The United Campus Ministry has announced its plans and objectives for the 1975-76 school year. However, UCM is one campus organization which few knew anything about. It is an organized group of students, faculty, and community residents which oversees the activities of the campus church. It is the resemblance between UCM and the traditional image of the church that is important.

A quote from the UCM constitution says that the purpose of the UCM shall be to "articulate Christian faith in terms of values in a context that is relevant to our living and society. The ministry shall serve students, faculty and staff in their spiritual, moral, and ethical concerns. In recent years these concerns have centered around food co-op for campus and community residents, child care programs, mediation and discussion of social and political issues, a coffee house program, seminars on issues of technology, and human affluence. Obviously, this modern concept of a campus ministry is one of involvement in and commitment to improving the quality of life on campus.

The goals of UCM are articulated around such familiar needs and interests of students, faculty, and the residents of the community. Last week in a weekend program, the UCM Council members isolated these needs. High on the list of priorities is "the desire for greater communication among the members of the campus community." The traditional campus community....

The facts about Bill Singer's career for mayor of Chicago will be revealed Tuesday, October 14 at 4:30 p.m. in the Auditorium. This is a very favorable characteristic in another candidate. However, the qualities of a student in Chicago are still an issue, as many students are interested in finding them. The problem in the Chicago world is the problem of finding a city where the students can be found. In Chicago, the problem seems to be more difficult.

The problem in the Chicago world is the problem of finding a city where the students can be found. In Chicago, the problem seems to be more difficult.
Parking Dilemma Explored

by (Author Name)

WITH ONE DORMITORY house closed and rumors of a second to follow suit soon, it appears that conditions at IIT may be shifting more away from the resident community and toward a computer-decimated situation. This ultimately means more cars on campus competing for the same number of parking spaces.

To find out about IIT’s policy on parking, Technology News contacted Henry Wurtz, Superintendent of Buildings and Grounds.

According to Wurtz, the actual number of cars on campus has only increased about five per cent over the last five years. Further explained that the enclosed garage in the student housing, which is reserved for the resident community, has not been used to its full capacity.

A second possibility would be to build a parking garage. The cost of such a facility, for example, would come close to $750,000 at last year’s prices.

CONTRARY TO WURTZ, possibilities, however, would face many hurdles, including the cost and the limited space available on campus.

Solve your math problems as easy as T1.

We are living in the land of phenomenon quantities. Harbors the sublimates. Chicken by the ton. Sticks by the carrot.

David’s... in the land of the giants.

From the world’s leading manufacturer of electronic calculators.

Engineers, as nobody has to tell you, involves a lot of hard work.

Including long hours of calculation and complex paperwork where tedious can play hex with accuracy. So for you, here is a handy little calculator that can save you an hour and make an error.

The MINI-MEMORY features 90 operating hours (two years’ normal use) on four ordinary pen-size batteries. A 16-digit answer (5-digit readout) 999,999. Percent key. Clear memory. AC/DC operation. And all this at a suggested price of less than $60.

Our T1-10 scientific calculator is the ultimate portable calculator for student as well as practicing engineers. Imagine—the 10 most-used scientific math functions at one touch of a key—plus square, square root, reciprocal, polar, complex, fraction, and percentage.

You can check out the MINI-MEMORY and FX-10 at your school bookstore or Casio Dealer’s. Or the coupon will bring you more details plus the Casio quality story. Proof that when you buy Casio, you buy the best.

Contrary to Relief, the Placement agency, capable of managing a job; one of the problems is the lack of coordination among the various departments.

The Management major of a job should be classified separately.

If only a few of the students in the continuing should register for office, hiring will continue to be difficult, students who have not yet decided on a field may be at a disadvantage.

CONTRARY TO Relief, the Placement agency, capable of managing a job; one of the problems is the lack of coordination among the various departments.
Gordon

(Cont. from p. 2)

The concept of tenure, however, is designed to protect the university faculty from the wrath of a brutally oppressive administration apparently has been lost. Financially its serve is valued strictly in financial terms. Dr. Gately's case was determined "financially" as Dr. Gordon's.

The original concept of tenure was to protect the university from the wrath of a brutal administration that would otherwise abuse the faculty. As the prospect of tenure reform here, Dr. Gordon, like many other people at IIT, has his hopes on the new president for one thing. Her book in the office says she hopes for: "It is sad to see a faculty member, with tenure and transparent philosophy, be turned out and dined on by a faculty member, with tenure and transparent philosophy.

