Grad Students Make Waves With RA's

Michael A. Horowitz

"There aren't many students who have been involved in a project that will benefit the entire student body," says Gordon, Asst. Dean of Students.

"That's what we're doing," he adds, "and I think it's important for all students to be involved in this."
Don't let the price of a college education shake up your world.

The price of a college education is skyrocketing. Fortunately, the Air Force has something to catch up with it. It has increased the number of college scholarships available to regular qualified men, as well as for non-duty committed and advanced enlisted students. These new 11 scholarships, reimbursement for textbooks, as well as lab and incidental fees. Not only that, but you can receive $100 monthly as a tax-free allowance.

To cash on all this, just apply, qualify, and enroll in the Air Force ROTC at your local base. For more information, contact your local college registrar. Chicago, Illinois, summer is your best bet! You'll be on your way to a fine college education, an Air Force officer's career, and a future in the Air Force.
Spring Conference: This Saturday

The Programming and Organizing Committee of Stanford University Computer Society will convene Saturday, February 10, at 9 a.m. in the Music Recital Hall. The agenda includes a keynote address on database systems by Dr. James Gray, a presentation on computer graphics by Dr. John Hanley, and a panel discussion on the future of software development. The conference is free and open to the public. For more information, contact the Stanford University Computer Society at 510-723-4321.

Lecture...

The annual lecture series at Stanford University features renowned experts in the field of technology. This year, the series kicks off with a talk by Dr. Jane Smith, who will discuss the latest developments in artificial intelligence. The lecture will be held on February 12 at 7 p.m. in the Auditorium. Admission is free. For more information, contact the Stanford University Department of Computer Science at 510-723-4321.

... and Lecture

Interdisciplinary courses and seminars, such as Computer Science and Economics, are offered at Stanford University. These courses integrate knowledge from multiple disciplines and are taught by faculty members from both departments. The courses are held on Mondays and Wednesdays from 10 a.m. to 12 p.m. For more information, contact the Stanford University Department of Computer Science at 510-723-4321.

Earth-Ark Kite-Fly Coming

The Earth-Ark Kite-Fly Competition is held annually at Stanford University. This year, the competition will be held on Saturday, April 1 at 3 p.m. in the quad. The competition is open to all, and contestants can register on site. Prizes will be awarded to the winners, and all participants will enjoy a day of kite-flying fun. For more information, contact the Stanford University Earth-Ark Society at 510-723-4321.

Theatre III: Drama Alive with "Loot"

Sterne Harris, who has never seen the stage before, takes to the boards for the first time in "Loot," a dark comedy by J.B. Priestley. Directed by Professor John Smith, the play is performed in the Black Box Theatre. Tickets are $10 for adults and $5 for students. For more information, contact the Stanford University Drama Department at 510-723-4321.

Two Robbed

The ITT students were robbed and left with a report card that read "F." The incident occurred at approximately 11 p.m. on the night of the incident. One of the students, a member of the computer science club, was walking home from a party when two men approached. The students were promised $1,000 if they could hack into the school's computer system. When the students refused, the men attacked and rob them. The computer system is protected by advanced security measures, and the students are now facing disciplinary action. For more information, contact the Stanford University Department of Computer Science at 510-723-4321.

The Whitfield Avenue gang have been arrested for their role in the theft. The students have been promised a full scholarship if they can hack into the school's computer system again. The students are now facing disciplinary action. For more information, contact the Stanford University Department of Computer Science at 510-723-4321.

Terrorists threaten "Loot"!

On Thursday, March 1, the debate club of the University of California, Los Angeles, held a mock trial on the topic "The Right to Bear Arms." The case was presented by Professor John Smith and his students, who argued for and against the amendment. The students were able to present a compelling case, and the jury was convinced. The trial is part of the university's efforts to promote critical thinking and public debate. For more information, contact the University of California, Los Angeles Department of Philosophy at 310-825-4321.

Further details are available on the Stanford University Department of Computer Science website at computer.stanford.edu. For more information, contact the Stanford University Department of Computer Science at 510-723-4321.

Politics

Alive and Well

By R. Michael Baker

The week that the Cook County Board of Supervisors met in Chicago was a time of great political activity. The city council was considering several major issues, including the city budget, the proposed school tax, and the potential for new developments in the city. In addition, there were several national issues that were receiving attention, such as the Vietnam War and the civil rights movement. The week was marked by intense debate and lively discussion, as politicians from all sides presented their views and arguments.

Would you believe that some politicians speak only once in a lifetime? This is the case with many politicians who have been active for a long time. Many of these politicians have been active in politics for many years, and they have been involved in many different issues. They have been fighting for the same cause for many years, and they have been active in many different ways. They have been fighting for the same cause for many years, and they have been active in many different ways. They have been fighting for the same cause for many years, and they have been active in many different ways.

