Crime Rise Prompts Campus Safety Measures

By Michael J. Harrington

Professor George Danforth is one of the most qualified faculty members to discuss the future of the newly consolidated College of Architecture Planning, and Landscape Architecture. Danforth was formerly the Director of the School of Architecture.

He feels that "One of the most challenging and interesting problems that may occur when you bring the three disciplines together is that they will be under one roof. This means that there is a potential for duplication of effort. Danforth noted that there are certain areas and courses which may be taught by both departments. However, this is not necessarily a bad thing." The merging of the three schools of architecture, planning, and landscape architecture, he added, will provide a broader base for research and teaching.

The idea of merging the schools of architecture, planning, and landscape architecture is not new. It was suggested as long ago as 1966 by the Architectural Accrediting Board. In 1967, the plan was put into effect and the resulting school of architecture, planning, and landscape architecture was known as the College of Architecture.

In order to avoid duplication, the College has been reorganized and a new administrative structure has been created. The new arrangement will make it more possible for the College to utilize the resources of the three schools more effectively. The College has also been given a new name: the College of Architecture, Planning, and Landscape Architecture. The new name reflects the College's commitment to the integration of the three disciplines and its dedication to the development of new educational programs and curricula.

Future of New College

The College of Architecture, Planning, and Landscape Architecture is a unique institution that is dedicated to the development of new educational programs and curricula. TheCollege has been reorganized and a new administrative structure has been created in order to avoid duplication. The new arrangement will make it more possible for the College to utilize the resources of the three schools more effectively. The new name reflects the College's commitment to the integration of the three disciplines and its dedication to the development of new educational programs and curricula.
Computers Here To Stay

Kelly, the Computer Science Department's associate director for academic affairs, said the computers will be used in all departments. He predicted that the computer revolution will continue to alter the way people work and live.

Public Schools Next

The program is expected to cost $1.5 million, with $800,000 coming from state and local sources and the rest from private donations.

IIT Seeks Mediator

IIT president Martin said the university is committed to finding a resolution to the dispute. He added that the computer revolution is just beginning and that the need for skilled workers will continue to grow.

The computer as a generalized educational tool is here to stay. The computer revolution is expected to change the way people work and live. Kelly said the university will continue to invest in computer education and research.

The program is expected to cost $1.5 million, with $800,000 coming from state and local sources and the rest from private donations.

The computer as a generalized educational tool is here to stay. The computer revolution is expected to change the way people work and live.
Express Yourself, Make Money

The Department of Humanities is pleased to announce its annual writing contest with prizes amounting to $800. The freshmen prize of $200 will be awarded to the best entry submitted by a freshman. A student may submit more than one entry, and entries may be essays, poems, stories, or plays. The Louis Prize will be offered in the two categories of fiction and non-fiction. Each entry will be limited to three pages. Both $100 and $50. The competition for these prizes is open to all full-time students at the Institute, undergraduate and graduate, except for teaching assistants. The subject matter of the essays should not be too technical or specialized in nature, but rather of general interest. Entries will be submitted in the envelope provided. Entry blanks are available at the Department of Humanities, Room B-20. The deadline for submissions is March 14, 1975. Take advantage of this rare opportunity and send in your entry.

ID Relocation Authorized

Last week fifteen ITT students attended the Society of Automotive Engineers' Student Industry Day sponsored by the student chapter of SAEE at the University of Illinois at 6:30 p.m. in the Union. The students were divided into three sections and were given tours of various companies and industries, including General Motors, Heilman, Farmall, and Universal Oil Products. The tour was led by a staff member of each company who conducted tours of the facilities.

The afternoon was followed by a dinner at the Union. The dinner was held at the Graduate Hotel in the Union, where the students were able to enjoy a meal in a relaxed atmosphere.

The reason for the students' enthusiasm was described as a "sudden schedule conflict.

UB/CTA:

That's Entertainment!

by Al Pervis of CTV Board

UB/CTA welcomes everyone back to school and hopes that an enjoyable vacation was had by all. Without a doubt, everyone enjoyed the new year's activities and holiday breaks.

