without interference from others.

The protection of privacy is essential for our democracy. It is the foundation of our freedoms and our ability to live our lives as we choose.
E. Duke McConnell: Commitment to the City

From p. 1

Leaving the city at a greater rate than it is coming in. Loss of business means loss of jobs which eventually translate into a high crime rate. Businesses have left the city, they're going to the suburbs. People no longer rely on the downtown and neighborhood shopping centers. They're more frequently going to Woodfield Mall, River Oaks, Southco and the like. McConnell proposed a 10-year tax increment reorganization to encourage business and industry to stay or relocate in the city. McConnell is also addressing businessmen that have left Chicago for why they have to do so in an effort to come up with some solutions to prevent others from following the trend.

McConnell was critical of some specialized training programs (STJ), which didn't train the people for the jobs industry needed them. He believes that the job training program should be coordinated with business so that there will be a use for the skills the trainees learn. If enough business and industry people aren't available, McConnell advocates public service jobs for the unemployed, unskilled people in the job training area.

Among the many problems facing the city, the inadequate housing of its people, the need for more of them. McConnell spoke on the need for low-income housing. Housing in the city is bad and the people live in terrible conditions. Through his work with the WDJ, McConnell has helped to improve a special housing program. The offer is especially popular in the Jackson Park Terrace. He described how it was planned to accommodate residents from three social strata, the middle class, working, and poor. If people from different income levels can all live together they can inspire each other, and that's what we need.

A person from the audience raised the question of providing good public housing in light of the current economic situation. McConnell responded by saying that the government must get out of the public housing and try to give a shot in the arm to business, even if it means going in the red at the beginning. He feels that the government and business are the only institutions that people can look to for help. McConnell also criticized the Chicago Plan for his belief that it's a program to sell the rich and affluent and would not benefit the most needy of the city.

Another member of the audience raised the question of the quality of the city's public education system. McConnell said that he has a task force currently working on solutions to the problem. They are going to a random selection of schools and making a report on their findings. "We have been sending out other communities where the system is working, and bringing these programs into the city to see if they could work here." He feels that there has been no commitment from the mayor to improving the quality of education. "We spend over $100 million on our schools, if a business spent that much money after your year and had no program they would find a way to change or close down," McConnell said.

The final question from the floor was the desirability of cities in the future due to more efficient communication and transportation systems in the suburbs. McConnell said those who pointed out that the cities would be unnecessary were the people who had moved to the suburbs, but there was "a glorious and magnificent concept. People must make a commitment to the city if it is to survive.

C.C. Gebhart was this month's winner of the Hub Recreation room giveaway contest.

Mikado Tonight

"The Mikado," opera tonight at the Hub Auditorium, courtesy of South Commons Music Theater. The Gilbert and Sullivan opera, set in Japan, will be staged tonight and Saturday at 8 p.m., Sunday at 3 p.m. Admission is $3.50.

Final rehearsals run this week in the Auditorium to the captivating accompaniment of light and shade, stage and general impression. In this way the rehearsals and the scene for the newest production, "The Mikado," have been successful, acclaimed two weeks ago, despite everything. Stage directorial efforts have the way of making ends meet at the last minute, and the Mikado Theater has put up with the tech personnel before. This is another successful season production, and 34th at IT. The Hub Auditorium has too many seats, too little stage, and numerous other drawbacks—but it's the largest facility the campus has to offer.

Dr. Robert Dewar of the Computer Science Department, as Master of Ceremonies, will participate in the opening event. He will present the opening event. He will present the Hub Auditorium—"The Mikado," opera tonight at the Hub Auditorium, courtesy of South Commons Music Theater. The Gilbert and Sullivan opera, set in Japan, will be staged tonight and Saturday at 8 p.m., Sunday at 3 p.m. Admission is $3.50.

announcements

Guest Speaker To Discuss Tractors

At this week's ASME meeting, a guest speaker from International Harvester will discuss the design of tractor implements. The lecture will focus on the initial stage of the implement from the conceptual stage to the actual manufacturing techniques.

In addition to this, details of the November 15 tour of Underwater Lab will be presented at the meeting which will be held in room 101 S1. November 12, at 12 o'clock.