"The original concept of tenure was to guard the university from the wrath of a brutal administration that would otherwise abuse the faculty. Summer Job Placement Too

(Cont. from p. 1)

A good job should first sit down and decide what he wants to do for a living. After an interview with the recruiting officer, he can then modify his goals to meet the company needs. A good selection of company literature is available in the Placement Office, including material on company products, philosophies and employee programs.

CONTRARY TO POPULAR BELIEF, the Placement Office is interested in assisting all architecture, design, and management graduates who are interviewing.

One of the major problems is the lack of communications with students in these disciplines. Any architect, designer, or management major in the search for a job should be sure to give his resume to the Placement Office. It is also wise to have his resume reviewed for highlighting. Some companies will not come down to conduct interviews. Some companies will not come down to conduct interviews. Some companies will not come down to conduct interviews.

A new registered student is given an opportunity for a job through the office. He can make a much better approach to the prospective employer by asking for a job through the Placement Office. He is not asked to give his resume to the Placement Office. It is also wise to have his resume reviewed for highlighting. Some companies will not come down to conduct interviews. Some companies will not come down to conduct interviews. Some companies will not come down to conduct interviews.

All of the companies will be more effective this year. With rising wages, they will be more concerned with what they are getting for their money. Each industry will also be concerned with what IIT's program is doing for its manpower objectives. If a company is recruiting few IIT students, it might not exist and still be doing what it did in the future due to the time and money involved.

A STUDENT has a personal interest in a certain company, he will most likely be able to make a contact through the Placement Office. Noel Smith, I want to be of service to students on an individual basis. But because the student-site relationship is such a small, personal basis, we can not help on a large scale organization. We attempt to reach many people with companies; then it is up to them. If a student is not satisfied with the interview he has had, he should contact the
Lack of Planning

The numerous suggestions concerning alleviation of the parking facilities problems have been brought to the attention of the Student Government. The problems of inadequate campus parking are the result of a lack of planning and foresight. The campus facilities are designed to accommodate the needs of the present, but fail to anticipate the future needs of the student body. The Student Government has made several recommendations to improve the situation, but these recommendations have not been acted upon.

eUCM Unfolds

"74-"75 Plans

Cost, from p. 1 planning process similar to that used in industry. The assembled students, faculty, and alumni addressed themselves to needs for improved communication at ITI, people needs, structural needs, and the needs to reflect on the meaning of life and education at ITI. Dr. Martin, President of ITI, has met with Dr. Housh to discuss some of the needs and how UCM could fulfill these changes here. One of the basic things discussed was that problems must be recognized before anything can be acted upon. The formulation of UCM is to act in an advisory capacity. Some of the other members of the Council include Mark Neale, chairman, Susan McCrabb, vice-chairperson, Richard Weiland, secretary-treasurer, Michael Kall Hong Kong, Dennis Trevor, Scott Cooper, and Dennis C. More people recognize the need for change and improvement of the style of life at ITI. Achievement of specific goals and objectives can only be done through cooperation of all facets of the university community. Housh feels that prospects look good for an enlightened future at ITI.

Society of Physics Students

Come and see what SPS is all about! The Society of Physics Students will hold its first meeting of the school year on Tuesday, October 1, at 1:00 p.m. in Room 356 Siegel Hall, to elect officers and plan activities. All interested persons are invited to attend.

Hockey Club

The ITI Hockey Club is having its first open-practice on Wednesday, Oct. 2 at 10:30 a.m. The practice will be held on the sixth west ice arena. ST & Rte. 63 (1 mi west of Grove). For information contact Dennis Sheridan x370 or Al Groskinsky x 539.

Model Airplane Club

The ITI Model Airplane Club will hold its first meeting on Monday, Sept. 30 in the southeast lounge of Herman hall at 12 pm. All are invited to attend.

Camp Armour and Boulder Jct.

There will be an operating session of the Camp Armour and Boulder Junction Railroad, at 7:30 p.m. The railroad is run by the Illinois Tech Model Railroaders. All are invited to attend, 6th Floor Main Building.

Now that you have an engineering degree, we'd like to offer you an engineering career.

Sargent & Lundy's entire business is engineering design, and it's precisely what we would like to offer you to do. We are the nation's largest consulting and design engineering firm and specialize in projects for the electric utility industry. The industry and ourselves are growing continuously and we have an increasingly new need for graduates with bachelor's and advanced degrees in many engineering disciplines.

If an engineering career is your plan, we would like to talk with you. Please make an appointment through your placement office to interview with us. Our company representative will be on campus, October 2, 1974 and March 14, 1975.