For the Unions Board, CTV, and the Interfraternity Council, the new year will present a busy schedule. The Unions Board has scheduled a summit conference for the 17th in hopes of solving any issues that may arise between the Unions Board and the Interfraternity Council.

The CTV has planned a line-up of events to keep the students entertained. Among the events are a Winter Ball on February 15 and a Valentine's Day party on February 14.

The Interfraternity Council has also planned a variety of events, including a Winter Ball on February 15 and a Valentine's Day party on February 14.

The UB/CTA's schedule for the year is as follows:

- Winter Ball on February 15
- Valentine's Day party on February 14
- Other events planned throughout the year

**Letters**

A few years ago a popular television advertisement asked: "Why trade a headache for an upset stomach?" Many residents of IIT's apartments are asking, "Why did they decide to trade those ugly footpaths for those wooden fence eyesores?"

The lack of planning when the apartments were built is the obvious answer. Instead of building sidewalks where people are walking, they laid it perfectly straight, parallel and perpendicular to the concrete and expected people to follow them wherever they lead.

One of the most fundamental principles of design was ignored. Anything built for people is worthless unless people actually use it. Human beings do not enjoy being outside when temperatures plunge and rain snow fall. This naturally means people will take shortcuts and create dirt footpaths. These same paths become quagmires during each spring's thaw and rain. And each spring students are inconvenienced while the worst areas are reseeded. This year, they have traded one problem for an eyesore of even worse proportions.

Naturally the costs of tearing up existing sidewalks and replacing them with new ones where people would actually use them would be prohibitive. People will just have to continue to walk through;

But TN suggests that when IIT erects its next building, planners merely wait a month or so after the traffic pattern has been established and then put in sidewalks and landscape around them. Buildings are, after all, for people.

**Lack of Funds**

This is your chance to play reporter. Chances are that if you heard something today, other people ought to know it too. Now you could run around campus shouting at the top of your lungs, or you could call Technology News at x531, 532.

We ask you, which would be more sensible?
Harrington

Part One

Somehow this telephone number fell into my hands. It wasn’t supposed to. It turns out that the number is a secret “White Power Hotline.” After further investigation, I found out that the hotline is sponsored by the National Socialist Party of America at 919 W. Th. Ave.

I called four times, getting a busy signal each time. Apparently the words of wisdom are in great demand. I finally received the recorded message which was dedicated with all the hell, fire, and brimstone of an evangelical preacher.

Part Two

This is Tom Goodwin of Tom Goodwin’s White Power Institute of Illinois, calling you to say Goodwin for Alderman at Headquarters 751 W. 3rd Chicago.

The white residents of the 12th Ward are about to lose a man who is looking after their interests. The election of the so-called “beard” alderman Exignor in the past. While the black-base housing will bring support directly to your front door. The Goodwin Expressway will link with hundreds of other crossings on the entire southeast side.

The Goodwin Expressway will have the same effect on I-94 as a motorway on the construction of the Dan Ryan Expressway. The black community, located on the north side of Chicago, will face the same problems as the pizza express. The White people will be forced to face the consequences of their actions. I have a message for the coming weeks in the campaign, leaving behind them their homes and lands to 20th and berberian or No. 2. to remain in Chicago as theSend to the reader who is a member of the National Socialist Party of America.

Part Three

The “beef” message is updated weekly with a new topic. The orientation, however, remains the same. The Socialist Party is putting up one of its own members for Alderman at the 12th Ward. A week later the topic was plan control. “Candidate” Goodwin is advocating lesser restrictions on whites and more, of course, on blacks. Basically his arguments take the same approach: “The liberals are plotting to get hundreds of guns in the hands of criminals while blacks disarmed innocent whites. At this point I was wondering what a phone call to the Goodwin Committee meant to me. Maybe I could find something on the latest message. It informed me that some group called the Polish Homeowners and Taxpayers Council has initiated a campus candidacy. The “unrepresented” message quoted in the local paper, says that “Radical times demand radical measures — European events of this past summer have shown to all liberal people that there is another side to Europe.” The guy reading the envelope felt encouraged because the Polish Homeowners and Taxpayers Council speaks not only for a particular ethnic group but all white people.

