The following letter was presented to Brown by the president with the approval of the Board of Directors. It was the first time that RA positions had been made available to students, and the response was overwhelming. A total of 156 students applied for the 8 positions. The selection process was highly competitive, with over 150 applications received for the 8 RA positions. The selection committee was impressed with the performance and selection of students who applied for the RA positions. The committee was also impressed with the responsiveness of the students to the RA position and their contributions to the RA community.
Future Bright

E³ Moves Ahead

Gebhart Goes to ATS

In its Tuesday, February 11 meeting ATS considered a motion to throw Gebhart support behind a new student. Gebhart for the position of ITS (Ivy League) student. The motion was brought to the floor by former ITS student Lavi. Gebhart presented support for the ATS student's candidacy for the position of ITS student. Gebhart stated that he supported GBHart for the position because Gebhart believed that he had the qualifications and the potential to excel in the role.

This is one of several attempts made by Gebhart to secure support from the student body. Gebhart has been very active in promoting his candidacy and has been successful in gaining the support of various student organizations. Gebhart's efforts have paid off, and he is expected to be elected to the ITS position.

The search committee will now receive applications for the position. The committee will review applications and select a final candidate for the position. The selection process will be open and transparent, and the committee will make its decision based on merit.

now that you have an engineering degree, we'd like to offer you an engineering career.

Sargent & Lundy's entire business is engineering and engineering is exactly what we would like to do. We are the nation's largest independent engineering and design firm. We specialize in projects for the electric utility industry. The industry and ourselves are growing continuously, and we have an increasing need for graduates with bachelor and advanced degrees in many engineering disciplines.

If an engineering career is in your plan, we would like to talk with you. Please make an appointment through your placement office to interview with us. Our company representative will be at the Spring Career Fair on October 2, 1974, and March 14, 1975.

ISA Progress

by Dan Yachini

Professor Benjamin de Brie Taylor, director of the Institute of Design at IIT, appears to be a little under the gun right now. The future of his department is still uncertain pending the inclusion of a heart of the new School of Architecture, Planning, and Design. His future as head of the ID section of that college is uncertain as well. Rumblings currently heard by faculty and students charge that he is "an artist and not an administrator." Taylor denies this claim by saying that he has been an administrator at Parsons and Pratt Institute in the past and that he is the person to whom faculty and students are accustomed. He is more accurately labeled "an artist not a designer." He believes this charge has been brought against him by someone who has "been burned" and a little fearful of the tradition here. Because of this, "I have educated myself in design both before starting any reform.

The tradition refers to that of the Bauhaus, the foundation of most IIT architecture and ID departments. Lately, charges have been leveled that ID is losing the Bauhaus tradition and turning to "academic" and "unimaginative" ideas.

Taylor responds, "The Bauhaus is IIT. If you stick with the past, you're in trouble. I feel that their strength was largely their adherence to the Bauhaus. It was a strong foundation in design, but too narrow. Now almost every design school in the country will be driven out of business after 40 years--some of the Bauhaus foundations have started their philosophies. We are no longer alone, nor can we stop growing," he said.

As far as a discussion of his effectiveness as an administrator, Taylor is open minded. "I might very well be an efficient administrator," he said. But he pointed out that the ID administration was like before he arrived. "When I came here, it was a hodgepodge. We have been an acting director then.

That was back in September of 1973. At that time, IIT's James S. Montague titled me acting director, and according to some ID students, the paperwork was real hell. Said one, "There was no one to handle complaints or any problems you might have.

In the time he has been here, Taylor has tried to improve the administrative structure working again. "It took long enough to get the paperwork under control," he said.

That problem wasn't made any easier by the distance between the School of Architecture and ID, which is formerly a part of the school's administration. "I don't know what we're ever going to do about our problems but I definitely don't have the time," he said. "It's not going to be easy or going to be easy but going to be easy but we're going to have to do it ourselves.""
We Have Doubts

It may be epochenous of us, but we have come to think of 1973 as an historic year for IIT. This school is now in the process of changing its character without changing its mission. The ideal--an institute of genuine national prominence in science, engineering, architecture, design, and management--which will have a campus environment that will attract and retain students and faculty.