Jim ASME

Physics Students Examine Membrane

Next week, the Society of Physics Students will feature tours of the FSR/Membrane Biophysics Laboratory and the High Energy Physics Laboratory. All interested are invited to come along; meet at 1 p.m. on Room 208, for both labs on Tuesday, November 11.

Professor R. C. D. H. of Chemistry Dept.

Attention Grad Students

There is a proposal being considered by the Graduate Study Committee that a formal requirement of 12 credit hours equivalent to courses in a specific department other than the student's major department be introduced into the graduate programs. I feel that this is a serious proposal and students' views should be presented to the committee. Before the final decision is made I am your representative in the committee. To enable me to present the reactions of graduate students, both in- and out-of-class, I must have your views and comments in writing by November 15.

R. D. H. of Chemistry Dept.

Road Rallye Coming

Elia Koppert will present a RALLYE on November 15th. Saturday rally starts at 8:00 a.m. in the northwest corner of the tent at 6 per car.

Driver and navigator must be required. Prizes will be awarded in the best three places.

Home Cooked Meals

The Kappa Sigma Club will hold its annual Pot Luck Luncheon for freshman women in the main floor of the dining hall on Tuesday, November 11 at the basement lounge of the women's dormitory. Hot home-cooked food prepared by the members will be served from 11:30 to 1:00. Freshman dorm students and residents only are invited.

Laurel and Hardy Visit BOG

T.A. again and every other day by the BOG this Thursday, Nov. 14 for their free film presentations. Laurel and Hardy on "Booby Traps" and "Night of Horror" are just two of their films. At this time, the members of the BOG may be nominated for the new chairmanship of the BOG. Any interested should apply to the BOG office immediately. A first prize in a big 3pound bag of tubers, with a list of stuff, second prize in a bottle of fine wine.

IIT BOOKSTORE

1200 S. Wabash
The question of good taste has once again arisen in connection with the subject material of TN's satirical publication, Federal Street News & Blues. It was set in motion by an interview with those who object to something or other in each year's annual edition of that publication.

I have, the editors of FSNB, have given to somehow, some of the best books of good taste, "Little Carcassons," the subject of a fictitious award ad, has provoked a negative reaction among members of the IIT staff. There can be no denial of that fact. Some have called for a front page apology. Others have called for psychiatric treatment for the contributor of "Little Carcassons." Technology News will do neither.

Indeed, the issue will be discussed here, on the editorial page, where it belongs. It is a question of editorial policy, and this page is the forum for such affairs.

But before anything else is said, a clarification of the position of technology editor, Michael Daley. Daley can now be seen as a typical example of the annual parade of opinions on questions of taste. To limit the subject matter of such a parade, regardless of how high an editorial rank, is the essence of the FSNB. Certainly it is not the purpose or intention of the IIT staff, notably the female secretarial staff of Main Building, to express disgust with the concept behind the character "Little Carcassons." To those persons we express our sorrow that they are offended by our parody of the legitimate but sometimes less than tasteful absolute, that periodically appear in Technology News.

The position is this: the material is not only important, but it is also characterized as a "mockable" or "targetable," but is not, as our nomenclature suggests, "mockable" or "targetable." The parody is a satire, and satire is a form of opinion. It is an opinion, and as such, it is protected by the First Amendment. It is not a form of speech that is inherently offensive.

Moreover, the issue is not a question of taste, but of the freedom of expression. The First Amendment guarantees the right of every citizen to speak, write, and publish without fear of government interference. This includes the right to parody and satire.

The following are examples of satire in popular media:

- "The Daily Show with Jon Stewart"
- "The Colbert Report"
- "Dr. Strangelove"
- "Monty Python's Flying Circus"
- "The Late Show with David Letterman"

Satire is a powerful tool for commentary and criticism. It allows us to hold powerful figures and institutions accountable. It is a way to challenge the status quo and bring attention to important issues.

Dear Editor,

Please extend my thanks to the Federal Street News & Blues for accomplishing a feat whichI think is more important than the original goal. The newspaper, which I think is a great place to work and to read, has produced a piece that is both entertaining and informative.

Monica Editor

The Technology News staff should be congratulated for its continued effort to provide a reliable source for Technology News readers. Special recognition should be given to the Federal Street News & Blues.

Week after week the TN staff puts together a paper containing articles dealing with major issues and events on campus. Because of this, the TN is an essential part of the campus community.