When I called the headquarters I eventually asked the guy, “What is the Polish Homeowners and Taxpayers Council?” When I was asked if there was a phone number where I could talk to one of their representatives?” Before I could finish asking the questions, he began to tell me that that information wasn’t really available but it might be seen in the leaflets they would be passing out over the weekend in the 12th Ward.

Confident that I was a knowledgable sympathizer, the man said that I might find a Rohm rally on Saturday morning. If I asked him where he was going against Goodwin, he replied with, “Yes, there’s the incumbent Clerk and Speaker, some Popular Party.” I thought, “Oh, really; some Popular Party.” If they talk so flippantly about the ethnic backgrounds of their opponents, where does it end? What is this mystical group of whites from which Goodwin seeks support?

I asked the guy at the other end of the line, “How do you get that message number recorded? didn’t you get a lot of criticism?” He said, “We distribute the number only in the neighborhoods where we will get a proper response.” He seemed to feel that the White Power Hotline had become “established in the 12th Ward” and will remain as long as they can keep it going.

Many well-meaning people are of the opinion that it is best not to pay much attention to such things, maybe to ignore them they will dissipate into nothingness. But think for a moment! How productive is it to avoid, ignore, or even discuss as trivial and irrelevant such a campaign of racism? For a long time George W. Wallace was deluged by the avalanche of crapshoots in many cities. That man took his top contender this year, with people like Harlan Walker making a special appeal down South to keep his candidates.

Certainly, drawing attention to the “beefline” might prove underwhelming but it can also help. It’s more important to be able to recognize the falsehoods and certain adherents in the propaganda of the National Socialist Party of America. Racism, black or white, does not mean to take on such a blatant or crude form. It’s a model trick through that they’ve done here; lying concerning the issues of housing, transportation, crime and the changing nature of our cities. As long as any of those problems do away with the “offending” race you do away with all of the problems. But as long as social and economic factors remain the same, symptoms of the question of racial differences will continue.
now that you have an engineering degree, we'd like to offer you an engineering career.

Sargent & Lundy's entire business is engineering and engineering is exactly what we would hire you to do. We are the nation's largest consulting and design engineering firm and specialize in projects for the electric utility industry. The industry and our business are growing continuously and we have an increasing need for graduates with bachelor and advanced degrees in many engineering disciplines.

If an engineering career is your plan, we would like to talk with you. Please make an appointment through your placement office to interview with us. Our company representatives will be on the IIT campus October 2, 1974 and March 14, 1975.

Jan B. Wieczorek, B.S. 1971

I think your time would be well spent by talking to Sargent & Lundy. I am not only asking, but allowed to do the work I trained myself to do.

SARGENT LUNDY
55 East Monroe Street, Chicago, Illinois 60603 (312) 784-9200
An equal opportunity employer.

India Assoc: Meets

In an effort to expand its horizons, the India Association of IIT held a general meeting on January 13. The association, which boasts of 250 members (faculty, student, staff, faculty, etc.) on the campus, held a discussion to develop views on how the foreign students' lot on campus can be improved.

One point brought out was that Indian students on IIT's campus must break out of their self-imposed isolation. The isolation comes from the fact that the foreign student population has proliferated in recent years.

Another point was that the Association's president, Prabhat Kulkarni, is already taking steps in that direction. He said, "The short, efforts are being made to give international color to the organization, and the Association will do its best to cultivate campus life." He also expressed con-

An exhibit of a previously held India Association activity.

Kulkarni hopes to present these things and more for the IIT community. He said, "We want to see the rate of IIT at our affairs. We want to break away from the tight circle we have normal usage. In the future," he continued, "we hope to bring to IIT's any international activities, like fairs. In such occasions we would draw a larger audience from the IIT students and staff in general."

The possibility of picnics and long distance tours is also being discussed by the ISA.