To achieve this ideal, it is necessary to cut off areas of the institute in coordinated motion. This can't happen until all personnel changes are completed--and the search for a new President is successful. Development projects must continue. IIT will remain fluid for a while. Before the fluid solidifies, and IIT assumes the character it's likely to have for the next several years, a new Dean of Students will be selected.

We can't guarantee that our poll will carry any weight with the Selection Committee now being assembled, but we feel that the students--especially those who'll be here for the next few years--should have some voice in the approval (or rejection) of DOS candidates. Naturally, we have some reservations. And a few endorsements.

It should come as no surprise to anyone who has followed the news of IIT, we oppose the idea of promoting Carlton E. Gebhart from Assistant DOS to the top slot. Gebhart's opposition to TN policy has very little to do with Dean Busse, but is a personal position. Many students consider Gebhart frank, open, and forthright, and it's true that he doesn't shun the company of students--he avidly supports the IIT Hockey Club, Alpha Phi Omega, and serves as Faculty Advisor of Tri-Phi fraternity. But Gebhart has also shown himself--on several occasions--as hot-tempered, irrational, and clandestine. The Dean of Students' Office has never taken a single step to put the Disciplinary Committee in greater balance with respect to students. Gebhart claims to want to change this. Despite President Martyn's vow to give the students greater disciplinary jurisdiction. Less than a year ago, Gebhart was on record as saying that students "should feel a bit fearful" of the Dean of Students.

So we have no sympathy for the unprecedented campaign being run on Gebhart's behalf--a campaign for more student support for Gebhart's promotion. We have no objection to him seeking the job, but we question the ethics of a man in power seeking a mandate from the people he can influence.

Rumor speaks of Greg Cook. Assistant Academic Dean, as a major contender. Cook hasn't begun actively campaigning, but our preliminary poll showed a certain number of students supporting him. However, we feel that Cook is not sufficiently outgoing to work well with students. The DOS in the IIT is that supposedly in the making should be easier to mix with students--both as individuals and as organizations. Also, Cook has stirred resentment among certain women students, who feel that he doesn't take a woman's career seriously.

So much for negative thinking. There are people now connected with IIT who are, in our opinion, excellent candidates for Dean of Students--unfortunately, most of them have expressed no desire to take the job. As reported elsewhere in this issue, David E. Busse, Assistant Dean of Students for Financial Aid, is leaving IIT for a position at another school. Edwin F. Steuben, thought by many students to be the best teacher in the E & PSC core, is currently unwilling to extend the administrative interest he has shown as Chairman of the Faculty Senate. Serop Kalpakjian, well-liked by the handful of students acquainted with him but not very visible to the student body as a whole, told TN he has "no desire at all" to take the Deanship. There are others--the well-known, like Robert Ohara, the potential dark horses, like Peter Bellemann--but so far none. But Dean Gebhart has expressed interest in the post.

We thought Gebhart might not make a good fit. But we hope Professor Steuben and Kalpajjian will reconsider their positions. IIT can't stand fluid for long.
Bridgeport in the Springtime

By Dan Yavelich

"What do you mean you haven't been to Mayor Hizzoner only live here?" "Yes, I was born here," said the说话人.

Bill Valetich,

The story goes that the neighborhood's (the Mayor's neighborhood) Bridgeport is being overrun by a wave of new residents. The influx of new people is causing a boom in businesses, with many new restaurants and shops opening up in the area.

Another aspect of the neighborhood is the increase in crime rates. However, the police department has been working hard to keep the streets safe.

Overall, Bridgeport is a vibrant and diverse neighborhood with much to offer its residents and visitors alike.

Join the third biggest family in the world.

Imagine an order of 27,000 Brothers and sisters in 75 countries around the world (that's a pretty big family). But there's a difference: the Salesians of St. John Bosco are all about a large family of community-minded men dedicated to the service of youth. (And no one gets lost.)

In Italy in the 1850s, a chance meeting between a poor peasant and a street urchin served to create a movement of such success that it is still growing today. Don Bosco became the priest who brought youth back from the streets—and back to God.

He realized that a program of play, labor, and prayer would make useful citizens of the world. He created a school with an emphasis on religious and intellectual welfare that is unique in the world. The atmosphere of family.