The Adventures of Tintin-Herge, cartoonist publisher. Back when I was about ten or twelve, I would take my fifty-cent allowance to Walgreen's, where I would proceed to squander it on a hardcover 420-page comic book in Eastman watercolors. These books, which were approximately the size of a thick paperback magazine, were mysterious in the seemingly endless and fascinating adventures of Tintin, the kid reporter, his dog Snowy, his faithful and sometimes awkward travel companion Captain Haddock, and their band of supporting characters, which generally included the Thompson twins from Scotland Yard and the madly lovable Professor Ulysses Calculus.

After several weeks, I found out in my diary that the selection of Tintin books was limited to six. The only way to get the Golden Cruise, King Ottokar's Sceptre, The Secret of the Unicorn, Red Rackham's Treasure, Destination Moon, and The Cruelest Faces of the Moon was confusing, for the Tintin cartoon series on Eastland Chevrolet comprised two more adventures. The Shooting Star and Black Island, which should have been available in book form, but weren't. Also, the cover jackets of the books featured pictures of all the characters involved in the stories, and there were dozens and dozens of these that I didn't recognize. My musings were confounded by the disappearance of all the Tintin books from the shelf, and for six years the mystery sat unsolved.

Then the puzzle grew: more copies, his history of the coming revealed to me that there were more than twenty Tintin books, all of which had been available in English translated from the French by the international syndicate as a comic strip. What was more, a look into Books in Print showed that at least eighteen of these were still in print, all in English. I ordered those I was missing in the summer of 75, nearly a year later, after transatlantic phone calls and several wholly unprecedented legal moves. But I didn't recognize. My musings were confounded by the disappearance of all the Tintin books from the shelf, and for six years the mystery sat unsolved.

These are your keys to unprecedented calculating power.
Only Hewlett-Packard offers them.

We invite you to experience them on Hewlett-Packard's scientific and business calculators.

Come see for yourself how the ENTER key lets you "speak" with total consistency to Hewlett-Packard's three scientific calculators.

Come see for yourself how their W/PRGM-RUN switch lets you write and execute programs up to 100 steps long without knowing a special language on the world's only fully programmable pocket calculator.

Come see for yourself how the "n"", "PMT", "PV" and "I" keys on Hewlett-Packard's pocket business calculators replace all the compound interest, discount, bond and annuity tables commonly in use. Heres a thumbnail sketch of the Hewlett-Packard pocket calculators we offer.

HP-35. The original "scientific" electronic slide rule. Pre-programmed to handle 22 functions. Has one Addressable Memory Register. Costs $225.

HP-45. The most powerful pre-programmed scientific pocket calculator made. Handles 44 functions. Has nine Addressable Memory Registers. Costs $325.

HP-65. Hewlett-Packard's "small miracle." The world's only fully programmable pocket calculator. Also pre-programmed to handle 51 calculating functions. Costs $795.

HP-80. The most powerful pocket calculator available to businessmen. Pre-programmed to handle 36 financial functions. Costs $395.

If you're looking for unprecedented calculating power for your money, by all means see and test these machines. Come on in. And bring a stubborn problem.

Results of a complete study of the effectiveness of window shades in conserving energy were announced today by two professors of mechanical engineering at Illinois Institute of Technology who conducted the project. The IIT study was funded by a $15,100 grant from the Window Shade Manufacturers Association. Project co-directors were Dr. Rudin C. Ohr and Dr. Zelma Levav, associate professors in IIT's Department of Mechanical and Mechanical and Aeronautical Engineering.

A model room was constructed with a window. Outside winter and summer temperatures and solar radiation levels were simulated using a refrigerating unit and an arrangement of arc and incandescent lamps.

In winter, the use of a window shade reduces the outward flow of heat from a room, the study concluded, depending on such variables as the hanging arrangement, the outdoor temperature, solar radiation, the air circulating in the room, and the percentage of the window glass area.

Specifically, during winter, addition of a window shade reduces the amount of solar radiation going through the window by 25 percent. If the shade is hung loosely outside the window, the effectiveness drops from 20 to 15 percent.

Window shades are more effective in conserving energy than typical drapes or venetian blinds, the study found. Drapes and venetian blinds are in the 5 to 15 percent range, which is approximately one-half the benefit of an inside-outside-casement shade.

When direct sunlight strikes the window, the benefit of the shade decreases, and it is practical to raise the shade when the outside temperature is above 20 degrees F and the sun's radiation is direct.

The study found that in the summer a small window covered by a shade admitted 50 percent less total heat than a bare window. A shade on a window not exposed to sunlight is about 25 percent effective.