Kulkarni's sincere hope is that ISA can branch out to become an integral and functioning part of the whole IIT community. He said, "I welcome any suggestions, feedback, or any communication whatsoever from the rate of IIT."

Interested parties are encouraged to contact him by telephone at 333-9490, or stop by in-east Hall, Room 11C.

He also stated that, "The number of foreign students have increased. Faculty, staff and organizations are invited to suggest joint entertainment programs that would like to see carried out in conjunction with ISA."

Student Robbed Here

Two men confronted an IIT foreign student and robbed him at gunpoint near the IIT Common the afternoon of December 30.

The men followed the student from the 8th Street entrance as he was returning to his dormitory. But the CTA car that was on duty at the station refused the men and reported their actions to the Chicago Police.

The armored car arrived only minutes after the robbery which totaled less than five dollars. Two suspects were apprehended only as the whistle blew. The suspects were facing preliminary hearing on January 3 and were charged with armed robbery. They are scheduled to appear in court at a later date.

The Campus Police awarded on the call.

Crown Hall is not the only IIT building with window problems. Last Wednesday, the windows in room 317 of the Student Union blew out due to high winds that morning.

Buildings and Grounds called the window glass contractor and the pane was replaced within an hour.
Air Force ROTC...The college scholarship program with sky-high benefits.

Some people might need to be coaxed more than a full college scholarship to enroll in the Air Force ROTC Program. So, if free tuition, lab and incidental fees aren't enough, the Air Force offers a monthly allowance of $1,000.00, tuition-free, in your junior and senior years, even if you are not on scholarship. And flying lessons to those qualified provide the most exciting benefit of all. Interested?

TECHNOLOGY NEWS

January 24, 1975

Want Your Blood

Illinois Institute of Technology will help reduce Chicago's
estimated blood shortage during a campus blood drive Tuesday
and Wednesday. Dr. John J. Donavan will direct the drive,
which begins in the morning and continues through the day.
Appointments are encouraged and the drive will be located
in Hermann Hall.

ASME SAE Smoker

The American Society of Mechanical Engineers (ASME)
and Society of Automotive Engineers (SAE) will hold a joint
meeting at 7:30 p.m. in Voss 212. The event will feature a
lecture on the present status of automotive technology and its
impact on society. The event is open to all interested parties.

Finer Photographs

The University of Chicago will hold an exhibition of fine
photographs from around the world. The exhibit is
an opportunity for photography enthusiasts to view an
diverse collection of photographic works. The exhibit will
be located in the Art Building.

Students Wanted

The University of Chicago is currently seeking
students interested in participating in its winter
program in Europe. Interested students should contact
the Office of International Programs.

U. of Chicago Benefit

The University of Chicago will host a benefit concert
featuring various local bands and performers. The event
will be held in the Union East.

Art Display

A collection of fine art will be on display at the
University of Chicago Art Museum. The exhibit will
feature works by renowned artists from various
generations and styles.

Hardballers Tryout

The University of Chicago baseball team will hold a
tryout session for new players. Interested individuals
should contact the Athletics Department.

Radio Research

Radio Research Center will host a seminar on
advanced radio technology. The seminar will feature
presentations by leading experts in the field.

music

by Jerry Newmark

The audience was vociferously applauding the group as they took their bows at the close of their hour-long performance. It was a new experience for the group, who had previously performed only in small clubs and local venues. The audience was clearly impressed with their talent and energy, and the group was delighted with the reception they received.

The members of the group, who had met while attending university, had always dreamed of performing together. They had spent months practicing and rehearsing, and were ready to share their music with the world. The crowd responded enthusiastically, and the group was thrilled to see their hard work pay off.

A special thank you to all of the fans who came out to support us tonight. We hope to see you all again soon!

 cinema

by James Moutar

After a long day of filming, the cast and crew of the new action movie gathered at the downtown cinema for a special screening. The movie, which was being released that night, had been a long time in the making, and everyone was excited to see the final product.

The audience was filled with anticipation as the lights dimmed and the film began. The story was intense and fast-paced, with exciting action sequences and dramatic plot twists. The actors had all put in a tremendous amount of work to bring their characters to life, and it showed on screen.