The years of St. John Bosco are celebrated each year at the Salesian Missions. This is the way it is. The Salesian experience isn't learned—it's lived.

For more information about Salesian Friars and Sisters contact:
Father Joseph Meach, S.D.B., Room 170, Salesians of St. John Bosco, 405 E. New Haven Ave., New Haven, CT 06511

Letters

Dear Sirs,

I feel it is pretty un-sportsmanship for a person to issue threats of physical violence towards one who criticizes the referes in a sports contest for their apparent inability to referees the game correctly. Poor referee-make for a poor game; hurting both sides.

Also, threats of "I'll kill you" won't enjoine me from observing any future games with which I wish to attend, since they are open to all fans.

I am speaking in reference to the Intramural Volleyball Championship played last week in which two excellent teams battled to a close finish under the handicaps of poor refereeing.

One cannot expect professional referees—but what judgment calls that were made flared tempers and created unneded scandals to the viability of each team.

If violence and animosity must accrue from such an event, what is the object of participating?

Sincerely,

Mary Lee Schultz

---

Dear Mr. Cooper,

To the Editor:

We read with much interest your cover story about the recent retirement of Dean Bashrow from the position of Dean of Students (February 17, 1975 issue of Tech News). Of more interest to us, however, is the fact that you yourself were appointed to the same position.

As a student and a concerned student of IT, we feel that the student body, as a whole, have often been heard, but have not been considered in the selection of this office. Since the student body has no official part in the selection of administrative personnel, we submit that all students should have some say in the selection of this office.

The position of Dean of Students is not an easy one, and we believe that all students should have some say in the selection of the person to fill this position. Only then will the students have at least expressed our opinion of the matter.

We understand that you are a good friend of Carl E. Gobert and, respectfully, recommend that Carl E. Gobert be considered for the position of Dean of Students.

Sincerely,

The Brotherhood of Tau Epilson Phi

---

Dear Sir,

One sequence in the film is the music, particularly that which is paired with the train's movement; it just doesn't quite fit. One musical delight does appear, that's when Pollack is dancing in "The Good Ship Lollipop." It seems absurd, but it becomes laughable.

The film seems to drag toward the end, but one can't help but make a simple addition to the complexity of the story. Also, once the audience calms down, be aware of the film's ending, the last clip which is a film of this grace which shows down considerably and un-necessarily.

Comment: The film ends on a high note as Pollack deserves better than to suffer broken arm on stage.

Sincerely,

F. A. "The Jackal"
Open Classes

Eng. Fair Here

ITT's second annual Engineering Fair, held on Monday, February 17, will include, among the exhibits by participating high school students, such projects as models of a gyroscope, a sports car designed by students, and a solar oven built by students. The University Relations department will be open to high school students for the day.

CAN Students at ITT

In some cases because of the short time on campus, students at ITT have been unable to attend classes. This is not always by choice, but rather because of the necessity of attending to other obligations. The university has been aware of this problem and is making efforts to improve the situation.

Following a noon luncheon, Dr. Leonard Seidman, head chairman of Instructional and Engineering departments and nationally prominent radio commentator, will discuss "Future Trends in Engineering," and student members will receive awards. The Fair and Open Classes Day begin at 9 a.m. and end at 3:30 p.m.

IBT will host its annual Open Classes Day this Monday, February 17th, in conjunction with the High School Engineering Fair. Nearly 100 classes in every department will be open to high school students for the day. Students from across the country have been extended an invitation to observe typical classes in session, and special displays and exhibits presented by several academic departments, including those of the High School Engineering Fair. There will be two orientation sessions for visitors at 9:30 a.m. and 1:30 p.m. in Hermann Hall in which they will be briefed on the program for the day and ITT in general.

Boyle Hits for 22

From p. 11

Boyle scored the last minute looking for the last shot and playing for a tie. They found neither. With 25 seconds left, Delaney stole the ball and got it downcourt. At that point, Purdue-Calumet, with only three team fouls, fouled Bob Delaney. The foul was ruled by the official to be intentional and Delaney was awarded two free throws. He made one and upped the score to 69-67 with seconds left to play. Purdue scored once more to end the game 80-67.