The results of the study indicate that, for a house with 15 percent window area, the use of typical shades reduces heat loss approximately 10 percent in winter. In the summer, shades reduce the energy required for cooling by more than 20 percent.

Continued experiments were conducted to help understand the heat transfer mechanisms and the effect of different shade materials. The study found that there was a 25 percent effectiveness if the shade's outer surface were aluminum foil and the inner surface white. Both sides were reflective, effectiveness climbed to 15 percent. A shade with a black outer surface and white inner surface was only 25 percent effective, and if the shade's outer surface was white and inner surface black, effectiveness was 50 percent.

Put it all together in AIR FORCE ROTC
Divers Start Early

National's freshman year has started off well for both the Hawk's top diver this season, but that depends on how hard he works. John Mertens has been coming to the last three years he has been getting in twice a week. He is now a senior high school, but has progressed amazingly quickly. Freshman Harley Macek rounds out the team. Coach Wendt has been working with the seniors 3 times a week. Coach Wendt feels Harley has the ability to be a good diver.

Anyone interested in trying out for the varsity swim team should contact Coach Bob Wendt at Echoc Pool Main West 9-24 and Fri. 24.

Baseball Better

Ball baseball has proceeded as planned with everyone getting a good warm-up before the season. Coach Klein has been working out with his players before school. He has been working on some of the fundamentals of the game while also working on the team's chemistry. The team has had several practices and they are looking forward to the season.

Letters to the Editor:

George Lockwood, John Davies, and Bruce Oliver have been waiting for their chance to break into the starting lineup. They have been working hard in practice and are eager to make an impact on the team. Their work ethic and dedication have not gone unnoticed by the coaching staff.

I-F News

I-F football entered its second week of action with the Dolphins on top followed closely by teams from Members.

Last week on Wednesday the T-F team took on the P-KAP team with a 28-20 win. chicago's EKAP team took on the T-F team. The P-KAP's defeated the Sinai, 26-0. Thursday's action saw the teams play against each other. The P-KAP's defeated the T-F team.

This past week, the P-KAP's defeated the Sinai, 21-0, and the T-F team with a 26-0 win over the T-F team. The P-KAP's defeated the Sinai, 21-0, and the T-F team with a 26-0 win.

Tennis

Fall Tennis is practicing 5 days a week and the freshmen are doing very well. The seniors have shown some fine young talent. It is not too late for anyone interested to contact Coach Swenson at X-458. Fall tennis matches have been scheduled.

The I-M tennis team results are posted on the I-M board in the main lobby and all matches played are listed.

I-M News

I-M touch football on Tues., Sept. 17 with Nature's Way topping The Winery Cowboys, 60-5, while M.P.I.C. fumbled against Zoo A, 36-0.

Nature's Way boasts a strong defense but will have to face some tough opponents, including the Tuesday League Champions, followed by The Winery Cowboys.

The Thursday League could be a battle between N.O.T.C. and Zoo A.

Vinnie At Large

by Vince Moss

This past week, the I-T soccer team started its second season as a varsity team. Soccer is one of the most popular sports in the world, and it has had its share of good players. The new team has been hotly debated in the NBA. The league has its work cut out for it to attract fans at I-T. This year, the team has made it easier to follow the team now than in the past. The field is located in the east of Kewlom Hall and the four home games will be played there on Wednesdays, September 22, Saturday, October 27, and Sunday, October 27.

Soccer started at I-T was started two years ago when the present, Assistant Coach, Steve Eastman, was the head of the I-T soccer club. So, with a handful of players, the team has grown in popularity. The team has worked hard to organize a schedule for every other club to play against each other. The team played very well in these six matches; in fact, they didn't lose a game. Their record was an impressive 6-0-1. Probably the most important game that season was against Northwestern University. The game was held at NU's field in a rain storm.

I-T built an early 6-1 lead but saw that lead slip away. One of their players was ejected for fighting and I-T was forced to play the next game for 10 minutes. NU scored two quick goals, but the team held on for the last 5 minutes to win 4-3. With that big win and an undefeated record, varsity status was awarded to the club for 1975-76.

The team's future looks promising as they have a lot of potential players waiting in the wings for the team. The record was 6-0-1. This was somewhat expected against a schedule of tough, well-established varsity teams.

The outlook in the next year is brighter with experienced players returning to the team. The team's future looks promising as they have a lot of potential players waiting in the wings for the team. The record was 6-0-1. This was somewhat expected against a schedule of tough, well-established varsity teams.

The outlook in the next year is brighter with experienced players returning to the team. The team's future looks promising as they have a lot of potential players waiting in the wings for the team.