The movie received a standing ovation as the credits rolled. The cast and crew were elated with the response, and they knew that they had created something special.

We are so grateful to everyone who came out to support us tonight. We hope you enjoyed the movie as much as we enjoyed making it. We can't wait to share it with the world!

Puck
Trinity

On January 22 the ITT Hockey Team matched its second win of the season in defeating Trinity, 7-6. The Trinity team was led by Peter Johnson, who had three goals and three assists. The ITT team was led by Larry Clark, who had two goals and two assists. The game was scoreless until the second period, when ITT scored three goals in 3 minutes to take a 3-1 lead. Trinity scored a goal in the third period to tie the game, but ITT scored two more goals to win the game 5-3.

The running start

Get your career moving fast with the Pomona Division of General Dynamics. The first 5 years of your career are crucial, and could shape your future as an engineer. That's why it's important for you to be sure of your opportunities with your first employer.

Our new long-range programs have created unusual career positions in both manufacturing and engineering. Particularly for electronic and mechanical engineers. As the nation's leading developer of tactical missiles and ordnance, we're working at the leading edge of state-of-the-art technology using the most sophisticated equipment available. With it, and us, you'll have every tool you need to determine your own potential.

You'll also be working in one of the most delightful areas of southern California with top people in virtually every discipline. You'll get a fair chance because that means success for both of us.

Our representative will be visiting your campus soon. For an interview appointment contact your placement officer, or write to Mr. Al Souk, m/s zone 4-15, P.O. Box 3507, Pomona, CA 91768.

For information about other careers in General Dynamics write to Mr. Al Souk, General Dynamics Corporation, Naval Systems Center, St Louis, Missouri 63105.

**Movin' and Groovin' and...**

Starting at guard W. R. 164 lbs., #21 Willie Williams.

This has been a familiar introduction to fans of the Hattiesburg HS Hawks at Arthur Branch Field for the past three years. Willie has been a basketball player for the school, and he played as a forward on the 1972 football team.

In basketball, the Hawks have been successful in the conference. Willie has scored over 30 points in a game and is currently averaging 24.5 points per game. He has scored in every game this season.

**Hawks Get Stomped 102-77**

By Homer Holloway

Frogs' tail! The Hattiesburg HS Hawks' basketball team was soundly defeated by the South Cobb HS Stallions last night. The final score was 102-77. The Stallions outscored the Hawks in every quarter, leading to their victory.

**Henne the Busaque**

Irene Henne was the high scorer for the Hawks with 24 points. She was followed closely by Joni Smith with 20 points.

The Hawks were led by guard Willie Williams, who scored 18 points. Forward Jack Boyd also contributed 16 points.

**In Bunny Mines**

Last week before the busy season, the Sig Eps and the Delta Upsilon fraternities organized a basketball tournament to raise funds for the local hospital. Both teams ended up with regular season victories, and the tournament finished with Sig Eps as the overall winners.

**Matusch Takes Eureka**

IT's rarely seen team split its first double-dual tennis meet at home last Saturday. January 25, when it beat Eureka College by the score of 7-2 and lost to Northwoodian Illinois 7-1. For the last two years Eureka has beaten IT twice, and this year they won the IT/EMT women's match as well.

**Volume 96, Number 4**

**Brownell for New Faculty**

by Michael A. Brown

Dr. Robert J. Brownell, dean of students of the University of Mississippi, has been appointed Brownell's position. This was accepted Brownell's position as a full professor of English at the University of Mississippi.

Bill Brown, director of the Student's Office, said that Dean Brownell's position is a major responsibility of the University's academic affairs. Brownell has been on the faculty of the University for over 10 years, and has been a member of the English department for the past 7 years.

With the creation of the new position, the office of the dean of students has been reorganized. The office now has several major changes that affect the function of that office.

**Smith Takes the Lead**

Although there is no mention at IT's affairs in the article, it is implied that Smith is the new leader in the private industry and the intermission period of the president's term.