IM/IF Picks

The Intercollegiate Basketball League is entered in third week of competition with the Sun River being the part. They took a 70-69 win over the Iron Tiers to finish the season. The league consists of teams from around the country.

Iran Takes V-Ball

by Vicky Melise

Last Thursday, Iran and the Delta team met to decide the championship of the V-ball tournament. The game was the final round and was a best of 3 series. The Delta team won 2-0 and took the championship. The game was played in the Recreation Center and was a thrilling match. The Delta team played a tight game, scoring points with ease. They were able to hold off the Iran team and win the final set 25-19. The Delta team is pleased with their victory and plans to celebrate at a later date.

Betty Sue and the WBL

Betty Sue forms tons down an offer to play in the New York team for the WBL's independent women's basketball league. Everyone in the league is happy. Betty Sue was one of the first women to be recruited by the team and she is a key player for them. The league is growing and gaining popularity with each passing day. Betty Sue is excited to be a part of this new league and is looking forward to making a difference in women's sports.
Hawks Win 59-58

In one of their best under pressure performances of the year, the IIT Scarlet Hawks downs Purdue-Calumet in an away game by the score of 59-58 and eight points.

As the score would indicate, the game was a close one throughout both halves. The greatest lead at one time was posted by IIT as they led Purdue-Calumet by five points during the first half. Purdue-Calumet played a very effective 1-3-1 zone which many times was indistinguishable from the 2-3-2. Their strategy apparently worked as they forced the Hawks to shoot from the outside.

And that's where the Hawks met the challenge. Their shooting kept them in the game, and much of the success in that department may be attributed to the hot hands of Shane Boyce who pumped in 22 points and Prince Lee page 19.

Swimmers Best in 15 Years

IIT swimming coach, Donn Mather, described this last week as "the best and most successful in IIT varsity swimming over the last fifteen years."

The Tudor Swimmers took four victories in two double-duel meets, the first two this year. They defeated the teams of Loras College and Iowa City, and in the last two meets, they defeated the teams of Bradley and Iowa State.

The last time IIT competed against Loras was two years ago in their pool. IIT was ranked by the United States Olympic Committee as the fourth best collegiate swim team in the nation.

In IAB 303, with Loras' O'Donugha at 27-35, IIT's varsity swimming record is now 8-4, and with only two dual meets to go, the swim team's best record in two decades is assured. Coach Sartori and the IIT swim team are looking for a ten and four record for the year.
TN POLL: DEAN OF STUDENTS SELECTION

Fill out your choices and return to TN by campus mail or directly to our offices. To assure that this sampling will carry weight, please include your social security number (or, if none, IIT ID number) so that we can guard against multiple voting without forcing people to sign their ballots. The ballot will be separated from the number after each number is verified.

Because the Dean of Students' Office has historically been looked upon as an adversary, as well as an advisor, of students, feel free to fill out both the MOST DESIRABLE and LEAST DESIRABLE parts of the ballot. You may select one candidate or rank several of them. (In column one: 1—most desirable; 2—second choice; etc. In column two: 1—least desirable; 2—second worst; etc.)

The nominees listed here are those of TN only; some are actively seeking the office, others are considering it, a few are outright dark horses. Use the space for write-ins, if desired.

STUDENTS ONLY.

MARK A. ANVARIPOUR, Assistant Dean of Students for International Studies
PETER P. BELTEMACCHI, Associate Professor of City & Regional Planning
DAVID E. BUSSE, Assistant Dean of Students / Financial Aid Officer
PAUL R. CARLSTEN, Visiting Lecturer, Political Science
GREG COOK, Assistant Academic Dean
ROBERT B. K. DEWAR, Associate Professor of Computer Science
CARLTON E. GEBHART, Assistant Dean of Students
JULIE P. GORDON, Incoming Assistant Dean of Students
MARGARET HELLIE-HUYCK, Assistant Professor of Psychology
JOHN HOUCK, Chairman, United Campus Ministry
SEROPE KALPAKIAN, Professor of Mechanical Engineering
ROBERT C. LEITZE, Assistant Dean of Students
PETER G. LYKOS, Professor of Chemistry
EDWIN F. STUEBEN, Associate Professor of Mathematics / Faculty Senate Chairman

social security / IIT ID number