Walter Payton died last weekend, but he will be remembered for years to come. Payton was a football player for the Chicago Bears, and he was a fan favorite. He was known for his skills on the field, and he was known for his personality off the field. Payton was a true American hero, and he will be remembered for years to come.

**Gebhart: Commuter Population Problem Is Real**

Gebhart, a commuter, believes that there is a real commuter population problem. He argues that the commuter problem is not being recognized and that it is just as serious as the student problem. Gebhart suggests that commuters are a lot more important to the university than the students, and that the commuter problem is being ignored. He believes that the commuter problem is being ignored because of the high cost of living in the area and the distance that commuters have to travel.

**Gordon: Not Just Woman's Dean**

Gordon, a dean, believes that women are not just women's deans. He argues that women have the same responsibilities and duties as men, and that they should be treated equally. He believes that women have been discriminated against in the past, and that they should be given the same opportunities as men.

Dear Editor,

I would like to comment and express my opinion on the recent issue of the Siemens Industry Review. I believe the article on the latest advancements in automation technology was both informative and timely. The implementation of intelligent control systems in various industries, such as manufacturing and energy, is crucial for maintaining efficiency and sustainability. The article highlighted the benefits of such technologies, particularly in reducing energy consumption and improving operational efficiency. I appreciate the emphasis on the integration of AI and machine learning in these systems, which will undoubtedly drive innovation in the industry. Overall, I found the article well-researched and well-presented. I look forward to future issues that continue to explore these important topics.

Sincerely,
[Your Name]
from here to there

by Francois Bédosse

Triumph Productions, is considered to
be one of the major, if not the major, motion picture production companies in Canada. The fact that it has
been endowed with a French Canadian director,
Michel Bodilin, has added a new dimension to its
output. Bodilin's first film, "Le Fil des Nids,"
was released in 1976 and was criticized for its
wastefulness and its portrayal of French
Canadian life. However, "Le Fil des Nids" was
successful at the box office and Bodilin has
since directed several other films, including
"Le Vieux," which was released in 1978 and
was a critical and commercial success.

Bodilin's latest film, "Le Vieux," is set in
a small village in Quebec and follows the
life of a elderly man who is confronted with
the realities of aging and death. The film is
a poignant and moving exploration of the
meaning of life and the passing of time. It
was released in 1980 and was met with
universal acclaim. Bodilin's next film, "Le
Vieux," is scheduled for release in 1982 and
is already generating a great deal of interest.

YOGA

Beginning Tuesday March 14th and Thursday March 16th from 6 to 9:30 a.m., six Yoga classes will be offered on campus at the Illinois Institute of Technology by the Yoga Program. The course will be held in
Hornisinn Hall, 2021 S. Federal St. For the exact room location check with the IHOG Director's Office.

Tuesday classes will meet from 6-9:30 p.m., 1st to 14th. Thursday classes will meet from 6-9:30 p.m., 16th to 30th.

Classes will be taught by David Melman who has taught for Study of Activity at the University of Chicago, 1967-1972 and for the university
continuing education program. The classes will include Asanas (Yoga Poses), Pranayama (Breath Control), Nirodha, Elements, Mudras, and Counting. Tuition is $50 for six classes.

To register, come or send tuition to the Craft & Idea Program Director, HSL Office, Hornisinn Hall Center, 2021 S. Federal St.

For Interimius cult Craft & Idea Program Director at CSH-NEO ext. 364 or 307.

Hawks Win 71-64

by Hyman Hoffman

The 13th annual Hawks-Nets game, which is a regular feature of the NBA season, took place at the packed arena of the Boston Garden. The game, which was filled with the usual excitement of an NBA game, saw the Hawks victory over the Nets.

The game was attended by a large crowd, and the atmosphere was electric. The Hawks dominated the game, winning with a score of 71-64.

Iceem Lack Coach

by Joseph M. Crilley

The Tech Hawks lost 8-6 against the Boston University Terriers. The game was filled with powerful throws and quick defensive plays. The Tech Hawks' loss marks the end of their season.

The game was held at the Boston University stadium, and it was a cold day. The Tech Hawks' players were unable to perform their best due to the cold weather.

Season Roundup

by John Watkins

The 1978-1979 NBA season was a memorable one for the Hawks. The team made it to the playoffs, and it was a season filled with excitement and thrill.

The Hawks started off the season with a bang, winning their first few games. However, they faced some challenges along the way, and they had to work hard to maintain their momentum.

In the end, the Hawks made it to the playoffs, where they faced tough competition. But they managed to hold on and make it to the final round. The team's hard work and dedication paid off, and they emerged victorious.

The Hawks are looking forward to the upcoming season, and they are already preparing for it. They are confident that they will continue their winning streak and make it to the playoffs again.

The Hawks are a team that is always ready to fight and win. They are a true representation of the spirit of the NBA. Their success is a testament to their hard work and dedication. The Hawks are a team that is always on the lookout for the next challenge.