Dear EIC,

Thank you for the opportunity to have my work featured in the TN. Your staff's efforts are truly impressive, especially considering the limited resources available. I am proud to be a part of your team.

Vince Brown

Dear EIC,

I enjoyed this semester's issue of The Federal Street News & Blues. It was a great read. The way you were able to summarize the events with humor was fantastic. I enjoyed reading your stories and hope to see more of your work in the future.

Sincerely,

Dana Briach
 Poor Turnout

Weathers Soaks GOP Hopes

By: Michael Blake

November 6, 1974

The weather on election day in California was rainy, a common occurrence for the state. However, the rain did not dampen the spirits of the voters, as the turnout was relatively high despite the wet conditions. The main issue that affected the voting was the quality of the roads, which were flooded in many areas, making it difficult for some voters to reach their polling places.

In Los Angeles, the weather was cold and wet, with rain falling throughout the day. The roads were slick and muddy, making it challenging for voters to travel to the polls. Nevertheless, the turnout was high, with many voters braving the weather to cast their ballots. The Democratic candidates, who benefited from the rain, won many of the races.

The state's governor, Jerry Brown, won re-election in a landslide, receiving over 90% of the vote. The Democratic candidates also won the races for the U.S. Senate and House of Representatives. The Republicans did not fare as well, losing many races to the Democrats.

The rain also affected the presidential race, with President Jimmy Carter winning California by a narrow margin. The wet conditions made it challenging for voters to vote for President Ford, who lost to Carter in the state.

The weather on election day was a factor in the outcome of many races, with the Democrats benefiting from the wet conditions. The turnout was high, and the Democrats won many of the races, including the governor's race and the presidential race.

For: Masters, Engineer, and Doctoral Degrees

In the fields of: Electrical, Aerospace and Mechanical, Engineering, Computer Science, Physics and Mathematics

Benefits include:

- Educational stipend
- Dependent allowance
- All academic expenses
- Professional, employee benefits, and travel allowances

Value of these ranges from approximately $3,000 to $10,000 annually

Mikado

(continued from Page 2)

Picken and Carlo Kibuio also detail John Mogens as Pink-Yash.
Steve Napier as Nambi Poo.
Damon H. O'Carney as Forge Brown,
Virginia Picken as Kalisha,
Thomas A. Bailey as Pink-Bah.
Rita Marta Samson as Pitti Sing
and lots of group members.

The Matriarchal Theatre has not yet
been accused of being a pioneering,
avant-garde company,
but it knows entertainment.
If the thought of Gilbert and Sullivan makes you groan, too bad. This is a show where the audience has fun.

Look how much you can save with Allegheny's Discount Air Travel Plans.

It doesn't matter if you're going home for the weekend or just taking off with a group of friends. Allegheny can save you up to 21% off our regular fares, so you can get away on a budget.

The Allegheny Air System has a lot more going for it than just low fares. The flights are comfortable, the food is delicious, and the service is top-notch. You'll feel like a celebrity every time you fly with Allegheny.

These days grilling your own meat is considered old-fashioned. Because it's time consuming. But with Allegheny, we grill every day. So our meats are fresher. They taste better. So you enjoy.

We also prepare all our dishes fresh. (Frozen food is icky) And we make our own salads from our produce delivered daily. The rich home-style ice cream. Serve people. Not numbers. All in all, we provide quality food to taste at reasonable prices.

Bernie

I came from far away I remember the Sports, the Mountains, and general course of the trail. So it's been hot. Not bad. The NASL, has held in through lean years, learned from the mistakes of failure. At the year's end, the NASL, has held New York City and Miami, most exciting.

The NASL is leagues better than the WFL, and the WHA, drawn well in equal sparring. (Dreams of Seattle, Vancouver, Toronto, Rochester, and even succeeded with a team in San Jose, California, all offering something where the Oakland A's can't draw a million.) The NASL, like the WHA, would have wanted to break her last season, the right to keep playing.

Music

by James R. Malherbe

Starting Over: Raspberries (drag): Well, they want a hit record, so they make a couple of steps in the right direction. First, they dump bassist Dave Smalley and drummer Jim Bunkelfi for Scott McCarl and Michael McIlroy, respectively. This might be good: there seems to be a little more influx of ideas—but it's probably had, as both of these new guys seem to have been raised in obscure British rock of the sixties, and neither seem to want to go any further than that. Anyhow, McIlroy is an even worse drummer than Bunkelfi was, if such a thing is possible.

But the whole band agrees on something: this album's got to have guts and strength of conviction. So they lay down the first cut, "Overnight Sensation (Hit Record)," which could have been just the title signature, had it not been heavily stressed on vocals, sax, acoustic guitar, and background drums. But it's still another step in the right direction, the Brian Wilson-style production, and if you can hardly hear it, it's not worth Paul McCartney anymore. And besides, the only reason they want a hit record is "Play the "features another "ingoing" is really to "surprise? John Lennon on lead vocals? No, just Scott McCarl. Too bad if it was really John. I like being called "inflated" because it was. The Raspberries have never really made a hit album, but they had a hit record. The Party's over" takes another step backwards with an embarrassing Money Never Sleeps opening, and a newspaper-like background titled lyric. But Wally Bryson's strength of conviction really blazes through in the best vocals, danny. (I'm crazy, but I don't give a shit) I could tell, Wally, by the way you disguise those names and meaningless lines. I don't know what I want—" could this be 1969 and are we hearing Pete Townshend's post-adultish whines of environmental anxiety? No, it's 1974, and it's "I Can Believe You're Mine" has a hell of a lot of guts, presumably to make up for its blatant artificiality. That's okay—I can listen to it, too. It sounds as though Carsten never practiced the saxophone, since his voice cracks uncomfortably in several spots, and even though the middle eight is one of his poorest compositions yet. Oh well?

"SO" is another and John Lennon imitation, packed with enough clichés to make Pete Ham cringe in horror. The Raspberries purpose at the end is unwittingly inappropriate "Hands On You" in the "The Number One" in the "The Number One" is the George Harrison singing, is it? Sure, he wouldn't be caught dead on this particular bad joke of a track. Next in "Tiny Dancer"—oops, I mean "Starting Over." For the album's theme song, the number seven owes a lot to Elton John, and to Paul Buckmaster, for that manner—these monotonic strings came from somewhere other than Jimmy Stein-er's little head. The song's not too bad at all, but the production is just plain terrible. If these guys want a hit record, why don't they make one? They can start by getting rid of Jimmy Stein-er, whose terrible production and "sound" has been making them audibly incomprehensible for some years now. This album sounds like pure shit. Listening to a transistor radio through a vacuum cleaner would be comparable. They can continue by writing some better songs, learning to play a little better and practicing a little more, and by keeping those stupid studio musicians off their album. It means, I could have paled when I heard a sax lead in "Hit Record"—ugh! Talk about numbers following of trends!

The new Detroit Hawks are operating their wings and getting ready for the season, and isolated fan base, with a core of veteran players, has reasons to believe in the future of their team. The Hawks have signed a number of new players, and the addition of these players is expected to improve the team. The Hawks are currently playing at 7-4 in the Eastern Division, and they are looking to improve their record in the upcoming games.

Barnie Rambles On

In the Western Conference, the Lakers are getting ready for the season. The team has added a number of new players, and the addition of these players is expected to improve the team. The Lakers are currently playing at 8-3 in the Western Division, and they are looking to improve their record in the upcoming games.

ICMEN NEAR COUNCILDOWN WITH NORTHEASTERN

On November 11th, the ICMEN Football team enters its matchup with Northeastern. The game is expected to be a tough one, with both teams having strong defensive units. The ICMEN offense is expected to score well, while the Northeastern defense is expected to hold them in check. The ICMEN defense is expected to perform well, with the team having a strong unit that can dominate the game.

Vinnie At Large

This week I want to take a look at the NBA scene and what is in store for the teams. The NBA is on the rise, with more teams making a push for the playoffs. The Atlanta Hawks are one of the teams that are pushing for a playoff spot, and they are currently playing at 6-5 in the Eastern Division. The team is looking to improve their record in the upcoming games.

Thomas "Tom" E. Old

The buildings and streets are majestic, and the people are friendly. The city is a great place to live, and I highly recommend it to anyone looking for a new home. The city is known for its beautiful architecture, with many buildings that are over 100 years old. The streets are clean and well-maintained, and the people are always friendly. The city is a great place to live, and I highly recommend it to anyone looking for a new home.
